[SPA2 (2), v.]

Ornith.: *Passer domesticus* (*Pyrgita domestica*, Cuvier), the House Sparrow, a well-known bird, the constant follower of civilized man. It ranges over the British Islands and the Continent, into the North of Africa and Asia, and has been introduced into America and Australia. Sparrows are found even in crowded cities and in manufacturing towns, these differing only from the country birds in being dirtier, and, if possible, more daring. Mantle of male brown striped with black; head bluish-gray; two narrow bands, one white and the other rusty-yellow, on wings; cheeks grayish-white, front of neck black, under-parts light gray. From a high antiquity, their great fecundity, their attachment to their young, their levy on the farmer and market-gardener have been commented on by writers on ornithology, but opinions have long been divided on the subject of their alleged aervia to man in destroying insect pests. English farmers, however, settled the question to their own satisfaction, and in many villages sparrow-cubs exist, from the funds of which a small sum (about twopence a dozen) is paid for the destruction of these birds. Dr. Conca (*The English Sparrow in America*, 1885) says that these birds, introduced to keep down insect life, "have proved a failure, and are now generally regarded as a distinct curse." This opinion is now generally entertained in the United States, and the sparrows are also disliked for their combative disposition, and their tendency to drive off other birds. They frequent the cities and add an agreeable element of bird life to the streets. The name sparrow is also applied in this country to several of the Fringillide. [HEDGE-SPARROW, REED-SPARROW, TREE-SPARROW.]

sparrow-bill, s. [SPARABLE.]**sparrow-hawk, s.**

Ornith.: *Accipiter nisus*, common in Great Britain, extending across Europe, through Asia to Japan. The adult male is about twelve inches long, dark-brown on the upper surface, softening into gray as the bird grows old; the entire under-surface is rusty-brown, with bands of a darker shade. The female is about fifteen inches long, the upper surface nearly resembling that of male bird in ground-colour, but having many of the feathers white at the base; under surface grayish-white, with dark transverse bars. The Sparrow-hawk is very destructive to small quadrupeds and young birds, and is practically the only bird of prey the English game-preserved need fear. The hen lays four or five eggs irregularly blotched with brownish-crimson on a bluish-white ground.

Min.: A form of Marcasite (q. v.) formed by twin crystals which resemble the head of a *spear*.

spear-side, spear-half. A term occasionally used for the male line of a family, in contradistinction to spindle side or spindle half, the female line.

spear-staff, s. The handle of a *spear*.

spear-thistle, s.
Bot.: *Carduus* (formerly *Cnicus*) *lancoletus*, a very common thistle two to five feet high, with large purple flowers.

spear-wigeon, s.
Ornith.: *Mergus serrator*. (See extract under *SHELL-DUCK*, 2.)

spēar, v. t. & t. [SPEAR, s.]

A. Trans.: To pierce with, or as with a *spear*; to kill with, or as with a *spear*.

"Our diversion was therefore changed to *spearing* of salmon."—*Cook: Third Voyage, bk. v., ch. v.*

bēil, bōy; pōut, jōwī; cat, çell, chorus, çin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = çhan. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -bie, -dle &c. = bēl, dēl.

B. Intrans.: To shoot into a long stem; to spire (q. v.).

"Let them not lie lest they should spear, and the air dry and spoil the shoot."—*Mortimer: Husbandry.*

spēar-ēr, s. [Eng. spear; -er.]

1. One who spears.
2. A spearman.

spēar-man, *spere-man, s. [Eng. spear, and man.] One who is armed with a spear.

"Horsemen senenti and spere-men twel hundrede."—*Wycliffe: Deeds xxlii.*

spēar-mint, †spīre'-mint, s. [Eng. spire (?); mint; so named because its inflorescence is spiral in place of capitate. (*Prior.*)]

Bot.: A mint, *Mentha viridis*, with oblong, lanceolate, sub-acute, serrate leaves, and slender spikes of flowers. Found in watery places. It is distributed through almost all the temperate parts of the globe, being very common in many places. It has a very agreeable odor. It is used in cookery as a sauce, and yields an aromatic and carminative oil, Oil of Spear-mint.

spēar-wood, s. [Eng. spear, s., and wood.]

Bot.: (1) *Acacia doratoxyton*; (2) *Eucalyptus doratoxyton*.

spēar-wört, s. [Eng. spear, s., and wort.]

Bot.: (1) *Ranunculus Lingua*; (2) *R. Flammula*. Called also the Lesser Spearwort.

speat, s. [SPATE.]

spéc, s. [See def.] An abbreviation of speculation (q. v.).

"They said what a very generous thing it was of them to have taken up the case on spes, and to charge nothing at all for costs, unless they got 'em out of Mr. Pickwick."—*Dickens: Pickwick, ch. xxxiv.*

***species, s.** [SPECIES.]

spécht (ch as k), spéight (gh silent), s. [Ger. *specht* = the woodpecker; *lcl. speatr*; Dan. *spette*.] A woodpecker. (*Prov.*)

spéc-i-al (c as sh), *spec-iale, a. & s. [*Fr. special*, from Lat. *specialis* = belonging to a species, particular, from *species* = species (q. v.); Sp. & Port. *especial*; Ital. *speciale, speciale*. *Special* and *especial* are doublets.]

A. As adjective:

1. Pertaining to, constituting, or noting a species or sort.
2. Particular, peculiar; different from others; out of the common; extraordinary, uncommon.

"I never yet beheld that special face, Which I could fancy more than any other."—*Shakespeare: Taming of the Shrew, ll. 1.*

3. Designed for a particular purpose or occasion; affecting a particular person.

"O'Neal . . . was made denizen by a special act of parliament."—*Darwin: State of Ireland.*

4. Confined to some particular class or branch of subjects; devoted to a particular field or range; as, a special dictionary.

5. Chief in excellence.

"The king hath drawn
Of all the land together."—*Shakespeare: 1 Henry IV, iv. 4.*

B. As substantive:

1. A particular item; a special or particular person or thing.

"Fragments of long life annexed to some special of his service."—*Hammond: Sermons, vol. IV, ser. 3.*

2. A person or thing designed or appointed for a special purpose or occasion, as a train, a constable, a correspondent, an edition of a newspaper containing the latest news, &c.

"To number among its enterprising band of correspondents the famous special of the Daily News."—*O. Pebody: English Journalism, p. 147.*

3. In *special*, in *special*: Especially, particularly.

"For there be some in special,
In whom that all vertue dwelleth."—*Goose: C. A. (ProL)*

special-administration, s. Administration of the estate of a deceased person granted for a special purpose.

special-administrator, s.
Law: A person appointed to carry out special administration (q. v.).

special-agent, s. An agent authorized to transact only a particular business for his principal, as distinguished from a general agent.

special-bail, s. [BAIL, s.]

special-bailiff, s. [BAIFFIFF.]

special-bastard, s. A child born of parents before marriage, the parties afterwards intermarrying.

special-case, s.

Law: A statement of facts agreed to on behalf of two or more litigants for the opinion of a court of justice as to the law bearing on the facts so stated. In Scots law, in civil jury cases, a special case differs from a special verdict only in this that the special verdict is returned by the jury, whereas the special case is adjusted by the parties themselves, or by their counsel, and sets forth the special facts on which they are agreed without the evidence.

special-coinage, s. A term applied to a word, coined for the occasion by an author, but which has never been incorporated into the language.

special-commission, s.

Law: An extraordinary commission of oyer and terminer and gaol delivery issued by the Crown to the judges when it is necessary that offences should be immediately tried and punished.

special-constable, s. [CONSTABLE.]

special-contract, s. [CONTRACT OF SPECIALITY.]

special-correspondent, s. [CORRESPONDENT, s.]

special-damage, s.

Law: A particular loss flowing from an act complained of, in addition to the wrongful nature of the act itself.

special-demurrer, s. [DEMURRER.]

special-edition, s. [SPECIAL, B. 2.]

special-endorsement, s. [ENDORSEMENT, s., ll. 2.]

special-impairance, s.

Law: One in which there is a saving of all exceptions to the writ or count, or of all exceptions whatever.

special-injunctions, s. pl.

Law: Those prohibitory writs or interdicts against acts of parties, such as waste, nuisance, piracy, &c.

special-intention, s. The same as INTENTION, s., ll. 2. (Used also, as in the example, by High Anglicans.)

"In the Common Service a 'special intention' was made known by the introduction of words implying that the sacrifice was received in memory of the dead, with the added prayer for everlasting rest and perpetual light. And nobody nowadays seriously protests against what would have been denounced at one time as reviving purgatory."—*Echo, Nov. 30, 1895.*

special-jury, s. [JURY.]

special-licence, s. [MARRIAGE-LICENCE, l.]

special-occupancy, s. [OCCUPANCY.]

special-paper, s.

Law: A list kept in court for putting down denunciations, &c., to be argued.

special-plea, s.

Law: A plea in bar in a criminal matter, not being a plea of the general issue. Such pleas are of four kinds: a former acquittal, a former conviction, a former attainder, or a pardon.

special-pleader, s.

Law: A member of one of the Inns of Court, whose occupation it is to give verbal or written opinions on matters submitted to him, and to draw pleadings, civil and criminal, and such practical proceedings as may be out of the usual course.

special-pleading, s.

I. Ord. Lang.: A popular term for the specious but unsound or unfair argumentation of one whose aim is victory rather than truth.

II. Law:

1. The allegation of special or new matter as distinguished from a direct denial of matter previously alleged on the other side.

2. The science of pleading, which, until the passing of an Act in 1852, was a distinct branch of the practice of English law, having the merit of developing the points in controversy with great preciseness. Its strictness

and subtlety were frequently a subject of complaint, and one of the objects of the Act was to relax and simplify its rules.

special-property, s.

Law: A qualified or limited property, as the property which a man acquires in wild animals by reclaiming them.

special-tail, s.

Law: Where a gift is restrained to certain heirs of the donee's body, and does not descend to the heirs in general.

special-trust, s.

Law: A trust which names some object which the trustee is actively to carry out.

special-trustee, s.

Law: A trustee charged with a special trust (q. v.).

special-verdict, s.

Law: A verdict by which the jury find the facts and state them as proved, but leave the law to be determined by the court.

"Sometimes, if there arises in the case any difficult matter of law, the jury, for the sake of better information, and to avoid the danger of having their verdict disregarded, will find a special verdict, stating the naked facts, as they find them to be proved, and praying the advice of the court thereon. . . . Another method of finding a species of special verdict is when the jury find a verdict generally for the plaintiff, but specify nevertheless to the opinion of the judge or the court above, on a special issue stated by the counsel on both sides with regard to a matter of law."—*Blackstone: Comment., bk. III, ch. 13.*

***special-vert, s.**

Old Law: (See extract.)

"Special-vert, which may be over or nether-vert, or both if it bears fruit, for nothing is accounted special-vert but such which beareth fruit to feed the deer."—*Nelson: Laws Conc. Gorne, p. 231.*

spéc-i-al-izm (c as sh), s. [Eng. *special*; -ism.] Devotion to a special or particular branch of a profession. (Used at first, and still principally, of particular branches of medicine.)

"Specialisms, doubtless, like other good things, are liable to abuse."—*Cobbett: Human Parasites, p. 84.*

spéc-i-al-ist (c as sh), s. [Eng. *special*; -ist.] One who devotes himself to a special or particular branch of a profession, art, or science; one who has studied and acquired a special knowledge of or skill in some particular subject.

"It is most desirable that specialists should, from time to time, overstep the narrow limits of their own subject, and judge and criticize the work of specialists in cognate branches."—*Athenaeum, Oct. 14, 1882.*

spéc-i-al-i-tý (c as sh), s. [Fr. *spécialité*.]

1. A particular matter or point; a speciality.

"What we term natural selection is the epitome of the improvements acquired by specialization in the process of adaptation."—*Oscar Schmidt: Doctrine of Descent, p. 150.*

2. That property by which a person or thing is specially characterized; that branch of a profession, art, or science to which one has specially devoted himself, and in which he has acquired a special knowledge.

3. A quality or attribute peculiar to a species.

spéc-i-al-i-zā-tion (c as sh), s. [Eng. *specialize*(e); -ation.]

I. Ord. Lang.: The act of specializing; the act of devoting to a particular use or function; the act of devoting one's self to a special or particular branch of study.

"Extreme enthusiasm for specialization in study has never pervaded this country, any more than it has England, though for different reasons."—*Scribner's Magazine, Dec., 1893, p. 226.*

II. Biol.: The adaptation of a particular organ for the performance of a particular function. Animals of low organization are less specialized than those higher in the scale of being, and are older in geological date. As they rise, organs which were originally used to perform several functions become more and more limited in their action, and consequently carry it out more effectively. Many causes have contributed to this end, one of the most potent being natural selection.

spéc-i-al-ize (c as sh), v. t. & i. [Eng. *specialize*; -ize.]

A. Transitive:

1. To mention specially; to specify.
2. To mention a specific use or purpose to; to devote or apply to a specific use or function.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fūll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

B. Intrans. To devote one's self to a special or particular branch of study.

spēc'ial-lī (c as sh), adv. [Eng. *special*; -ly.]

1. In an especial manner; particularly, especially.

"Persons who were not *specially* interested in a public bill very seldom petitioned Parliament."—*Maxwell's Hist. Eng.*, ch. xix.

2. For a special or particular purpose: as, a meeting *specially* summoned.

spēc'ial-tī (c as sh), s. [The same word as *speciality* (q.v.).]

I. Ordinary Language:

* 1. A particular point, matter, or thing; a particular.

"The *specialties* wherof do so forth in the first chapter of this booke appere."—*Sir T. More's Workes*, p. 105.

2. A special term or article in a contract.

3. That property by which a person or thing is *specially* characterized; that to which a person devotes himself, and in which he is *specially* versed; *speciality*.

II. Law: A special contract; an obligation or bond; the evidence of a debt by deed or instrument; such a debt is called a debt by *specialty* in distinction from simple contract.

specialty-debts, s. pl.

Law: Bonds, mortgages, debts secured by writing under seal.

spē-cis (c as sh), s. [A pseudo sing. from *species* = money paid by tale, by confusion with *Lat. specie*, abl. sing. of *species*, as, paid *in specie* = in visible coin.] Gold, silver, &c., coined and circulated as a medium of commerce and exchange; hard money, coin; in contradistinction to paper-money, as bank-notes, bills, &c.

specie payments, s. pl. The act or practice of discharging monetary obligations in coin only, if creditors so demand.

spē-cīōs (c as sh), s. [Lat. = a look, appearance, kind, sort, from *specio* = to look, to see; Sp. & Port. *especie*; Ital. *specie, specie*.]

I. Ordinary Language:

* 1. Visible or sensible representation; appearance to the senses or mind; sensible or intellectual representation; an image.

"Those pretty mirrors . . . transmit the *species* of a vast excellency."—*Sp. Taylor's Sermons*, vol. II, ser. 5.

* 2. A public representation, spectacle, or exhibition; a show. (*Bacon*.)

3. A kind, a sort, a variety, a description: as, a *species* of wit, a *species* of cunning, &c.

* 4. Metal coined into a circulating medium; coin, specie. [In Low Lat. *species*, from having the meaning of wares in general, came to mean valuables, precious goods, and the like.]

"Rome possessed a much greater proportion of the circulating *species* of its time than any European city."—*Arbutnot: On Coins*.

II. Technically:

1. **Biology:** A somewhat ambiguous term used to denote a limited group of organisms, resembling each other, and capable of reproducing similar organisms, animal or vegetable, as the case may be. A *species* is defined by Haeckel (*Gen. Morphologie*, II, 359) as "the sum of all cycles of reproduction which, under similar conditions of existence, exhibit similar forms." Linnaeus held that all *species* were the direct descendants from and had the characters of primevally created forms (*Totidem naturam species quot in principio formæ sunt creatae*), and in this he was followed by those who accepted the first chapter of Genesis in a strictly literal sense. Buffon and Cuvier, leaving the question of origin on one side, held the distinguishing marks of a *species* to be similarity and capability of reproduction. But beardless varieties and races in various *species* of animals and plants, dimorphism, and in others trimorphism, exists, so that close similarity cannot be taken as a criterion, and the value attached to external resemblances varies in the case of different observers. At a later date was added the physiological definition that all the individuals of every *species* were capable of producing fertile offspring, by intercrossing, whereas sexual intercourse between different *species* produced only sterile offspring or was actually infertile; and, although subject to exceptions, this definition is generally true. The descent of any given

series of individuals from a single pair, or from pairs exactly similar to each other, is in no case capable of proof. Darwin, in his *Origin of Species*, says: "I look at the term *species* as one arbitrarily given for the sake of convenience to a set of individuals closely resembling each other, and that it does not essentially differ from the term variety, which is given to less distinct and more fluctuating forms" (ch. II). [DARWINISM.] That book popularized in England the idea of the mutability of *species*, the chief factor in which Darwin believed to be Natural Selection, though he afterwards modified his views to some extent as to its importance. The latest theory of the origin of *species* is that of Physiological Selection, propounded by Mr. W. G. J. Romanes, F.R.S., who holds that many *species* have arisen on account of variations in the reproductive system, leading to some infertility with parent forms—mutual sterility being thus regarded as one of the conditions, and not as one of the consequences of specific differentiation. (*Journal Linn. Soc., Zool.*, July, 1886; see also Oscar Schmidt: *Doctrine of Descent*, ch. v.)

2. **Civil Law:** The form or shape given to materials; form, figure.

3. **Logic:** A predicable that expresses the whole essence of its subject in so far as any common term can express it. The names *species* and *genus* are merely relative, and the same common term may, in one case, be the *species* which is predicated of an individual, and in another case the individual of which a *species* is predicated. Thus, the individual, George, belongs to the logical *species* man, while man is an individual of the logical *species* animal. [SPECIFIC-DIFFERENCE.]

"The name of a *species* is a more extensive (i.e., comprehensive) but less full and complete term than that of an individual. . . since the *species* may be predicated of each of those."—*Whately: Logic*, bk. II, ch. v, § 8.

4. Medicine:

(1) A component part of a compound medicine; a simple.

(2) A compound powder of any kind.

spē-cif'icō, *spē-cif'icō, a. & s. [Fr. *spécifique*, from *Lat. specificus*, from *species* = *species*, and *facio* = to make; Sp. *especifico*; Ital. *specifico*.]

A. As adjective:

I. Ordinary Language:

1. Pertaining to, characterizing, or constituting a *species*; possessing the peculiar property or properties of a thing which constitute its *species*, and distinguish it from other things: as, the *specific* qualities of a plant, the *specific* difference between virtue and vice, &c.

2. Tending or intended to specify or particularize; definite, precise: as, a *specific* statement.

3. Specified or particularized; definite: as, a *specific* sum.

II. Technically:

1. **Law:** Having a certain form or designation; observing a certain form; precise.

2. **Med.:** Acting upon some particular organ more than upon others; possessed of a peculiar efficacy in the cure of a particular disease. [B. 2.]

B. As substantive:

1. **Ord. Lang.:** Something certain to effect the purpose for which it is used; an unfailing agent or remedy.

2. **Med.:** A remedy which possesses a peculiar efficacy in the prevention or cure of a particular disease; an unfailing remedy.

"The *specifics* usually prescribed in such cases."—*Wileman's Surgery*, bk. I, ch. v.

specific area, s.

Biol.: The space over which any individual is distributed.

† **specific-centres, s. pl.**

Biol.: The points at which particular *species* are supposed to have been created, according to those who believe that each has originated from a common stock. (Woodward.)

specific-character, s. [CHARACTER, s., B. 2.]

specific-difference, s.

Logic: (See extract.)

"*Specific-difference* is that primary attribute which distinguishes each *species* from one another, while they stand ranked under the same general nature or

genus. Though wine differs from the other liquids, in that it is the juice of a certain fruit, yet this is but a general or generic difference: for it does not distinguish wine from cyder or perry; the *specific difference* of wine therefore is its pressure from the grape."—*Watts: Logic*.

specific-gravity, s. [GRAVITY.]

specific-heat, s. [HEAT, s.]

specific-legacy, s.

Law: A bequest of a particular thing, as of a particular piece of furniture, specified and distinguished from all others.

specific-name, s.

Nat. Science: The scientific name by which one *species* is distinguished from another. Linnaeus introduced the binomial system of nomenclature, in which the first word is the generic, and the second the specific name. Thus the lion and the wild cat both belong to the genus *Felis*, but the specific name of the first is *leo*, and of the second *caus*; the potato and the egg-plant both belong to the genus *Solanum*, but the specific name of the first is *tuberosum*, and of the second *esculentum*. In the trinomial system, sometimes adopted owing to the difficulty of distinguishing between varieties and *species*, the second name is specific and the third varietal: as, *Sciurus* (indicating the genus) *canticeps* (the *species*) *pygæythrus* (the variety).

spē-cif'icō-al, *spē-cif'icō-al, a. [Eng. *specific*; -al.] The same as SPECIFIC, A. (q.v.)

spē-cif'icō-al-īy, adv. [Eng. *specifically*; -ly.] In a specific manner; according to the nature or character of the *species*; definitely, particularly.

"Here the intended punishment is explained *specifically*."—*Warburton: Divine Legislation*, bk. IV, § 6.

spē-cif'icō-al-nēss, s. [Eng. *specifically*; -ness.] The quality or state of being specific.

***spē-cif'icō-cāt, n.f.** [Lat. *specificatus*, pa. par. of *specifico*, from *species* = *species*, and *facio* = to make.] To mark, note, show, or designate the *species* or the distinguishing particulars of a thing; to specify.

"Any particular, *specificating*, concurrent, non-impetrate act of the divine special providence."—*Hale: Orig. of Mankind*, p. 40.

spē-cif'icō-cā-tion, s. [Fr.]

I. Ordinary Language:

* 1. The act of specifying or determining by a mark or limit; notation of limits.

"This *specification* or limitation of the question, hinders the disputers from wandering away from the precise point of enquiry."—*Watts*.

2. The declaration or designation of particulars; particular mention.

"A *specification* of a few improvements will add but little to the sum of my transgressions."—*Anon: University of Oxford*.

3. A particular and detailed account; *specification*, a statement of particulars describing the dimensions, peculiarities, materials, &c., of a work to be executed, as in architecture, civil engineering, building, drainage, or the like. A person wishing to take out a patent for any invention is required to furnish a *specification* of his invention, in which its nature must be particularly described.

4. An article, item, or particular specified.

* 5. Specific character.

"The action gives goodness to the plant, and a *specification* to the fruit."—*Sp. Hall: Christ Mystical*.

II. Scots Law: The formation of a new property from materials belonging to another.

spē-cif'icō-nēss, s. [Eng. *specific*; -ness.] The quality or state of being specific.

spē-cif'icō-fī, *spec-ī-fīe, n.f. [Fr. *spécifier*, from *Lat. specifico*, only found in the pa. par. *specificatus*, from *specificus* = specific (q.v.); Sp. & Port. *especificar*; Ital. *specificare*.] To mention or name specifically or distinctively; to designate in words, so as to distinguish from anything else.

"The particulars are *specified* at the conclusion."—*Pope: Homer; Odyssey*. (Postac.)

spē-cif'icō-mēn, s. [Lat., from *specio* = to see, to look at.]

1. A part or small portion of anything intended to exhibit or illustrate the kind or nature of the whole or of something not exhibited; a sample.

"From the fragments picks His specimen, if happily interveid With sparkling mineral."—*Wordsworth: Excursion*, bk. III.

bōl, bōy; pōut, jōwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f -cian, -tian = shan, -tion, -sion = shūn; -çion, -çion = zhūn, -cious, -tious, -sious = shūs, -hle, -dle, &c. = bēl, del.

2. An illustration, an example, a sample, an instance.
 "They were perhaps the two most remarkable specimens that the world could show of perverse absurdity."—*Macaulay: Hist. Eng.*, ch. xvi.
 "It is sometimes used adjectively: as, a specimen copy, &c.

spē-cī-ōl'-ō-ġy (c as sh), s. [Eng. *spec(ies)*; suff. *-ology*.] The doctrine of species.

***spē-ōi-ōs'-ī-tŷ** (c as sh), s. [Eng. *specious*; *-ity*.]
 1. A beautiful scene, spectacle, or show; beauty.
 2. The quality or state of being specious; speciousness; a specious show.
 "So great a glory as all the *speciosities* of the world could not equalise."—*H. More: On Godliness*, bk. III, ch. vi, § 3.

spē-cious, a. [Fr. *spécieux*, from Lat. *speciosus* = beautiful, from *specio* = to see.]
 1. Beautiful; pleasing to the eye; fair, showy.
 "As sweet to the smell as *speciosus* to the sight."—*Failler: Playah Night*, bk. III, ch. II, § 3.
 2. Apparently right; superficially fair, just, or correct; plausible; appearing well at first sight.
 "It was a sin for which *specious* names and proverbs might be found."—*Macaulay: Hist. Eng.*, ch. xiv.
 3. Making a fair outward show.
 "I propose next to describe, the *specious* or decent man. By the decent man, I mean him who governs all his actions by appearances."—*Gilpin: Sermons*, vol. I, ser. 8.

spē-cious-ly, adv. [Eng. *speciosus*; *-ly*.] In a specious manner; with a fair show or appearance; plausibly; with show of right or justice.
 "What may be said *speciosus* enough to persuade."—*Bolingbroke: On History*, let. 3.

spē-cious-nēss, a. [Eng. *speciosus*; *-ness*.] The quality or state of being specious; fair or plausible appearance; plausibility.

speck (1), *specke, *spekko, s. [A.S. *specca* = a spot, mark. From the same root as *spew* (q.v.); cf. Low Ger. *spaken* = to spit with wet; *spatig* = spotted with wet.]
 1. A spot, a stain, a blemish; a small place or anything which is discoloured with some foreign matter or substance, or is of a colour different to that of the main body.
 "The bottom consisting of grey sand, with black specks."—*Atton: Voyages*, bk. II, ch. vii.
 2. A minute particle or patch.
 "First a speck, and then a venture,
 Till the air is dark with pinpoints."
Longfellow: Hiawatha, xiv.

speck (2), s. [Dut. *spek* = fat.]
 1. Blubber; the fat of whales and other mammals.
 2. Bacon.

speck-block, s.
Naut.: A block used in stripping the blubber of a whale. Through it the speck-fall, a purchase, is rove, the blocks being made fast to the blubber-ply.

speck-falls, s. pl.
Naut.: The ropes of the speck-block (q.v.).

spēck, v. t. [SPECK, s.] To spot; to mark or stain, as with spots or drops.
 "Of white, or blue, or speck'd with gold."
Gay: To a Lady, Ep. 13.

spēck-kle, s. [A dimn. of *speck* (1), s. (q.v.).] A little speck or spot in anything of a different substance or colour to that of the thing itself.
 "An huge great serpent all with speckles side."
Spenser: Virgil's Gnat.

spēck-kle, v. t. [SPECKLE, s.] To mark with speckles or small spots of a different colour to that of the ground or surface.

spēck-kled (le as el), pa. par. & a. [SPECKLE, v.]
 A. *As pa. par.*: (See the verb).
 B. *As adjective*:
 I. *Ord. Lang.*: Marked with specks or speckles; variegated with spots of a different colour to that of the ground or surface.
 "Turning thence her speckled talle advannt."

spēc'-ta-cle, *spek-ta-kel, s. [Fr. *spectacle*, from Lat. *spectaculum* = a show, from *specio* = to see, from *specium*, sup. of *specio* = to see; Sp. *espectaculo*; Ital. *spettacolo*.]
 I. *Literally*:
 1. A show; a gazing-stock; something exhibited to the view as eminently remarkable or unusual and worthy of special notice; a pageant, a pageant, a gorgeous or splendid show, an exhibition attractive to the eye.
 "We are made a *spectacle* unto the world, and to angels and to men."—*I. Corinth.* iv. 9.
 2. Anything seen; a sight, a prospect.
 "Neerwanden was a *spectacle* at which the oldest soldiers stood aghast."—*Macaulay: Hist. Eng.*, ch. xx.
 3. A glass through which to view objects.
 "Poverty a *speckel* is, as thinketh me,
 Though which he may his very friends see."
Chaucer: C. T., 6,786.
 4. (Pl.) A familiar and invaluable optical instrument used to assist or correct defects of vision. They are frequently also called *eye-glasses*, though properly this term is applied to spectacles which are merely fixed on the nose. *Spectacles* consist of two oval or circular lenses mounted in a light metal frame, composed of the bows, bridge, and sides or temples. The frame is so constructed as to rest on and adhere to the nose and temples, and keep the lenses in their proper position. *Short sight* is the habitual accommodation of the eyes for a distance less than that of ordinary vision, so that persons affected in this way only see very near objects distinctly. Its usual cause is a too great convexity of the cornea or of the crystalline lens; the eye being too convergent, the focus, in place of forming on the retina, is formed in front, so that the image is indistinct. It may be remedied by means of diverging glasses, which, in making the rays deviate from their common axis, throw the focus further back, and cause the image to be formed on the retina. *Long sight* is the contrary of short sight: the eye can see distant objects very well, but cannot distinguish those which are very near. The eye is not sufficiently convergent, and hence the image of objects is formed beyond the retina; but if the objects are removed further off, the image approaches the retina, and when they are at a suitable distance is exactly formed upon it, so that the objects are clearly seen. Long sight is corrected by means of converging lenses. These glasses bring the rays together before their entrance into the eye, and therefore, if the converging power is properly chosen, the image will be formed exactly

on the retina. Generally speaking, numbers are engraved on these glasses, which express their focal length in inches. The spectacles must be so chosen that they are close to the eye, and that they make the distance of distinct vision ten or twelve inches. (Ganot.)
Astigmatic vision is a defect of the eyes in which the focus of the crystalline lens is different in different azimuths. Thus, if vision is directed to a figure, as in the margin, in strong black lines and on a larger scale, some of the lines may be seen sharply defined, while others are blurred. These defects can be remedied by spectacles in which the focus differs in different azimuths, and extreme cases have been known in which cylindrical lenses (i.e. lenses with no focus at all in one direction, but a strong focus in some other—a segment of a cylinder instead of a sphere) have been required. Astigmatism more than any other defect requires thorough study by an oculist, as the focus of the eyes is apt to be normal in some directions, and this masks it, while yet the vain effort to define the object in all parts causes constant distress and pain. There are also tinted, gray, or smoke-gray spectacles to protect sensitive eyes from too much light. Mere weakness of the eyes is not benefited by spectacles, unless by the protective kind. Wire-gauze spectacles are used to exclude dust and ashes. Divided spectacles have each lens composed of two semicircles of different focal length united; one half for looking at distant objects, the other for examining things near the eye. (GOOGLES, PERISCOPE-SPECTACLES.)

II. *Figuratively*:
 1. The eye; the organ of vision.
 "Bid mine eyes be packing with my heart,
 And called them blind and dusky *specacles*
 For losing ken of Albion's wished coast."
Shakspeare: 2 Henry VI., III. 1.
 2. (Pl.) Anything which assists or aids the intellectual vision.
 "Shakspeare was naturally learned; he needed not the *spectacles* of books to read nature; he looked inward and found her there."—*Dryden: On Dramatick Poesy*.

spéc-trōm-ě-tēr, s. [Eng. *spectrum*, and *meter*.]

Optics: This word is used in somewhat different though allied senses. It has been applied to a micrometer or other apparatus applied to the eye-piece of a spectroscope for measuring the position of the lines. But it is now very generally used as a substitute for spectroscope, the word being applied to that better class of instruments which are fitted

up for measuring and determining with great exactness the position of the lines in the spectra examined, and the qualities of prisms as regards refractive and dispersive power.

spéo-trō-scōpe, s. [Lat. *spectrum*, and Gr. *σκοπέω* (skopéo) = to see.]

Optics: An instrument for observing spectra, or for spectrum analysis. With a single glass prism, the few most prominent lines in a solar spectrum may be seen, by using a narrow slit to admit the light, which was the first great improvement made upon Newton's experiment, since a hole or wide slit gives confusion of effect. The second great improvement was to place a collimating lens behind the slit at its focal distance, whereby all the rays from the slit become a parallel bundle before passing through the prism. Finally, a small telescope was mounted behind the prism, to magnify and define the image thus obtained. The whole arranged on a table, with means of adjusting the collimating and eye-tubes at the proper angles with the prism, forms the ordinary single-prism Spectroscope. Further prisms may be added to increase the dispersion, and as many as eleven have been used, but it is more usual to

SIMPLE FORM OF SPECTROSCOPE.

employ half the total number, and having sent the rays once through their lower portion, to reflect them back again through the upper ends, thus using each prism twice. Arrangements are often added for throwing the image of a micrometer scale upon the spectrum [SPECTROMETER], or a reflecting prism may be placed over half of the slit to reflect the solar spectrum into the instrument for comparison with the one under observation. It is in this way that spectra are compared with the solar lines, which are carefully mapped, and form the standard of reference. By combining prisms of different refractive and dispersive powers, a strong spectrum may be obtained without deflection. Such prisms may be contained in quite a small tube with slit and lens, and are called Direct-vision Spectroscopes, which are much used for microscopic observation. Instruments specially fitted for the purpose are called Star Spectroscopes, and there are also special Sun Spectroscopes, each being necessarily different in practical details from ordinary or Chemical Spectroscopes. Of late years, it has become very usual to employ the spectra from diffraction-gratings instead of prisms. The higher-order spectra thus produced are very pure, and have the advantage of giving the lines in the true position due to their relative wave-lengths alone, whilst prisms compress some groups of lines, and extend others, according to the peculiar dispersion of the glass. Spectroscopes thus constructed are called Grating Spectroscopes.

spéc-trō-scōp-ic, **spéc-trō-scōp-ic-al**, a. [Eng. *spectroscopy* (e); -ic, -ical.] Of or pertaining to the spectroscope or spectroscopy.

"Huggins has applied *spectroscopic* observation to the determining of the proper motion of the heavenly bodies."—*Knigh: Dict. Mechanics*, s.v. *spectroscopy*.

spéc-trō-scōp-ic-al-ly, adv. [Eng. *spectroscopy*; -ly.] In a spectroscopic manner; by means of the spectroscope.

spéc-trōs-cō-pist, s. [Eng. *spectroscopy* (e); -ist.] One who uses the spectroscope; one who is skilled in spectroscopy.

spéc-trōs-cō-pý, s. [Eng. *spectroscopy* (e); -y.] That branch of science which is concerned with the use of the spectroscope and with spectral analysis.

spéc-trūm (pl. ***spéc-trūmş**, **spéc-trā**), s. [Lat. = an appearance, image, apparition, spectre (q.v).]

* *1. Ord. Lang.*: A spectre.

"Luvator puts solitariness a main cause of *moab spectrums* or apparitions."—*Burton: Anat. of Melancholia*, pt. II., § 4, p. 2.

* *2. Optics*: The coloured image or images produced when the rays from any source of light are decomposed or dispersed by refraction through a prism. It has been proved that whiteness is simply a totality of effect produced by the simultaneous effects of many colours falling at once upon the retina. It has been shown [REFRACTION] how a beam of light is deflected on meeting at any inclination the surface of a denser medium, and it is obvious that by using a prism with two inclined surfaces, the beam may be permanently deflected. It is found that each different colour, representing a different length of wave, is differently refracted by the prism, or has its own special index of refraction; hence, the prism separates or spreads out, in order, according to their refrangibility, all the different colours of which the beam is composed. This appearance is the Spectrum of that particular light. Solids or liquids heated to incandescence—as the particles of soot in a candle-flame—always yield an unbroken band of colours shading into one another; this is called a continuous spectrum. Incandescent gases generally yield lines or bands only, and this is a line or banded spectrum. When portions of what would have been a continuous spectrum are intercepted or cut out by an intervening medium, this is called an absorption spectrum. Besides the waves of such a length as cause visual effects, there are many more beyond the red at one end of the spectrum and the violet at the other, which produce powerful chemical and heating effects. This portion is sometimes called the Invisible Spectrum, sometimes described as the Ultra-red or Ultra-violet spectrum. Its length greatly exceeds that of the visible spectrum, and it is found to comprise lines and bands precisely analogous to those occurring in the luminous portion. [SPECTRUM-ANALYSIS.]

spectrum-analysis, s.

Physics & Chem.: The determination of the chemical composition, the physical condition, or both, of any body by the Spectrum (q.v.) of the light which it emits or suffers to pass through it, under certain conditions. For such determinations an instrument is used called the Spectroscope (q.v.), which employs the light passing through a very narrow slit, and, by using more prisms than one, disperses or separates the colours a great deal more than one prism alone can do. The human eye is totally unable to judge of the real component colours of any light presented to it; not only does a mixture of all colours appear white, but so do many simple pairs of colours; and, similarly, two apparently similar shades of colour may be quite differently constituted, the one being perhaps a pure colour, while the other is really a compound. The prism never errs, but rigidly sorts out any light presented to it into all the separate wave-lengths of which it is composed, each one having its own invariable place in the spectrum of a beam of ideal white light.

A vast mass of commercial spectrum analysis consists of the study of simple Absorption spectra. Most of the colour we see around us is really of the nature of a shadow; the coloured body absorbs amongst its molecules many of the constituent rays of the white light which falls upon it, and the colour we see consists of the remainder. It is the same with coloured transparent bodies; a red glass does not turn all the light into red, but simply stops or absorbs all the rays except those which make up the red. This is shown by spectrum analysis of the light which has passed through any such body, or been reflected from it; various dark bands are cut out of the white-light spectrum. If glass cells are filled with various coloured fluids, and interposed between the slit of the spectroscope and some source of light which gives a complete continuous spectrum, the various bands cut out are observed. These bands are invariable for the same substance, in the same state—i.e., of dilution or otherwise—and hence we have an analysis which is very powerful as regards adulteration. Thus, an alcoholic solution with a tincture of logwood, &c., can be made up so as to precisely imitate to the eye the colour of port wine. But the spectroscope cannot be so cheated; the spectrum of port wine cannot be imitated by anything else; though the visual total

may appear the same, the prism will sort out the imitation with different constituents. It has been found that up to a certain age even the year of the vintage can be thus determined. So, again, healthy blood gives a quite different absorption spectrum from blood poisoned by carbonic oxide. The prism is thus used daily to test the validity of many commercial products. It should be observed that numerous apparently clear and colourless substances show very strong absorption bands, e.g., solutions of didymium.

Analysis of the rays emitted by luminous bodies throws light upon both their chemical constitution and physical condition. A solid or liquid substance heated to a high temperature gives a continuous spectrum. [SPECTRUM.] It first becomes red, representing the slowest vibrations as taken up by its molecules. Gradually the yellow, green, and, finally, blue rays are added as quicker and more energetic vibrations are imparted, till it becomes a white or even bluish colour, but the spectrum is always continuous so far as it goes. Therefore a continuous spectrum is presumptive proof of the body being in a solid or liquid state. On the other hand, every substance heated sufficiently to become luminous as gas or vapour, when at a low pressure, gives a spectrum of bright lines or bands only. It is this localization which causes the colour of the flame; and the spectrum of each of the known elements is so well recognized, that new lines are proofs of the presence of some unknown chemical element, several of which have been discovered in this manner. Thus the spectrum of the vapour of a substance, when ignited in the electric arc or in a vacuum tube, is another searching method of chemical analysis. It is found, however, that as the density is increased, the lines in the spectrum of a luminous gas are widened or thickened. Gradually these widened bands approach each other, until, at a great pressure, the spectrum becomes continuous. This is intelligible on the hypothesis that in rarefied gases the molecules are free to give their own peculiar periods of vibration, but that as they are crowded together they are hampered, and the vibrations and encounters modified into other periods, until at last the complex vibrations of a solid are produced, and give the complete or continuous spectrum. Thus the nature of the spectrum—say of a gaseous nebula—gives us information not only of the composition, but of the physical condition of the gas.

Another wide department of research was opened by the study of the spectrum of the sun. To Newton this appeared continuous; but when it was made pure by more dispersion and the use of a slit, it was found to be crossed by countless dark lines, thousands of which have been mapped. On the face of it, these appeared to show absorption of some kind; while the foundation or continuous spectrum must be due to either incandescent solid, liquid, or at least very dense gaseous matter. It was soon discovered that two of the most distinct dark lines (called D lines) across the yellow portion were exactly coincident with the two bright yellow lines given by incandescent sodium vapour; and Prof. Stokes, in 1852, pointed out the probable cause of this, in the molecules taking up or absorbing all vibrations of their own peculiar period which reach them, just as a tuning-fork will respond to its own note sung to it. Kirchhoff verified this, proving experimentally that sodium flame interposed before the slit of a bright solar spectrum, darkened the D lines. Most of the other dark lines of the solar spectrum were afterwards identified with the bright lines of the vapours of various elements; and thus was proved the fact that the incandescent photosphere of the sun is surrounded by a highly-heated, but still by comparison cooler, atmosphere containing hydrogen, sodium, iron, and many other substances. Subsequently, by suitable arrangements, the bright lines of this external atmosphere were obtained at the edge of the sun's disc. The chemistry and condition of the stars were rapidly studied in the same way, with the result of discovering very interesting resemblances, and in many cases still more interesting and marked differences between their condition and that of the sun. In this way, for instance, when a great increase in the brilliancy of the variable star γ Coronæ was observed in May, 1886, the spectroscope showed its usual absorption

spectrum to be crossed by a few bright lines, as in the figure; and thus the phenomenon was clearly traced to some almost inconceivable outburst of glowing hydrogen, as was

SPECTRUM OF γ CORONÆ.

also the "new star" which appeared in Cynos in 1876. In another star there is an abundant quantity of the metal tellurium, which cannot be traced in our sun, and is only present in exceedingly small quantities in our earth.

Still further: the apparent colour or wavelength of any given ray apparently depends simply upon the rate at which the ethereal waves beat upon the retina. If the source of light be approaching rapidly enough, this rate will obviously be increased, the effect of which will be to make that ray of apparently higher refrangibility, or nearer a blue colour. In sound we get exactly the same effect, if a whistle sounds while two trains are approaching; the pitch rises till the whistle is opposite a hearer in the other train, and then as rapidly falls as it recedes. Now it is found that well-known groups of lines are thus shifted in the case of certain stars; and thus it is absolutely determined that they are approaching or receding from the solar system at the rate of so many miles per second. In exactly the same way the speed of up-rushes and down-rushes of the glowing hydrogen during solar storms has been determined.

Spectrum analysis has finally led to a theory, or speculation of capital importance, concerning the so-called "elements." The spectra of compounds are as characteristic as those of what are called elements; but as the temperature of the luminous vapour is increased, this spectrum breaks up, as it were, into the lines of the elements themselves. Where the vapour is known to be "dissociated," as it is termed, at a certain temperature, there is simultaneously a marked and sudden change in its spectrum. Now it is found that even at temperatures produced in our laboratories the spectra of the so-called elements themselves go through analogous changes as the temperature is raised, giving apparently similar reason to believe that they then break up into still simpler elements. In the far greater heat of the sun's chromosphere there is much more evidence of this process going on, and there is one strong line in particular which has never been identified with any element known on earth. It further appears, that unless we are to suppose an amount of impurity hardly possible, different elements are capable at certain high temperatures of giving rise to certain coincident lines; and from these and other collateral facts, such as an ascertained relation between the atomic weight of an element and the position of its lines in the spectrum, it is now held to be probable that the so-called elements are themselves compounds, which at a certain temperature are broken up into much fewer elements, or possibly into one. This conclusion is one of the latest results of spectrum analysis.

spén-cér (3), s. [Etym. doubtful.]

Naut.: A four-cornered four-and-aft sail, whose head is extended by a gaff and its foot usually by a sheet. Its position is abaft the fore or the main mast, and it is frequently bent to a spencer-mast (q.v.). It is a trysail to the fore or main mast, and differs from s-

panker or driver in position. The latter belong to the mizzen. [SNOW (2), s.]

spencer-mast, s. Naut.: A small mast abaft a lower mast for hoisting a trysail.

Spén-cér'-i-an, a. & s. A. As adj.: Of or pertaining to Herbert Spencer or Spencerism.

B. As subst.: A follower of Herbert Spencer.

Spén-cér'-ism, s. [See def.]

Hist. & Philos.: The system advocated by Herbert Spencer (born 1820) in his works—the application of the principles of evolution to the phenomena of mind and of society.

"Social or moral theories, such as Comtism and Spencerism, which, in the absence of grounded philosophical truth, offer to assume its place and duties." Davidson: Phil. Syst. of A. Nozomi, p. cv.

spénd, *spénde, v.t. & i. [A.S. spendan (in the compounds á-spendan and for-spendan), from Low Lat. dispéndere = to spend, waste, consume; Ital. spendere = to spend; spendio = expense; O. Fr. despéndre.]

A. Transitive:
1. To lay out, to expend; to part with.

"Wherefore do ye spend money for that which is not bread?" Isaiah lv. 2.

2. To consume, to waste, to exhaust, to squander.

"There is off in the dwelling of the wise, but a foolish man spendeth it up." Proverbs xxi. 20.

3. To exhaust or drain of force or strength; to waste; to wear away.

"The Trojans, worn with toils, and spent with woes." Dryden: Virgil, Æneid i. 243.

* 4. To utter, to speak; to give out, to declare.

"I will but spend one word here in the house." Shakspeare: Merchant of Venice, i. 2.

5. To pass, as time; to suffer to pass away.

"They spend their days in wealth." Job xxi. 18.

B. Intransitive:
I. Ordinary Language:

1. To expend money; to make disposition of money; to incur expense.

* 2. To be lost, wasted, dissipated, or consumed; to vanish, to dissipate, to spread.

"The sound spendeth, and is dissipated in the open air; but in such conceives it is conserved and contracted." Bacon.

II. Min.: To break ground; to make away.

* To spend is to deprive in a less degree than to exhaust, and that in a less degree than to drain; everyone who exerts himself in any degree spends his strength; if the exertions are violent he exhausts himself; a country which is drained of men is supposed to have no more left. To spend may be applied to that which is external or inherent in a body; exhaust to that which is inherent; drain to that which is external to the body in which it is contained; we may speak of spending our wealth, our resources, our time, and the like; but of exhausting our strength, our vigour, our voice, and the like; of draining, in the proper application, a vessel of its liquid, or, in the improper application, draining a treasury of its contents: hence arises this farther distinction, that to spend and to exhaust may tend, more or less, to the injury of a body; but to drain may be to its advantage. To spend implies simply to turn to some purpose or to make use of; to expend carries with it likewise the idea of exhausting; to dissipate signifies to expend in waste, to squander. (Crabb.)

¶ To spend a mast: Naut.: To break or carry away a mast in foul weather.

* spend-all, s. A spendthrift.

*spénd'-a-ble, a. [Eng. spend; -able.] Capable of being spent; available for expenditure.

"Not begeten of mannes sperme outlean." Chaucer: C. T., 14, 1515.

2. The spawn of fishes or frogs.

3. A common and colloquial abbreviation for spermaceti (q.v.).

sperm-cell, s.

Biology:

1. The male element in reproduction.

2. A spermatoblast (q.v.).

sperm-oil, s.

Chem.: An oil found, together with spermaceti, in the head of the sperm whale. It is neutral, liquid at 18°, and is saponified with difficulty by potash.

sperm-whale, s. [CACHALOT.]

spĕr-mā-čĕ-tĭ, * par-mā-čĕ-tĭ, s. & a. [Lat. *sperma ceti* = sperm of the whale; *cetus* = a whale; Gr. *κῆτος* (*kētos*).]

A. As substantive:

1. **Chem.**: A neutral, inodorons, and nearly tasteless, fatty substance, extracted from the oily matter of the head of the sperm whale by filtration and treatment with potash-ley. It is white, brittle, soft to the touch, sp. gr. 0.943 at 15°, melts from 38° to 47°, and is chiefly used in ointments and cerates.

2. **Pharm.**: Spermaceti was formerly given as a medicine; now it is chiefly employed externally as an emollient, and in the preparation of a blistering paper.

B. As adj.: Relating to or composed of spermaceti.

spermaceti-oil, s. The same as SPERM-OIL (q.v.).

spermaceti-ointment, s.

Pharm.: An ointment composed of spermaceti, white wax, and almond oil.

spermaceti-whale, s. [CACHALOT.]

spĕr-mā-, pref. [SPERMAT-]

spĕr-mā-cō-čĕ-s, s. [Pref. *sperma*(-a), and Gr. *ἀκμή* (*akmē*) = a point. Named from the acute calyx teeth surmounting the seed-vessel.]

Bot.: The typical genus of Spermaceoidae (q.v.). Tropical weeds, with white or blue flowers. *Spermaceo ferruginea* and *S. Poaya* are used in Brazil, and *S. verticillata* in the West Indies, as substitutes for ipecacuanha, and *S. hispidia* in India as a sudorific.

spĕr-mā-cō-čĭ-dĕ, s. pl. [Mod. Lat. *spermacoc*(e); Lat. fem. pl. adj. suff. *-idæ*.]

Bot.: A family of Coffea (q.v.).

spĕr-mā-gōne, spĕr-mā-gō-nĭ-ŭm, s. [SPERMOCONE, SPERMOCONIUM.]

spĕr-mān-ġĭ-ŭm, s. [Pref. *sperma*(-a), and Gr. *ἀγγεῖον* (*anggeion*) = a vessel, a pail.]

Bot.: The case containing the spores of Algae.

spĕr-mā-phōre, spĕr-māph-ōr-ŭm, s. [Pref. *sperma*-, and Gr. *φορός* (*phoros*) = bearing.]

Bot.: The placenta.

spĕr-mā-rĭy, spĕr-mār-ĭ-ŭm, s. [Mod. Lat. *spermarium*, from Gr. *σπέρμα* (*sperma*) = seed.]

Anat.: The spermatie gland or glands of the male. (*Dana*.)

spĕr-māt-, spĕr-mā-tō-, spĕr-mā-, spĕr-mō-, pref. [Gr. *σπέρμα* (*sperma*), genit. *σπέρματος* (*spermatos*) = seed, sperm.] Pertaining or relating to sperm or semen.

spĕr-mā-thĕ-ca, s. [Pref. *sperma*-, and Gr. *θήκη* (*thēkē*) = a case.]

Entom.: A cavity in female insects for the reception of sperm from the male. (*Car-penter*.)

spĕr-mā-tĭ-a (t as sh), s. pl. [Mod. Lat., from *sperma* = seed, sperm (q.v.).]

Bot.: The spores of the Ascomycetes, Uredinea, and some other Fungals. They are contained in sporegonia (q.v.).

spĕr-māt-ĭc, spĕr-māt-ĭc-al, * spĕr-māt-ĭcĭc, a. [Fr. *spermatique*, from Lat. *spermatĭcus*; Gr. *σπερματικός* (*spermatĭkos*), from *σπέρμα* (*sperma*), genit. *σπέρματος* (*spermatos*) = seed, sperm.]

1. Consisting of seed; seminal.

2. Pertaining to the semen; conveying the semen.

"Two different sexes must concur to their generation: there is in both a great apparatus of spermatĭc vessels, wherein the more spirituous part of the blood is by many digestions and circulations exalted into sperm."—*Ray*: On the Creation.

spĕr-mā-tĭn, s. [SPERMAT-]

Physiol.: An organic substance resembling mucin and albumin, found in the vesiculae seminales. (*Power*.)

spĕr-mā-tĭam, s. [Pref. *spermat*-; suff. *-iam*.]

1. The emission of semen or seed.

2. The theory that the germ in animals is produced by spermatie animalcules.

*** spĕr-mā-tĭze, v. t.** [Gr. *σπερματίζω* (*spermatĭzō*).] To yield seed; to emit seed or semen.

"Women do not spermatize."—*Browne*: Vulgar Errors, bk. III, ch. xvii.

spĕr-mā-tō-, v. t. [SPERMAT-] (See the compound.)

spermatocystidium (pl. spermatocystidia), s.

Bot.: Hedwig's name for the supposed male organs in the Muscales. [ANTHERIDIUM.]

spĕr-māt-ō-blast, s. [Pref. *spermat*-, and Gr. *βλαστός* (*blastos*).]

Biology: A daughter-cell in the seminal duct giving origin to a spermatozoon (q.v.).

spĕr-māt-ō-čĕle, s. [Pref. *spermat*-, and Gr. *κῆλη* (*kēlē*) = a tumour.]

Pathol.: A morbid distension of the epididymis and vas deferens.

spĕr-mā-tō-ġĕn-ĕ-sĭs, s. [Pref. *spermat*-, and Eng. *genesis*.]

Physiol.: The origin of spermatozooids in the seminiferous canals.

"He (Prof. Grünhagen) had attained the same results on spermatogenesis as had Dr. Biondi, to whom, of the two independent discoverers, was due the title of priority."—*Nature*, Oct. 1, 1888, p. 544.

spĕr-mā-tō-ġĕ-nĕt-ĭc, a. [Pref. *spermat*-, and Eng. *genetic*.] Of or pertaining to spermatogenesis (q.v.). (*Encyc. Brit.* (ed. 9th), xx, 412.)

spĕr-mā-tōġ-ĕn-oŭs, a. [Pref. *spermat*-, and Lat. *gignō*, pa. t. *genui* = to produce.] Producing sperm.

spĕr-mā-tōĭd, a. [SPERMAT-] Sperm-like; resembling seed or sperm.

spĕr-mā-tōĭ-ō-ġy, s. [Pref. *spermat*-, and Gr. *λόγος* (*logos*) = a discourse.] Scientific facts or theories concerning sperm.

spĕr-mā-tō-ŏn (pl. spĕr-mā-tō-a), s. [Pref. *spermat*-, and Gr. *ὄν* (*ōn*) = an egg.]

Biol.: A cell which stands in the relation of a nucleus to a sperm-cell, and of a developmental cell to the spermatozoa. (*Brande & Cox*.)

spĕr-māt-ō-phōre, s. [Pref. *spermat*-, and Gr. *φορός* (*phoros*) = bearing.]

Biol. (Pl.): Capsules or sheaths containing fertilizing elements. Used chiefly of the cylindrical capsules secreted by the prostatic gland of male Cephalopods. When moistened, the spermatophores expand and burst, expelling the contents with considerable force.

spĕr-mā-tōph-ōr-oŭs, a. [SPERMATOPHORE.] Bearing or producing sperm or seed; seminiferous.

spĕr-mā-tō-rhĕo-a, s. [Pref. *spermat*-, and Gr. *ῥέω* (*rhēō*) = to flow.]

Pathol.: A real or apparent discharge of

seminal fluid, without voluntary sexual excitement. It is of two kinds: (1) True, in which discharges of spermatozoa occurs; (2) False, or prostaticorrhœa, in which a fluid clearer and more tenacious than the seminal fluid, and destitute of spermatozoa, is discharged.

spĕr-mā-tō-zō-ĭc, a. [Eng. *spermatozo*(a); -ic.] Belonging to or resembling spermatozoa (q.v.). (*Draper*: Human Physiol., p. 518.)

† spĕr-mā-tō-zō-ĭd, s. [Mod. Lat. *spermatozo*(on), and Gr. *είδος* (*eidos*) = form, resemblance. (See def.)]

Biol.: Von Siebold's name for a spermatozoon (q.v.). Duglison (ed. 1874) says: "More properly, spermatozoid, for their animalcular nature is not demonstrated." The name is also applied to antherozoids. [ANTHEROZOID.]

spĕr-mā-tō-zō-ŏn (pl. spĕr-mā-tō-zō-a), s. [Pref. *spermat*-, and Gr. *ζῷον* (*zōon*) = an animal.]

Biology (Pl.): The name given by Leeuwenhoek to the moving, active constituents of the seminal fluid, which were brought to his notice by his pupil Hamn, in 1677. Spermatozoa consist of a head, a rod-shaped middle piece, and a long hair-like tail, by the vibratile motion of which they move in a spiral manner. Cold arrests their movements, and they may be deprived of vitality (the power of fecundation) in various ways. They were at first regarded as parasites, and classified as Helminthes or Infusoria, and Von Baer maintained this view as late as 1835. Von Siebold discovered them in many vertebrates, but Kölliker was the first to recognize them as definite histological elements arising within the testes. [SPERMATOZOID.]

*** sperme, s.** [SPERM.]

spĕr-mĭo, a. [Eng. *sperm*; -io.] Of or pertaining to sperm or seed.

† spĕr-mĭd-ĭ-ŭm, s. [Mod. Lat., from Gr. *σπέρμα* (*sperma*) = seed.]

Bot.: An achene (q.v.).

spĕr-mō-, pref. [SPERMAT-]

spĕr-mō-dĕrm, s. [Pref. *spermo*-, and Gr. *δέρμα* (*derma*) = the skin.]

Bot.: The skin or testa of a seed. (*De Candolle*.)

spĕr-mō-gō-nĭ-a, s. pl. [Pref. *sperma*-, and Gr. *γονεῖα* (*goneiā*) = to beget.]

Bot.: The cysts containing spermata in lichens. (*Tulasne*.)

spĕr-mōĭ-ō-ġĭst, a. [Eng. *spermatology*(y); -ist.] One who treats of sperm or seeds; one who studies spermatology (q.v.).

spĕr-mōĭ-ō-ġy, s. [Eng. *sperm*; suff. *-ology*.] That branch of science which deals with sperm or seeds; a treatise on sperm or seeds.

spĕr-mō-phĭle, s. [SPERMOPHILUS.]

Zool.: Any individual of the genus *Spermophilus* (q.v.). They are squirrel-like in form, with rather short tails.

"The labour of the moles is supplemented by that of the gophers, *spermophiles*, and badgers."—*Field*, Dec. 26, 1858.

spĕr-mōph-ĭl-ŭs, a. [Pref. *spermo*-, and Gr. *φιλό* (*philō*) = to love.]

Zool. & Paleont.: Pouched Marmots, a genus of Scuridae, sub-family Arctomyina, with twenty-six species, confined to the Nearctic and Palaearctic regions. Cheek pouches large; pollex rudimentary or absent. They appear first in the European Miocene, and connect the Squirrels with the Marmots. [SISEL, SPERMOPHILE.]

spĕr-mō-phōre, spĕr-mōph-ōr-ŭm, s. [Gr. *σπερμοφόρος* (*spermo-phoros*) = bearing seeds; *σπέρμα* (*sperma*) = seed, and *φορός* (*phoros*) = bearing.]

Botany:

1. A cord bearing the seeds in some plants.

2. The placenta.

spĕr-mō-thĕ-ca, s. [Pref. *spermo*-, and Gr. *θήκη* (*thēkē*) = a case, a box.]

Bot.: A seed-vessel.

The powder of the root is said to be stomachic, and the bark ground and mixed with whey a remedy for piles. (Calc. Exhib. Rep.)

sphær-ën'-chÿ-ma (ær as ör), s. [Pref. sphær-, and Gr. ἐγχύμα (engchuma) = an infusion.]

Bot.: Merenchyma (q.v.).

sphær-ÿ-ä (ær as ör), s. [Gr. σφαῖριον (sphaîrion), dimin. from σφαῖρα (sphaîra) = a sphere. Named from the globular form of the species.]

Bot.: The typical genus of Sphaeriacæ (q.v.). Perithecia carbonaceous, completely exposed, partially sunk into the matrix, or covered by the cuticle and accompanied by a growth of threads, constituting the mycelium. Known species about 500, of which about 200 are British. They are found at all seasons on the trunks of trees, on leaves, on fir cones, &c.

sphær-ÿ-ä'-çë-i (ær as ör), s. pl. [Mod. Lat. sphaerici; Lat. masc. pl. adj. suff. -acet.]

Bot.: A sub-order of Ascomycetes. They have carbonaceous or membranaceous cysts, or perithecia composed of cells or very rarely of interwoven threads, with a pore or narrow slit at the top, which often ends in a nipple or crest. Lining the cysts is a gelatinous mass of asci and paraphyses (barren threads). Found on decayed wood, stems, algae, dung, soil, &c. (Berkeley.)

sphær-ÿ-ä'-gä, s. pl. [SPHERIDIUM.]

Zool.: Stalked appendages with button-like heads covered with cilia, found in most recent sea-urchins. They are supposed to be organs of sense, probably of taste. (Loven.)

sphær-ÿ-ä'-næ (ær as ör), s. pl. [Mod. Lat. sphaeridium; Lat. fem. pl. adj. suff. -inæ.]

Entom.: A sub-family of Hydrophilidæ, living on the dung of land animals.

sphær-ÿ-ä'-üm (ær as ör), s. [Gr. σφαιρίδιον (sphaîridion), dimin. from σφαῖρα (sphaîra) = a sphere. So named from the spherical shape of the insects.]

Entom.: The typical genus of Sphaeridiina (q.v.). Three are British, the type being Sphaeridium scarabaeolus.

sphær-ÿ-ä'-tër'-ÿ-üm (ær as ör), s. [Lat., from Gr. σφαιριστήριον (sphaîristêrion), from σφαιριστής (sphaîristês) = a ball-player; σφαῖρα (sphaîra) = a ball, a globe.]

Anc. Arch.: A court for the exercise of ball-playing; a tennis-court.

sphær-ÿ-ä'-ite (ær as ör), s. [Lat. sphaera = a sphere; suff. -ite (Min.).]

Min.: A mineral occurring in globular concretions without fibrous or concentric structure. Hardness, 4; sp. gr. 2.588; lustré, greasy-vitreous; colour, light-gray; translucent. Compos.: phosphoric acid, 26.1; alumina, 47.4; water, 26.5 = 100, corresponding with the formula 5Al₂O₃.2P₂O₅.+16H₂O. Occurs in fissures in limonite at Zajecov, Bohemia, in Lower Silurian schists.

sphær-ö-blas-tüs (ær as ör), s. [Pref. sphæro-, and Gr. βλαστῆς (blastos) = a sprout, a shoot.]

Bot.: A cotyledon which rises above ground, bearing at its end a spheroid tumour.

sphær-ö-cär'-ÿ-ä (ær as ör), s. [Pref. sphæro-, and Gr. καρπία (karua) = a walnut tree.]

Bot.: A genus of Santalacæ. Sphaerocarpya edulis is eaten in Nepal.

sphær-ö-cö-bält'-ÿ-ä (ær as ör), s. [Pref. sphæro-, and Eng. cobaltite.]

Min.: A mineral found in small spherical masses, having crystalline structure, with roselite, at Schaeberg, Saxony. Colour, externally velvet-black, internally rose-red. Hardness, 4; sp. gr. 4.02 to 4.13. An analysis yielded: carbonic acid, 34.65; protoxide of cobalt, 58.86; sesquioxide of iron, 3.41; lime, 1.80; water, 1.22 = 99.94, which corresponds to the formula CoCO₃, which requires, CO₂, 36.94, CoO, 63.06.

sphær-ö-cöc'-çï'-tëg (ær as ör), s. [Mod. Lat. sphærococcus; suff. -ites.]

Palæobot.: A genus of Algae. British species two—one from the Lias and one from the Lower Jurassic.

sphær-ö-cöc'-cöld'-ç-ä, sphær-ö-cöc'-çö-ç-ä (ær as ör), s. pl. [Mod. Lat. sphærococcus; and fem. pl. adj. suff. -æe.]

Bot.: A sub-order of Ceramiales (q.v.) (Lindley), placed under the Rhodosperrnæ (Berkeley). Frond cellular, enclosing closely packed, oblong granules arising from the base, within a spherical cellular envelope, which finally bursts. Tetraspores in indefinite heaps scattered over the frond. (Lindley.)

sphær-ö-cöc'-cüs (ær as ör), s. [Pref. sphæro-, and Lat. coccus = a berry, a kernel.]

Bot.: The typical genus of Sphaerococcoides (q.v.). Now nearly restricted to two European species.

sphær-ö-dön (ær as ör), s. [Pref. sphær-, and Gr. δόντις (odontis), genit. δόντιος (odontios) = a tooth.]

Ichthy.: A genus of Pagrina (q.v.), with one species from the Indian Ocean.

sphær-ö-dön'-tî-dæ (ær as ör), s. pl. [SPHERODON.]

Palæont.: A family of Ganoid Fishes. Body oblong, with rhombic scales; dorsal and anal fins short (q.v.); vertebra ossified, but not completely closed; tail homocerical; fins without leucina; teeth on palate globular. Type-genus Lepidotus (q.v.), made by Owen the type of his Lepidotia.

sphær-ö-düs (ær as ör), s. [Pref. sphær-, and δόντις (odontis) = a tooth.]

Palæont.: A genus of Pycnodontidæ. One British species, Sphaerodus gigas, from the Kimmeridge Clay of Shotover and from the Jura Mountains.

sphær-ö-gäs'-trä (ær as ör), s. pl. [Pref. sphæro-, and Gr. γαστήρ (gastêr), genit. γαστήρος (gastroe) = the belly.]

Zool.: The same as ARANEIDA.

böü, böy; pöüt, jöwi; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f -clan, -lian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bpl, dpl

sphaer-ô-ma (ær as èr), s. [Gr. σφαίρωμα (sphaîrôma) = anything round.]

Zool.: The type-genus of Spheromidae (q.v.), with several species, which are vegetable-feeders, and, like many of their allies, have the power of rolling themselves into a ball.

sphaer-ôm-î-dæ (ær as èr), s. pl. [Mod. Lat. *sphaeroma*(a); Lat. fem. pl. adj. suff. -îdæ.]

Zool.: A family of Natatorial Isopoda, with several genera, in some of which the branchial endopodites are transversely folded, so as to approach those of the Xiphosura (q.v.).

***sphaer-ô-nê-mé-î** (ær as èr), s. pl. [Mod. Lat., from pref. *sphaero-*, and Gr. νημα (nêma) = yarn.]

Bot.: An old order of Gasteromycetes. The species placed under it are now believed to be immature states of other Fungals.

sphaer-ô-nî-tês (ær as èr), s. [Gr. σφαίρων (sphaîrôn), genit. σφαίρωνος (sphaîrônônos) = a round fishing-net.]

Palæont.: A genus of Cystidæ, with five British species characterizing the middle division of the Bala or Caradoc rocks.

sphaer-ô-phôr-î-dæ, **sphaer-ô-phô-râ-cê-sæ** (ær as èr), s. pl. [Mod. Lat. *sphaerophoron*]; Lat. fem. pl. adj. suff. -accæ.]

Bot.: A family of Gasterothalamææ (q.v.). Apothecia formed in the swollen points of the thallus, bursting irregularly.

sphaer-ô-ph-ôr-ôn (ær as èr), s. [Pref. *sphaero-*, and Gr. φέρω (phorê) = to bear.]

Bot.: The typical genus of Spherophorida (q.v.). *Sphaerophoron coralloides* is not uncommon on sand-rocks among mosses. *S. compactum* is less common.

sphaer-ô-sî-dêr-îte (ær as èr), **sphêr-ô-sî-dêr-îte**, s. [Pref. *sphaero-*, and Eng. *siderite*.]

Min.: A variety of Siderite (q.v.) occurring in globular form with radiating fibrous structure in cavities in basaltic rocks. The name is sometimes misapplied to ordinary massive clay-stones.

sphaer-ô-spôrc (ær as èr), s. [Pref. *sphaero-*, and Eng. *spore*.]

Bot.: The quadruple spore of some Algae.

sphaer-ô-stil-bite (ær as èr), s. [Pref. *sphaero-*, and Eng. *stilbite*.]

Min.: A variety of stilbite sometimes mixed with mesolite, occurring in spheres, mostly minute, having a fibrous radiating structure, with other zeolites in the Isle of Skye.

sphaer-ô-zÿ-ga (ær as èr), s. [Pref. *sphaero-* (q.v.), and Gr. ζυγον (zygon) = a yoke.]

Bot.: A synonym of *Anabaina* (q.v.).

sphaer-û-lâr-î-a (ær as èr), s. [From Lat. *sphaerula* = a little sphere.]

Zool.: A genus of Nematode worms, family Gordiidae, founded by Dufour, 1836, on a specimen (*Spherularia bombi*) discovered by him in the abdominal cavities of *Bombus terrestris* and *B. hortorum*. Lubbock has since found it in other species of that genus, and also in *Apythus restalis* (Nat. Hist. Rev., Jan., 1861). He estimated the female to be 28,000 times larger than the male, which is frequently found united to his larger companion.

sphaer-û-lîte (ær as èr), s. [SPHERULITE.]

sphâg-nê-î, **sphâg-nâ-cê-sæ**, s. pl. [Lat. *sphagnum*(um); masc. pl. adj. suff. -ei, or fem. -acæ.]

Bot.: Bog-mosses; an order, tribe, or family of operculate mosses. Proper roots wanting; branches fasciculate; leaves with two kinds of cell—one narrow, elongated, and filled with chlorophyll; the other hyaline. Capsule sessile, globose, in the elongated sheath; at first spores apparently of two kinds, the first in sets of four, the last in sets of sixteen. [SPHAENUM.]

sphâg-noûs, a. [SPHAENUM.] Pertaining to, or of the nature of bog-moss; mossy.

sphâg-nûm, s. [Lat. *sphagnos*; Gr. σφάγνος (sphagnos), σφάκος (sphakos) = (1) sage, (2) a lichen.]

Bot.: The only genus of Sphagnei (q.v.) It occurs in all temperate climates. At first

only one species, *Sphagnum palustre*, was admitted, then it was multiplied into fourteen, then the number fell to four, then rose again to nine, though some were doubtful. They form a great part of every bog in moory districts. [PEAT.]

They make excellent bedding material; and when they become lumpy they can be restored to their original softness by being taken out, placed in water, and then dried. In the northern regions they are used for lining clothes, especially boots, and as wicks for lamps. They afford excellent material for enveloping and preserving the roots of plants which have to be sent a long distance.

SPHAENUM.

sphâg-ôl-ô-bûs, s. [Gr. σφαγή (sphagê) = the throat, and λοβός (lobos) = a lobe.]

Ornith.: A genus of Bucerotidae, with one species (*Sphagobius atratus*, the Black Horn-bill), from the west coast of Africa. It is often classed with Bucerotes, but has been separated by some authors on account of its peculiar casque.

sphâl-êr-îte, s. [Gr. σφαλερός (sphaleros) = treacherous; suff. -îte (Min.).]

Min.: The same as *Blende* (q.v.). This name was originally proposed by Haidinger, because Blende had been applied to other species, but it was lost sight of till Dana resuscitated it. It is as yet, however, used by few mineralogists.

sphâl-êr-ô-car-pî-ûm, **sphâl-êr-ô-car-pûm**, s. [Gr. σφαλερός (sphaleros) = slippery, and καρπός (karpós) = fruit.]

Bot.: A fruit with a one-seeded, indehiscent pericarp, enclosed within a fleshy perianth. Lindley places it under his collective fruits.

sphar-êi-dæ, s. pl. [Mod. Lat. *sphargis*(is); Lat. fem. pl. adj. suff. -îdæ.] [SPHARGIS.]

sphar-êis, s. [Gr. σφαργίζω (spharagizô) = to roar loudly.]

Zool.: A genus of Chelonates, with a single species, *Sphargis coriacea*, often made the type of a family Sphargidae. The skin resembles thick leather, and contains bony deposits, arranged like mosaic, but this dermal shield is not united to the vertebrae and ribs. The bones of the paddles are extremely simple, and claws are absent. The genus is an extremely ancient type, little progress having been made in the development of a bony carapace; and Cope discovered in the Chalk of Kansas a form, which he named *Protostega*, allied to Sphargis.

sphê-çî-a, s. [Gr. σφήξ (sphêx), genit. σφήκος (sphêkos) = a wasp.]

Entom.: A genus of *Egeriidae*. Abdomen moderately stout, no anal tuft. British species two, *Sphæcia apiformis*, the Hornet Moth, and *S. bembeciformis*, the Lunar Hornet Moth. [HORNET-MOTH.]

†sphê-çî-dæ, **†sphê-êi-dæ**, s. pl. [Mod. Lat. *sphæx*, genit. *sphæcid*(is), *sphægid*(is); Lat. fem. pl. adj. suff. -îdæ.] [SPHÆX.]

Entom.: A family of Fossorial Hymenoptera, often merged in *Crastrionidae* (q.v.). Antennæ generally slender, with long joints, prothorax forming a distinct neck; base of the abdomen constricted into a long petiole. Genera, *Sphæx*, *Pepsis*, *Pompilus*, *Ammophila*, &c.

sphên-, pref. [SPHENO.]

sphên-a-cân-thûs, s. [Pref. *sphen-*, and Gr. ακανθα (akantha) = a spine.]

Palæont.: A genus of Placiotostomes, founded on spines from the Coal-measures.

sphêne, s. [Gr. σφήν (sphen) = a wedge.]

Min.: The same as *TITANITE* (q.v.).

sphên-is-çî-dæ, s. pl. [Mod. Lat. *spheniscus*]; Lat. fem. pl. adj. suff. -îdæ.]

Ornith.: A family of Natatorial Birds, equivalent to Huxley's Spheniscomorpha (q.v.). By some authors the genera are subdivided.

sphê-nis-cô-mor-phæ, s. pl. [Mod. Lat., from *spheniscus*, and Gr. μορφή (morphê) = form.]

Ornith.: A family of Schizognathæ (q.v.). It contains three genera: *Eudyptes*, *Spheniscus*, and *Aptenodytes*. (Proc. Zool. Soc., 1867, p. 453.)

sphên-is-çûs, s. [Gr. σφήνισκος (sphênískos), dimin. from σφήν (sphên) = a wedge. From the shape of the bill.]

Ornith.: A genus of Spheniscide. Bill shortish, compressed; maxilla ending in a conspicuous hook. Four species, one ranging as far north as the Galapagos.

sphên-ô, **sphên-**, pref. [Gr. σφήν (sphên), genit. σφήνος (sphênônos) = a wedge.] Pertaining to, or resembling a wedge in shape.

spheno-maxillary, a. **Anat.**: Of or belonging to the jaws and the sphenoid bone: as the *spheno-maxillary* fissure and fossa.

spheno-orbital, a. **Anat.**: Of or belonging to the orbital bones and to the sphenoid.

spheno-palatine, **spheno-palatinate**, a. **Anat.**: Of or belonging to the palate bones and to the sphenoid: as the *spheno-palatine* artery, foramen, and ganglion.

spheno-parietal, a. **Anat.**: Of or belonging to the parietal and the sphenoid. Between these is the *spheno-parietal* suture.

spheno-temporal, a. **Anat.**: Of or belonging to the temporal and the sphenoid bones.

sphên-ô-çêph-â-lûs, s. [Pref. *spheno-*, and Gr. κεφαλή (kephalê) = the head.]

I. Anat.: A malformation of the head in which the upper part of the cranium assumes a wedge-like aspect.
2. Palæont.: A genus of Berycidae, from the Chalk.

sphên-ô-clâse, s. [Pref. *spheno-*, and Gr. κλάσις (klasis) = a fracture.]

Min.: A massive mineral which, when struck, breaks into wedge-shaped fragments. Hardness, 5.5 to 6; sp. gr., 3.2; lustre, feeble; colour, pale grayish-yellow; sub-translucent. An analysis yielded: silice, 46.08; alumina, 13.04; protoxide of iron, 4.77; protoxide of manganese, 3.23; magnesia, 6.25; lime, 26.50 = 99.87. Found at Gjellebäck, Norway, in layers in a granular limestone.

sphên-ô-dôn, s. [Gr. σφήν (sphên) = a wedge; suff. -odon.]

1. Palæont.: A genus of Bradypodidae, from the bone-caves of Brazil.

2. Zool.: The sole recent genus of Rhychocephalia (q.v.), with one species, *Sphendon punctatus* (*Hatteria punctata*), from New Zealand, where it is called *Tuatara* by the Maoris. Externally, there is little to distinguish this genus from ordinary lizards, but important differences occur in the structure of the skeleton, viz., the presence of a double horizontal bar across the temporal region, the firm connection of the quadrato bone with the skull and the pterygoid bones, biconcave vertebrae as in the Geckos and many fossil Crocodilians, the presence of an abdominal sternum, and uncinatæ processes to the ribs (as in Birds).

SKULL OF SPHENODON, SHOWING ACRODONT JAW.

sphên-ô-dûs, s. [Pref. *sphen-*, and Gr. οδύς (odús) = a tooth.]

Palæont.: A genus of Lamnidae, founded on teeth from the Jurassic.

sphên-ô-grâm, s. [Pref. *spheno-*, and Gr. γράμμα (gramma) = a writing, a letter.]

Cuneiform or arrow-headed character. [GRAM.]

sphên-ôg-ra-phêr, s. [Eng. *sphenographer*(y)-er.] One who is skilled in sphenography, or the deciphering of cuneiform inscriptions.

fâte, fât, fâre, smidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôl er, wôro, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian, æ, œ = è; sy = â; qu = kw.

sphēn-ō-grāph'-īc, a. [Eng. sphenograph(y); -ic.] Of or pertaining to sphenography.

sphān-ōg-ra-phist, s. [Eng. sphenograph(y); -ist.] A sphenographer (q.v.).

sphēn-ōg-ra-phŷ, s. [Pref. spheno-, and Gr. γράφω (graphō) = to write.] The act or art of writing in cuneiform or arrow-shaped letters or characters; the art of deciphering cuneiform writings or characters; that branch of philological science which concerns itself with cuneiform writings.

sphē-nōg-yn-ē, s. [Pref. spheno-, and Gr. γυνή (gynē) = a female.]

Bot.: The typical genus of Sphenogynae (q.v.). Garden plants; their flowers orange colour, barred with black. They were brought originally from the Cape of Good Hope.

sphēn-ō-gŷn'-ō-sē, s. pl. [Mod. Lat. sphenogŷn(e); Lat. fem. pl. adj. suff. -eae.]

Bot.: A sub-tribe of Senecionideae.

sphēn-ōid, a. & s. [Gr. σφῆν (sphēn) = a wedge, and εἶδος (eidos) = form, appearance.]

A. As adj.: Resembling a wedge; wedge-shaped.

B. As substantive:

1. Anat.: The sphenoid-bone (q.v.).

2. Crystall.: A wedge-shaped crystal contained under four equal isosceles triangles.

sphenoid-bone, s.

Anat.: A wedge-shaped bone placed across the base of the skull near the middle, and helping to form the cavity of the cranium, the orbits, and the posterior nares. It has a central part or body, two pairs of lateral expansions called the great and small wings, and another pair pointing downwards called the pterygoid processes. (Quain.)

sphēn-ōid-al, a. [Eng. sphenoid; -al.] Sphenoidal (q.v.); as, the sphenoidal fissure, the sphenoidal sinus, &c.

sphēn-ō-lēp'-is, s. [Pref. spheno-, and Gr. λέπις (lepis) = a scale.]

Palaeont.: A genus of Esocidae, with long wedge-shaped scales, from the freshwater limestone of Aix and the gypsum of Paris.

sphēn-ōn'-chūs (pl. sphēn-ōn'-chī), s. [Pref. sphēn-, and Gr. ὄγκος (ongkos) = a hook, a barb.]

Palaeont.: One of the hooked cephalic dermal spines of Hybodus and Acrodus, specimens of which genera are in the British Museum, South Kensington, showing the spines (not more than four in any individual) *in situ*, but it is not known whether four was the normal number, or if they occurred in all the species. On these spines Agassiz founded a genus Sphenonchus, which he placed with the Hybodontidae. This has, of course, lapsed, and the word Sphenonchus has now no generic signification.

sphēn-ōph'-ŷil-lūm, s. [Pref. spheno-, and Gr. φύλλον (phūllon) = a leaf.]

Palaeobot.: A genus of Equisetaceae (?), allied to (or according to Mr. Carruthers, identical with) Calamites. They have verticillate-leaves, like reversed wedges. Four species from the Carboniferous rocks of Somerset and Newcastle; others from North America.

sphēn-ōp'-tēr-is, s. [Pref. spheno-, and Gr. πτερίς (pteris) = a kind of fern.]

Palaeobot.: A genus of Ferns, having the leaves twice- or thrice-pinnate; the leaflets not adhering to the rachis by their whole base, but resembling small wedges reversed, the nervures dividing pinnately from the base. From the Devonian to the Wealden. In the Carboniferous rocks there are thirty-four species, and in the Jurassic seventeen.

sphēn-ō-spōn'-dŷl-ūs, s. [Pref. spheno-, and Gr. σπονδύλος (spondylos) = a vertebra.]

Palaeont.: A genus of Dinosaurs or Crocodilia, from the Furber beds and the Wealden.

sphēn-ō-za-mī'-tēs, s. [Pref. spheno-, and Mod. Lat. zamites (q.v.).]

Palaeobot.: A genus of Cycads, from the European Jurassic rocks.

*sphēr'-al, a. [Eng. spher(e); -al.]

1. Of or pertaining to the spheres or heavenly bodies; inhabiting the spheres. (Lytton: *Cassino*, bk. xiv., ch. 1.)

2. Rounded like a sphere; sphere-shaped; hence, symmetrical, perfect.

sphēr, *sphere, s. [O. Fr. *esphere*; Fr. *sphère*, from Lat. *sphaera*; Gr. σφαῖρα (sphaira) = (1) a ball for playing with, (2) a sphere, a globe.]

I. Ordinary Language:

1. Literally:

(1) In the same sense as II.

(2) An orb, a globe, as the sun, the earth, the stars, or planets; one of the heavenly bodies.

"First the sun, A mighty sphere, he framed." Milton: *P. L.*, vii. 546.

(3) An orbicular body representing the earth or the apparent heavens; a celestial or terrestrial globe.

"Canon, and what's his name who made the sphere, And show'd the seasons of the sliding year." Dryden: *Virgil's*, bk. III. 61.

(4) A circular body; a disc.

"With a broader sphere the moon looks down." Hook: *Adamantide*.

2. Figuratively:

(1) Circuit or range of action, knowledge, or influence; compass, province, employment.

"The narrow sphere of our research." Cook: *Third Voyage*, bk. iv., ch. II.

(2) Rank; order or class of society.

"(3) An orbit, a socket.

"Make my two eyes, like stars, start from their spheres." Shakspeare: *Hamlet*, I. 5

II. Technically:

1. Astron.: A term formerly applied to any one of the concentric and eccentric revolving transparent shells in which the heavenly bodies were supposed to be fixed, and by which they were carried so as to produce their apparent motions. The word now signifies the vault of heaven, which to the eye seems the concave side of a hollow sphere, and on which the imaginary circles marking the positions of the equator, the ecliptic, &c., are supposed to be drawn. It is that portion of limitless space which the eye is powerful enough to penetrate, and appears a hollow sphere because the capacity of the eye for distant vision is equal in every direction.

"What stately building durt so high extend Her lofty towers unto the starry spheres." Spenser: *F. Q.*, I. x. 55.

2. Geom.: A solid or volume bounded by a surface, every point of which is equally distant from a point within, called the centre. Or it is a volume that may be generated by revolving a semi-circle about its diameter as an axis. The distance from any point of the surface to the centre is called a radius of the sphere. Every section of a sphere made by a plane is a circle, and all sections made by planes equally distant from the centre, are equal. A circle of the sphere whose plane passes through the centre, is a great circle; all other circles are small circles. All great circles are equal, and their radii are equal to the radii of the sphere. The surface of a sphere is equal to the product of the diameter by the circumference of a great circle; or it is equivalent to the area of four great circles. Denoting the radius of the sphere by *r*, and its diameter by *d*, we have the following formula for the surface: $s = 4r^2 = \pi d^2 = 3.14159 \dots d^2$. The volume of a sphere is equal to the product of its surface by one-third of its radius. It is also equivalent to two-thirds of the volume of its circumscribing cylinder. The following formula gives the value of the volume of any sphere, whose radius is *r*, and diameter is *d*: $v = \frac{4}{3} \pi r^3$. Spheres are to one another as the cubes of their diameters.

3. Logic: The extension of a general conception; the individuals and species comprised in any general conception.

¶ (1) *Armillary sphere*: [ARMILLARY].

(2) *Doctrine of the sphere*: The application of geometrical principles to geography and astronomy.

(3) *Harmony (or music) of the spheres*: [HARMONY, ¶ (4)].

(4) *Oblique sphere*: *Spherical projection*: The case in which the projection is made upon the plane of the horizon of any place not on the equator, or at the poles.

(5) *Parallel sphere*: [PARALLEL, a.].

(6) *Projection of the sphere*: [PROJECTION].

(7) *Right sphere*: [RIGHT, a.].

*sphere-born, a. Born among the spheres; celestial. (Milton: *Solemn Music*, 2.)

sphere-melody, sphere-music, s. The harmony of the spheres. [HARMONY.]

*sphère, *spear, s. [SPHERE, s.]

1. Literally:

(1) To place or set among the spheres or heavenly bodies.

"The glorious planet Sol, In noble eminence enthroned and splend'ring Amidst the other." Shakspeare: *Troilus & Cressida*, I. 5.

(2) To form into roundness; to make round or roundish.

"How, villain, till thy sphered bias cheek Outswell the puff'd Aquilon?" Shakspeare: *Troilus & Cressida*, IV. 5.

2. Fig.: To give perfect or complete form to; to concentrate.

"Not vassals to be beat, nor petty labors To be divided, no, but living wills, and spher'd Whole in ourselves and owed to none." Fenimore: *Frances*, IV. 123.

sphēr-ō-ō-type, s. [Gr. σφαῖρα (sphaira) = a sphere, and Eng. type.]

Photog.: A positive collodion picture taken upon glass by placing a mat before the plate, so as to give a distinct margin to the picture.

sphēr'-ic-al, *sphēr'-īc, a. [Lat. *sphericus*; Gr. σφαιρικός (sphairikos) = like a sphere (q.v.); Fr. *spherique*; Sp. *esferico*; Ital. *sferico*.]

1. Having the form of a sphere; orbicular, globular.

"Some certain determinate figure either round or angular, spherical, cubical . . . or the like." Cuvier: *Intel. system*, p. 666.

2. Pertaining or belonging to a sphere.

*3. Pertaining or relating to the orbs of the planets; planetary. (Shakspeare: *Lea*, I. 2.)

spherical-aberration, s. [ABERRATION.]

spherical-angle, s. [ANGLE, s.]

spherical-bracketing, s.

Arch.: The forming of brackets to support lath-and-plaster work, so that the surface of the plaster shall form the surface of a sphere.

spherical-case-shot, s. [SHEAPNEEL]

spherical-excess, s. [EXCESS.]

spherical-geometry, s. That branch of geometry which treats of spherical magnitudes, as spherical triangles, areas, and angles.

spherical-lune, s. A portion of the surface of a sphere included between two great semi-circles, having a common diameter. The angle of the lune is the same as the angle of the planes of the circles. [LUNE.]

spherical-polygon, s. A portion of the surface of a sphere bounded by the arcs of three or more great circles. Like plane polygons they are named from the number of sides or angles. [POLYGON.]

spherical-projection, s. A representation of the surface of the sphere upon a plane, according to some geometrical law, so that the different points in the representation can be accurately referred to their positions on the surface of the sphere. [PRIMITIVE-CIRCLE, PRIMITIVE-PLANE.]

spherical-pyramid, s. A portion of a sphere bounded by a spherical polygon, and by three or more sectors of great circles meeting at the centre of the sphere.

spherical-sector, s. A portion of a sphere which may be generated by revolving a sector of a circle about a straight line through its vertex as an axis.

spherical-segment, s. A portion of a sphere included between a zone of the surface and a secant plane, or between two parallel secant planes.

spherical-triangle, s. A spherical polygon of three sides. It is a portion of the surface of a sphere bounded by the arcs of three great circles. The points where the arcs meet are called vertices of the triangle, and the arcs are called sides.

spherical-trigonometry, s. [TRIGONOMETRY.]

spherical-ungula, s. A portion of the sphere bounded by a lune and two semi-circles meeting in a diameter of the sphere.

spherical-zone, s. A portion of the surface of a sphere included between two parallel planes.

bōil, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian, -cian = çhan. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

sphér-ic-al-ly, *adv.* [Eng. *spherical*; *-ly*.] In form of a sphere.

*Either spherically or angularly figured.—*Cudworth: Intell. System*, p. 253.

sphér-ic-al-néss, *s.* [Eng. *spherical*; *-ness*.] The quality or state of being spherical; sphericity.

*Such bodies receive their figure and limits from such lets as hinder them from attaining to that sphericity they aim at.—*Digby: On Bodies*.

sphér-ic-ty, *s.* [Fr. *sphéricité*.] The quality or state of being spherical; sphericity, globularity, roundness.

*He espoused the correct view of the earth's sphericity and rotation.—*G. H. Lewis: Hist. Philos.*, II. 106.

***sphér-ic-le**, *s.* [A dimin. from *sphere* (q.v.).] A little sphere.

sphér-ics, *s.* [SPHERIC.]

Geom.: The doctrine of the properties of the sphere, considered as a geometrical body, and in particular of the different circles described on its surface, with the method of projecting the same on a plane; spherical geometry and trigonometry.

***sphér-ic-fi-cá-tion**, *s.* [Eng. *spherify*; *c* connect., and suff. *-ation*.] The act of spherifying, the state of being spherified.

*The rupture and general spherification of as many distinct nonuniform rings.—*Poe: Eureka (Works 1848)*, II. 155.

***sphér-ic-form**, ***sphér-ý-form**, *a.* [Eng. *sphere*, and *form*.] Having the form of a sphere; spheroidal.

*Aristotle dealt not ingeniously with Xenophanes, when from that expression of his, that God was spheriform, he would infer that Xenophanes made God to be a body.—*Cudworth: Intell. System*, p. 378.

***sphér-ic-fy**, *v.t.* [Eng. *sphere*; *-fy*.] To make or form into a sphere.

*Seven uniform bands which were spherified irrespectively into as many moons.—*Poe: Eureka (Works 1848)*, II. 156.

sphér-ô-gráph, *s.* [Gr. *σφαῖρα* (*sphaira*) = a ball, a sphere, and *γράφω* (*graphō*) = to write, to draw.]

Navig.: An instrument invented for the mechanical application of spherics to navigation. By its aid any possible spherical triangle can be constructed without dividers or scale. It consists of a stereographic projection of the sphere upon a disc of pasteboard, in which the meridians and parallels of latitude are laid down to single degrees. By its aid, with a ruler and index, the angular position of a ship at any place, and the distance sailed, may be readily and accurately determined on the principle of great circle sailing.

sphér-ô-id, *s.* [Gr. *σφαιροειδής* (*sphairoeidēs*) = sphere-like, from *σφαῖρα* (*sphaira*) = a sphere, and *εἶδος* (*eidos*) = form, appearance; Fr. *sphéroïde*.]

Geom.: A solid, resembling a sphere in form, and generated by the revolution of an ellipse about one of its axes. If an ellipse be revolved about its transverse axis, the spheroid generated is called a Prolate spheroid; if it be revolved about its conjugate axis, the spheroid generated is called an Oblate spheroid. The earth is an oblate spheroid—that is, flattened at the poles so that its polar is less than its equatorial diameter.

sphér-ôid-al, **sphér-ôid-ic**, **sphér-ôid-ic-al**, *a.* [Eng. *spheroid*; *-al*; *-ic*; *-ical*.]

I. *Ord. Lang.*: Having the form of a spheroid.

*If these corpuscles be spheroidal, or oval, their shortest diameters must not be much greater than those of light.—*Cheyne*.

II. *Crystallog.*: Bounded by several convex faces.

spheroidal-bracketing, *s.*

Arch.: Bracketing prepared for a plaster ceiling whose surface is to form that of a spheroid.

spheroidal-excess, *s.* [EXCESS, *s.* ¶.]

spheroidal-triangle, *s.* A triangle on the surface of a spheroid, analogous to a spherical triangle.

sphér-ôid-i-ty, **sphér-ôid-ic-i-ty**, *s.* [Eng. *spheroid*, *spheroidic*; *-ity*.] The quality or state of being spheroidal.

sphér-ôm-ê-tër, *s.* [Gr. *σφαῖρα* (*sphaira*) =

a sphere, and Eng. *meter*.] An instrument for measuring the curvature of surfaces. It consists of a three-armed frame, standing on three steel pins, which form with each other an equilateral triangle; in the centre of the instrument is a vertical screw with a fine thread, and having a large graduated head.

sphér-ô-si-dër-ite, *s.* [SPHEROSIDERITE.]

sphér-û-la, *s.* [Lat., dimn. from *sphæra* = a sphere (q.v.).]

Bot.: A globose peridium with a central opening, through which are emitted sporidia mixed with a gelatinous pulp. It occurs in fungi.

sphér-û-late, *a.* [Eng. *spherulite*; *-ate*.] Covered or studded with spherules; having one or more rows of minute tubercles.

sphér-û-le, *s.* [SPHERULA.] A little sphere or spherulite body.

*Their parts, or little spherules, become more neighborhoodly or contiguous.—*Brooks: Universal Beauty*, II. II. [Note.]

sphér-û-lite, *s.* [Lat. *sphærulea* = a little sphere or globe, and Gr. *λίθος* (*lithos*) = a stone; Ger. *sphärolit*, *sphärolithe*.]

Petrol.: A name originally applied to a variety of pearl-stone or pitchstone (q.v.), which consists of an aggregate of spherulitic concretions, but it is now applied to the parts of any rock which may have a similar structure.

sphér-û-lit-ic, *a.* [Eng. *spherulite*; *-ic*.]

Petrol.: Partaking of the structure of a Spherulite (q.v.).

***sphér-ý**, *a.* [Eng. *spher*; *-y*.]

1. Pertaining or belonging to the spheres.

*She can teach ye how to climb,
Higher than the spherý chime.—*Milton: Comus*, 1, 61.

2. Resembling a sphere or star in roundness, brightness, or the like.

*Make me compare with Hermin's spherý oyne.—*Shakspeare: Midsummer Night's Dream*, II. 2.

***sphér-ër-ize**, *v.t.* [Gr. *σφαιροῖζω* (*sphairoizō*), from *σφαιρετός* (*sphairotos*) = their own; *σφαις* (*sphais*) = they.] To appropriate; to make one's own. (*Burke*.)

sphêx, *s.* [Gr. *σφήξ* (*sphêx*), genit. *σφήκος* (*sphêkos*) = a wasp.]

Entom.: The typical genus of Sphecidae or Sphegidae. They are large, solitary, wasp-like insects, some of them two inches long. They store their nests with caterpillars, which they paralyze by two stings. The genus is cosmopolitan. One of the best known species, *Sphex flavipennis*, is common in the south of Europe.

sphig-móm-ê-tër, *s.* [SPHYGOMETER.]

sphing-ëtër, *s.* [Gr. *σφίγγη* (*sphinghêter*) = that which binds tight; *σφίγγω* (*sphinggō*) = to bind tight.]

Anat.: A more or less circular muscle which contracts or shuts any natural orifice, as the bladder, the anus, &c.

*Nature has furnished the body of this little creature with a glutinous liquid, which it spins into thread, coarser or finer, as it chooses to contract or dilate its sphincter.—*Goldsmith: The Bee*; No. 4.

sphin-gê-s, *s. pl.* [SPHINX, 3. (3).]

sphin-gî-dæ, *s. pl.* [Lat. *sphinx*, genit. *sphing(is)*; fem. pl. adj. suff. *-idæ*.]

Entom.: The typical family of SpHINGINA (q.v.). Antennæ slightly thickened in the middle, generally terminating in a hooked bristle; wings large, clothed with scales; the anterior part long and pointed, or with the hind margin indented. Larva generally naked, with a horn on the back of the twelfth segment. Pupa subterranean. Many species, widely extended. Some of those of South America strikingly resemble the humming birds.

sphin-gî-na, *s.* [Lat. *sphinx*, genit. *sphing(is)*; neut. pl. adj. suff. *-ina*.]

Entom.: SpHINGES or Hawk-moths; a group of Heterocera, having the antennæ fusiform. [CREPUSCULARIA, HAWK-MOTH.]

†**sphîn-gür-ûs**, *s. pl.* [Mod. Lat. *sphingur(us)*; Lat. fem. pl. adj. suff. *-inæ*.]

Zool.: A synonym of SYNETHERIA (q.v.), with three genera: Erithizon, Chetomys, and SpHINGURIA (= SYNETHERA). [TREE-POCUPINES.]

†**sphîn-gür-ûs**, *s.* [Gr. *σφίγγω* (*sphinggō*) = to bind tight, to squeeze, and *οὐρά* (*oura*) = a tail.] [SPHINOURINA, SYNETHERIA.]

sphînx (pl. **sphînx-ês**), *s.* [Lat., from Gr. *σφίγξ* (*sphingx*).]

I. *Ordinary Language*:

1. *Lit.*: In the same sense as II. 1.

2. *Fig.*: One who proposes riddles, puts puzzles or obscure questions, or talks enigmatically.

II. *Technically*:

1. *Antiq.*: A fabled monster, half woman and half lion, said by the Grecian poets to have infested the city of Thebes, devouring its inhabitants till such time as a riddle had proposed to them should be solved. The riddle was as follows: "What animal is that which goes on four feet in the morning, on

SPHINX.

(From the British Museum.)

two at noon, and on three in the evening?" Numerous victims fell before the monster, till at length Œdipus, who was then at Thebes, came forward, and answered the sphinx that it was Man, who, when an infant, creeps on all fours; when he has attained to manhood goes on two feet; and, when old, uses a staff—a third foot. The sphinx thereupon flung herself down to the earth and perished; and Œdipus was, by the gratitude of the Thebans, chosen their king.

2. *Egypt. Antiq.*: A figure having the body of a lion, winged, and a human (male or female) head. Those with human heads were called Androsphinxes. Sphinxes are also represented with the heads of rams and hawks (Criosphinx, Hiercosphinx). The Egyptian sphinx had no wings; these were added by the Greek artists. The Grecian sphinx was probably borrowed from the Egyptian.

3. *Entomology*:

* (1) A comprehensive genus under which Linnaeus placed all Hawk-moths.

(2) The typical genus of SpHINGIDE. Hind wings rounded at the anal angle, or with a hardly perceptible projection. The species fly with great velocity in the dusk, remaining for a time poised above flowers, sucking the honey from them without alighting. The name is derived from the Sphinx-like attitude assumed by the caterpillar of *Sphinx ligustri*, the Privet Hawk-moth.

(3) Any individual of the modern genus SPHINX (2). In this sense the plural is SPHINGES.

4. *Zool.*: [SPHINX-BABOON.]

sphinx-baboon, *s.*

Zool.: *Cynocephalus sphinx*, a large species from the West of Africa. They are good-tempered and playful when young, but become morose and fierce as they grow older. They bear confinement well, and are common in menageries.

sphrâg-id, **sphrâg-id-ito**, *s.* [Gr. *σφραγίς* (*sphragis*), genit. *σφραγίδος* (*sphragidos*) = a seal, a signet; suff. *-ite* (*Min.*).]

Min.: A name given to a clay in ancient times used as a medicine, and stamped with a seal, hence the name. It was also called *Terra sigillata*, and is the *Terra Lemnia* of Pliny. Compos.: like all other clays, essentially a hydrated silicate of alumina, but contains some soda, hence its medicinal use.

sphra-gis-tics, *s.* [Gr. *σφραγιστικός* (*sphragistikos*) = pertaining to seals or sealing.] [SPHRAΓID.] The science of seals, their history, peculiarities, and distinctions. Its chief use is to determine the age and genuineness of documents to which seals are affixed.

fâto, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêrs; pine, pît, sire, sir, marine; gô, pôt, or, wôro, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, oûr, râle, fûll; trý, Sýrian. æ, œ = ê; eý = ä; qu = kw.

sphrig-ō-ais, s. [Gr. σφριγῶς (*sphrigōs*) = to be full to bursting.]

Veg. Pathol.: Morbid luxuriance in plants. It may exist in fruit trees, in cereals, in potatoes, &c. There is often a peculiar greenness, sometimes produced by fungi, which fore-shadows decay.

sphryg-mic, a. [Gr. σφρυγμός (*sphrygmos*) = the pulse.] Of or pertaining to the pulse.

sphryg-mō-grāph, s. [Gr. σφρυγμός (*sphrygmos*) = the pulse, and γράφω (*graphō*) = to write, to draw.]

Med.: An instrument used for recording the character of the movements of the pulse. An instrument for this purpose was constructed by Ludwig in 1847, and several forms of sphygmograph are now in use. That most generally employed was first described by Marey in 1868. It consists of an ivory pad, which rests on the pulse, and is connected with one end of a delicate spring, the other end of the spring being fastened to a framework.

MAREY'S SPHYGMOGRAPH.

The movements of the pulse, acting on the pad, are communicated to a system of two light levers, one of which carries a small point, or pen (a), which produces a trace on a piece of smoked glass or paper (b) attached to a brass plate, which is moved along by clock-work. The character of the trace thus produced depends on the character of the movements of the pulse, which are magnified about fifty times by means of the levers. The information gained by the examination of these sphygmographic traces is of the greatest value in the diagnosis of affections of the heart, &c.

sphryg-mō-grāph-ic, a. [Eng. *sphygmograph*; *-ic*.] Of or pertaining to the sphygmograph; traced or marked by a sphygmograph.

sphryg-mōm-ē-tēr, s. [Gr. σφρυγμός (*sphrygmos*) = the pulse, and Eng. *meter*.]

Med.: A comprehensive name for any instrument for measuring and recording the movements of the pulse.

sphryg-mō-phōne, s. [Gr. σφρυγμός (*sphrygmos*) = the pulse, and φωνή (*phōnē*) = sound.]

Med.: An instrument devised to enable a person to determine the rhythm, &c., of the pulse at a distance by means of the electric wire. (*Dunghison*.) The gas sphygmoscope is sometimes modified, so as to render the variation of the pulse audible.

sphryg-mō-scōpe, s. [Gr. σφρυγμός (*sphrygmos*) = the pulse, and σκοπέω (*skopēō*) = to observe.]

Med.: An instrument for rendering the movements of the pulse visible. Marey's sphygmoscope consists of a small glass cylinder containing a small indiarubber bag, connected with a receiving and a registering tambour. The expansion of the indiarubber bag, consequent on the pressure on the receiving tambour, compresses the air in the cylinder and so affects the recorder. The gas sphygmoscope consists of a metal chamber with a bottom of delicate membrane, with a service pipe at the side and a fine burner at the top. When the membrane is placed over an artery and the gas lit, the movements of the pulse are shown by up-and-down movements of the flame. [*SPHYGMOPHONE*.]

sphyræn-a, s. [Lat., from Gr. σφύραϊνα (*sphyraina*) = a kind of sea-fish.]

Ichthy.: Barracuda, the sole genus of the family Sphyrænidæ (q.v.). Large, voracious fishes from the coasts of tropical and subtropical seas. Some of them attain a length of eight feet, and attack bathers. They are used as food, but occasionally their flesh contracts deleterious properties, from their having fed on poisonous fishes.

sphyræn-i-dæ, s. pl. [Lat. *sphyræn(a)*; *Yem. pl. adj. suff. -idæ*.]

1. *Ichthy.*: A family of Mugiliformes (q.v.). Body elongate, sub-cylindrical, covered with

small cycloid scales; mouth wide, armed with strong teeth.

2. *Palæont.*: They commence in the Chalk. [*HYPSODON, SPHYRÆNODUS*.]

sphyræn-ō-dūs, s. [Lat. *sphyræn(a)*, and Gr. ὀδούς (*odous*) = a tooth.]

Palæont.: A genus of Sphyrænidæ, from the London Clay of Sheppey and the Eocene of Monte Bolca.

sphyr-āp-ī-ōūs, s. [Gr. σφύρα (*sphura*) = a hammer, and Lat. *picus* = a woodpecker.]

Ornith.: A genus of Picidæ, with seven species from the Nearctic region, Mexico, and Bolivia. *Sphyrapticus varius* is the Yellow-billed Woodpecker.

* **spī-āl, * spŷ-āl, s.** [*Ser, v.*]

1. Close watch. [*Udal: John vii.*]

2. A spy, a scout.

"Cessar (as our spiale say, And as we know) resemble with Tamburlaine." [*Mariotus: Tamburlaine, ll. 2.*]

spī-an-tēr-ite (an as ōw), s. [*Sw., Dan., Ger. spiauter* = spelter; *suff. -ite (Min.)*.]

Min.: The same as WURTZITE (q.v.).

spī-ca, s. [Lat. = an ear of corn.]

Surg.: A form of bandage resembling a spike of barley. The turns of the bandage cross like the letter V, each leaving a portion uncovered.

Spica Azimeth, s. [*SPICA VIRGINIS*.]

spica descendens, s.

Surg.: The uniting bandage used in rectilinear wounds. It consists of a double-headed riller, with a longitudinal slit in the middle, three or four inches long.

Spica Virginis, Spica Azimeth, s.

Astron.: A star of the first magnitude, a Virginis, in the constellation Virgo. If a line be drawn through two opposite angles of the rectangular figure in the Great Bear, and prolonged with a slight curve, it will pass through Spica Virginis.

spī-cate, spī-cāt-ēd, a. [Lat. *spicatus*, *pa. par. of spico* = to furnish with spikes; *spica* = an ear of corn.]

Bot.: Having a spike or ear; eared like corn.

spīc-ca-tō, adv. [*Ital.* = divided.]

Musiq.: A direction that every note to be played with a distinct and separate sound. It is marked by dots over the notes. In the case of instruments played with a bow, it denotes that every note is to have a distinct bow.

spīce, s. [O. Fr. *espice*, from Lat. *speciem*, *accus. of species* = a kind, a species (q.v.); *Sp. & Port. especia*; *Ital. spezie*; *Fr. epice. Spice and species* are thus doubtless.]

1. *Ordinary Language*:

* 1. *Lit.*: A kind, a species.

"The spices of penance ben three—that one of them is solempne, another is commune, and the thridde privie."—*Chaucer: Parson's Tale*.

2. *Fig.*: A small quantity which gives flavour or zest to a greater; a small admixture; a flavouring, a smack.

"If by hard work, it must be some kind that has a spice of adventure in it."—*Century Magazine*, April, 1882, p. 508.

II. *Comm.*: A general name for vegetable substances possessing aromatic and pungent properties, such as cinnamon, cloves, ginger, pepper, &c.

spīce-bush, s.

Bot.: (1) *Oreodaphne californica*; (2) *Spice-wood* (q.v.).

spīce-mill, s. A mill similar to a coffee or drug-mill, for grinding spices.

spīce-nut, s. A gingerbread nut.

* **spīce-plate, s.** A plate on which spice was laid, when it was the custom to take spice with wine. [*Halliwel*.]

"There was a viald of spice-plates and wine."—*Coron. Anne Boleyn* (Eng. Garner, ll. 50).

spīce-wood, s.

Bot.: A North American name for *Benzoin odoriferum*. Called also Spice-bush.

spīce, v.t. [*SPICE, s.*]

1. *Literally*:

1. To season with spice; to mix with spice; to mix aromatic substances with; to season.

* 2. To impregnate with a spicy odour.

"In the spiced Indian air by night, Full often she hath gossip'd by my side." [*Shakespeare: Midsummer Night's Dream, ll. 1.*]

II. *Figuratively*:

1. To season; to mix up with something which gives flavour or zest.

"They will patronise a highly-spiced sensational melodrama."—*Daily Telegraph*, Sept. 23, 1884.

* 2. To render nice or scrupulous.

"Take it, 'tis yours, Be not so spiced, it is good gold." [*Beaum. & Flac.: Mad Lover, III.*]

* **spīc-ēr, * spyo-er, s.** [*Eng. spic(e); -er*.]

1. One who seasons with spice.

2. One who deals in spice.

"A spicer or grocer named Petyr Gylle."—*Fobyan: Chronycle; King John* (an. 8).

* **spīc-ēr-ŷ, s.** [O. Fr. *espicerie*; *Fr. epicerte*.]

1. Spice generally or collectively; aromatic substances used in seasoning.

"With balm and wine, and costly spicerie." [*Spenser: F. Q. II. xl. 40.*]

2. A repository of spices.

"The spicerie, the cellar and its furniture, are too well known to be here insisted upon."—*Addison: On Italy*.

* **spī-cīf-ēr-ōūs, a.** [Lat. *spicifer* = bearing spikes or ears; *spica* = an ear, and *fero* = to bear.] Bearing ears, as corn; producing spikes; spicated.

† **spī-cī-form, a.** [Lat. *spica* = a spike, and *forma* = form.]

Bot.: Spike-like.

spī-cī-ness, s. [*Eng. spicy; -ness*.]

The quality or state of being spicy.

spīck, s. [*SPIKE*.]

spīck-and-span, a. & adv.

A. As adj.: Quite new or fresh, brand new.

"The spīck-and-span appearance presented by Marlow and Hastings after their journey."—*Asfere*, Feb. 27, 1887.

B. As adv.: Quite.

spīck-and-span new, a. [*Lit.* = spike and chip new, that is, new as from the workman's hands; cf. *Dut. spīckspeldernieuw* = spike and quite new; *Sw. spīck-spāngende ny*.] Entirely new; brand-new. [*SPANNEW*.]

"In the same dialog, to make a spīck-and-span new world."—*Scott: Redgauntlet*, letter xl.

spīck-nēl, s. [*SPIONEL*.]

spī-cōse, spī-coūs, a. [Lat. *spica* = an ear or spike.] Having spikes or ears; eared like corn; spicate.

spī-cōs-ŷ-tŷ, s. [*Eng. spīcos(e); -ity*.] The quality or state of being spīcose, or of having, or being full of ears, like corn.

spī-coūs, a. [*SPICOSE*.]

spīc-ŷ-la (pl. spīc-ŷ-læ), s. [*Mod. Lat., from spica* (q.v.).]

1. *Bot.*: (1) A small spike, a spikelet; (2) a pointed, fleshy, superficial appendage; (3) one of the points of the basidia of fungi or their aculeae.

2. *Zool.*: A fine pointed body like a needle. Spīcule are found in the body-mass of many of the Protozoa.

spīc-ŷ-lar, a. [Lat. *spiculum* = a dart.] Resembling a dart; having sharp points.

spīc-ŷ-late, a. [Lat. *spiculatus*, *pa. par. of spiculo* = to sharpen to a point; *spiculum* = a point.]

* 1. *Ord. Lang.*: Covered with or divided into fine points.

2. *Bot.*: Covered with fine, fleshy, erect points.

* **spīc-ŷ-lāte, v.t.** [*SPICULATE, a.*] To sharpen to a point.

"Extend a rail of elm, securely armed With spīcūlated palting." [*Mason: English Garden, II.*]

spīc-ŷ-le, s. [*SPICULA*.] A needle-shaped body.

"It is destitute of hard parts, spīcules or shell."—*Scribner's Magazine*, June, 1877, p. 156.

spīc-ŷ-lī-form, a. [*Eng. spīcule, and form*.]

Having the form of a spīcule.

spīc-ŷ-līg-en-ōūs, a. [Lat. *spicula* = a spīcule, and *gigno, pa. t. genui* = to produce.]

Containing or producing spīcules.

bōl, bōy; pōūt, jōwl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, çenophon, exist. ph = ç-clan, -tian = çhan. -tion, -sion = çhūn; -çion, -çion = çhūn. -çious, -çious, -çious = çhūn. -ble, -dle, &c. = beç, deç.

spic'-u-lum (pl. **spic'-u-la**), *s.* [Lat. = a little sharp point or sting, dimin. from *spica* = a thorn.]

Zool. : Any hard-pointed animal structure.

spic'-y, *a.* [Eng. *spice*(*e*); -*y*]

I. Literally :

1. Producing *spice* or *spices*; abounding with *spices*. (*Cowper: Charity*, 442.)

2. Having the qualities of *spice*; flavoured with *spice*; fragrant, aromatic.

"Cast round a fragrant mist of *spicy* fumes."
Addison: Virgil: Georgic iv.

II. Figuratively :

1. Having a sharp flavour or smack; pungent, pointed, keen: as, a *spicy* story.

2. Showy, handsome, smart: as, a *spicy* dress. (*Colloq.*)

spid'-er, * **spi-ther**, * **spi-thre**, * **spy-der**, *s.* [For *spinther*, from *spin* (q.v.); cf. *Dut. spin* = a spider; *Dan. spider*, from *spinde* = to spin; *Sw. spinnel*, from *spinnas*; *Ger. spinne*.]

I. Ord. Lang. : In the same sense as **II. 5.**

II. Technically :

1. *Billiards* : A rest having long legs, so as to stand over a ball.

2. *Domestic* :

(1) A kitchen utensil, with feet, adapted to be used on the hearth for baking or boiling.

(2) A griddle.

(3) A trivet.

3. *Machinery* :

(1) A skeleton of radiating spokes; as a sprocket-wheel (q.v.).

(2) The internal frame or skeleton of a gear-wheel, for instance, on which a cogged rim may be bolted, shrunk, or cast.

(3) The solid interior portion of a piston to which the packing is attached and to whose axis the piston-rod is secured.

4. *Nautical* :

(1) An outrigger to keep a block from the ship's side.

(2) An iron hoop around the mast for the attachment of the futtock-shrouds.

(3) A hoop around a mast provided with belaying-pins.

5. *Zoology* :

(1) The popular name of any individual of Huxley's Araneins (q.v.). The species are very numerous and universally distributed, the largest being found in the tropics. The abdomen is without distinct divisions, and is generally soft and tumid; the legs are eight in number, seven-jointed, the last joint armed with two hooks usually toothed like a comb. The distal joint of the palps is folded down on the next, like the blade of a pocket-knife upon the handle, and the duct of a poison-gland in the cephalothorax opens at the summit of the terminal joint. There are two or four pulmonary sacs and a tracheal system; eyes generally eight in number; no auditory organs have been discovered. Their most characteristic organ is the arachnidium, the apparatus by which fine silky threads—in the majority of the species utilized for spinning a web—are produced. In *Epeira diademata*, the Common Garden Spider, more than a thousand glands, with separate excretory ducts, secrete the viscid material of the web. These ducts ultimately enter the six prominent arachnidial spinnerettes, projecting from the hinder end of the abdomen, and having their terminal faces beset with minute arachnidial papillae, by which the secretion of the gland is poured out. By means of these silky threads, spiders form their dwellings and construct ingenious nets for the capture of their prey; these threads serve also as a safeguard against falling, and as a means of transport from one elevated object to another, being thrown out as a sort of flying bridge. The webs are in high repute for stanching blood; the threads are employed for the cross lines in astronomical telescopes, and have been made into textile fabrics as articles of curiosity. Spiders are essentially predaceous, and adopt various devices as nets, traps, and ambushes, for the capture of their prey; but the fate of the victim is always the same—the claw-joints of the palps are buried in the body, inflicting a poisonous wound, and the juices are then sucked out by the muscular apparatus appended to the œsophagus of the spider. The bite of noos of the species is

dangerous to man. [TARANTULA.] They are extremely pugnacious, and in their combats often sustain the loss of a limb, which, like the Crustaceans, they have the power of reproducing. The males are smaller than the females, which they approach with great caution, as they run great risk of being devoured, even at the time of impregnation. The eggs are numerous, and usually enveloped in a cocoon or egg-case; the young undergo no metamorphosis. The chief species are described in this Dictionary under their popular names.

"Scalger relates that in Gascony, his country, there are *spiders* of that virulence, that if a man treads upon them, to crush them, their poison will pass through the very soles of his shoes."—*Berham: Phys. Theol.*, bk. iv., ch. xiii. (Note.)

(2) A spider-crab (q.v.).

"Like all the other triangular Crustaceans, the fishermen inveterately term it '*spider*,' and they appear to have very little idea of any affinity between these forms and the crabs properly so called."—*Bell: Brit. Salt-eyed Crustacea*, p. 42.

spider-ant, *s.*

Entom. : A name sometimes applied to the European species *Mutilla* (q.v.), from the fact that the females have a somewhat spider-like appearance.

spider-catcher, *s.*

Ornithology :

1. *Arachnothera*, a genus of Indian birds, family *Meliphagide*.

2. The Wall-creeper (q.v.).

spider-crab, *s.*

Zool. : Any crab of the family *Maitide* (q.v.). One of the commonest is *Maita squinado*, the Spinous Spider-crab (q.v.).

spider-eater, *s.*

Ornith. : The same as SPIDER-CATCHER, 1.

spider-fly, *s.*

Entom. : A popular name for various insects of the genera *Hippobosca* and *Nycteribia*.

spider-line, *s.*

Optics : A filament of spider's web used in micrometers for delicate astronomical observations.

spider-mite, *s.*

Zool. (Pl.) : The *Gamasel*.

spider-monkey, *s.*

Zool. : A popular name for any individual of the genus *Ateles* (q.v.), so called because, in the opinions of the Europeans who first saw them in their native forests, their long limbs gave them some distant resemblance to immense spiders.

spider-orchis, *s.*

Bot. : *Ophrys aranifera*. Sepals yellow-green inside, petals oblong, lip broad and convex without an appendage, anther beaked. Found in copses and downs in the east of England.

spider-shell, *s.* [SCORPION-SHELL.]

* **spi'-dèred**, *a.* [Eng. *spider*; -*ed*.] Infested with spiders; cobwebbed.

"Context ead visit the poor *spidered* room."
Wolcott: Peter Pintar, p. 59.

spi'-dèr-like, *a.* [Eng. *spider*, and *like*.] Like or resembling a spider.

"*Spider-like*
Out of his self-drawing web he gives us acta."
Shakespeare: Henry VIII., l. 1.

spi'-dèr-wòrt, *s.* [Eng. *spider*, and *wort*.]

Botany :

1. *Sing.* : (1) The genus *Tradescantia*; spec., *Tradescantia virginica*; (2) *Anthericum serotinum*.

2. *Pl.* : The order *Commelyneceæ* (q.v.).

spilè-gel-ei'-sphen, *s.* [Ger. (See def.)]

Metal. : A name applied by the Germans to a variety of cast-iron, which is coarsely crystalline, the large crystal planes having bright reflections. Numerous analyses show that it contains about five per cent. of combined carbon, but although most, if not all, analyses show a fair proportion of manganese to be present it is still regarded as uncertain whether this element or the combined carbon determines the crystallization.

spier, *s.* [SPIRE, 3.]

spicèr, *v.t.* or *t.* [SPEIR.]

spif'-fy, *a.* [Etym. doubtful.] Spruce, fine, showy. (*Slang.*)

spif'-li-cate, *v.t.* [Etym. doubtful.] *
crush; to smash up. (*Slang.*)

"The way in which the learned, racy old Hector smashes and *spificates* scientific idiots . . . is delicious."—*British Quarterly Review* (1878), livk. 276.

spif-li-cá-tion, *s.* [Eng. *spificat*(*e*); -*tion*.] The act of spificating; the condition of being spificated.

"Whose blood he vowed to drink—the Oriental form of threatening spification."—*Burton: Et Medinâ*, l. 304.

spig'-èl-è-so, *s. pl.* [Mod. Lat. *spigel*(*ia*); Lat. fem. pl. adj. suff. -*ea*.]

Bot. : A tribe of *Loganiaceæ* (q.v.).

spi-gè'-li-a, *s.* [Named after Adrian Spigelius (died 1625), Prof. of Anatomy and Surgery at Padua, and a botanical author.]

Bot. : The typical genus of *Loganiaceæ*. Calyx five-parted; corolla funnel-shaped; limb five-lobed; anthera converging; capsule two-celled, four-valved, many-seeded. Known species about thirty, from the warmer parts of America. Various species, as *Spigelia glabra*, are poisonous; *S. marilandica*, the Carolina Pink-root, and *S. Anthelmia*, are antheimotic and narcotic.

spi-gè-li-à'-cè-so, *s. pl.* [Mod. Lat. *spigel*(*ia*); Lat. fem. pl. adj. suff. -*acea*.]

Bot. : The same as *LOGANIACEÆ* (q.v.).

spi-gè'-li-an, *a.* [SPIGELIA.]

Anat. : Of or pertaining to Spigelias; applied to the *lobulus spigelii*, a lobe of the liver lying behind the fissure for the portal vein.

* **spight** (*gh* silent), *s.* & *v.* [SPITE, *s.* & *v.*]

spight (*gh* silent), *s.* [SPECHT.]

spig'-nel, *s.* [A corrupt. of *spikenail* (q.v.).] The common name of plants of the genus *Atlamanta*.

spig'-nèt, *s.* [A corrupt. of *spikenard* (q.v.).] **Bot.** : *Aralia racemosa*.

spig'-òt, * **spig'-gòt**, * **spig'-otte**, * **speg-et**, * **spyk'-ette**, *s.* [Irish & Gael. *spicard*, dimin. of *spice* = a spike (q.v.); *Wel. ysbigod* = a spigot; *ysbig* = a spike. All from *Lat. spica* = a spike.] A pin or peg used to stop a vent or to command the opening through a faucet; a spile.

"Then take out the *spigot* with your left hand, and clap the point of it into your mouth."—*Burton: Directions to the Butler*.

spigot-joint, *a.* [FAUCET-JOINT.]

* **spi-gür'-nel**, *s.* [Etym. doubtful.]

Law : A name formerly given to the seal of the writs in Chancery.

spike (1), * **spycke**, * **spyke**, *s.* [Lat. *spica* = an ear of corn, a point, a spike. Cf. *Irish spic*; *Gael. pic*; *Wel. pig*; *Ice. spik*; *Sw. spik*; *Dan. spiger*; *Ger. spieker*; *Dut. spijker* = a nail. All due to *Lat. spica* = an ear of corn, a point, a spike.]

I. Ordinary Language :

1. An ear of corn or grain.

"The gleucers spread around, and here and there, *Spike* after *spike*, their scanty hat vest pick."
Thomson: Autumn, 188.

2. A large nail or pin, usually of iron, but sometimes of wood. **Spicif.** : In base-ball, one of a set of sharp nails projecting from the sole of a player's shoe, to prevent him from slipping when running the bases.

3. A piece of pointed iron, like a long nail, inserted with the point outwards, as on the tops of walls, gates, &c., to prevent persons from passing over them.

"He had climbed across the *spikes*."
Tennyson: Princess, (ProL 111.)

4. A nail or piece of iron with which the vents of cannon are plugged up to destroy their efficiency.

* 5. Something resembling an iron or wooden spike.

"He wears on his head the *corona radiata*, another type of his divinity; the *spikes* that shoot out represent the rays of the sun."—*Addison*.

II. Botany :

1. A kind of inflorescence, having flowers sessile along a common axis, as in *Plantago*. [COMPOUND-SPIKE.]

"These latter in their turn developed *spikes* of bloom nearly equal to the earlier ones."—*Fitch*, Oct. 3 1885.

2. The same as SPIKE-LAVENDER (q.v.).

spike-lavender, s.

Bot.: *Lavandula Spica*.

spike-nail, s. A nail of three inches or upwards in length.

"Which they received with a great deal of indifference, except hatchets and spike-nails."—Cook; *Second Voyage*, bk. I, ch. iv.

spike-oil, s.

Chem.: A volatile oil obtained by distilling the leaves and stalks of the lavender. It is less agreeable than lavender oil, specifically heavier, and deposits a larger quantity of camphor.

spike-plank, s.

Naut.: In arctic navigation, a platform projecting across the vessel before the mizzenmast, to enable the ice-master to cross over and see ahead, so as to pilot her clear of the ice. It corresponds with the bridge in steamers.

spike-rush, s.

Bot.: The genus *Eleocharis*.

spike-team, s. A wagon drawn by three horses, or by two oxen and a horse. (Amer.)

spike-wheel propeller, s. A mode of propulsion of canal-boats, in which a spiked wheel, driven by the engine, is made to track upon the bottom of the canal, and thus draw the boat. The spiked-wheel operates outside the boat, or in a compartment inside open at bottom.

spike (2), s. [Icel. *spik* = blubber; Ger. *speck* = fat, bacon.] Blubber.

spike-tackle, s.

Naut.: The tackle by which the carcase of a whale is held alongside while flensing.

spike-tub, s. A vessel in which the fat of bears, seals, and minor quarry is set aside till an opportunity occurs for adding it to the blubber in the hold. (Smyth.)

spike, v.t. [SPIKE (1), s.]

- 1. To fasten with spikes or long nails. "Lay long planks upon them, spiking or pinning them down fast."—Mortimer; *Hubandry*.
2. To set with spikes; to furnish with spikes.
3. To fix upon a spike; to impale on a spike; to pierce with a spike.
4. To make sharp at the end, like a spike.
5. To stop the vent of, as of a cannon, with a spike.
"A battery of four guns, which he spiked."—Field, Sept. 4, 1856.
To spike a cannon or gun: To fill up the touchhole or vent by driving a spike into it, so as to render it unserviceable.

spiked, a. [Eng. *spike* (1), s.; -ed.]

- 1. Having spikes or ears; eared.
"In spiked corn, the leaf resembleth that which growth to reedes."—P. Holland; *Pittis*, bk. xviii, ch. vii.
2. Set with spikes.

spikes'-lét, s. [Eng. *spike* (1), s.; dimin. suff. -let.]

Bot.: A partial spike in grasses.

spike'-nard, s. [Eng. *spike*, and *nard*; Mod. Lat. *spica nardū*.]

1. Botany: (1) *Nardostachys Jatamansi*, called in Hindustan *Jatamansi* and *Balckhar*. The root, which is from three to twelve inches long in baths and at feasts as an unguent (cf. *Hor. Carm.*, II, xl, 16, 17; IV, xii, 16, 17), and the women of Nepal still employ oil in which the root has been steeped for perfuming their hair. The "ointment of apikenard," with which our Lord was anointed as he sat at meat in the house of Simon of Bethany (Mark xiv, 3; John xii, 3) was prepared from it. Its costliness may be inferred from the indig-

nant surprise of Judas (John xii, 5; cf. *Hor. ubi sup.*). Sometimes applied to the ointment itself, as in the example.

"She bows, she bathes her Saviour's feet With costly apikenard and with tears."—Tennyson; *In Memoriam*, xxxiii, 12.

spik'-y, spik'-ey, a. [Eng. *spike* (1), s.; -y.]

- 1. In the shape of a spike; having a sharp point or points.
2. Set with spikes.
"The spiky wheels through heaps of carnage tore."—Pope; *Homer*; *Iliad* xi, 886.
3. Resembling the spike of a grass. (*Nature*, xxxiii, (1886), p. 500.)

spi-lán'-thés, spi-lán'-thús, s. [Gr. *σπίλος* (*spilos*) = a mark, and *άνθος* (*anthos*) = flower.]

Bot.: A genus of Verbesinæ. Composites with yellow heads. Known species about forty. *Spilanthes oleracea*, or *S. Acemella*, var. *oleracea*, is the Para cress, cultivated in the tropics as a salad and potherb. The whole plant is acrid; the flower-heads are sometimes chewed to relieve toothache.

spile, s. [Dut. *spil*; Low Ger. *spile* = a bar, a stake; Ger. *spieß* = a skewer.]

- 1. A small plug of wood for stopping the spile-hole of a barrel or cask. The spile-hole is a small aperture made in the cask when placed on tap, usually near the bung-hole, to afford access to the air, in order to permit the contained liquid to flow freely.
2. A spout for sugar-water (the sap of the sugar-maple tree). [MAPLE-SUGAR.]
3. A stake driven into the ground to protect a bank, form wharves, abutments, &c.; a pile.
spile-borer, s. An auger-bit to bore out stuff for spiles.
spile-hole, s. [SPILE, s., l.]

spile, v.t. [SPILE, s.] To supply with a faucet or apigot, as a cask of liquor.

"I had them spiled underneath."—Marryat; *Pacha of Many Tales*; *The Greek Slave*.

spil'-y-kín, s. [Eng. *spill*, s.; dimin. suff. -kin.]

- 1. A small peg, of bone, wood, ivory, &c., used for taking the score at cribbage and other games.
2. (Pl.): A game played with such pegs; push-pin.

spil'-yng, s. [SPILE.]

Shipbuilding: 1. The edge curve of a plank or strake. 2. (Pl.): Dimensions taken from a straight-edge or rule to different points on a curve.

spil (1), *spil, *spille, s. [Prop. *speld*, from A.S. *speld* = a torch, a spill to light a candle with; Dut. *speld* = a pin; *spul* = the pin of a bobbin, spindle, axis; Icel. *speld*, *speldi* = a thin slice of board; *spildá* = a flake, a slice; Goth. *spilda* = a writing-tablet; M. H. Ger. *spelle* = a splinter; Ger. *spalten* = to cleave.]

- I. Ordinary Language:
1. A spile. [SPILE, s., l.]
"Have near the bunghole a little venthole, stopp'd with a spill."—Mortimer.
2. A piece broken off; a splinter.
"The same meale draweth forth spiles of broken and shivered bones."—P. Holland; *Pittis*, bk. xxii, ch. xxv.
3. A small bar or pin of iron.
4. A little sum of money.
"The bishops . . . were wont to have a spill or sportule from the credulous laity."—Ayiffe; *Parergon*.
5. A slip of paper rolled up, or a thin slip of wood used to light a candle, lamp, &c.
II. Shipwright: A small peg used to atop the hole left by a spike when drawn out.

spill (2), s. [SPILL, v.] A throw, a tumble, a fall. (Colloq.)

"A quick drive along the frosty road, ending in a harmless spill."—Field, Jan. 2, 1886.

spill, *spille, v.t. & i. [For *spild*, from A.S. *spylan*, *spyllan* = to destroy, from *spil* = destruction, orig. = a cleaving, from the same root as *spill* (1), s.]

- A. Transitive:
I. Ordinary Language:
1. To ruin, to destroy.
"If thou wilt go, quod she, and spill thyself, Take va."—Surrey; *Virgile*; *Æneid* II.

- * 2. To piece, set, or diversify with spilla or small pieces; to inlay. [SPILL (1), s.]
"Though all the pillars of the one were gullt, And all the others pavement were with ivry spilt."—Spenser; *F. Q.* IV, i, 5.
3. To throw, as from a horse or carriage. (Colloq.)

- 4. To suffer to fall or run out of a vessel; to lose or suffer to be scattered. (Applied only to fluids and substances whose particles are small and loose; as, To spill water out of a jug; to spill quicksilver; to spill powders. It differs from pour in denoting an accidental or undesigned loss or waste.)
"Like the fair pearl-necklace of the Queen, That burst in dancing, and the pearls were spilt."—Tennyson; *Florien*, 362.
5. To suffer or cause to flow out; to shed. (Applied especially with regard to blood. Formerly applied also to tears.)
"Enough of blood rests on my head, Too rashly spilled."—Scott; *Lord of the Isles*, III, 18.

II. Naut.: To discharge the wind from, as from the belly of a sail.

- B. Intransitive:

3. To fall. (Amer.)
"His body slumps off, and rolls and spills down the hill."—Burroughs; *Peppaton*, p. 217.
* 4. To be shed; to be suffered to fall; to be lost or shed.
"His was so topful of himself, that he let it spill on all the company: he spoke well indeed, but he spoke too long."—Watts.

* spillie, v.t. & i. [SPILL, v.]

spill'-ér, s. [Eng. *spill*, v.; -er.]

- 1. One who spills or sheds; a shedder.
2. A kind of fishing-line.
"In harbour they are taken by spillers made of a cord, to which divers shorter are tied at a little distance, and to each of these a hook is fastened with a bait: this spiller they sink in the sea where those fishes have their accustomed haunt."—Carver; *Survey of Cornwall*.

spill'-ét, spill'-lard (1 as y), s. [Apparently a dimin. from *spill* (1), s.] (See compound.)

spillet-fishing, spillard-fishing, s. A method of fishing practised in the west of Ireland, in which a number of hooks are set on snoods, and all on one line. Called also Bultow or Bultow-fishing.

spil'-li-kén, s. [SPILIKIN.]

spill'-íng, pr. par. or a. [SPILL, v.]

spilling-line, s. Naut.: A line to spill the wind out of a sail, by keeping it from bellying out when clewed up.

* spi-ló-gæ'-a, s. [Gr. *σπίλος* (*spilos*) = a spot, and *γαία* (*gaia*) = the earth.]

Bot.: A spurious genus of Coniomycetous Fungals, the immature state of various species of Cladosporium.

spi-ló-gá'-lê, s. [Gr. *σπίλος* (*spilos*) = a spot, and *γαλή* (*galê*) = a weasel.]

Zool.: A genus of Melidæ, frequently merged in *Mephitis* (q.v.).

spil-or'-nīs, s. [Gr. *σπίλος* (*spilos*) = a spot, and *ορνίς* (*ornis*) = a bird.]

Ornith.: A genus of Aquilinæ, with six species from the Oriental region and Celebes. Formerly made a sub-genus of *Circæetus* (q.v.).

spi-ló-síte, s. [Gr. *σπίλος* (*spilos*) = a spot; suff. -ité (*Petrol*).]

Petrol.: A gray slate occurring in the Harts Mountains, which encloses numerous dark-brown grains, giving it a spotted aspect.

spilt, pret. & pa. par. of v. [SPILL, v.]

spil'-tér, s. [SPILL (1), s.] One of the small branches on a stag's head. [SPELDEN.]

"Such spillers and frochings on their heads."—Howell; *Party of Beasts*, p. 62.

* spilth, s. [Eng. *spil*(1), v.; -th.] The act of spilling; that which is spilt or poured out lavishly.
"Our vaults have wept with drunken spilth of wine."—Shakesp.; *Timon of Athens*, II, 2.

spī-nā (pl. **spī-næ**), s. [Lat.] A thorn, a prickle; the backbone or spine.

spina-bifida, s.

Pathol.: Cleft spine; a congenital malformation of frequent occurrence, arising from arrest of development. It may be regarded as a hernia of the membranes of the spinal cord through a fissure in the wall of the bony canal. The person affected may occasionally survive till middle life, but the disease usually terminates fatally.

spī-nā-ceoūs (ce as *sh*), a. [SPINACH.]

Pertaining or relating to spinach, or to the class of plants to which it belongs.

spin'-ach, spin'-age (ach, age as *ÿg*), s.

[Ital. *spinace*; Sp. *espinaca*; Port. *espinafre*;

Low Lat. *spinacia*, *spinacium*, *spinathia*, *spinarium*, from Lat. *spina* = a thorn. So named from its pointed leaves, or from the processes of the seed.]

1. *Hort.*: The genus *Spinacia* (q.v.), and specially *Spinacea oleracea*, Common or Garden Spinach. It is a hardy annual with large, succulent, triangular leaves on long petioles. Its bome is unknown, but it is extensively cultivated in various countries. Some varieties have prickly, others smooth, seeds. The leaves are used as a vegetable; they are generally boiled and served with meat as a purée, or with cream and gravy, or pressed into a mould and served with poached eggs. In India the seeds are given for difficult breathing, inflammation of the liver, and jaundice. [HEATH-SPINACH, WILD-SPINACH.]

2. *Entom.*: A British geometer moth, *Cistaria dotata*.

spī-nā'-cī-a, s. [SPINACH.]

Bot.: Spinach; a genus of Chenopodiaceæ. Flowers dioecious, the males with five stamens, the females with four styles and simple stigmas. Known species, two. [SPINACH.]

spī-nāc'-ī-dæ, s. pl. [Mod. Lat. *spinax*, geit. *spinac(is)*; Lat. fem. pl. adj. suff. *-idæ*.]

1. *Ichthy.*: A family of Selachoidæ (q.v.), with ten recent genera, of which the most important are *Centrina*, *Acanthias*, *Centroprorus*, *Spinax*, *Seymour*, *Lemargus*, and *Echinorhinus*. No nictitating membrane; two dorsals, no anal fin; spiracles present; gill-openings narrow.

2. *Palæont.*: Two genera, *Palæospinax* and *Prognathodus*, from the Lias, and two, *Drepanophorus* and *Spinax*, from the Chalk.

spī-n'āl, a. [Lat. *spinalis*, from *spina* = the spine.] Pertaining or relating to the spine or backbone of an animal.

spinal-brace, s.

Surg.: A brace for remedying posterior curvature of the spine.

spinal-column, s. [SPINE.]

spinal-cord, spinal-marrow, s.
Anat.: That part of the cerebro-spinal axis which is situated within the vertebral canal. It extends from the margin of the *foramen magnum* of the occipital bone to about the lower part of the body of the first lumbar vertebra. It is continued above into the *medulla oblongata*, and ends below in a slender filament, the *filum terminale*, or central ligament of the spinal cord. It is invested by a membrane called the *pia mater*, surrounded by a sheath formed by the *dura mater*. Between this and the *pia mater* is the arachnoid membrane and the cerebro-spinal fluid. It is subject to various diseases, as spinal congestion, hemorrhage, irritation, meningitis, myelitis, paralysis, &c.

spī-nāx, s. [Lat. *spina* = a spine.]

Ichthy. & Palæont.: A genus of Spinacidae (q.v.), with three small species from the Atlantic and southern extremity of America. Each dorsal with a spine; spiracles wide, superior, behind the eye. [SPINACIDÆ, 2.]

spī-n'le, * spin-el, spin-nel (*Prov.*), * **spin-dele, * spin-dell, s.** [A.S. *spil*, from *spinnan* = to spin; O. Dut. *spille*; Dut. *spil* (for *spinnen*); O. H. Ger. *spinala*; Ger. *spille, spindle*. The *d* is excrement as in sound, thunder, &c.]

I. Ordinary Language:

1. In the same sense as II. 6.

"The enormous wheel that turns ten thousand *spindles*."—*Wordsworth: Excursion*, vii.

* 2. A long slender stalk.

"The *spindles* must be tied up, and, as they grow in height, rods set by them, lest by their bending they should break."—*Mortimer: Husbandry*.

3. Any slender pointed rod which turns round, or on which anything turns: as

(1) A shaft, as of a fusee; the axis of a capstan.

(2) The rod which forms the axis of a vane.

(3) A round connecting piece in a chair, as the vertical pieces uniting the seat and slst top.

(4) The stem of a door-knob, which actuates the latch.

* 4. Something very thin and slender.

"I am fall'n a way to nothing, to a *spindle*."—*Beaumont & Fletcher: Woman Pleas'd*, iv. 3.

II. Technically:

1. *Build.*: The same as *NEWEL* (q.v.).

2. *Founding*: The pin on which the pattern of a mould is formed.

3. *Geom.*: A solid generated by revolving a portion of a curve about a chord perpendicular to an axis of the curve. The spindle takes its name from the curve which is revolved, as the hyperbolic, the parabolic, the elliptic, &c., spindle.

4. *Lathe*: The arbor or mandrel. [HEAD-STOCK, TAIL-STOCK.]

5. *Mill*: A vertical shaft supporting the upper stone or runner of the pair in a flour-mill.

6. *Spinning*:

(1) A skewer or an axis upon which a bobbin is placed to wind the yarn as it is spun. As in a lathe, the spindles are said to be live or dead, according as they do, or do not, rotate. A ring-spindle has a travelling ring upon it.

(2) A pendent piece of wood for twisting and winding the fibres drawn from the distaff.

(3) The pin used in spinning-wheels for twisting the thread, and on which the thread, when twisted, is wound.

(4) A measure of length; a spindle of eighteen hanks of cotton yarn is 15,120 yards; a spindle of twenty-four heers of linen yarn is 14,400 yards.

7. *Shipwright*: The upper main piece of a masted mast.

8. *Vehicles*: The tapering end or arm on the end of the axle-tree. The hub of the wheel is slipped on the spindle, and is secured there by a linch-pin in some cases, and by a nut in others.

9. *Weaving*: The skewer in a shuttle on which a bobbin or cop of yarn or thread is impaled.

10. *Zool.*: [SPINDLE-SHELL.]

spindle-lathe, s. [LATHE.]

spindle-legged, a. Having long, thin legs.

spindle-legs, spindle-shanks, s. pl. Long, thin legs; hence applied to a long, slender person, humorously or contemptuously.

"The marriage of one of our heiresses with an eminent courtier gave us *spindle-shanks* and crumps."—*Tatler*.

spindle-mould, s.

Bot.: The genus *Fusarium*.

spindle-shanked, a. Spindle-legged (q.v.).

"This *spindle-shanked fellow*."—*Addison: Drummer*, l. 1.

spindle-shanks, s. pl. [SPINDLE-LEGS.]

spindle-shaped, a.

1. *Ord. Lang.*: Having the shape of a spindle; fusiform.

2. *Bot.*: Thick, tapering to each end, as the root of the long radish.

spindle-shell, s.

Zool.: *Fusus antiquus*. Called also Buckle, Roaring Buckle, and Red Wheel.

spindle-side, s. The female side in descent. [SPEAR-SIDE.]

"I am not sure that he does not think it a conspiracy of all those to settle the representation of the martial De Caxton on the *spindle-side*."—*Lytton: Caxton*, pt. xviii, ch. viii.

spindle-step, s. The lower bearing of an upright spindle. Used in mill-and spinning spindles.

spindle-stromb, s.

Zool.: The genus *Rostellaria* (q.v.).

spindle-tree, s.

Botany:

1. The genus *Euonymus* (q.v.); specif. *Euonymus Europæus*, so named because it furnishes a hard-grained wood which is used for spindles, pins, or skewers.

2. (*Fl.*) The order Celastraceæ (q.v.).

Spindle-tree oil:

Chem.: A fatty oil extracted by pressure from the seeds of the spindle-tree. It is clear, reddish-brown, has a repulsive odour, and bitter taste, soluble in alcohol and ether, sp. gr. 0.938, and solidifies between 12° and 16°.

spindle-valve, s. A valve having an axial guide-stem.

fâte, fât, fâre, amidst, whât, fâll father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sire, sir, marine; gô, pô, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ô; ey = â; qu = kw.

spindle-whorl, spindle-whirl, s.

Archaeol.: A small perforated disk forming a rude fly-wheel, formerly fixed on the spindle to maintain its rotatory motion before the introduction of the spinning-wheel. [SNAKE-STONE.] They are often met with in sepulchral chambers, and the oldest are probably of Neolithic age. The specimen in the illustration was found at Holyhead.

SPINDLE-WHORL.

spindle-worm, s.

Zool.: The caterpillar of an American moth, *Geartyna aea*, which burrows into the stem of maize and some other cereals.

*spin-dle, v.i. [SPINDLE, s.] To shoot, grow, or extend into a long slender stalk or body. (Cowper: Task, v. 11.)

spind-ling, s. [Eng. spind(e); -ing.] The Spindle-tree (q.v.). (Tennyson: Amphion, 92.)

spin-drift, s. [A variant of spoon-drift (q.v.).] Naut.: The blinding haze of salt water blown from the surface of the sea in a hurricane.

"Driving the spindrift like clouds of smoke before it."—Field, Dec. 19, 1855.

spine, s. [O. Fr. *espine* (Fr. *épine*), from Lat. *spina* = a thorn, a prickle, the spine; allied to spike (q.v.); Sp. *espina*; Port. *espinha*.]

I. Ordinary Language:

- 1. In any of the senses of II.
2. A ridge of mountains, especially a central ridge.

- 3. A longitudinal slit of a riddle.

II. Technically:

1. Bot.: An indurated branch or process formed of woody fibre and not falling off like a prickle from the part that bears it. Sometimes spines are transformed tendrils. Spines on the leaves are formed by the lengthening of the woody tissue of the veins, in which case they project beyond the margin of the leaf, as in the holly, or they arise from a contraction of the parenchyma of the leaves, as in the barberry.

"Roses, their sharp spines being gone." Two Noble Kinsmen, I. 1.

2. Comparative Anatomy:

(1) The vertebral column. [VERTEBRA.] "The spine, or backbone, is a chain of joints of very wonderful construction."—Paley: Nat. Theology, ch. viii.

(2) A slender, sharp or pointed process, as the nasal spine, the neural-spine, &c. Called also a Spinosus process.

(3) A stout, rigid, and pointed process of the integument, formed externally by the epidermis, and internally of a portion of the cutis. Sometimes used of stout, rigid, and pointed processes of the epidermis only.

- 3. Mach.: A longitudinal ridge; a fin.

spine-bearers, s. pl. [SPINOER.]

spine-tails, s. pl.

Ornith.: The family Dendrocolaptidae. They owe their popular name to their more or less rigid tail-feathers. Messrs. Scudder and Salvin divided the family into five sub-families: Furnariinae, Sclerurinae, Synalaxinae (to which the name Spine-tails is sometimes confined), Phylodinae, and Dendrocolaptinae.

spined, a. [Eng. spin(e); -ed.] Having spines; spiny: as, a spined caterpillar, spined cicadae. (Swainson & Shuckard: Insects, p. 406.)

spin-el (1), s. [Gr. σπινος (spinōs), σπινθήρ (spinthēr) = a spark (King); Lat. spinella; Fr. spinelle; Ger. spinel; Ital. spinella.]

Mineralogy:

1. The type species of a group of minerals called the Spinel Group, crystallizing in the isometric system, and being compounds of protoxide and sesquioxides with the typical formula ROR2O3.

2. A mineral occurring in crystals of octahedral habit, and very rarely massive. Hardness, 8.0; sp. gr. 3.5 to 4.1; lustre, vitreous to apendant, sometimes dull; colour, many shades of red, also blue, green, yellow, brown,

and black; sometimes nearly white, or colourless; transparent to opaque; fracture, conchoidal. Compos.: when pure, alumina, 72.0; magnesia, 28.0 = 100, corresponding with the formula, MgOAl2O3; but the magnesia is often partly replaced by other protoxides, and the alumina by sesquioxides, giving rise to many varieties. Dana thus distinguishes them:

- (1) Ruby or magnesia-spinel; with sp. gr. 3.82 to 3.85;
(2) spinel-ruby, deep red; (3) balas-ruby, rose-red; (4) rubicelle, yellow or orange-red; (5) almandine, violet.

(6) Ceylonite, or iron-magnesia spinel = pleonaste, containing much iron; colour, dark green to black. (7) Magnesia lime-spinel; colour, green. (8) Chlorospinel; colour, grass-green, with the iron constituent as sesquioxide.

(9) Flotite, containing over seven per cent. of oxide of chromium. Found embedded in crystalline limestone, and associated with calcite in various rocks, also in the dolomitic agglomerate of Monte Somma.

spinel-ruby, a. [BALAS-RUBY.]

spin-el (2), s. [Etym. doubtful.] Bleached yarn for the manufacture of inkle (q.v.).

*spino-löss, a. [Eng. spine, -less.] Destitute of a spine; hence, limp. [INVERTEBRATE.] "A remarkably stout feather, and three spinolöss oons."—Dickens: Uncommercial Traveller, iv.

spin-ell-āno, s. [Eng. spinel; suff. -ane (Min.).]

Min.: The same as NOSITE (q.v.).

spin-ell-ine, s. [Eng. spinel; suff. -ine (Min.).]

Min.: The same as SEMELINE (q.v.).

spin-ēs-cent, a. [Lat. spinescens, pr. par. of spinosus = to grow thorny; spina = a thorn.] Bot.: Tending to be spinous; somewhat spinous.

spin-ēt (1), spin-nēt, s. [O. Fr. spinette (Fr. épinette); from Ital. spinetta, dimin. of spina = a thorn. Named from a fancied resemblance of its quill plectra to spines or thorns.]

Mus.: An ancient keyed instrument similar in construction to, but smaller in size than, the harpsichord. The strings, which were placed at an angle with the keys, were sounded by means of leather or quill plectra.

SPINET.

"Educated only to work embroidery, to play on the spinet."—Macaulay: Hist. Eng., ch. vii. Dumb-spinet: [MANICHOARD.]

*spin-ēt (2), s. [Lat. spinetum, from spina = a thorn.] A small wood or place overgrown with thorns and briars; a spinney.

"A Satyr, lodged in a little spinet."—Ben Jonson: The Satyr.

*spin-ēt-ēd, a. [Eng. spinet (1); -ed.] Cleft, open, split. (Ascham.)

spin-īf-ēr-ōūs, a. [Lat. spina = a thorn, a spine, and fero = to bear.] Bearing or producing thorns or spines; thorny.

spin-ī-form, a. [Lat. spina = a thorn, a spine, and forma = form.] Having the form of a spine or thorn.

† spin-nīg-ēr-ī, s. pl. [Lat. spina = a spine, and gero = to bear or carry.]

Entom.: Spine-bearers; a division of Caterpillars in which they are armed with more or less branched spines, shed with every moult, but again renewed till the final one, when they disappear. Example, the caterpillars of Antiope, Io, and Atalanta. (Newman.)

spin-īg-ēr-ōūs, a. [Lat. spina = a thorn, a spine, and gero = to carry.] Bearing a spine or spines.

spin-ī-ness, *spin-1-ness, s. [Eng. spiny; -ness.] The quality or state of being spiny.

"Their cold and bloodless spininess."—Chapman: Itad, iii. (Comment.)

spīnk (1), *spynko, s. [Sw. dial. spink; Gr. σπινγος (spinggos) = a finch.] A finch, a chaffinch.

"The spink chauns sweetest in a hedge of thorns." Harris.

spīnk (2), s. [Dut. pinkster bloem, from pinkster = Pentecost, at which the plant blooms.] Bot.: Cardamine pratensis.

spin-na-kör, s. [SPIN, v.]

Naut.: A jib-headed racing sail carried by yachts, set when running before the wind on the opposite side to the mainsail.

"Both hauled up spinmakers as they crossed the line."—Field, Oct. 3, 1855.

spin-nēr, s. [Eng. spin, v.; -er.]

1. One who or that which spins; one skilled in spinning.

"The spinner is almost always a distinct person from the weaver."—Smith: Wealth of Nations, bk. i, ch. l.

2. A spinning-machine.

3. A garden-spider.

"Weaving spiders, come not here; Hence, you long-legged spinners, hence!"—Shaksp.: Midsummer Night's Dream, II. 2.

4. A spinneret. (q.v.).

spin-nēr-ēt, s. [Eng. spinner; dimin. suff. -et.]

Comparative Anatomy:

1. Any one of the mammilla projecting from the arachnidium in Spiders. These mammillae are little conical or cylindrical organs, four or six in number, through which the secretion of the glands of the arachnidium is passed, and moulded into a proper thread-like shape for the formation of a web or line.

2. A tubular organ in the labium of caterpillars, communicating with two internal glands which furnish the silk from which the animal spins its cocoon.

spin-nēr-ūle, s. [Eng. spinner; dimin. suff. -ule.]

Compar. Anat.: One of the minute horny tubes which compose the spinneret in the Araneina.

spin-nēr-ŷ, s. [Eng. spinner; -y.] A spinning-mill.

spin-neŷ, spin-nŷ, s. [O. Fr. spinoyes (Fr. épinait) = a thorny place, from Lat. spinetum.] [SPINET (2).] A small wood with undergrowth; a clump of trees; a small grove or shrubbery.

"The strip of grass land which lies between the spinneys and the farm."—Field, April 4, 1855.

spin-nīng, pr. par. or a. [SPIN, v.]

spinning-head, s. A form of spinner in which the drawing and twisting mechanism are united in one head. This was the first form of spinning-machine, if we except the spinning-wheel. It was invented by Lewis Paul, and patented by him in 1738.

*spinning-house, s. An English house of correction, so-called because women of loose character had to spin or to beat hemp there as a punishment. The House of Correction for offenders within the jurisdiction of Cambridge is, or was till recently, so-called.

spinning-jenny, s. The name given by James Hargreaves to the spinning-machine invented by him in 1767. The name jenny is a corruption of engine, the term gin being a common local expression for a machine. It consisted of a number of spindles turned by a common wheel or cylinder worked by hand.

spinning-mill, s. A mill or factory where spinning is carried on.

spinning-roller, s. A wheel in the drawing portion of a spinning-machine.

spinning-wheel, s. A machine for spinning wool, cotton, or flax into threads. It consists of a large wheel, band, and spindle, driven by foot or by hand. The wool is carded into rolls, which are twisted, drawn, and wound a length at a time, the wheel being turned periodically to twist the yarn. It was the first great improvement upon spinning by a distaff and spindle.

At first spinning was performed by the spindle and the distaff. Representations of the process are on the Egyptian tombs. The spinning-wheel was invented in Nuremberg about 1530, and was introduced into England a few years after. In 1767 James Hargreaves invented the spinning jenny, and Arkwright the spinning frame in 1769; then followed the mule jenny, invented by Crompton, in 1774-9.

*spin-ny (1), a. [SPINY, a.]

spin-nŷ (2), s. [SPINNEY.]

spin-ōse, a. [SPINOUS.]

boŭl, boŷ; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = ʔ -cian, -tian = shqn. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bpl, dpl.

spin-ös'-Y-tÿ, s. [Eng. spinos(e); -ity.]

I. Lit. : The quality or state of being spinous or thorny.

* 2. Fig. : Something thorny, harsh, or crabbed.

"He [Jeremy Taylor] could bear with the bareness and roughness of the schools, and was not unwise in their subtilties and spinosities."—Wood : Athenæ Oxon., vol. II.

spi-nō-sō, pref. [Lat. spinosus.] Spinous.

spinoso-dentate, a.

Bot. : Having teeth tipped with spines.

spin-ōūs, a. [Lat. spinosus, from spina = a thorn, a spine.]

1. Lit. & Bot. : Full of spines; armed with spines or thorns; thorny.

2. Fig. : Thorny, crabbed, sharp.

"Nor needeth it any spinous criticisms for its explication."—Macle : Works, disc. 4.

spinous-leaf, s.

Bot. : A leaf having its margin beset with spines, as in thistles.

spinous-loach, s.

Ichthy. : *Cobitis taenia*, an European species of the Loach genus. It is about three inches long, and less valued for food than the Common Loach. [LOACH.]

spinous-process, s.

Anat. : A sharp projection, as of a vertebra or of the sphenoid bone. To the former Owen gave the name Neural-spine.

spinous-shark, s.

Ichthy. : *Echinorhinus spinosus*. "The Spinous-shark is readily recognized by the short, bulky form of its body, short tail, and large spinous tubercles. It is evidently a ground shark, which probably lives at some depth, and but accidentally comes to the surface. More frequently met with in the Mediterranean. It has been found several times on the south coast of England and near the Cape of Good Hope."—Günther : Study of Fishes, p. 334.

spinous spider-crab, s.

Zool. : *Maia spinadno*, common on the south and west coasts of England. The carapace is convex, spinous, and tuberculated, and grows somewhat triangular by the increase in length of the rostral portion.

Spī-nō-zīsm, s. [See def.]

Hist. & Philos. : The monistic system of Baruch Despinosa (or Benedictus de Spinoza), a descendant of Portuguese Jews who had sought refuge in Holland from the cruelties of the Inquisition. He was born at Amsterdam (Nov. 24, 1632), and his father, an honourable but not very wealthy merchant, intended him for a theological career. His education was superintended by the Talmudist Saul Levi Mortiera, but unsatisfied doubts kept him from the profession of a Jewish teacher, and his determined and continued refusal to attend the Synagogue gave such offence that in 1656 he was solemnly excommunicated. (The terrible formula is printed at length in *Leaves: Hist. Phil.* (ed. 1880), ii. 167-71.) For a short time Spinoza became an assistant in a school kept by a physician named Vanden Ende, but he soon resigned this post and afterwards maintained himself by the art of polishing lenses, which, in accordance with the Jewish custom of teaching every boy some trade or handicraft, he had learnt in his youth, though this source of income was afterwards increased by a small annuity settled on him by his friend de Vries. After a life of study, abstemiousness, and bodily and mental suffering, Spinoza died at the Hague (Feb. 21, 1677), at the age of forty-four. The system of Spinoza has been described as Atheism, as Pantheism, and as the most rigid Monotheism, according as his cardinal teaching—that there is only One Substance, God—has been interpreted. By Substance, however, Spinoza meant the underlying reality and ever-living existence, and he chose for the epigraph of his *Ethics* the words of St. Paul : "In Him we live, and move, and have our being" (*Acts xvii. 28*). God is for him the one principle, having Thought and Extension as two eternal and infinite attributes constituting its essence, of which attributes Mind and Matter are the necessary manifestations; and thus he solves the problem of the relation of the Finite to the Infinite. Everything is a form of the ever-living existence, the Substance, God, which is, and is not, Nature, with which He is no more to be confounded than the fountain with the rivulet or eternity with time. God is

natura naturans, Nature is *natura naturata*; the one is the energy, the other is the act. In the same way he explains the union of the soul with the body. Man is but a mode of the Divine Existence; his mind a spark of the Divine Flame, his body a mode of the Infinite existence.

"Neither in Holland nor in Germany has there been a Spinozist, as there have been Cartesian, Kantists, and Hegelians, although German philosophy is in some sense saturated with Spinozism."—Leaves : *Hist. Philos.* (ed. 1880), ii. 211.

Spī-nō-zīst, s. [SPINOZISM.] A supporter of or believer in the doctrines of Spinoza.

spin'-stōr, *spynn-sterē, s. [A.S. spinnan = to spin; j. suff. -estre, -ster.]

I. Ordinary Language :

* 1. A woman who spins or whose occupation is to spin; a spinner.

"The spinster's distaff stood unemployed."—*Idler*, No. 2.

¶ It was formerly applied also to a male spinner, as in *Shakespeare: Henry VIII.*, i. 2.

* 2. A woman of evil life or character; so called in England from their being obliged to spin in the House of Correction as a punishment. [SPINNING-HOUSE.]

"Many would never be wretched spinsters were they spinsters in deed, or come to so public and shameful punishments if painfully employed in that vocation."—*Fuller: Worthies of England; Kent.*

3. Any unmarried woman of marriageable age.

II. English Law : The common term for an unmarried woman, from a viscount's daughter downward.

¶ It is also used adjectively : as, a spinster aunt—i. e., unmarried.

* spin'-strōss, s. [A double fem. from spin.] A spinster.

* spin'-strÿ, s. [Eng. spinster; -ÿ.] The business or occupation of spinning.

"What new decency can then be added by your spinstry?"—*Milton: Reasons of Church Government*, bk. II., ch. II.

* spin'-tōxt, s. [Eng. spin, and text.] One who spins out sermons; a prosy preacher.

"The race of formal spinsters and solemn sayers is nearly extinct."—*Arnot: Winter Evenings*, even. 9.

spin'-thēre, s. [Gr. σπινθήρ (spinthēr) = a spark.]

Min. : The same as SEMELINE (q. v.).

spin'-ūle, s. [Lat. spinula, dimin. from spina = a spine, a thorn.] A minute spine.

"The serrulations being composed of spinules."—*Trans. Amer. Philos. Society* (1873), p. 287.

spin'-ū-lēs'-çent, a. [Mod. Lat. spinulescens, from Lat. spinula = a little thorn.]

Bot. : Having a tendency to produce small spines.

spin'-ū-lōse, † spin'-ū-loūs, a. [Mod. Lat. spinulosus, from spinula = a little thorn.]

Bot. : Covered with small spines.

spin'-ū-lō-sō, pref. [SPINULOSE.] Covered with small spines.

spinuloso-ciliate, a.

Bot. : Spinulose with fine spines.

spin'-ÿ, * spin'-le, * spin'-ny, a. [Eng. spin(e); -ÿ.]

I. Literally :

1. Full of or furnished with spines; thorny.

* 2. Like a spine; hence, slender.

"Cold spinie grasshopper."—*Chapman: Homer; Iliad III.*

II. Fig. : Thorny, perplexing, difficult, troublesome.

"So difficult and thorny an affair."—*Dickens: On Bedes.*

spiny-finned fishes, s. pl.

Ichthy. : The Acanthopterygii (q. v.).

spiny-lobster, s.

Zool. : *Palinurus vulgaris*. [ROCK-LOBSTER.]

spiny-rat, s.

Zool. : The genus *Echinomys*, small rodents from the country east of the Andes and some of the West Indian islands. The fur is mixed with small spines, whence their scientific and popular name.

* spin'-ÿ, s. [SPINNEY.]

spī'-ō, s. [Lat. = a sea nymph in the train of Cyrene.]

Zool. : The typical genus of Spionidae (q. v.). Body long, slender, tapering, with sixty joints, terminating in two short styles; head with long cirri and two very long tentacles; eyes four; colour pale, with pink cirri. It occupies a very slender tube composed of adventitious matter, slightly agglutinated, and placed on articularian zoophytes.

* spī'-ōn, s. [O. Fr. *espion*.] A spy, a scout.

"Captain of the *espions*."—*Heywood*.

spī'-ōn'-ÿ-dōe, s. pl. [Mod. Lat. *spio*, genit. *spionis*(s); Lat. fem. pl. adj. suff. -īdōe.]

Zool. : A family of Tubicolæ (q. v.).

spī'-g, s. [Lat.]

Arch. : The base of a column. This member did not exist in the Doric order, but is always present in the Ionic and Corinthian. [See illustration under BASE (I), 4.]

* spīr'-a-ble, a. [Lat. *spirabilis*, from *spiro* = to breathe.] Capable of being breathed; respirable.

"The spirable odor . . . ascending from it."—*Nash: Lenton Staffe*.

spīr'-a-cle, * spyr'-a-kle, s. [Fr. *spiracle*, from Lat. *spiraculum* = an air-hole, from *spiro* = to breathe.] Any small hole, aperture, orifice, or vent in animal or vegetable bodies, by which air or other fluid is inhaled or exhaled. Applied to the breathing tubes of insects, the blowholes of cetaceans, &c.

spīr'-rōe'-g, s. [Lat., from Gr. *σπείρα* (*spira*) = the meadow-sweet. (See def.).]

Bot. : The typical genus of Spiræidæ (q. v.). Calyx inferior, equally five-cleft, persistent; petals five, roundish; follicles three to twelve, usually distinct, one-celled, two-valved, with few seeds. Known species fifty, from the temperate and cold parts of the northern hemisphere. *Spiræa tomentosa*, or Hardhack, an United States species, is used as a tonic and astringent. The Meadow-sweet of Europe (*S. ulmaria*), has strongly fragrant flowers, from which a distilled water is prepared.

spiræe-oil, s. [SALICYLOL.]

spīr'-rōe'-ÿ-dōe, s. pl. [Lat. *spiræa*(s); Lat. fem. pl. adj. suff. -īdōe.]

Bot. : A family of Rosaceæ. Calyx tube herbaceous, fruit a ring of follicles, seeds not winged.

spīr'-rōe'-in, s. [Mod. Lat. *spiræa*(s); -in (Chem.).]

Chem. : $C_{30}H_{50}O_{14}$ (?). A colouring mass extracted from the flowers of *Spiræa Ulmaria* by ether. It is a yellow crystalline powder, insoluble in water, soluble in alcohol and ether, the solutions being of a deep green colour when concentrated, yellow when dilute. Its alcoholic solution forms a yellow precipitate with baryta-water, crimson with lead acetate, dark green with ferrous salts, and black with ferric salts.

spīr'-al (1), a. [SPIRE (1), s.] Pointed or shaped like a spire.

spīr'-al (2), a. & s. [Fr., from Lat. *spiralis*, from *spiro* = a coil, a twist, a wreath; Sp. *espiral*; Ital. *spirale*.] [SPIRE (2), s.]

A. As adjective :

1. Winding about a fixed point or centre, and continually receding from it, like a watch-spring.

"Some watches have strings and physica, and others none; some have the balance loose, and others regulated by a spiral spring, and others by logs' bristles."—*Locke: Human Understanding*, bk. III., ch. vi.

2. Winding about a cylinder or other round body, and at the same time rising or advancing forward.

"From this a tube, or round body, was formed, by which the water, or air, or both, was carried in a spiral stream up to the clouds."—*Cook: Second Voyage*, bk. I., ch. vi.

B. As substantive :

1. Geom. : A curve which may be generated by a point moving along a straight line, in the same direction, according to any law whilst the straight line revolves uniformly about a fixed point, always continuing in the same plane. The portion generated during one revolution is called a Spire. The moving point is the generatrix of the curve, the fixed point is the pole of the spiral, and the distance from the pole to any position of the generatrix is the radius vector of that point. The law according to which the generatrix

moves along the revolving line is the law of the spiral, and determines the nature of the curve. Any position of the revolving line, assumed at pleasure, is called the initial line. Spirals are known by the names of their inventors, or by terms derived from the properties by which they are characterized: as, the spiral of Archimedes, hyperbolic spirals, logarithmic spirals, parabolic spirals, &c.

2. A helix or curve which winds round a cylinder like a screw.

spiral-bit, s. A wood-boring tool, made of a twisted bar of metal, with a hollow axis.

spiral-gearing, s. [SPIRAL-WHEELS.]

spiral-pipe-oven, s.

Metall.: An arrangement for heating air for the blast furnace, consisting of a long spiral of cast-iron pipes, connected with each other by cemented socket joints, through which the air to be heated circulates.

spiral-pump, s. A form of the Archimedeian screw water-elevator, consisting of a pipe coiled spirally round an inclined axis.

spiral-screw, s. A screw formed upon a conical or conoidal core.

spiral-spring, s. A coil whose rounds have the same diameter, and which is generally utilized by compression or extension in the line of its axis.

Spiral-spring coupling: A coupling for a pair of shafts meeting at an angle. The ends of the spiral connect to the respective shafts and make a bent coupling.

spiral-vessels, s. pl.

Bot.: Membranous tubes with conical extremities, their interior occupied by a fibre twisted spirally, and capable of unrolling with elasticity. Called also Tracheæ. They are designed for the transmission of air. When formed by the convolutions of a single spiral they are called Simple, when by those of many turning in the same direction they are called Compound.

spiral-wheels, s. pl.

Mech.: A species of gearing which serves the same purpose as bevel-wheels, and is better adapted for light machinery. The teeth are formed upon the circumferences of cylinders of the required diameter, at an angle with their respective axes, when the direction of the motion is to be changed. By this construction the teeth become in fact small portions of screws or spirals winding round the cylinders. Wheels of this kind are used when the two shafts require to pass each other; when the shafts are in the same plane bevel-wheels are employed.

***spi-rāl-i-ty, s.** [Eng. *spiral* (2); -ity.] The quality or state of being spiral.

spir-al-ly, adv. [Eng. *spiral* (2); -ly.] In a spiral form or direction; in the manner of a screw.

"The slides are composed of two orders of fibres, running circularly or spirally from base to tip."—*Ray: On the Creation.*

spir-ant, s. [Lat. *spirans*, pr. par. of *spiro* = to breathe.] A consonant in the articulation of which the breath is not wholly stopped, the articulating organs being so modified as to allow the sound to be prolonged, a continuous consonant, such as *h, th, f, v, &c.*

spi-rān-thēs, s. [Gr. *σπειρα* (*speira*) = a spire, and *άνθος* (*anthos*) = a flower. Named from the twisted inflorescence.]

Bot.: Lady's Tresses; the typical genus of Spiranthideæ. Spike of small flowers in one to three spirally-twisted rows; sepals and petals similar, the former gibbous at base, upper part adnate to the petals, forming a tube round the lip; pollen masses four, powdery; stigma discoid. Known species forty-six, from tropical and temperate countries. *S. gracilis*, the Lady's Tresses, is a very delicate plant, found in old woods in New England.

spi-rān-thi-ās, s. pl. [Mod. Lat. *spiranthes* (*anthos*), and Lat. fem. pl. adj. suff. -idae.]

Bot.: A family of Arethuseæ.

spi-rān-thy, spoi-rān-thy, s. [SPIR-ANTHES.]

Bot.: The occasional twisted growth of the parts of a flower.

***spi-rā-tion, s.** [Lat. *spiratio*, from *spiratus*, pa. par. of *spiro* = to breathe.] The act of breathing.

"To other substances, void of corporeal bulk and cohesion, the name of spirit is assigned to imply the manner of their origin, because God did, by a kind of spiration, produce them."—*Barrow: Sermons*, vol. II., ser. xxxiv.

spire (1), *spir, s. [A.S. *spīr*; cogn. with Icel. *spira* = a spar, a stilt; Dan. *spire* = a germ, a sprout; Sw. *spira* = a sceptre, a pistol; Ger. *spiere* = a spar.]

spirit-duck, s. Ornith.: Clangula albeola, from North

America. Head and neck golden green, a patch on the head, one behind the eyes, the lower part of the neck, the breast, and belly white, the rest dusky white.

spirit-hand, s. A form of spirit-manifestation in which phosphorescent hands, said to be those of spirits, are visible.

"We had . . . spirit-hands touching us."—The Medium, Feb. 2, 1872.

spirit-lamp, s. A lamp burning alcohol. Used for many purposes in the arts where heat rather than light is required.

spirit-leaf, spirit-weed, s. Bot.: Cryptanthus barbadosis; called also Ruellia tuberosa.

spirit-level, s. An instrument used for determining a line or plane parallel to the horizon, and also the relative heights of two or more stations. It consists of a glass tube nearly filled with alcohol, preferably coloured. The remaining space in the tube is a bubble of air, and this occupies a position exactly in the middle of the tube when the latter is perfectly horizontal. The tube is mounted on a wooden bar, which is laid on a beam or other object to be tested; or it is mounted on a telescope or theodolite, and forms the means of bringing these instruments to a level, the slightest deviation from the horizontal position being indicated by the bubble rising toward the higher end of the tube.

Spirit-level quadrant: An instrument furnished with a spirit-level and used for taking altitudes.

spirit-manifestations, s. pl. A generic term for all the mysterious phenomena said to take place through the intervention of spirits in the presence of mediums.

"I am well aware that the problem of the so-called spirit-manifestations is one to be discussed on its merits, in order to arrive at a distinct opinion how far it may be concerned with facts insufficiently appreciated and explained by science, and how far with superstition, delusion, and sheer knavery."—Tylor: Prim. Cult. (ed. 1873), I. 142.

spirit-merchant, s. One who deals in or is licensed to sell spirituous liquors, as brandy, rum, whisky, &c.

spirit-meter, s. An instrument for measuring the volume, and registering the strength, of spirits passing through a pipe leading from a still.

2. Hist.: A system of professed communication with the unseen world, chiefly through persons called mediums. It is asserted that spirits manifest their presence by raps, by unfastening knots, by transporting furniture and human beings through the air, by the turning and tilting of tables, by writing on slates, playing on musical instruments, imparting phosphorescence to certain objects, and,

in some cases, by becoming partly or entirely materialized in human form. The first rappings are said to have been heard in April, 1848, in a house in Acadia, New York, inhabited by a Mr. Fox, whose daughters afterwards became mediums, and gave public sances in various towns in the United States. About 1852 American mediums came to London, and their claims were more strictly investigated than had been the case in their native country. In 1855 Mr. D. D. Home visited Europe, and afterwards the continent of Europe, where he is said to have shown his powers before many sovereigns, and to have strongly impressed Napoleon III. with their supernatural character. Since that time spiritualism has developed into a cult, and many persons have professed to believe in it, and to derive consolation from its teachings. Its opponents urge that two extremely suspicious circumstances attend so-called spirit-manifestations: that they always take place in the dark, and that the presence of a determined unbeliever is sufficient to prevent them. Moreover, it is indisputable that in some cases actual fraude have been practised by mediums, and many of the manifestations have been imitated by professional conjurers. Tylor (*Primitive Culture*, ch. iv.) looks upon spiritualism as a survival, and says:

"Our own time has revived a group of beliefs and practices which have their roots deep in the very stratum of early philology, where witchcraft makes its first appearance. This group of beliefs and practices constitutes what is now commonly known as spiritualism."

The system, however, is not without defenders; several newspapers and monthly magazines in England and America are devoted to its interests, and it has a voluminous and increasing literature. The *Spiritualist Magazine* (the oldest Spiritualist journal in England) has as its motto:

"Spiritualism is based on the cardinal fact of spirit truth relating to man's spiritual nature, capacities, relations, duties, welfare, and destiny; and its application to a regenerate life. It recognizes a continuous divine inspiration in man; it aims, through a careful reverent study of facts, at a knowledge of the laws and principles which govern the occult forces of the universe; of the relations of spirit to matter and of man to God and the spiritual world. It is thus catholic and progressive, leading to true religion as one with the highest philosophy."

3. Philos.: A wide term embracing all systems which are not Materialist; that is, which hold that Mind is not a function of, but something distinct from Matter (MATERIALISM), or which deny the existence of Matter. Thus the term covers all systems recognizing the existence of Mind and Matter, as well as those which, like the Idealism of Berkeley and the Egoism of Fichte, regard the external world as a succession of notions impressed on the mind by the Deity, or as the educt of this mind itself.

spōn-dŷ-lŷs, s. [Lat., from Gr. *σπόνδυλος* (*spondulos*) = a vertebra.]

Zool. & *Palæont.*: Thorax Oyster; a genus of Ostreidae (*Woodward*), of Pectinidae (*Tate*), formerly made the type of the family Spondylidae, with sixty-eight recent species, widely distributed in coral reefs. Shell irregular, with divergent ribs, terminating in foliaceous spines, attached to foreign bodies by right-valve; unbores wide apart and eared; lower valve with triangular hinge-area; two hinge-teeth in each valve. Animal like that of Pecten (q.v.). Water-cavities are common in the inner layer, the border of the mantle having deposited shell more rapidly than the umbonal portion. Eighty fossil species, from the Carboniferous onward. (*Woodward*.) Other authorities make it commence in the Jurassic.

*** spōne, s.** [SPOON.]

spōng, s. [E_{tyim}. doubtful.] An irregular, narrow, and projecting part of a field. (*Prov.*)
"The tribe of Judah with a narrow spang confined on the kingdom of Edom."—*Fisher*: *Pisgah Sight*, pt. II., bk. IV., ch. II.

spōngc, * spōunge, * spūnge, s. [O. Fr. *espōnge* (Fr. *éponge*), from Lat. *spongia*; Gr. *σπγγία* (*spongia*), *σπγγος* (*spongus*) = a sponge; Lat. *fungus* = a fungus (q.v.); Sp. & Port. *esponja*; Ital. *spugna, spugna*.]
I. Ordinary Language:

1. Literally:
(1) The fibrous framework of any species of *Spongia* (q.v.). It is soft, light, and porous,

easily compressible, readily absorbing fluids, and giving them out again on compression. Sponges are used for many domestic purposes—the finer qualities for the bath and toilet, and the coarser for washing paint-work, carriages, &c. Mattresses are acoustically stuffed with sponge, which is also employed as a filter and as a polishing material for fine surfaces. Sponges are obtained either by diving, or by tearing them from the rocks with a long pole. The former method is adopted for the better class of sponges. They are prepared for market by soaking them in dilute hydrochloric acid to cleanse them and remove adherent particles of carbonate of lime.

"Then with a sponge he drest
His face all over." *Chapman*: *Bomer*: *Mad xviii*.
(2) Any sponge-like substance, as, in baking-dough before it is kneaded and formed, when it is full of globules of carbonic acid generated by the yeast or leaven.

2. *Fig.*: One who pertinaciously lives upon others; a parasite, a sponger.

II. Technically:

1. *Metallurgy*: The extremity or point of a horseshoe, answering to the heel.

2. *Metallurgy*:
(1) Iron in soft or pasty condition, as delivered in a ball from the puddling-furnace.

(2) Iron ore reduced, but not melted, preserving its former shape, but porous and lighter by the removal of foreign matters.

(3) Platinum sponge (q.v.).

(4) The gold remaining from the parting process, after the silver has been dissolved by nitric acid from the alloy of gold and silver.

(5) Silver in a partly reduced condition, ready for refining.

3. *Ordn.*: A kind of mop for cleaning the bore of a cannon after a discharge.

4. *Pharm.*: Formerly burnt sponge was much given in goitre and strumous glandular swellings; but the iodine and bromine, from which it derived its value, are now administered in other forms.

5. *Zool.*: Any species of the genus *Spongia*, and popularly the three most commonly used—viz., *Euspongia officinalis*, the fine Turkey or Levant Sponge; *E. zimocca*, the Hard Zimocca Sponge, and *Hippospongia equina*, the Horse Sponge or common Bath Sponge. In the first, found in the Mediterranean and in the West Indies, the chief fibres are of different thicknesses, irregularly swollen at intervals, and cored by sand grains, while the uniting fibres are soft, thin, and elastic. In the second the chief fibres are thinner, more regular, and almost free from sand, while the uniting fibres are denser and thicker. The third has very generally a thick, cake-like form. The Yellow and Hard-headed Sponges of the American shores resemble *S. zimocca*; some at least of the Wool Sponges belong to *Hippospongia gossypina*, and the Velvet Sponge to *H. mediformis*.

¶ *To throw up the sponge*: A phrase taken from prize-fighting, where the loser's seconds throw the sponge into the air in acknowledgment of the defeat of their man; hence, to give in as beaten, to acknowledge one's self beaten. (*Colloq. or slang*.)

* **spon'gi-dæ**, **spon'gi-dæ**, **spon'gi-æ**, *s. pl.* [Mod. Lat., formed from *spongia* (q.v.).]

1. *Zool.*: A class of Protozoa. Though not the lowest animals in organization, they were once relegated by some zoologists to the vegetable kingdom, but the botanists repudiated them, and with justice. They are essentially multicellular animals, in which the endodermal layers consist partly or wholly of flagellated collared cells. Most of them have a horny capsule, composed of fibres, strengthened by siliceous or calcareous apicules (q.v.). The animal is of a gelatinous substance, investing the fibres of the skeleton during life, and traversed by canals connected directly or indirectly with the surface of the skeleton by many minute and a few larger apertures. The gelatinous part consists of an outer superficial layer of sponge particles. The inferior layer is of similar composition. The two are separated by a wide cavity communicating with the exterior by minute bores in the superficial layer; it is filled with water. In the floor of the cavity are many apertures, leading into canals, which ramify in the deep layer, and end in the floors of lofty funnels or orsters. At the top of these are large exhalant apertures called oscules, whence currents proceed, while other currents set into the sponge by many minute holes, called pores or inhalant apertures. The pores bring in nutriment, while the oscules carry off excrementitious matter. They may also constitute an incipient breathing apparatus. Two reproductive processes exist—one asexual, the other sexual. Nearly all sponges are marine. They occur more or less in every sea, and vary in size from a pin's head to four or even six feet high, and the same broad, but are largest and most numerous in the tropics. "They are massive, incrusting, sessile, or stalked, globular, branched, tree-like, with the

branches free or united laterally into a network; lamellar, irregularly or fan-shaped; tubular, vasiform, or labyrinth, many of the forms presenting a close parallelism to corals." (*Sollas*.) Orders: Myxospongiae, Calcispongiae, Silicispongiae, and Ceropongia. [SPONGE, SPONGIA.]

2. *Palæont.*: From the Cambrian (?), or the Silurian (?), onward. Vitreous sponges occur abundantly in the Chalk.

spong'-i-form, *a.* [Eng. *sponge*, and *form.*]

Resembling a sponge; sponge-like; soft and porous, like a sponge.

spongiform - quartz, *s.* [SPONGIFORM - QUARTZ.]

spon'gil-la, *s.* [Lat., *dimin. from sponsia.*]

1. *Zool.*: The typical genus of Spongiina, and the only one of which the species inhabit fresh water. They are green or grey. Several species occur in the streams of the United States. They are found attached to stones, old woodwork, &c.

2. *Palæont.*: From the Upper Oolite.

spon'gil-lī-na, *s. pl.* [Mod. Lat. *spongiilla*(*a*); Lat. neut. pl. adj. *suff. -ina.*]

Zool.: A sub-family of Renierinae or Renieridae. Reproduction by ova and by winter-eggs or statoblasta.

spong'-in, *s.* [Eng. *sponge*; *-in* (*Chem.*)]

Chem.: An insoluble substance obtained from sponge by treating it with ether, alcohol, water, hydrochloric acid, and dilute soda-ley. It closely resembles fibroin, but is insoluble in an ammoniacal solution of copper, and, when boiled with sulphuric acid, yields leucine, but not tyrosine.

spong'-i-nēsa, *s.* [Eng. *sponge*; *-ness.*] The quality or state of being spongy.

"Consider the sponginess and laxness of the brain." —More: *Immort.*, *south*, pt. iii, bk. ii, ch. ix.

spong'-ing, *pr. par. or a.* [SPONGE, *v.*]

sponging-house, **sponging-house**, *s.* A house or tavern where persons arrested for debt were lodged for twenty-four hours, before being put into prison, to allow their friends an opportunity of settling the debt. They were usually the private dwellings of the bailiffs. (*English.*)

"From all the brothels, gambling-houses, and sponging-houses of London, false witnesses poured forth to swear away the lives of Roman Catholics." —Macaulay: *Hist. Eng.*, ch. 11.

spon'gi-ō-car'-pī-dæ, **spon'gi-ō-car'-pō-æ**, *s. pl.* [Mod. Lat. *spongiocarpus*]; Lat. fem. pl. adj. *suff. -idæ, -eæ.*]

Bot.: A family of Cryptomonæ (*Lindley*); an order of Rose-spored Algae (*Berkeley*).

spon'gi-ō-car'-pi-us, *s.* [Gr. *σπογγία* (*spongia*) = a sponge, and *καρπός* (*karpos*) = fruit.]

Bot.: The single genus of Spongiocarpidae (q.v.). Called also Polyides.

spong'-i-ōle, *s.* [Lat. *spongiolus* = a kind of fungus, *dimin. from sponsia* (q.v.).]

Bot.: The young tender extremity of a root by which fluid food is absorbed from the earth. It was once believed to be the growing and absorbing point of the root. This is now known to be just behind the apex. Called also a Spongelet.

"The effect of this pruning is to increase the number of fibres and spongiolæ." —Scribner's Magazine, April, 1880, p. 828.

† **spon'gi-ō-līte**, *s.* [Gr. *σπογγία* (*spongia*) = a sponge, and *λίθος* (*lithos*) = a stone.]

Palæont.: The fossil apicule of a sponge. (*Dana.*)

spon'gi-ō-pī-līne, *s.* [Gr. *σπογγία* (*spongia*) = a sponge, and *πίλος* (*pilos*) = felt.]

Surg.: A substitute for a poultice, made of an absorbent stratum of sponge and fibre on an india-rubber backing.

spon'gi-ōus, **spon'gi-ōse**, *a.* [Eng. *spong*(*e*); *-ious, -iose.*]

Sponge-like, like a sponge; spongy.

* **spong'-ite**, *s.* [Gr. *σπογγίτης* (*spongitēs*) = of, in, or like a sponge.]

Palæont.: A fossil sponge.

* **spon'-gold**, *a.* [Eng. *spong*(*e*); *-suff. -oid.*]

Resembling a sponge; sponge-like, spongy.

spong'-y, *spūng'-y, *a.* [Eng. *spong*(*e*); *-y.*]

I. Ordinary Language:

- 1. Resembling a sponge; sponge-like; soft and full of cavities; of an open, loose, and easily compressible texture; spongy.
- "A light spongy wood, and easily wrought." —Cook: *First Voyage*, bk. 1, ch. xviii.
- 2. Having the quality of imbibing like a sponge; hence, drenched, soaked. (*Lit. & Fig.*)
- "There is no lady of more softer bowels, More spongy to suck in the sense of fear." —Shakesp.: *Troilus & Cressida*, II, 2.

* 3. Wet, rainy.

"The spongy south." —Shakesp.: *Cymbeline*, IV, 2.

II. Bot.: Having the texture of a sponge; very cellular; with the cellules filled with air, as the coats of many seeds.

spongy-bones, *s. pl.*

Anat.: Various bones of spongy texture. The superior spongy bone is the superior turbinated process of the nose, the middle spongy bone its middle meatus, and the inferior one the inferior turbinated or maxillo-turbinated bone. There are also ethmoidal and sphenoidal spongy bones.

spongy - platinum, *s.* [PLATINUM - SPONGE.]

spongy-quartz, *s.*

Min.: A variety of quartz with a cellular, sponge-like structure which will float on water. Similar to floatstone (q.v.).

spongy-stem, *s.*

Bot.: A stem internally of spongy texture; a stem composed internally of elastic cellular tissue.

spon'ī-a, *s.* [Named after Jacob Spon (1647-1685), a French physician.]

Bot.: A genus of *Celastr.* The bark of *Sponia orientalis*, formerly called *Celastris orientalis*, a small Indian tree, yields a gum. The Coorg planters call it Charcoal-tree, the burnt wood yielding good charcoal for gunpowder. *S. politoria*, also Indian, is used to tie the rafters of native houses.

sponk, *s.* [SPUNK.]

* **sponne**, *pret. of v.* [SPIN, *s.*]

* **spon'-sal**, *a.* [Lat. *sponsalis.*] Pertaining or relating to marriage.

spon'-si-ble, *a.* [A contract of responsible (q.v.).]

- 1. Capable of discharging an obligation; responsible. (*Scottish.*)
- 2. Respectable, creditable; becoming one's station. (*Scottish.*)

spon'-sing, **spon'-cing**, *s.* [SPONSON.]

spon'-sion, *s.* [Lat. *sponsio* = a solemn promise or engagement, from *sponsus*, pa. par. of *spondeo* = to promise solemnly.] [SPOUSE.]

* 1. *Ord. Lang.*: The act of becoming surety for another.

"A mockery, rather than a solemn sponson, in too many." —Burnet: *Hist. Own Time.* (Concl.)

2. *Internat. Law.*: An act or engagement made on behalf of a state by an agent not specially authorized. Such conventions must be confirmed by express or tacit satisfaction.

* **spon'-sion-al**, *a.* [Eng. *sponson*; *-al.*] Responsible; implying a pledge.

"It is evident that he is righteous, even in that representative and sponsion person he put on." —Leighton: *Sermos*, ser. 4.

spon'-sōn, *s.* [Etym. doubtful.]

Shipbuild.: The angular space before and abaft the paddle-box against the ship's side.

SPONSON.

"The people in the steamer wanting to see what was happen' all ran to one side, of course, and listed her down till she was sponson under." —Daily Telegraph, Dec. 23, 1884.

sponson-beam, *s.*

Shipbuild.: One of the two projecting beams uniting the paddle-box between with the ship's side.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk. whō, sōn; mūte, cūb, cūre, unite. cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

sponson-rim, s. *Shipbuild.*: The side connecting the paddle-beam with the ship's side.

spón'-són (2), s. *Navy*: A bulging projection from the side of of a warship, designed to give range fore and aft to the gun mounted therein.

spón'-sór, s. [Lat., from *sponsus*, pa. par. of *spondeo* = to promise.]
1. A surety; one who binds himself to answer for another, and to be responsible for his default.
2. *Specif.*: One who is surety for an infant at baptism; a godfather or godmother.

spón'-sór-i-ál, a. [Eng. *sponsor*; -*ial*.] Of or pertaining to a sponsor.

spón'-sór-ship, s. [Eng. *sponsor*; -*ship*.] The state of being a sponsor; the office or position of a sponsor.

spón-tá-né-i-tý, s. [Fr. *spontanéité*.]
1. *Ord. Lang.*: The quality or state of being spontaneous, or of acting from natural feeling, inclination, or impulse, without constraint or external force.

"Really a large and charming sketch, it has all the artist's spirit, spontaneity, and wealth of tones."—*Athenaeum*, Dec. 30, 1884.

II. Technically:

1. *Biol.*: This tendency to variation, unrestrained by environment. [VARIATION.]

2. *Mental Philos.*: The doctrine that muscular activity may, and does, arise from internal causes, apart from, and independent of, the stimulus of sensations. It supposes that the nerve-centres, after repose and nourishment, acquire a fulness of vital energy which discharges itself in the play of movement, without any other occasion or motive. The addition of a feeling or end enhances and directs the activity, but does not wholly create it. Freshness in horae, the gambols of puppies and kittens, and the boisterous play of children, are examples of spontaneity. [Bain: *Senses & Intellect*.]

spón-tá-né-óus, a. [Lat. *spontaneus*, from *sponte* = of one's free will.]

1. Proceeding from natural disposition, inclination, or impulse, without constraint or external force; impulsive.

2. Acting by its own impulse, energy, or natural law, without external force.

"And rusted bolt and bar
Spontaneous took their place once more."
Scott: Bridal of Friarman, III. 17.

3. Produced or growing without being placed, or without human labour.

"Thorns spring spontaneous at her feet."
Cowper: Guion: Joy of the Cross.

spontaneous-combustion, s. [COMBUSTION.]

spontaneous-fission, s. [FISSION, 2.]

spontaneous-generation, s. [GENERATION.]

spontaneous-rotation, s. [ROTATION.]

spón-tá-né-óus-ly, adv. [Eng. *spontaneous*; -*ly*.]

1. In a spontaneous manner; of one's own impulse, inclination, or disposition; impulsively, without external influence.

"He never gave spontaneously; but it was painful to him to refuse."—*Macaulay: Hist. Eng.*, ch. 11.

2. By inherent or natural force or energy; without external influence, impulse, or force.

"The soil of the island is truly luxuriant, producing fruits of many kinds spontaneously."—*Anson: Voyages*, bk. 1, ch. v.

spón-tá-né-óus-néss, s. [Eng. *spontaneous*; -*ness*.] The quality or state of being spontaneous; spontaneity.

"The sagacities and instincts of brutes, the spontaneity of many of their animal motions."—*Hale: Orig. of Mankind*, p. 49.

***spón-toón, s.** [Fr. *esponçon*, *sponton*; Ital. *spontone*, *spuntone*, from *puncto*; Lat. *punctum* = a point.]

Old Arms: A military weapon; a kind of half-pike or halberd, borne by infantry officers in the British service up to 1787. It was used for signalling orders to the regiment.
"Says Johnson, in a tone of admiration, How the little fellow brandished his *spontoon*!"—*Murphy: Life of Johnson*.

spóok, s. [Dut. *spook*; Ger. *spuk*.] A ghost, a hobgoblin. (*Amer.*)

spóol, *spole, s. [O. Dut. *spoels*; Dut. *spool*; Low Ger. *spole*; Sw. *spole*; Dan. *spole*; O. H. Ger. *spulo*, *spuold*; Ger. *spule*.] A hollow cylinder upon which thread may be wound. It assumes various forms: the ordinary spool or reel for sewing-cotton; the spool for winding-machines, otherwise called a bobbin; the spool to hold the thread in a shuttle, and revolving on a spindle in the latter.

spool-holder, s.
1. A spool-stand (q.v.).
2. A creel on which spools or bobbins are placed on skewers for warping.
3. A skewer on a sewing-machine to hold a spool of cotton or thread.

spool-stand, s. A frame for holding various-sized spools for work-table purposes or for exhibition in stores.

spóol, v.t. [SPOOL, s.] To wind on a spool.

spóol-ér, s. [Eng. *spool*; -*er*.] One who uses a spool.

spóol-íng, s. [SPOOL, v.] The winding of yarn or thread upon bobbins.

spóom, v.t. [Prob. from *spume* = foam.]
Naut.: To move swiftly, as a vessel through the water. (Also written Spoon.)

"When virtue wishes before a prosperous gale,
My heaving wishes help to fill the sail."
Dryden: Hind & Panther, III. 84.

spóon, *spoon, *spone, *spoonc, s. [A.S. *spón* = a chip, a splinter of wood; cogn. with Dut. *spaan* = a chip, a splint; Icel. *spánn*, *spánn* = a chip, a spoon; Dan. *spaan*; Sw. *spån*; O. H. Ger. *spán*; Ger. *span*.]

I. Literally:

1. A domestic utensil, having a shallow bowl at the end of a handle, and used for taking up and conveying to the mouth liquids or liquid food. Spoons are made of various sizes and materials, according to the particular purpose for which they are intended. Spoons for the administration of medicine are made with a cover or shield, which converts the pointed end into a funnel.

"He must have a long spoon that must eat with the devil."—*Shakspeare: Comedy of Errors*, IV. 2.

2. A spoon-bait (q.v.).

"In the sea they will often take a spoon."—*Field*, Sept. 4, 1884.

3. A kind of club used in the game of golf.

"He played a capital shot with his spoon, clearing a wide ditch."—*Field*, Sept. 4, 1884.

4. *Cotton*: A weighted and gravitating arm in the stop-motion of a drawing-machine, which is kept in position by the tension of the sliver, and falls when the sliver breaks or the can is emptied, and thereby arrests the motion of the machine.

II. Fig.: A foolish fellow, a simpleton, a spooney. (*Slang*.)

"But you'll find very soon, if you aim at the moon
In a carriage like that, you're a bit of a spoon."
Barham: Ing. Legends: The Witches' Frolic.

¶ (1) *Apostle spoons*: [APOSTLE.]

(2) *To be born with a silver spoon in one's mouth*: [SILVER, a.]

(3) *To be spoons on*: To be in love with. (*Slang*.)

"A girl would rather make her way out by herself than with a fellow she's spoons on."—*Hawley Smart: Bruck Down*, ch. 11.

(4) *Wooden spoon*: A term applied in Cambridge University to the student last on the list of mathematical honours.

spoon-bait, s. A sort of bait for fish, especially pike, consisting of a spoon-shaped piece of metal with hooks attached.

spoon-bill, s. [SPOONBILL.]

spoon-bit, s. A bit with a rounding end, which assumes a conoidal form.

spoon-chisel, s. A bent chisel, with the basil on both sides, used by sculptors.

spoon-gouge, s.

Join.: A gouge with a crooked end, used in hollowing out deep parts of wood.

† **spoon-meat, s.** Food eaten with a spoon; liquid food. (*Ford: 'Tis Pity She's a Whore*, 1.)

spoon-worms, s. pl. [GEPHYREA.]

spóon (1), v.t. [SPOON.] To move rapidly through the water.

"Without any inch of sail, we spooned before the sea."—*Hackluyt: Voyages*, vol. III., p. 849.

spoon-drift, s. The same as SPINDRIFT (q.v.).

spóon (2), v.t. & i. [SPOON, s.]
* **A. Trans.**: To take up or eat with a spoon or ladle.

"It then may be spooned up as it is wanted."—*Anderson: On the Deiry*.

* **B. Intrans.**: To act the lover.

* **spóon'-age (age as íg), a.** [Eng. *spoon*; -*age*.] Spoon-meat.

"And suck she might a taat for teeth,
And spoonage too did fall."
Warriser: Albions England, bk. II., ch. 2.

spóon'-bill, s. [Eng. *spoon*, s., and *bill*.]

1. *Ichthy.*: The genus *Polyodon* (q.v.).

2. *Ornith.*: Any individual of the genus *Platalea* (q.v.); *specif.*, *Platalea leucorodia*, the White Spoonbill, found over the greater part of Europe and Asia, and the north of Africa. The adult male is about thirty-two inches long; plumage white with pale pink tinge; at the junction of the neck with the breast there is a band of buffy yellow; the naked skin on the throat is yellow; legs and feet black; bill about eight inches long, very much flattened and grooved at the base, the expanded portion yellow, the rest black. There is a white occipital crest in both sexes. The Spoonbill possesses no power of modulating its voice. The windpipe is bent on itself, like the figure 8, the coils applied to each other, and held in place by a thin membrane. This peculiarity does not exist in young birds. The Roseate Spoonbill (*P. ajaja*), an American species, has rose-colored plumage. It is the only species which occurs in the United States, and is very abundant in the tropics. It is nearly equal in size to the White Spoonbill, which it resembles in habits. This bird is a beautiful one, its plumage being of a fine rose color, the tint deepest on the wings. The tail coverts are crimson.

spóon'-eý, s. & a. [Eng. *spoon*; -*ey*.]

* **A. As subst.**: A stupid or silly fellow; a noodle, a spoon. (*Slang*.)

"Yes, Captain Waldron avowed, he was a spoony; that was the right name for a man who let himself be played with as she had played with him."—*Macmillan's Magazine*, Nov., 1889, p. 65.

* **B. As adj.**: Spoony.

spóon'-fúl (pl. spóon'-fúls), spóon'-fúll, *spone-ful, *spoonc-full, s. [Eng. *spoon*, s.; -*full*.]

1. As much as a spoon will contain.

"Devour the whole dish without offering a spoonful to Her Royal Highness."—*Macaulay: Hist. Eng.*, ch. 21.

2. Any small quantity.

"At least as much importance as what we talk seldom, and only by grains and spoonfuls."—*Arbutnot*.

spóon'-i-ly, adv. [Eng. *spoony*; -*ly*.] In a weak or spoony manner; like a spoon.

spóon'-wört, s. [Eng. *spoon*, and *wort*.] So named because its leaf is shaped like an old-fashioned spoon. (*Prior*.)

Bot.: *Cochlearia officinalis*.

spóon'-ý, a. & s. [Eng. *spoon*, s.; -*y*.]

* **A. As adj.**: Soft, silly, weak-minded; *specif.*, foolishly fond, showing calf-love.

"Lovell, a tall, thin, spoony middleman, usually called 'Lady Margaret.'"—*Hunnay: Singleton Fontenay*.

* **B. As subst.**: A spooney, a spoon.

spóor, s. [Dut.] The track or trail of a wild animal, especially of such as are pursued as game.

"Following the spoor slowly and laboriously right up to the top of the hill."—*Field*, Sept. 4, 1884.

* **spóor, v.t.** [SPOOR, s.] To follow a spoor or trail.

"After searching and spooning about for another hour, we were obliged to abandon pursuit."—*Field*, Feb. 17, 1887.

spór-, spór-ò-, pref. [SPOR.] Of, belonging to, or possessing spores or seed.

Spór'-a-dēs, s. pl. [Gr.] [SPORADIC.]

1. *Geog.*: A group of scattered islands; especially applied to a group of islands in the Archipelago.

2. *Astron.*: Stars not included in any constellation; unformed stars.

* **spó-rá'-dí-ál, a.** [SPORADIC.] Scattered, sporadic.

ból, bóy; póut, jówl; oat, cöll, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün. -tion, -gion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

spō-rād'-īc, spō-rād'-īc-ā-l, a. [Low Lat. sporadicus, from Gr. σποράδικος (sporadikos) = scattered, from σπορά (spora), genit. σποράδος (sporados) = scattered, from σπειρώ (speirō) = to scatter; Fr. sporadique.]

1. Ord. Lang.: Separate, single, scattered; occurring singly or apart from other things of the same kind.

* Under these circumstances, the cholera which has broken out at Montreal would appear to be local and sporadic.—Daily Telegraph, Sept. 19, 1888.

2. Biol.: Applied to animals and plants appear over wide areas.

sporadic-disease, s.

Pathol.: A disease which, being normally an epidemic one, attacks in a particular year only a person here and there without spreading extensively.

spō-rād'-īc-ā-l-ly, adv. [Eng. sporadical; -ly.] In a sporadic or scattered manner; separately, singly.

* They are due to causes acting universally, and not sporadically in one or more centres.—Darwin: Early Man in Britain, ch. 1.

spōr-ān-ġī-ās-tēr, s. [Mod. Lat. sporangiūm, and Gr. ἀστὴρ (astēr) = a star.]

Bot. (Pl.): Certain bodies, often clavate, intermixed with the spore-cases in some ferns. Probably abortive sporangia. (Treas. of Bot.)

spōr-ān-ġīd'-ī-ūm (pl. spōr-ān-ġīd'-ī-ā), s. [Mod. Lat. sporangium, and Gr. εἶδος (eidos) = form.]

Bot.: The inner series of organs to which the peristome belongs in the capsule of a moss.

spōr-ān-ġī-ōle, spōr-ān-ġī-ō-lūm (pl. spōr-ān-ġī-ō-la), s. [Mod. Lat., dimin. from sporangium (q.v.).]

Bot.: A case containing sporidia in Fungals.

spōr-ān-ġī-ō-phōre, spōr-ān-ġī-ōph-or-ūm (pl. spōr-ān-ġī-ōph-or-ā), s. [Mod. Lat. sporangium, and Gr. φέρω (phōros) = bearing.]

Bot.: The axis or columnella on which the spore-cases are borne in some ferns; the filaments bearing the sporangia in some fungals.

spōr-ān-ġī-ūm (pl. spōr-ān-ġī-ā), s. [Pref. spor-, and Gr. ἀγγεῖον (anggeion) = a vessel, a jail, a capsule.]

Bot.: The case in which the spores are contained in flowerless plants. It varies in the different orders.

spōre (1), s. [Gr. σπόρος (sporos), σπορά (spora) = a sowing, seed.]

1. Bot.: The reproductive body in a cryptogam, which differs from a seed in being composed simply of cells and not containing an embryo. Called also Sporules. Applied also to the reproductive bodies produced either singly or at the tips of the fruit-bearing threads in Fungi.

* From the offensive smell communicated to sound corn by the bursting of the envelope and distribution of the fecid spores.—Fried, Oct. 5, 1855.

2. Paleobot.: A large part of the Better-bed coal of Lowmoor, near Leeds, is formed by spores and sporangia; so is the white coal of Australia. [FLEMINGES.]

3. Zool. (Pl.): The reproductive gemmules of certain sponges.

spore-case, s.

Bot.: The immediate covering of the spores in cryptogams.

* spōre (2), s. [SPUA, s.]

spōr-ēn-dō-nē-ma, s. [Pref. spor-, and Gr. ἔνδον (endon) = in, within, and νῆμα (nēma) = yarn.]

Bot.: Either a genuine genus of Hyphomycetous Fungi, or a spurious one, founded on some half-developed fungals. Sporendonema muscæ grows on flies in autumn, and kills them. The fly attacked adheres to the walls or window-panes by its proboscis, with its legs spread out. About twenty-four hours after death a white substance projects from between each ring of the abdomen, and in a day or two after there is a circle around the body. Called also Empusa or Empusina.

† spōr'-īd, s. [SPORIDIUM.]

Bot.: A spore (q.v.).

spōr-ī-dēs'-mī-ūm, s. [Pref. sporo-, and Gr. δεσμός (desmos) = a band.]

Bot.: An obscure genus of Naked-spored Fungals, with many species. They form soot-like patches on wooden rails, &c.

spōr-ī-dif-ēr-ī, s. pl. [Mod. Lat. sporidia, and Lat. fero = to bear.]

Bot.: The second of two cohorts of Fungals. It consists of those bearing sporidia. Orders, Ascomycetes and Phylumycetes.

spōr-ī-dif-ēr-ō-us, a. [SPORIDIFER.] Bearing sporidia.

spōr-īd-ī-ō-la, s. pl. [Pl. of dimin. from Mod. Lat. sporidium (q.v.).]

Bot.: The spores or sporules of Thallogens and Acrogens.

spōr-īd-ī-ūm (pl. spōr-īd-ī-ā), s. [Pref. spor-, and Gr. εἶδος (eidos) = form.]

Botany (Pl.): (1) The spores of fungals and Hichens when contained in asci. (2) Granules resembling sporules, occurring in Algals. (Fries.) (3) The immediate cover of sporules in Fungals.

spōr-īf-ēr-ī, s. pl. [Mod. Lat. sporus = a spore, and Lat. fero = to bear.]

Bot.: The first of two cohorts of Fungals. It consists of those bearing spores. Orders, Hymenomyetes, Gasteromyetes, Coniomycetes, and Hyphomyetes.

spōr-īf-ēr-ō-us, a. [SPORIFER.] Bearing spores.

* sporne, v. t. [SPURN.]

spōr-ō, pref. [SPOR.]

spōr-ōb-ō-lūs, s. a. [Pref. sporo-, and Gr. βόλος (bolos) = a throwing.]

Bot.: A genus of Agrostæ. Sporobolus tenuissimus, growing on dry, barren ground in India, is a good fodder grass.

spōr-ō-car-pi-ān, spōr-ō-car-pi-ūm (pl. spōr-ō-car-pi-ā), s. [Pref. sporo-, and Gr. καρπός (karpos) = fruit.]

Bot.: Any spore-case. Applied specially to (1) a two-valved, coriaceous involucre in Marsileaceæ; (2) the sporangium in Jugeroneaceæ; (3) one of the spore-cases in Lycopodiaceæ; (4) one of the thecae in Equisetaceæ.

spōr-ōch-nī-dæ, spōr-ōch-nā-çĕ-æ, s. pl. [Mod. Lat. sporochne(us); Lat. fem. pl. adj. suff. -īca, -acea.]

Bot.: A family or tribe of Halysereæ. Olive-coloured, unjointed sea-weeds, the oösporangia and trichosporangia of which are attached to external, jointed filaments, either free or compacted together.

† (1) Book of Sports:

Eng. Hist.: A proclamation issued by James I., on May 24, 1618, entitled "The King's Majesty's Declaration to his subjects concerning lawful sports to be used." It is often represented as enjoining sports on the Lord's Day. It only enacted that people "should not after the end of Divine service be disturbed, letted, or discouraged from any lawful recreations." Its first publication led to a Sabbatarian controversy. The Declaration was embodied in a similar document issued by Charles I. in 1633, and the severity with which the public reading of it by the clergy was enforced roused the Puritans to a degree of indignation which contributed not a little to the overthrow of the Monarchy and the Establishment. In 1644, the Parliament

2. To be propagated, published, circulated, or made known more extensively; as, A report spreads.

3. To be propagated from one to another.

"Least his infection spread further."—*Shakesp.: Coriolanus, iii. 1.*

¶ Things may spread in one direction, or at least without separation; but they disperse in many directions, so as to destroy the continuity of bodies. Between scatter and disperse there is no other difference than that one is immetaphorical and involuntary, the other systematic and intentional. To spread is the general, to expand and diffuse are particular terms. To spread may be said of anything which occupies more space than it has done, whether by a direct separation of its parts, or by an accession to the substance; but to expand is to spread by means of separating or unfolding the parts. Evils spread, and reports spread; the mind expands, and prospects expand; knowledge diffuses itself, or cheerfulness is diffused throughout the company. To spread is to extend to an indefinite width; to circulate is to spread within a circle; thus news spreads through a country; but a story circulates in a village, or from house to house, or a report is circulated in the neighbourhood. Spread and circulate are the acts of persons or things; propagate and disseminate are the acts of persons only. (*Crabb.*)

"A very hunter did I flush Upon the prey; with leaps and *sprynge*."—*Wordsworth: To a Butterfly*.

2. A flying back; the resistance of a body recovering its former state by its elastic power: as, the *sprung* of a bow.

3. Elastic power or force; elasticity.

"In adult persons, when the fibres cannot any more yield, they must break, or lose their spring."—*Arbutnot.*

4. An elastic substance of any kind, having the power of recovering, by its elasticity, its natural state, after being bent or otherwise forced, interposed between two objects, in order to impart or check motion or permit them to yield relatively to each other. Springs are made of various materials, as india-rubber, strips or wire of steel coiled spirally, steel rods or plates, &c., and are used for many purposes: as, for diminishing concussion in carriages, for motive power, acting through the tendency of a metallic coil to unwind itself, as in clocks and watches; to measure weight and other forces as in the spring-balance, &c. Springs of coiled wire are much used for balances, for chair and sofa cushions and backs, mattresses, and in various other domestic applications where no great amount of strength is required.

"The spring must be made of good steel, well tempered; and the wider the two ends of the spring stand asunder, the milder it throws the chape of the vice open."—*Maxon: Mechanical Exercises.*

5. Any active power; that by which action or motion is produced or propagated.

"Nature is the same, and man is the same, has the same affections and passions, and the same springs that give them motion."—*Rymer.*

6. In the same sense as II. 2.

7. Often used adjectively, as *spring-water*.

7. Any source of supply; source, origin; that from which anything springs or is derived; a source of supply.

"Philosophy and science, and the springs Of wonder, and the wisdom of the world."—*Byron: Manfred, l. 1.*

8. One of the four seasons of the year; that season in which plants begin to spring and vegetate; the vernal season. In the northern hemisphere the spring season begins about March 21, when the sun enters the sign of Aries, and ends about June 22, at the time of the summer solstice. Popularly, however, spring is considered to begin with March and end with May.

"Spring is here with leaf and grass."—*Tennyson: The Window, 123.*

9. Hence, the beginning or freshest part of any state or time; the early part.

"Our love was new, and then, but in the spring."—*Shaksp.: Sonnet 102.*

10. A young shoot, a bud.

"Where the new spring first shooteth forth."—*P. Holland: Plinie, bk. xvii., ch. xxi.*

11. A plant, a young tree; also a grove of trees; a small shrubbery.

"In yonder spring of roses."—*Milton: P. L., ix. 515.*

12. Specifically applied to a white thorn. (*Prov.*)

"They are commonly erected upon the top of new banks, until the spring has grown strong enough to protect it."—*Field, Jan. 23, 1826.*

*13. A youth, a springal.

"The one his bow and shafts, the other spring A hurrying tead about his head did move."—*Spenser: McPheron's Farewell.*

*14. A race, a family.

15. A flock (of teal).

"Presently surprising a spring of teal with good effects on our bag."—*Daily Telegraph, Dec. 26, 1855.*

*16. That which causes one to spring; specifically, a lively, quick, and cheerful tune.

"He play'd a spring and danc'd it round Below the gallow-tree."—*Burns: McPheron's Farewell.*

II. Technically:

1. Nautical:

* (1) A leak; the starting of a plank; an opening in a seam.

"Where her springs are, her leaks and how to stop 'em."—*Ben Jonson: Caroline, III. 1.*

(2) A crack in a mast or yard, running obliquely or transversely.

(3) A rope or hawser passed from the stern of a ship and made fast to the cable on the anchor from the bow, by which she is riding. The object is to bring the broadside to bear in any direction.

(4) A check on a cable while unshackling it.

(5) A rope extending diagonally from the stern of one ship to the head of another, to make one ship sheer off to a greater distance.

2. *Phys. Geog. & Geol.:* An overflow of water or other liquid. When rain falls on a porous soil it is rapidly absorbed, the surface of the soil being soon again dry. Meanwhile, the water has percolated downwards till it has, at a greater or less depth, been intercepted by an impervious stratum, where it gradually

forms a reservoir. It then presses with great force laterally, and a system of subterranean drainage is established. If the impervious stratum be some distance up a hillside, the water finds its way out, not, however, all along the stratum, for the existence of rents, fissures, and inequalities confines it to a few spots. If the reservoir be beneath a plain, and a boring to it be made, it will come to or above the surface as an Artesian well (q.v.) which is akin to a spring. Springs are of two kinds, land and perennial springs, the former existing where there is a porous soil with an impervious subsoil, the latter deriving their waters from deeper sources. Perennial springs include thermal springs and geysers. [INTERMITTENT-SPRING.] Sometimes springs contain much earthy material; thus there are calcareous, sulphureous and gypseous, siliceous, ferruginous, saline, carbonated, and petroleum springs. They are then called mineral springs.

¶ (1) *Spring of pork:* The lower part of the forequarter, which is divided from the neck and has the leg and foot without the shoulder. (*Beaum. & Flet.: Propheetess.*)

* (2) *Spring of the day:* The dawn, dawning. "About the spring of the day, Samuel called Saul to the top of the house."—*1 Samuel ix. 26.*

spring-back, s.

Bookbinding: A mode of blinding in which a spring in the back throws up the folded edge so as to make the leaves lie flat.

spring-balance, s. A balance in which the weight of an object is determined from the tension or compression of a spring provided with an index and scale. In the ordinary form (A) the spring is spiral and inclosed in a cylindrical box, at whose upper end is a suspending ring. The hook from which the object to be weighed is suspended is connected by a rod to a piston above the spring, so that the weight has the effect of condensing the spring, a finger on the rod projecting through a long slot in the case and indicating the weight upon a graduated and numbered scale. Another (B) is in the form of the letter C, the upper end being suspended by a ring, and the lower end affording attachment for the hook whereby the object is suspended. As the bow opens a finger traverses a graduated arc and registers the weight.

SPRING-BALANCES.

Spring-balance valve:
Steam: A spiral spring weighing-balance, with an index and pointer attached to the end of the lever, by which the pressure upon the safety-valve is adjusted.

spring-beam, s.
1. *Shipbuilding:* The fore-and-aft timber uniting the outer ends of the paddle-box beams. [SPENSON.]
2. *Mach.:* An elastic bar at the top of a tilt-hammer, mortising-machine, or jig-saw, to accelerate the fall or give the return motion, as the case may be.
3. *Carp.:* A beam stretching across a barn without a central support, so as to leave the two bents of the barn-floor free for various uses.

spring-beauty, s.
Bot.: An American name for the genus *Claytonia*.

spring-beetle, s. [CLICK-BEETLE.]

spring-bell, s.
Bot.: *Sisyrinchium grandiflorum*.

spring-block, s.
Naut.: A common block or dead-eye connected to a ring-bolt by a spiral spring. It is attached to the sheets, so as to give a certain amount of elasticity and assist the vessel in sailing.

spring-board, s. An elastic board used in vaulting.

spring-bok, spring-boo, s. [SPRING-BOK.]

spring-box, s. The barrel containing the spring in any piece of mechanism.

spring-carriage, s. A wheeled carriage mounted on springs.

spring-cart, s. A light cart mounted on springs.

spring-coupling, s. A connecting device between cars, for attaching the draft-team to street-cars, &c.

spring-crocus, s.
Bot.: *Crocus vernus*, which flowers in spring. [CROCUS.]

spring-faucet, s. A faucet which is closed by a spring when the opening force is withdrawn.

spring-feed, s. Herbage produced in the spring.

spring-forelock, s. A cotter-key whose entering end springs apart to keep it from accidentally withdrawing.

* **spring-garden, s.** A garden where concealed springs are made to spout jets of water upon the visitors.

spring-grass, s.
Bot.: *Anthoxanthum odoratum*, and the genus *Anthoxanthum*. [VERNAL-GRASS.]

spring-gun, s. A gun which is fired by the stumbling of a trespasser upon it or against a wire connected with the trigger. They were formerly set in plantations and preserves.

"At that time no statute had been passed making the use of spring-guns a legal offence."—*Notes & Queries, March 19, 1857, p. 221.*

spring-haas, s.

spring-tide, s.

1. The time or season of spring; spring-tides.

2. (Pl.) The tides at the time of the new and full moon. At these times the sun and moon are in a straight line with the earth, and their joint effect in raising the water of the ocean is at a maximum, and the tides are consequently the highest. (Brande & Cox.)

"As the spring-tides, with heavy splash,
From the cliffs invading dash."
Byron: *Siege of Corinth*, v. 24.

spring-time, s. The time or season of spring; spring.

"In spring-time, when the sun with Taurus rides."
Milton: *P. L.*, l. 789.

spring-tool, s.

Glass: The light tongs of the glass-blower, whereby handles and light objects are grasped.

spring-trap, s.

1. A trap whose falling bar or door is operated by a spring as soon as the detent is released by any animal tampering with the bait.

2. A form of steam-trap.

spring-usher, s.

Entom.: A British geometer moth, *Hybernia leucophaea*. The female is apterous.

spring-valve, s. A valve which is held to its seat by a spring, except as temporarily depressed by the hand to allow the flow of water.

spring-water, s. Water issuing from a spring, as distinguished from rain-water, river-water, &c.

spring-wheat, s. A species of wheat to be sown in the spring.

2. The same as SPRUCE-BEER (q.v.).

II. Bot.: The same as SPRUCE-FIR (q.v.).

spruce-beer, s. A fermented liquor made from the leaves and small branches of the spruce-fir, or from the essence of spruce, boiled with sugar or molasses, and fermented with yeast. It is useful as an anti-acidotic.

spruce-fir, s.

Bot.: A popular name for many species of the genus *Abies* (q.v.), specif. *Abies excelsa*, a fine evergreen which sometimes reaches a height of 150 feet, with a straight, though not very thick trunk, and a regular pyramidal form. Leaves scattered equally round the twigs; four-cornered, mucronate, dull green; cones cylindrical, pendulous, with blunt, sinuate, slightly toothed scales. It is a native of the north of Germany and Norway, whence it is often called the Norway spruce. It is

commonly planted in Britain, and affords an excellent shelter for game. Its timber constitutes white deal. It is not so durable as the Scotch pine, but is prized for masts, spars, scaffolding poles, &c. In Norway it takes seventy or eighty years to arrive at maturity. By incision it yields a resin whence turpentine and Burgundy pitch are manufactured. The White Spruce fir (*A. alba*) has the leaves somewhat glaucous, rather pungent; the cones narrow, oval, tapering, with even, undivided scales. It is found in North America, where it reaches the height of forty to fifty feet. The Black Spruce is *A. nigra*, from the very cold parts of North America. It grows to seventy or eighty feet high. The timber is very valuable. Another United States species is *A. rubra*, the Red Spruce. *A. canadensis*, the Hemlock Spruce, is abundant in the forests of the north. There are several very large species in the west, especially *A. Douglasii*, which attains a height of 250 feet, and forms immense forests in the mountain districts. [HEMLOCK-SPRUCE.]

SPRUCE FIR.

spruce-leather, s. Prussian leather; pruce.

spruce-ochre, s. Brown or yellow ochre.

spruce, v.t. & i. [SPRUCE, a.]

(2) A figure, body, or substance nearly approaching such a figure; a square piece or surface.

(3) An area of four sides with houses on each side; sometimes a square block of houses, and sometimes applied to an area formed by the meeting or intersection of two or more streets. In the cities of the United States many, usually rectangular, spaces called by this name, and planted with grass and trees, are laid off as small parks, furnishing breathing places in the closely built-up portions of the city. William Penn, in laying out the plan of his new city of Philadelphia, was careful to provide for a number of squares, conveniently situated, and to these many others have since been added, while several of the other cities of the country have followed the same salutary example. Similar open spaces exist in European cities. They yielded the original suggestion of the modern park.

(4) A square body of troops; a squadron. [II. 7.]

"He alone Dealt on lieutenantry, and so practice had In the brave squares of war."
Shakesp.: *Antony & Cleopatra*, III. 11.

-cian, -tian = shân. -tion, -sion = shûn; -tion, -sion = zhûn. -cious, -tious, -sious = shûs. -ble, -dle, &c = bcl, dcl.

(7) An implement used by artificers for laying off lines to which work is to be sawed or cut. It consists essentially of two pieces at right angles to each other, one of which is sometimes pivoted, so that other angles than a right angle may be scribed or measured. A T square is one in which one ruler meets the other in the middle, so as to form the figure of a letter T. (Written also Squier, Squire, Swere, Swire.)

"Do you not know my lady's foot by th' squier,
And laugh upon the apple of her eye?"
Shakep.: Love's Labour's Lost, v. 2.

* 2. *Figuratively:*

(1) A measure, standard, pattern, or model.
"Those that effect antiquity will follow the square thereof."—*Milton.*

(2) Rule, regularity; exact proportion; justness of workmanship and conduct.

"I have not kept my square, but that to come shall all be done by th' rule."—*Shakep.: Antony & Cleopatra, ii. 2.*

(3) Level, equality.

"We live not on the square with such as these,
Such are our betters who can better please."
Dryden: (Todd.)

(4) A quarrel.

(5) The front part of the female dress near the bosom, generally worked or embroidered.
"Between her breasts the cruel weapon rives
Her curious square, embossed with swelling gold."
Fairfax.

4. *Carp.:* 100 feet, that is, 10 × 10; a unit of measurement used in boarding and roofing.

5. *Geom.:* An equilateral and quadrilateral, having all its angles right angles. The diagonals of a square are equal, and mutually bisect each other at right angles. The ratio of either side of a square to its diagonal is that of 1 to $\sqrt{2}$. The square is employed as a unit of measure in determining the area of surfaces, whence the term square measure, in that connection. The area of any square is equal to the product of two adjacent sides.

6. *Hor.:* That portion of the arbor on which the winding-key is placed, or a similar part on the arbor of the hands of a watch, whereby they are set.

7. *Mil.:* A formation adopted by infantry, formerly, to resist a charge of cavalry. It was two or four men deep, the front ranks kneeling with fixed bayonets, and the rear rank standing. Occasionally squares have been formed to enclose baggage, wounded, &c., when in presence of overwhelming numbers, as in savage warfare.

8. *Naut.:* That part of the shank of an anchor to which the stock and shackle are attached.

9. *Print.:* A certain number of lines in a column, of nearly equal height and width.

¶ 1. *All square:* All right, all arranged.

¶ 2. *At square:* In or into opposition or enmity. [SQUARE, s., l. 2. (4).]

"Falling at square with his husband."—*Holmeshead: Hist. Eng., bk. iv., ch. viii.*

3. *Geometrical square:* [GEOMETRICAL].

4. *Magic square:* [MAGIC].

5. *Method of least squares:* The method of finding the probable error in assuming the mean of a number of discordant observations of a phenomenon; the method of determining the values of certain elements by means of several equations which only approximately express the relations existing between the elements. These approximate equations of condition are usually derived from a series of observations, or of experiments, which are necessarily liable to certain errors. It is shown in the theory of probabilities, that the probable error will be least when the sum of the squares of the errors is a minimum.

6. *On (or upon) the square:*

(1) *Lit.:* At right angles: as, To cut cloth on the square.

(2) *Fig.:* Fairly, honestly: as, To act on the square. (*Colloq.*)

* 7. *Out of square:* Out of the proper order, rule, or proportion.

"The whole ordinance of that government was at first evil plotted, and through other overights came more out of square, to that disorder which it is now come unto."—*Spenser: State of Ireland.*

8. *Three square, five square, &c.:* Having three, five, &c., equal sides; having three, five, &c., angles. (An improper use of square.)

"One end of which being thicker, and almost three square, is inserted into the first bone of the sternon."
—*Wiseman: Surgery.*

* 9. *To break no squares:* To make no difference; to give no offence.

"I will break no squares whether it be so or not."
—*L'Estrange: Fables.*

* 10. *To break squares:* To depart from the accustomed order.

* 11. *To see how squares go:* To see how matters are going; to see how the game proceeds. (An expression borrowed from chess, the chess-board being divided into squares.)

"One frog looked about him to see how squares went with their new king."—*L'Estrange: Fables.*

square-built, a. Of a square build or frame; having a shape broad for the height, and bounded by rectilinear rather than curved lines: as, a square-built man.

square-coupling, s.

Mill-work.: A kind of permanent coupling, of which the coupling-box is made in halves and square, corresponding to the form of the two connected ends of the shafts. The halves of the box are bolted together on the opposite sides.

square-file, s. An entering-file (q.v.).

square-frame, s.

Shipbuild.: A frame square with the line of the keel, having no beveling.

square-framed, a.

Join.: Applied to a work when the framing has all the angles of its styles, rails, and mountings square, without being moulded.

square-joint, s.

Join.: A mode of joining wooden stuff, in which the edges are brought squarely together, without rabbeting, tongue, or feather.

square-leg, s.

Cricket.: A fielder who stands square with the wicket and behind the batsman.

* **square-leg, v.t.**

Cricket.: To hit to square-leg.
"Mr. Read continued a fine display of well-judged hitting by square-legging both bowlers for a couple each time."—*Daily Telegraph, Sept. 8, 1882.*

square-measures, s. pl. The squares of lineal measures: as, a square inch, a square yard, &c.

square-number, s.

Arith.: A number which may be resolved into two equal factors; the product of a number multiplied into itself. Thus, 4, 9, 16, 25, are square numbers, being the squares of 2, 3, 4, 5 respectively.

square-parsley, s.

Bot.: *Meum Buntius.*

square-rig, s.

Naut.: That rig in which the lower sails are suspended from horizontal yards, as distinguished from fore-and-aft rig.

square-rigged, a. [SHIP-RIGGED.]

square-roof, s.

Carp.: A roof in which the principal rafters meet at a right angle.

square-root, s.

Arith. & Alg.: A quantity which, being taken twice as a factor, will produce the given quantity. Thus, the square root of 25 is 5, because 5 × 5 = 25; so also $\frac{3}{2}$ is the square root of $\frac{9}{4}$, since $\frac{3}{2} \times \frac{3}{2} = \frac{9}{4}$; x^2 is the square root of x^2 , since $x^2 \times x^2 = x^4$; $a + x$ is the square root of $a^2 + 2ax + x^2$, and so on. When the square root of a number can be expressed in exact parts of 1, that number is a perfect square, and the indicated square root is said to be commensurable. All other indicated square roots are incommensurable.

square-sail, s.

Nautical:
1. A four-sided sail, whose middle position is athwartship. It is supported by a yard, slung at its mid-length by a truss or parrel. It is distinguished from sails which are extended by stays, booms, gaffs, lateens, sprits, &c.

2. A sail set on the foremasts of schooners, and on the masts of sloops and cutters, when sailing before the wind in light weather.

square-stern, s.

Naut.: A transom stern.

square-toed, a.

squill-insect, *s.* An unidentified aquatic animal. *Monfret (Theater of Insects*, lib. II, ch. xxxvii), says, "The Squilla, an insect, differs but little from the fish Squilla," a word which he uses as synonymous with shrimp. But by early writers names were loosely applied, and from Grew (*Mus. Reg. Soc.*, p. 119) we learn that Squilla was applied also to what he calls the Rough-horned Lobster (probably *Palinurus vulgaris*).

"The *squill-insect* described by Monfret. So called from some similitude to the *squill-fish*: chiefly in having a long body covered with a crust composed of several rings or plates. The head is broad and squat. He hath a pair of notable sharp fangs before, both hooked inwards like a bull's horns."—*Grew: Museum*, p. 174.

squill'-la, *s.* [Lat. = (1) A small crustacean, possibly the pea-crab (PINNOTHERES); (2) a sea-onion, a sea-leek, usually written *scilla* (q.v.).]

Zool.: A genus of Stomapoda (q.v.), with several species, of which the best known is *Squilla mantis*, with a number of popular names. Segments much less coalescent than in the lobster; those bearing the eyes and antennules are readily separable from the front of the head, and are not covered by the carapace, which only conceals eight segments. The gills are borne

Fr. *escuriel*; Fr. *écureuil*; Low Lat. *sciuriolus*, dimin. from Lat. *sciurus*, from Gr. *σκίουρος* (*skiouros*); *σκιά* (*skia*) = a shadow, and *οὐρά* (*oura*) = a tail, hence the name = the animal that shades or covers itself with its tail, from its habit of sitting with the tail curved over its back; *Prov. escuriol*; Sp. & Port. *esquilo*; Ital. *sciojattolo*.]

Zool.: A popular name for any of the Scuridae (q.v.); more particularly for the genus *Sciurus*, though there are even genera and many species in the family all popularly known as squirrels. They are characterized by their slender bodies, round, hairy tails, large, prominent eyes, and usually arboreal habits, though some few excavate subterranean retreats. In *Sciurus* the tail is long and bushy and the ears pointed. *Tamias* is an United States genus, with four species, each having cheek pouches, and

the back striped light and dark. The Chipmunk or Ground Squirrel is a common example. Squirrels haunt woods and forests, nesting in trees, and displaying marvellous agility among the branches. They feed on nuts, acorns, beech-mast, which they store up, birds' eggs, and the young bark, shoots, and buds of trees, doing no small amount of damage. They pass the winter in a state of partial hibernation, waking up in fine, warm weather, when the provision laid up in the summer is made use of for food. They are monogamous, and the female of *S. vulgaris*, the common European squirrel, produces three or four young. They are often kept as pets; in Lapland and Siberia this species is killed in great numbers for the sake of its winter coat. This, though valuable, is inferior to the fur of the North American Gray Squirrel (*S. carolinensis*).

Zoology & Sporting:

1. The Scotch deer-hound, called also the Wolf-dog, a breed that is rapidly dying out. These dogs hunt chiefly by sight, and are used for stalking deer, for which purpose a cross between the rough Scotch greyhound and the colley or the fox-hound is also often employed. True stag-hounds are wiry-coated, shaggy, generally yellowish-gray, but the most valuable are dark iron-gray, with white breast. They are of undamned courage and great speed, and should stand not less than twenty-eight inches high.

SCOTCH STAG-HOUND.

2. A breed of dogs hunting by scent. (See extract.)

"The modern Stag-hound is a tall Fox-hound of about 28 inches in height. The ancient breed is quite extinct. It was, I believe, last used in the Devon and Somerset pack, to hunt the wild red deer. The old hounds have often been described to me as large white and yellow dogs of the old Talbot-breed. They were heavy and slow, but able, from their exquisite tracking powers, to give the stag a grace of an hour or more, and kill him afterwards. The music of their tongues is spoken of as magnificent. In hunting water they were perfect."—*Meyrick: House Dogs & Sporting Dogs*, pp. 21, 22.

3. Hence (Pl.) that which constitutes the principal strength or support of anything; power of endurance; staying power, vigour, backbone.

*4. A first principle; an essential part. "Some few of the main stamina, or chief lines, were taken care of from the first, and made up the first creeds." Waterland: Works, IV. 309.

II. Bot.: The male organ of a flower, called by the old botanists an apex and a chive. Morphologically, it is a transformed leaf. It consists of a filament, an anther, and pollen. The last two are essential, the first is not. When anther and pollen are wanting, the stamen is called sterile or abortive. If the stamens are equal in number to the petals, then normally they alternate with them. When opposite, as in the primrose, it is supposed that the stamens are the second of two rows, of which the first has not been developed. When the stamens are twice as numerous as the petals, and are arranged in a circle, as in Silene, it is believed that they really constitute two rows of five each, though they look like a single row. They always originate from the space between the base of the petals and the base of the ovary, but they may cohere with other organs, whence the terms Epigynous, Hypogynous, and Perigynous (q.v.). Cohesion among themselves may make them Monadelphous, Diadelphous, or Polyadelphous (q.v.). They may be on different flowers, or even different plants, from the pistils, whence the terms Monocious or Dioecious (q.v.). Other terms used of stamens are exerted, included, declinate, didynamous, and tetradynamous (q.v.). In the Linnæan or Artificial System of arrangement, most of the classes are framed on the number of the stamens. [LINNÆAN-SYSTEM.] The stamens taken collectively form the Androecium or male apparatus of the flower.

A. As substantive:

I. Ordinary Language:

1. A flag or ensign round which men rally, or under which they unite for a common purpose; a flag or carved symbolical figure, &c., erected on a long pole or staff, serving as a rallying-point or the like. The ancient military standard consisted of a symbol carried on a pole like the Roman eagle, which may be considered as their national standard. Each cohort had its own standard, by which

it was known, and which was surmounted with a figure of Victory, an open hand, &c., the pole being decorated with circular medallions, crescents, &c. The Labarum was the peculiar standard adopted by Constantine. [LABARUM.] In mediaeval times the standard was not square, like the banner, but elongated, like the guidon and pennon, but much larger, becoming narrow and rounded at the end, which was elit, unless the standard belonged to a prince of the blood-royal. The size of the standard was regulated by the rank of the person whose arms it bore: that of an emperor was 11 yards long; of a king, 9 yards; of a prince, 7 yards; of a marquis, 6½ yards; of an earl, 6 yards; of a viscount or baron, 5 yards; of a knight-banneret, 4½ yards; and a baronet, 4 yards. It was generally divided into three portions—one containing the arms of the knight, then came his cognizance or badge, and then his crest; these being divided by bands, on which was inscribed his war-cry or motto, the whole being fringed with his livery or family colours. The so-called English royal standard, as at present displayed, is properly a banner, being square, and having its whole field covered solely by the national arms. Cavalry standards are also properly banners, of a small size, and corresponding in colour with the facings of the regiment to which they belong. They are charged with the cipher, number, insignis, and honours of the regiment. The corresponding flags used by infantry regiments are called colours.

"Knights bannerets are made in the field, with the ceremony of cutting of the point of his standard, & making it as if were a banner."
—Smith: *Commonwealth*, bk. I, ch. xviii.

2. That which is capable of satisfying certain defined conditions fixed by the proper authorities; especially that which is established by the competent authority as a rule or measure of quantity; the original weight or measure sanctioned by government, and deposited in some public place, to be used in regulating, adjusting, and trying weights and measures used in traffic. [MEASURE, WEIGHT.]

"It is therefore necessary to have recourse to some visible, palpable, material standard; by forming a comparison with which, all weights and measures may be reduced to one uniform size; and the prerogative of fixing this standard our ancient law vested in the crown."
—Blackstone: *Comments*, bk. I, ch. 7.

3. That which is established as a rule or model, by the authority of public opinion, or by respectable opinions, or by custom or general consent; that which serves as a test, gauge, or measure.

"Labour alone, therefore, never varying in its own value, is alone the ultimate and real standard by which the value of all commodities can at all times and places be estimated and compared."
—Smith: *Wealth of Nations*, bk. I, ch. v.

4. A certain degree of advancement, progress, proficiency, &c., to which one must attain to meet certain requirements: as, The standard of height in foot regiments; and the degree of proficiency which a child must reach in order to satisfy the requirements of the public schools, in passing from section to section, or graduating.

* 5. A candlestick of large size, standing on the ground, and having branches for several lights.

6. A measuring device for men or horses; the first expressed in feet and inches, the latter in hands and inches.

7. In the same sense as II. 4.

* 8. One who remains or stays long in the same place or position.

"The fickleness and fugitiveness of such servants justly addeth a valuation to their constancy who are standards in a family, and know when they have met with a good master."
—Fuller: *General Worthies*, ch. XI.

* 9. A suit.

"The lady commanded a standard of her own best apparel to be brought down, and Prudence is so fitted."
—Ben Jonson: *New Inn*. (*Argum.*)

II. Technically:

1. *Bot.*: The erect and expanded fifth or upper petal in a papilionaceous corolla. Called also Vexillum (q.v.).

2. *Carp.*: A strut.

3. *Coinage*: The proportion of weight of fine metal and alloy established by authority. Standard gold is a mixture of metal containing 11 parts of pure gold, with one part of alloy—i.e., 22 carats fine, with two carats of alloy. Standard silver is a mixed metal, containing 37 parts of pure silver, with three parts of alloy.

4. *Hort.*: A tree or shrub standing by itself, without being attached to any wall or

Bot.: *Smyrniolum Olusatrum*.

stánn-ám-ýl, s. [Eng. *stannum*, and *amyl*.]

Chem. (Pl.): Compounds produced by the action of amylic iodide on an alloy of sodium and tin. The product contains the three compounds, $\text{Sn}^{\text{IV}}(\text{C}_5\text{H}_9\text{O}_2)_4$, $\text{Sn}^{\text{IV}}(\text{C}_5\text{H}_9\text{O}_2)_2$, and $\text{Sn}^{\text{IV}}(\text{C}_5\text{H}_9\text{O}_2)$, homologous with the stannethylys. They are all unctuous masses, and do not fume in the air, insoluble in water, soluble in ether; and more soluble in alcohol in proportion as they contain less tin. The stannamyls reduce silver solutions, and are oxidized by nitric acid.

stán-nar-ý, *stán-nér-ý, a. & s. [Low Lat. *stannaria* = a tin-mine, from Lat. *stannum* = tin, an alloy of silver and lead; cf. Corn. *stann*; Wel. *stann*; Bret. *stann*; Ir. *stán*; Gael. *stáoin*; Manx *stainney* = tin.]

A. As adj.: Pertaining or relating to tin-mines.

"The stannary courts in Devonshire and Cornwall, for the administration of justice among the tinners therein, are also courts of record, but of the same private and exclusive nature."—*Blackstone*: *Commentaries*, bk. iii, ch. 4.

B. As subst.: A tin-mine, tin-works. The term is generally used to include in one general designation all the tin-mines within a certain district, the miners employed in working them, and the customs and privileges attached to the mines and those employed in them.

"If by publick law the mine were ordained to be coeily supplied by our stannaries, how currently would they pass for more precious than silver mines!"—*Ep. Mail*: *Select Thoughts*.

stán-náte, s. [Eng. *stannic*; -ate.]

Chem.: A salt of stannic acid.

stannate of potassium, s.

Chem.: K_2SnO_3 . Prepared by dissolving stannic acid in potash-ley, and evaporating over sulphuric acid. It is gummy, uncrystallizable, and strongly alkaline, very soluble in water, but insoluble in alcohol.

stannate of sodium, s.

Chem.: Na_2SnO_3 . Prepared by dissolving stannic acid in soda-ley, and evaporating over sulphuric acid. It is a crystalline granular body, and is less soluble in warm than in cold water, insoluble in alcohol. Used in calico-printing as a mordant, chiefly for mixture of wool and cotton.

***stán-nel, *stán-yel, *stán-nell, s.** [Prob. a corrupt, of *stannipale*, from the habit which the bird has of sustaining itself in one position, with its head to the wind, by a rapid motion of the wings; cf. its other name, Wind-hover.] The Kestrel (q.v.). Called also Staniel, Stanyel, Stannyel, Stone-zale.

"To prevent this danger, therefore, the doves need to have with them the bird which is called Tinmuculus, i.e., a kestrel, or stannell."—*P. Holland*: *Pinie*, bk. x, ch. xxxvii.

stánn-ó-thýl, s. [Eng. *stannum*, and *ethyl*.]

Chem. (Pl.): Ethyl compounds of tin. Three of these are at present known: viz., stannous ethide, $\text{Sn}^{\text{II}}(\text{C}_2\text{H}_5)_2$, stannoso-stannic ethide $\text{Sn}^{\text{IV}}(\text{C}_2\text{H}_5)_2$, and stannic ethide $\text{Sn}^{\text{IV}}(\text{C}_2\text{H}_5)_4$, the first and second acting as organic radicals capable of uniting with chlorine, bromine, oxygen, &c., and the third being a saturated compound.

stán-nio, a. [Eng. *stannum*; -ic.] Contained in or derived from tin.

stannic-acid, s.

Chem.: H_2SnO_3 . Obtained by adding barium or calcium carbonate, not in excess, to a solution of stannic chloride. When recently precipitated, it is gelatinous; but

after drying in the air, it forms hard translucent lumps like gum-arabic. It dissolves in the stronger acids forming stannic salts, and forms easily-soluble salts with the alkali metals.

stannic-chloride, s. [TIN-TETRACHLORIDE.]

stannic-ethide, s.

Chem.: $\text{Sn}^{\text{IV}}(\text{C}_2\text{H}_5)_4$. Stannotetethyl. A transparent colourless liquid obtained by the distillation of stannous ethids. It has a faint ethereal odour and metallic taste, sp. gr. 1.19, boils at 181°, and is very inflammable, burning with a dark blue-edged flame. It dissolves iodine with a brown colour, which gradually disappears.

stannic-oxide, s. [TIN-DIOXIDE.]

stán-nif-ér-óis, a. [Lat. *stannum* = tin, and *fero* = to bear, to produce.] Producing or containing tin.

"The further addition of the oxide of tin produces an enamel of an opaque white of great purity, which is the characteristic glazing of stanniferous or tin-glazed wares."—*Berthollet*: *Staphis*, p. 6.

stán-nine, stán-nite, s. [Lat. *stannum*] = tin; suff. -ine, -ite (*Min.*); Fr. *étain sulfuré*; Ger. *zinnkies*.]

Mineralogy:

1. An ore of tin, now of rare occurrence, but formerly found in a few mines in Cornwall in fair quantity. Crystallization undetermined, but probably tetragonal; found mostly massive. Hardness, 4.0; sp. gr. 4.3 to 4.5; lustre, metallic; streak, blackish; colour, steel-gray, sometimes with a bluish tarnish; opaque; brittle. Compos.: sulphur, 29.6; tin, 27.2; copper, 29.3; iron, 8.5; zinc, 7.5 = 100.1.

2. Under the name Stannite, Breithaupt has described an amorphous pale-yellow mineral, which, with much tin oxide, contains also much silica. Now shown to be quartz, in which finely divided cassiterite (q.v.) is mechanically suspended.

stánn-mé-thýl, s. [Eng. *stannum*, and *methyl*.]

Chem. (Pl.): Methyl compounds of tin. Compounds analogous in constitution to the stannethylys, and resembling them generally in their properties and modes of formation. Three of these are known, viz., stannous methide, $\text{Sn}^{\text{II}}(\text{CH}_3)_2$, stannoso-stannic methide, $\text{Sn}^{\text{IV}}(\text{CH}_3)_2$, and stannic methide $\text{Sn}^{\text{IV}}(\text{CH}_3)_4$.

stán-nó, pref. [Lat. *stannum* = tin.] Of, pertaining to, or consisting more or less of tin.

stán-nó-dí-é-thýl, s. [Pref. *stanno*, and Eng. *diethyl*.] [STANNOSO-STANNIC ETHIDE.]

stán-nó-só, pref. [Mod. Lat. *stannosus* = full of tin.] Pertaining to tin, largely consisting of tin.

stannoso-stannic chloride, s. [TIN-SESQUICHLORIDE.]

stannoso-stannic ethide, s.

Chem.: $\text{Sn}^{\text{IV}}(\text{C}_2\text{H}_5)_2$. Stannobitriethyl. A slightly yellow refractive oil obtained by digesting an alloy of sodium and tin with ethyl iodide, exhausting the mass with ether, evaporating the ethereal solution, and washing the residue with alcohol. It has a peculiar odour, resembling that of rotten fruit, is insoluble in water and alcohol, soluble in ether, and boils at 180°.

stán-nó-té-tréth-ýl, s. [Pref. *stanno*, and Eng. *tetethyl*.] [STANNIC ETHIDE.]

stán-nó-trí-é-thýl, s. [Pref. *stanno*, and Eng. *triethyl*.] [STANNOSO-STANNIC ETHIDE.]

stán-nó-týpe, s. [Lat. *stannum* = tin, and Eng. *type*.]

Photog.: A picture taken upon a tinned iron plate.

stán-noús, a. [Lat. *stannum* = tin.] Of, pertaining to, or containing tin.

stannous-chloride, s. [TIN-DICHLORIDE.]

stannous-ethide, s.

Chem.: $\text{Sn}^{\text{II}}(\text{C}_2\text{H}_5)_2$. Stannoditethyl. A thick yellowish oil, obtained by heating ethyl iodide and tin(II) in a sealed glass tube to 160°, and decomposing the resulting iodide with sodium or zinc. It has a pungent odour, is insoluble

in water, soluble in alcohol and ether, sp. gr. 1.558, does not solidify at -12°, and cannot be distilled without decomposition.

stannous-oxide, s. [TIN-MONOXIDE.]

stán-núm, s. [Lat. = tin.] [TIN.]

***stánt, v.t.** [For *standeth*, 3rd pers. sing. pr. indic. of *stand*.]

stán-tien'-ite, s. [Etym. doubtful, but probably after a Mr. Stantien; suff. -ite (*Min.*).]

Min.: A black resin found in glauconitic sands in East Prussia. Sp. gr. 1.175. Compos.: carbon, 71.02; hydrogen, 8.15; oxygen, 20.83 = 100. Insoluble in benzine, alcohol, &c.

***stán-tient (ti as sh), s.** [STANCHION.]

stán-tion, s. [STEMSON.]

***stán-yel, s.** [STANIEL.]

stán-za, *stánçe, *stánze, *stán-zó, s. [Ital. *stanza*; O. Ital. *stanzic* = a lodging, s dwelling, a stanza, from Low Lat. *stantia* = an abode, from Lat. *stans*, pr. par. of *sto* = to stand; Fr. *stançe*; Sp. & Port. *estancia*.]

1. *Poetry*: A number of lines or verses regularly adjusted to each other, and properly ending in a full point or pause; a part of a poem ordinarily containing every variety of measure in that poem; a combination or arrangement of lines usually recurring, whether like or unlike in measure. A stanza is variously termed Terzina, Quartetto, Settima, Ottava, &c., according as it consists of three, four, six, eight, &c., lines.

"Therefore (but not without new-fashioning the whole frame) I chose Ariosto's stanza, of all other the most complete and best-proportioned, consisting of eight; six interwoven or alternate, and a couplet in base."—*Dryden*: *Barons' Wars*. (Pref.)

*2. *Arch.*: An apartment or division in a building; a room or chamber.

stán-zá-ýc, a. [Eng. *stanza*; -ic] Pertaining or relating to a stanza or stanzas; consisting of or arranged as stanzas.

"That revolt against all stannate law for which he was afterwards to become so famous."—*Athenæum*, Feb. 24, 1852.

stánz-a-íte (z as tz), s. [After Stanzien, Bavaria, where found; suff. -ite (*Min.*).]

Min.: The same as ANDALUSITE (q.v.).

***stánze, *stán-zó, s.** [STANZA.]

stá-pé-di-ál, a. [Low Lat. *stapes* = s stirrup.] Stirrup-shaped.

stá-pé-di-ús, s. [Mod. Lat., from Low Lat. *stapes* (q.v.).]

Anat.: A muscle of the ear, lying in a small cavity of the os petrosus and inserted into the head of the stapes. It is governed by fibres from the facial nerve, tightens the tympanic membrane, and is supposed to regulate the movements of the stapes.

stá-pé-lí-a, s. [Named by Linnæus after John Boerhaave Stapel, who died in 1636. He was a physician at Amsterdam, and wrote a commentary on Theophrastus.]

Bot.: The typical genus of Stapeliæ (q.v.). Corolla rotate, five-cleft, fleshy, containing inside it a double staminal corona of leaves or lobes; odour of the flowers like that of carrion; stems succulent. The branches are generally four-sided and toothed, without leaves. More than a hundred species are known, from the Cape of Good Hope. Some are cultivated in greenhouses on account of the beauty of their flowers.

stá-pé-lí-é-æ, s. pl. [Mod. Lat. *stapeli* (o), Lat. fem. pl. adj. suff. -æe.]

Bot.: A tribe of Asclepiadaceæ.

stá-pés, s. [Low Lat. = a stirrup.]

1. *Anat.*: The third and innermost bone of the ear, named from its form. It is composed of a head, a base, and two crura. It is the auditory ossicle, which is joined to the fenestra ovalis, and corresponds with the columella in Saurapsida.

2. *Surg.*: A bandage for the foot, making a figure-of-8 round the ankle.

stáph-is-á-gri-a, s. [Lat. *staphis*; Gr. *στροφίς* (*staphis*) = (1) a resin, (2) stavesacre (see def.), and *αγρίος* (*agrios*) = living in the fields, wild.]

Pharm.: The seed of *Delphinium Staphis-*

státe, fát, fáre, ámidst, whát, fáll, fáther; wé, wét, hère, camél, hér, thère; píne, píť, síre, sír, maríne; gô, pôť, or wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, únite, cûr, rûle, fûll; trý, Sýrian. æ, œ = é; ey = á; qu = kw.

agra, the Stavesacre, or Licebane (q.v.). It appears to act as an emetic, purgative, and subhelminthic. A powder or ointment of it applied externally destroys vermin.

stāph-is-ā-grīc, a. [Eng. staphisagric(a); -ic.] Contained in or derived from staphisagria (q.v.).

staphisagric-acid, a.

Chem.: A peculiar acid, said to exist in the seeds of Delphinium Staphisagria. It is white, crystalline, and sublimable, and possesses emetic properties.

stāph-is-ā-grīn, s. [Eng. staphisagria(a); -ina.]

Chem.: Staphisaina. An alkaloid extracted from the seeds of Delphinium Staphisagria by alcohol. It has a slightly yellowish colour and a sharp taste, is insoluble in water and ether, very soluble in alcohol, and dissolves in acids, but without neutralising them.

stāph-is-ā-īn, s. [STAPHISAORINE.]

stāph'ŷ-lō, s. [Gr. = a bunch of grapes.] Anal.: The uvula.

stāph'ŷ-lō'ā, s. [Abridged from Gr. σταφυλόδενδρον (staphylodendron) = the bladder-nut.]

Bot.: Bladder-nut (q.v.); the typical genus of Staphyleaceae (q.v.). The branches of Staphylea Emodi are made into the "serpent-sticks" which are sold by the Afghans and the Indian hill tribes, it being supposed that they possess the property of keeping off snakes.

stāph'ŷ-lō'ā-čē-šē, s. pl. [Mod. Lat. staphyle(a); Lat. fem. pl. adj. suff. -aceae.]

Bot.: Bladder-nuts; an order of Hypogynous Exogens, alliance Sapindales, sometimes reduced to a section of Celastraceae. Leaves pinnate, with common and partial deciduous stipules; flowers in terminal, stalked racemes; sepals five, coloured, imbricate; petals five, inserted in or around a crenate, saucer-shaped disk; stamens five, styles two or three, cohering at the base; ovary two or three-celled, with the carpels more or less distinct; ovules several; fruit membranous or fleshy; seeds ascending, roundish. Known genera, three; species, fourteen, widely distributed.

stāph'ŷ-līnē, a. [Gr. σταφυλή (staphulē) = a bunch of grapes.]

Min.: Botryoidal (q.v.).

stāph'ŷ-līn-ī-dē, s. pl. [Mod. Lat. staphylīn(us); Lat. fem. pl. adj. suff. -idae.]

Entom.: Rove-beetles; Devil's Conch-horses; the typical family of the section Brachelytra (q.v.). Some recent entomologists make it the only family of the section, and divide it into eleven sub-families, with about 5,000 species. These are spread over the world, occurring in the dung of animals, in decaying animal and vegetable matter, under the bark of trees, in fungi, in ants' nests, &c. They fly abroad in large numbers in warm evenings after sunset. Their larvae more nearly resemble the adults than in other Coleoptera, showing their rank in the order to be low. (Bates, in Cassell's Nat. Hist.)

stāph'ŷ-lī'nūs, s. [Lat., from Gr. σταφυλίνας (staphulinos) = (1) a kind of carrot or parsnip; (2) a beetle.]

Entom.: The typical genus of Staphylinidae (q.v.). Labrum fissile; tarsi always pentamerous. They are the largest of the family, and are predaceous. Six or more species are British.

stāph'ŷ-lō-mā, s. [Lat., from Gr. σταφυλωμα (staphulōma); σταφυλή (staphulē) = a bunch of grapes, to which the diseased portion of the eye sometimes bears a remote resemblance.]

Pathol.: The protrusion of part of the eyeball beyond its natural position. When the affection has its seat in the cornea it is called staphyloma corneae; when in the sclerótica, s. sclerótica. It may arise from the ulceration of the cornea, or from the effusion of fluid behind the lens of the eyeball. Called also Staphyloma.

stāph'ŷ-lō-plān-tic, a. [Eng. staphyloplasty(a); -ic.] Of or relating to staphyloplasty (q.v.).

stāph'ŷ-lō-plān-tŷ, s. [Gr. σταφυλή (staphulē) = the uvula, and πλάσσω (plássō) = to mould, to form.]

Surg.: The operation for replacing the soft palate when it has been lost.

stāph'ŷ-lōr-ā-phic, a. [Eng. staphylo-graph(y); -ic.] Of or relating to staphylo-graphy (q.v.).

stāph'ŷ-lōr-ā-phŷ, s. [Gr. σταφυλή (staphulē) = the uvula, and ραφή (raphē) = a suture; ράπτω (raphō) = to sew.]

Surg.: The operation of uniting a cleft palate.

stāph'ŷ-lō-sis, s. [STAPHYLOMA.]

stāph'ŷ-lō-tōmō, s. [Gr. σταφυλή (staphulē) = the uvula, and τομή (tomē) = a cutting.]

Surg.: A knife for operating upon the uvula or palate.

stāph'ŷ-lōt-ō-mŷ, s. [STAPHYLOTOME.]

Surg.: Amputation of the uvula.

stā-ple, *sta-pel, *sta-pil, *stap-yile, s. & a. [O. Fr. estaple, estupe (Fr. étape) = a staple or mart, from Low Ger. stapel = a heap, a storehouse of wares; Dut. stapel = a staple, a pile; Dan. stabel = a hinge, a pile; Sw. stapel = a pile, a heap; Ger. stapel = a slip, a staple; stapel = a pile, a heap. The meaning A. 1. 7 is directly from A.S. stapul = a prop.]

A. As substantive:

I. Ordinary Language:

- * 1. A prop, a foundation, a support.
- * 2. A heap of goods or wares; hence a settled or established mart or market; an emporium; a town where certain wares were chiefly taken for sale. In England, formerly, the king's staple was established in certain ports or towns, and certain goods could not be exported without being first brought to these ports to be rated and charged with the duty payable to the king or public. The principal commodities on which customs were levied were wool, skins, and leather, and these were originally the staple commodities.
- * Bruges . . . was the great staple for both Mediterranean and Northern merchandise. — Hallam: Middle Ages, ch. ix., pt. ii.
- * 3. A mart, a market, a place of production.
- * This city of Amsterdam, though she be a great staple of news, yet I can impart none unto you at this time. — Howell: Letters, bk. i., let. 6.
- 4. The commodities sold at a mart; hence the principal commodity grown, manufactured, or produced in any country, district, or town, either for exportation or home consumption.
- 5. The material or substance of anything; raw or unmanufactured material.
- 6. The thread or pile of wool, cotton, or flax.

And seems to overmatch the golden Phrygian fell. — Dryden: Palæstina.

7. The principal element or ingredient in anything; the chief constituent; the main part, the chief item.

8. A bow or loop of metal bent and formed with two points for driving into wood, to hold a hook, pin, bolt, &c.

"He ran the strong gates hew and break: From whence he bet the staples out of brass." — Surrey: Virgile; Æneis li.

* 9. A district, especially one granted to an abbey.

"He also granted libertie of coynage to certain cities and abbeies, allowing them one staple, and two punctions at a rate, with certaine restrictions." — Camden: Remaines; Money.

II. Technically:

1. Foundry: One of the pieces of nail-iron, a few inches long, on one end of which flat discs of thin sheet-iron are rivetted.

2. Mining:

- (1) A shaft uniting workings at different levels.
- (2) A small pit.

B. As adjectives:

- * 1. Pertaining to or being a staple or mart for commodities; as, a staple town.
- * 2. Established in commerce; settled.
- "To ruin with worse ware our staple trade." — Dryden: Annus Mirabilis, civli.
- * 3. According to the laws of commerce; marketable; fit to be sold, &c.

"What needy writers would not solicit to work under such masters, who will take off their ware at their own rates, and trouble not themselves to examine whether it be staple or no?" — Swift.

4. Chief, principal, main; regularly produced or unmanufactured.

"The said three commodities [wool, skins, and leather] . . . were styled the staple commodities of the kingdom, because they were obliged to be brought to these parts where the king's staple was established, in order to be there first rated, and then exported." — Blackstone: Comment, bk. i., ch. viii.

staple-knee, s. [STANDARD-KNEE.]

staple-punch, s. A punch with two points, used to prick blind-roads and slats to receive the staples which connect them.

stā-ple, v.t. [STAPLE, s.] To sort and adjust the different staples of; as, To staple wool.

stā-plēr, *sta-pel-er, s. [Eng. stapl(e); -er.]

- 1. A dealer in staple commodities.
- "Staplers and merchant-adventurers, the one residing constantly in one place, where they kept their magazine of wool, the other stirring, and adventuring to divers places abroad." — Howell: Letters, bk. i., let. 3.
- 2. One employed in assorting wool according to its staple.

star (1), *starre, *sterre, s. [A.S. sterra; cogn. with Dut. ster (in comp. sterre); O. H. Ger. sterro; Icel. stjarna; Sw. stjerna; Dan. stjerne; Gotth. stajrna; Ger. stern; Lat. stella (for stercula); Gr. ἀστὴρ (astēr); Corn. & Shet. steren; Wel. seren; Sansc. tārd (for stārd), stri. From the same root as strew (q.v.).]

I. Ordinary Language:

- 1. Literally:
 - (1) In the same sense as II. 2.
 - "[He] sow'd with stars the heav'n thick as a field." — Milton: P. L., vii. 388.
 - (2) Something resembling a star; speciel.
 - (a) An ornamental figure, having rays like a star, and worn upon the breast to indicate rank or honour. (Tennyson: Wellington, 196.)
 - (b) The series of radial spokes, forming handles, on the roller of a copperplate or lithographic printing-press.
 - (c) A reference mark (*) used in printing or writing as a reference to a note in the margin or at the foot, or to fill a blank where words or letters are omitted; an asterisk.
 - "Remarks worthy of riper observation, note with a marginal star." — Watts.
 - (d) A radiating crack or flaw, as in ice or glass. (Tennyson: Epic, 12.)
- 2. Fig.: A person of brilliant or preminent qualities, especially in a public capacity, as a distinguished actor or singer.

II. Technically:

* 1. Astron.: A heavenly body supposed to have influence over a person's life; a configuration of the planets supposed to influence fortune.

"Hence the expressions, To thank one's stars, To be born under a lucky star, &c.

2. Astron.: The word star is popularly applied to any of the heavenly bodies, with the exception of the sun, the moon, and comets. Strictly speaking, the name is limited to the self-luminous bodies, constituted like the sun, and apparently maintaining a fixed position towards each other. [FIXED-STARS, STAR-NIGHT.] Till recently the hypothesis that the fixed stars, which are undoubtedly suns, are all surrounded by planets, was formed solely on the analogy of the solar system; now the discovery of an apparent planet revolving round Sirius (q.v.) places it on a firmer basis. The fixed stars have long been grouped into constellations. [CONSTELLATION.] The apparent revolution of the celestial vault with all the constellations around a fixed point near Polaris, or the Pole Star (q.v.), is produced by the real rotation of the earth.

3. Billiards: In the game of pool, an additional life bought by a player who has already lost his three lives. In a game of less than eight players there is only one star. So called from the player's colour on the scoring-board being marked with a small star.

"The star cannot be taken before the balls have done rolling." — Field, Jan 21, 1886.

4. Fort.: A small fort, having five or more points, or salient and re-entering angles flanking one another. Called also a Star-fort.

5. Her.: An estoile; a charge frequently borne on the shield, differing from the mullet in having its rays or points waved instead of straight, and in having usually six of these points, while the mullet has only five. When the number is greater, the points are waved and straight alternately.

bōl, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bəl, dəl.

6. Pyrotechny: A small piece of inflammable composition, which burns with a coloured flame.

* **1. Order of the Star:** An order of knighthood formerly existing in France, founded in 1350, in imitation of the Order of the Garter in England, then recently instituted.

2. Order of the Star of India: An order of knighthood instituted in February, 1861, to commemorate the direct assumption of the government of India by Queen Victoria, and subsequently enlarged in 1866, 1875, and 1876. It is conferred for services rendered to the Indian Empire.

The collar of gold consists of the lotus of India, palm branches tied together, and alternate red and white roses, the whole enamelled in their proper colour. The badge is an oval onyx cameo of her Majesty, surrounded by the motto and surmounted by a star of

STAR.
(Order of the Star of India.)

diamonds. The star is a five-pointed one composed of diamonds, resting upon a light blue enamelled circle bearing the motto, the whole surrounded by rays of gold. The ribbon is sky-blue, with narrow white stripe towards each edge. The motto on the badge is "Heaven's Light our Guide."

3. Star of Bethlehem:

Bot.: (1) The genus *Ornithogalum* (q.v.), and spec. *O. umbellatum*; (2) *Hypoxis decumbens*; (3) *Stellaria Holostea*; † (4) *Hypericum calycinum*; (5) Applied to some species of *Allium*. *Ornithogalum* is a genus with somewhat numerous species, almost exclusively confined to the Eastern Hemisphere, many belonging to the Cape of Good Hope, some to the south of Europe. *O. umbellatum* bears 6 to 9 large flowers, white and somewhat fragrant. It is a native of France, Switzerland, Germany, &c., but is naturalized and a common wild flower in the United States.

4. Star of Jerusalem:

Bot.: *Tragopodon porrifolius* and *T. pratensis*. Jerusalem is a corruption of Ital. *Girasole*, from its turning to the sun.

5. Star of night:

Bot.: *Clusea rosea*.

6. Star of the earth:

Bot.: *Plantago Coronopus*. Named because the leaves spread on the earth in star-fashion. (Poir.)

* Star is largely used in compounds, the meaning being in most cases sufficiently obvious, as *star-aspiring*, *star-bespangled*, *star-crowned*, *star-encircled*, *star-paved*, *star-rooted*, *star-sprinkled*, &c.

star-aniso, s.

Bot.: *Illicium anisatum*, a small tree of the order Magnoliaceae, indigenous to China and Japan. The seeds resemble anise, whence the name. In India they are used medicinally, in Europe they are employed chiefly to flavour spirits.

Star-anise oil:

Chem.: A volatile oil extracted from the seeds and seed-capsules of *Illicium anisatum*. It has a pale yellow colour, and resembles anise oil in taste, odour, and nearly all of its reactions, but is more mobile, and remains liquid at +2°.

star-apple, s.

Bot.: The fruit of *Chrysophyllum Cainito*. It is about the size of a large apple, with ten cells, and ten seeds disposed round the centre. [CHRYSOPHYLLUM.]

star-bearers, s. pl. [BETHLEHEMITE, 3.]

* **star-blasting, s.** The supposed pernicious influence of the stars.

"Bless thee from whirlwinds, star-blasting, and taking."—*Shaksp.*: *Lear*, III. 4.

Star Chamber, s.

Eng. Hist.: A court of civil and criminal jurisdiction at Westminster. As originally constituted, it consisted of a committee of the Privy Council. When remodelled by Henry VIII., it consisted of four high officers of state, with power to add to their number a bishop and temporal lord of the council, and two justices of the courts at Westminster. It had jurisdiction in cases of forgery, perjury, riots, maintenance, fraud, libel, and conspiracy, and generally of every misdemeanour, especially those of public importance. It was exempt from the intervention of a jury, and had the power of inflicting any punishment short of death. Under Charles I. its jurisdiction was extended to cases properly belonging to the courts of common law, and its process was summary, and frequently iniquitous, the punishments inflicted being cruel and arbitrary, and mainly, if not solely, for the purpose of levying fines. It was abolished by the Statute 10 Charles I.

"That court of justice, so tremendous in the Tudor and part of the Stuart reign, the star-chamber, still keeps its name; which was not taken from the stars with which its roof is said to have been painted (which were obliterated even before the reign of queen Elizabeth), but from the stars (Hebrew *shetar*) or Jewish covenants, which were deposited there by order of Richard I. in chests under three locks. No star was allowed to be valid except found in these repositories: here they remained till the banishment of the Jews by Edward I."—*Pennant*: *London*, p. 122.

* Now used derisively in referring to any inquiry or investigation (especially of a political character) conducted with astute or partial secrecy.

star-cluster, s.

star-diamond, s.

Min.: A diamond, which, when viewed by transmitted light through one of the octahedral planes, displays a six-rayed star.

star-drift, s.

Astron.: (See extract.)
"It may, indeed, sometimes happen, as Mr. Proctor has pointed out, that stars in a certain region are animated with a common movement. In this phenomenon, which has been called *star-drift* by its discoverer, we have traces of a real movement shared in by a number of stars in a certain group."—*Bull. Story of the Heavens*, p. 463.

star-falling, s. [STAR-JELLY.]

star-finch, s.

Ornith.: The Redstart (q.v.).

star-fish, s.

1. Zool.: A popular name for any individual of the family Asteriidae or Asteridæ (q.v.); applied specifically to the Common Star-fish, *Asterias (Urastra) rubens*, a familiar object on the British coasts. The body is more or less star-shaped, and consists of a central portion, or disc, surrounded by five or more lobes, or arms, radiating from the body and containing prolongations of the viscera; but in some forms the central disc extends so as to include the rays, rendering the animal pentagonal in shape. [See illustration under Asterias.] The integument is of a leathery texture, and is often strengthened by calcareous plates or spines. The mouth is situated in the centre of the lower surface of the body; and the anus is either absent or on the upper surface. Locomotion is effected by means of peculiar tube-like processes [AMBULACRUM], which are protruded from the under-surface of the arms. The nervous system consists of a gangliated cord surrounding the mouth, and sending filaments to each of the arms. The young generally pass through a free larval stage, [ECHINOPÆDIUM], and parthenogenesis seems to occur in Asterias. Star-fish are extremely voracious, and are very destructive to fishermen by devouring their bait. They possess in a high degree the power of reproducing lost members, and abound in all seas. [BRITTLE-STAR.]

2. Bot.: *Stapelia Asterias*.

star-flower, s.

Bot.: (1) *Borrago officinalis*; (2) various species of *Stellaria*; (3) *Ornithogalum umbellatum*, from the stellate white flowers; (4) *Trientalis americana*.

star-grass, s.

Bot.: (1) The genus *Callitriche*, named from the grassy appearance and stellate leaves; (2) *Asperula odorata*; (3) the genus *Hypoxis*, spec. *H. erecta*, a small plant, with grassy leaves and star-shaped yellow flowers; (4) the genus *Aletris*.

* **star-hawk, s.** Prob. a mistake for Sparhawk = a Sparrow-hawk.

star-head, s.

Bot.: The genus *Asteroccephalus*.

star-hyaointh, s.

Bot.: (1) *Scilla autumnalis*; (2) *S. bifolia*, named from the stellate look of the open flowers.

star-jelly, s.

Bot.: *Nostoc commune*, a trembling, gelatinous plant which springs up after rain. Called also Star-shoot, Star-shot, and Star-aloof, from the old folk-superstition that it was part of the remains of a fallen star. (See extract for an obsolete hypothesis as to this plant.)

"The gelatinous substance known by the name of *star-shot*, or *star-jelly*, owes its origin to this bird, or some of the kind; being nothing but the half-digested remains of earthworms, on which these birds feed, and often discharge from their stomachs."—*Pennant*: *British Zoology*, vol. II., p. 658.

star-light, s. & a. [STARLIGHT.]

star-lizard, s. [STELLION.]

star-map, s.

Astron.: A map of the stars or constellations visible in a portion of the sky. The observer is supposed to be looking either due north or due south along the meridian of the place.

* **star-monger, s.** An astrologer, a quack.

"A cozier, star-monger, and quack."
SWIFT: *Eclogy on Partridge*.

star-nose, s.

Zool.: *Condylura cristata*, the sole species of the genus. It is about five inches long, brownish-black in colour, a little paler beneath. At the extremity of the elongated nose is a sort of fringe of about twenty long, fleshy processes, forming a regular star, with the nostrils in the centre. Called also Star-nosed Mole.

star-nosed mole, s. [STAR-NOSE.]

star-reed, s.

Bot.: *Aristolochia fragrantissima*. Its root is used in Peru against dysentery, malignant inflammatory fever, cold, rheumatism, &c.

star-ruby, s.

Min.: A variety of red corundum (q.v.), exhibiting a six-rayed star when cut *en cabochon*.

star-sapphire, s.

Min.: A variety of sapphire (q.v.), which, owing to an internal lamellar structure, shows, when cut *en cabochon*, a six-rayed star.

star-shake, s. A defect in timber, consisting in clefts radiating from the pith to the circumference.

star-shaped, a.

Bot.: Stellate (q.v.).

star-shoot, star-shot, s. [STAR-JELLY.]

* **star-shooter, s.** An old term of contempt for an astronomer. (From their using optical instruments to observe the stars.)

"When navigators began to make observations with instruments on deck, the self-sufficient called them *star-shooters*, and, when a star's altitude was taken, would ask them if they had hit it."—*From Matter to Spirit*, by C. D., Pref. by A. B.

starch, *starobe, s. & a. [A weakened form of *stark* (q.v.), as *bench* from A.S. *benca*, arch from Fr. *arc*, &c.; Ger. *stirke* = (1) strength, (2) starch, from *stark* = strong.]

A. As substantive:

I. Lit. & Technically:

(1) Chem.: (C₁₂H₂₀O₁₀)_n. *Amylum. Fecula*. One of the most important and widely diffused substances in the vegetable kingdom, being found, in greater or less quantity, in almost every plant. To prepare it, the root or seed is finely ground, so as to break the cell-membranes, stirred up with water, and the milky liquid, after passing through a fine sieve, allowed to stand for some time, when the starch settles to the bottom of the vessel. It is a glittering white powder, soft to the touch, tasteless, and insoluble in cold water. Sp. gr. 1.505 at 19°. Under the microscope it is found to consist of granules varying in size, according to the plant from which it is obtained, from .002 to .185 millimetre in diameter. The granule consists of a thin envelope or series of envelopes, having the composition of cellulose, and enclosing the true starch matter or granuloae. In water heated to more than 40°, the granules well, burst the integument, and the granuloae diffusing through the liquid makes the mass appear like a solution. On cooling, if too much water has not been used, it becomes a transparent or semi-transparent jelly, and dries to a hard mass. Sulphuric acid and diastase change it into dextrose, maltose, or dextrine, according to the temperature and the agent employed. Heated to 160°, starch is converted into dextrin, sometimes called British gum. The most characteristic reaction for starch is the deep blue colour which it gives with iodine.

(2) Bot. & Physiol.: Starch is deposited in vegetable cells. Starch grains are stored up as reserve food material in bulbs, rhizomes, tubers, the cellular parts of endogenous stems, seeds, &c. It is starch which makes the grains of cereals and the seeds of leguminous plants so nutritive.

star-ling (1), *ster-lyng, *s.* [A dimin. from *stare* (1), *s.* (q. v.).]

Ornith.: A popular name for any individual of the genus *Sturnus* (q. v.), sometimes extended to the whole family [STURNIDÆ], but specifically applied to *Sturnus vulgaris*, the Common Starling, abundant in most parts of Britain and the continent of Europe, frequently visiting northern Africa in its winter migrations. The male is about eight inches long, general colour of the plumage black, glossed with blue and purple, the feathers, except those of the head and fore-neck, having a

triangular white spot on the tip. The female is very similar, but has the feathers tipped with broader spots, those on the upper parts being light brown. The eggs are from four to six in number, light blue in colour, and are deposited in some hole or crevice on a scanty lining. Starlings feed on snails, worms, and insects; they are gregarious, uniting in large flocks, and may be readily distinguished from all other birds by their whirling method of flight. They become exceedingly familiar in confinement, and display great imitative powers, learning to whistle tunes and to articulate words and phrases with great distinctness.

Bot. : A tribe of Plumbaginaceae having the styles free.

stāt-īca, s. [STATIC.]

Physics: That branch of dynamics which investigates the relations which exist between forces in equilibrium. A body is said to be in equilibrium when, if two or more forces act upon it at the same time, their united effect is such that no motion ensues. The science of dynamics is divided into kinetics and statics, the former treating of forces considered as producing motion, the latter of forces considered as producing rest. By some authorities statics is used in opposition to dynamics, the former being the science of equilibrium or rest, the latter of motion, and the two together constituting mechanics. The two great propositions in statics are that of the lever and that of the composition of forces.

John Wallis placed the whole system of statics on a new foundation.—Macaulay: Hist. Eng., ch. liii. Social statics:—(SOCIOLOGY.)

†stāt-ī-grāph, †stāt-ī-grām, s. [Eng. *static(s)*; suff. -graph, -gram.] Terms proposed to denote representations of statistics by means of lines, areas, &c. (*Nature*, Oct. 22, 1855, p. 597.)

stā-tion, *sta-ci-on, s. [Fr. *station*, from Lat. *stationem*, accens. of *statio* = a standing still, from *status*, pa. part. of *sto* = to stand; Sp. *estacion*; Ital. *stazione*.]

I. Ordinary Language:

*1. The act or manner of standing; attitude, posture, pose. "In station like the herald Mercury."

Shaksp.: *Hamlet*, li. 4.

*2. A state or condition of standing or rest; a standing. "His motion and her station are as one."

Shaksp.: *Antony & Cleopatra*, lii. 5.

*3. The spot or place where a person or thing stands, especially the spot or place where a person habitually stands or is posted to remain for a time; a post assigned. "Take up some other station."

Shaksp.: *Coriolanus*, li. 5.

*4. Situation, position. "The fig and date, why love they to remain in middle station, and an even plain?"

Prior: *Solomon*, l. 88.

*5. Condition of life; social position; rank, state, status. "And yet my love without ambition grew, I knew thy state, my station."

Byron: *Lament of Tasso*, v.

*6. Employment, occupation, business; sphere or department of duty. "We acquire new strength and resolution to perform God's will in our several stations the week following."—Nelson. (Todd.)

II. Technically:

I. Ecclesiology & Church History:

(1) A name given to the fast on Wednesdays and Fridays. In the Roman Church these were fasts of devotion, not of precept, and the Wednesday fast died out, while that on Friday became obligatory, about the end of the ninth century.

(2) A church in which a procession of the clergy haits on stated days to say any stated prayers.

(3) A stopping-place in a monastic procession. These are usually three: Before, (a) the dormitory; (b) the refectory, and (c) the west door of the church.

(4) Any one of the series of stopping-places in the devotion of the Stations of the Cross.

(5) (*In Ireland*): (See extract.) "A station in this sense differs from a station made to any peculiar spot remarkable for local sanctity. . . here, it simply means the coming of the parish priest and his curate to some house in the townland, on a day publicly announced from the altar for that purpose, on the preceding Sabbath. This is done to give those who live within the district in which the station is held an opportunity of coming to their duty, as frequenting the ordinance of confession is emphatically called."—Carleton: *Tales of Irish Peasantry*; *The Station*.

2. Police: A place or building where the police force of any district has its headquarters; a district or branch police-office.

3. Railroad: A building or buildings erected for the reception and accommodation of passengers and goods intended to be conveyed by railway; a place at which railway trains regularly stop for the setting down or taking up of passengers or freight. [DEPOT.]

4. Shipbuild. : A room-and-space staff (q. v.).

5. Survey. : The position of an instrument at the time of an observation.

6. Zoology & Botany:

(1) The peculiar nature of the locality where any plant grows or any animal lives. In the case of plants, it has reference to climate, soil, humidity, light, and elevation above the sea; in that of animals, it has reference chiefly to food, climate, and elevation. Thus some animals feed only on certain plants, and cannot exist where they are absent. The station differs from the habitation or habitat of the plant or animal, which simply means the country of which it is a native. (Lyell: *Princ. of Geol.*, ch. xxxviii., xlii.)

(2) A building, generally on the sea-coast, fitted with all appliances for the examination of the animals of the adjacent bay, gulf, &c.: as, the Granton station, the Neapolitan station, &c.

¶ (1) Military station: A place where troops are regularly kept in garrison.

(2) Naval station: A safe and commodious shelter or harbour for the navy or mercantile marine of a nation, provided with a dock and all other requisites for the repair of ships.

(3) Stations of the Cross: *Eccles. & Church Hist.*: A popular devotion in the Roman Church, consisting of visits, either alone or in procession, to a series of pictures or images, each corresponding to some particular stage in the Passion of Christ, and meditating devoutly thereon. The stations are to be found in nearly every church, and on the continent of Europe they are frequently erected in the open air. The devotion began in the Franciscan order, the official guardians of the Holy Places of the Latins in Jerusalem, and is intended to be a pilgrimage in spirit to the scene of the Saviour's sufferings and death. Many indulgences are annexed to the stations of the Cross. When the stations are made in procession, a verse of the *Stabat Mater* (q. v.) is sung as the people pass from one station to another. Called also Way of the Cross. There are fourteen stations:

1. Christ condemned by Pilate; 2. Christ receives his cross; 3. His first fall; 4. His meeting with his mother; 5. The bearing of the cross by Simon of Cyrene; 6. Veronica wipes the face of Jesus with a handkerchief; 7. His second fall; 8. His words to the women of Jerusalem: "Weep not for me," &c.; 9. His third fall; 10. He is stripped of his garments; 11. The crucifixion; 12. The death of Jesus; 13. The taking-down from the cross; 14. The burial.

station-bill, s.

Naut. : A list containing the appointed posts of the ship's company when navigating the ship.

station-calendar, s.

1. A dial-board at a railway-station, to indicate the hours of starting of trains for given destinations, or the time of starting of the next train for a given place.

2. A contrivance by which the name of the station they are approaching is exposed to the view of the passengers in a railway car. (U. S.)

station-clerk, s. A clerk employed at a railway-station.

station-house, s. A police-station.

station-master, s. The official in charge of a station: specif., the official in charge of a railway-station.

stā-tion-ar-ī, a. & s. [Fr. *stationnaire*, from Lat. *stationarius*, from *statio* = a station (q. v.); Sp. *estacionario*; Ital. *stazionario*.]

A. As adjective:

I. Ordinary Language:

1. Remaining or continuing in the same station or place; not moving, or not appearing to move; fixed, stable. "No stationary steeds Cough their own knell." Cooper: *Tusk*, iv. 147.

2. Remaining in the same condition or state; neither progressing nor receding; neither improving nor getting worse; standing still. "Though the wealth of a country should be very great, yet if it has been long stationary, we must not expect to find the wages of labour very high in it."—Smith: *Wealth of Nations*, bk. I., ch. viii.

II. Astron. (Of a planet): Not changing its relative place in the heavens for some days. This stage occurs at the beginning and ending of the planet's retrogradation.

*B. As subst. : A person or thing which remains or continues in the same place.

"Then they are stationaries in their houses, which be in the middle points of the latitudes, which they call *bellpicks*."—F. Holland: *Plinius*, bk. li., ch. xvi.

stationary-diseases, s. pl.

Pathol. : Certain diseases which depend upon a particular state of the atmosphere, and which, after prevailing for a certain number of years, give way to others. (Dunghison.)

stationary-engine, s. An engine permanently fixed, as distinguished from a locomotive or portable engine; a fixed engine for drawing carriages on a railway or tramway, by means of a rope extending from the station of the engine along the line.

stā-tion-ēr, s. [Eng. *station*; -er.]

1. One who took his station to sell an article. If applied, as it generally was, to those connected with book-selling, it included the publisher as well as the bookseller.

"The right of the printed copies (which the stationer takes as his own freehold), was dispersed in five or six several hands."—Oley: *Prof. to Dr. Jackson's Works*.

2. One who sells paper, pena, pencil, ink, and other articles connected with writing.

¶ The Stationers, or Text Writers, constitute one of the London companies. They were formed into a guild in 1403, and received their first charter in 1557.

Stationers' Hall, s. The hall of the Stationers' Company in Ave Maria Lane, London. [STATIONER.]

¶ To enter at Stationers' Hall: To register (a published work) in the books of the Stationers' Company. This formality is necessary before commencing proceedings for infringement of copyright.

stā-tion-ēr-y, s. & a. [Eng. *stationer*; -y.]

A. As subst. : The articles retailed by stationers, such as paper, pens, pencils, ink, account-books, writing-cases, portfolios, &c.

B. As adj. : Belonging to or sold by a stationer: as, stationery goods.

stationery-office, s. A government office in London through the medium of which stationery is supplied to all other government offices at home and abroad. It also contracts for the printing of reports, &c.

*stāt-īsm, s. [Eng. *stat(e)*; -ism.] The art of government; policy.

"Hence it is that the enemies of God take occasion to blaspheme, and call our religion *statism*."—Smith: *Sermons*, vol. I., ser. 4.

*stāt-īst (1), s. [Eng. *stat(istics)*; -ist.] A statistician.

*stāt-īst (2), s. [Eng. *stat(e)*; -ist.] A statesman, a politician; one skilled in government.

"Adorned with that even mixture of fluency and grace as are requested both in a *statist* and a *courier*."—Marriner: *Antiquary*, l. 1.

sta-tis-tic, a. & s. [Eng. *stat(e)*; -istic.]

A. As adj. : The same as STATISTICAL (q. v.).

B. As substantive:

1. [STATISTICAL].

*2. A statistician. "You were the best *statistic* in Europe."—Southey, in *Memoirs of Taylor of Norwich*, l. 568.

sta-tis-tic-al, a. [Eng. *statistic*; -al.] Of, relating to, or treating of statistics.

"The narrow views of cold-hearted *statistical* writers."—Knox: *Sermon* 23.

Statistical Society, s. [STATISTICS, s.]

ბილ, ბოჲ; პოტ, ჯოლ; oat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = ჲ -dan, -tian = ზჳან. -tion, -sion = ჰჳინ; -tion, -sion = ჰჳინ. -cious, -tious, -sious = ჰჳის. -ble, -dle, &c. = ბელ, დელ

sta-tis-tic-al-ly, *adv.* [Eng. *statistical*; *-ly*.] In a statistical manner; by means of statistics.

stát-is-ti-ó-í-an (o es sh), *s.* [Eng. *statistician*; *-ian*.] One who is versed in statistics; one who collects, classifies, and arranges facts, especially numerical facts, relating to the condition of a country, state, or community, with respect to extent of population, wealth, social condition, &c.

sta-tis-tí-cos, *s.* [Fr. *statistique*.]

1. A collection of facts, arranged and classified, respecting the condition of a people in a state or community, or of a class of people, their health, longevity, domestic economy, their social, moral, intellectual, physical, and economical condition, resources, &c., especially those facts which can be stated in numbers, or tables of numbers, or in any tabular and classified arrangement.

2. That department of political science which classifies, arranges, and discusses statistical facts.

¶ The Italians were the first to recognize the importance of statistics. The earliest English work on the subject was Grant's *Observations on the Bills of Mortality*, published in 1661. The *Statistical Account of Scotland*, edited by Sir John Sinclair, which appeared in 1791, was the first complete work on the subject. The perfecting of statistical methods is largely due to Quetelet, the great Belgian statistician, who founded the Belgian statistical bureau in 1831. The first International Statistical Congress, held at Brussels in 1853, was due to his exertions. Similar congresses have been held since, and in every civilized country since then much time and pains have been given to the collection and tabulation of statistics. This has been particularly the case in the United States, France, Italy, and Germany.

stát-is-tól-ó-gý, *s.* [Eng. *statistic*; *-ology*.] A discourse or treatise on statistics.

* **stát-ive**, *a.* [Lat. *stativus* = stationary; *stativa* (castra) = a stationary (camp).] Pertaining to a fixed camp or military posts or quarters.

* **A. As adj.:** Determined, decreed, ordained, settled.
"It is *statute* and ordaind, that gif any ship, galley, or other vessel, happens to brek."—*Sea Lawis in Balfour's Practick*, p. 263.

B. As substantive:

1. A law proceeding from the government of a state; an enactment of the legislature of a state; a written law: *specif.*, in the United States an act of Congress or state legislature, made by the two Houses and the President or Governor. In Britain a similar act of Parliament.
"The written laws of the kingdom are *statutes*, acts, or edicts, made by the sovereign, by and with the advice and consent of the lords spiritual and temporal, and commons, in parliament assembled. The most of these now extant, and printed in our *statute books*, is the famous Magna Charta, as confirmed in parliament 9 Henry III. . . . And these *statutes* are either general or special, public or private. A general or public act is a universal rule, that regards the whole community; and of this the courts of law are bound to take notice judicially and *ex officio*. Special or private acts are rather exceptions than rules, being those which only operate upon particular persons, and those which are made to supply defects in the common law itself, either by enlarging the law where it was narrow, or by restraining it where it was too lax."—*Blackstone: Comment.*, § 2, (introd.)

2. The act of a corporation, or of its founder, intended as a permanent rule or law: *as*, the *statute* of a university.

3. (*In foreign & civil law*): Any particular municipal law or usage, though not resting for its authority on judicial decisions or the practice of nations. (*Burrill*.)

4. A statute fair (q.v.). (*Prot.*)

¶ (1) **Statute of Frauds**: [FRAUD, ¶ (8)].

stau-rō-līte, s. [Pref. stau-ro-, and Gr. λίθος (lithos) = a stone; Ger. stauroolith.]

Mineralogy: 1. An orthorhombic mineral occurring only in crystals, mostly in cruciform twins of two kinds, one in which the crystals form approximately right angles with each other, and the other in which they are inclined at an angle of about 60°. Hardness, 7 to 7.5; sp. gr. 3.4 to 3.8, after purifying, 3.70 to 3.76; lustre, sub-vitreous; colour, dark brown to black, sometimes grayish; translucent to opaque; fracture, conchoidal. Compos.: silica, 28.3;

alumina, 51.7; protoxide of iron, 15.8; magnesia, 2.5; water, 1.7 = 100, the discrepancies in the analyses being due to impurities. The varieties are: (1) Ordinary; (2) Zinc-stauroilite; (3) Manganese-stauroilite = Nordmarkite. Occurs in schista and gneiss, occasionally in crystals of a tessellated structure, when seen in transverse section, resembling chialotilla.

2. The same as HARMOTOME (q.v.). Named by Kirwan because of its cruciform twins.

stauroilite-schist, s.

Petrol.: A fine micaceous schist containing crystals of stauroilite in various stages of development.

Shakespeare: Merchant of Venice, iv. 1.

¶ *To steal a base*: In base-ball, the act of a base-runner who takes advantage of the slow

passing of the ball between pitcher and catcher to run from one base to the next without waiting for the opportunity afforded by a base-hit or an error in fielding.

B. Intransitive:
 1. To thieve; to practise or be guilty of thieving.
 2. To withdraw or pass privily; to go or come furtively; to slip away or in secretly.
 "He *stealth* into her chamber."
Shakespeare: Rape of Lucrece, ARG. 15.
 ¶ *To steal a march*: To march secretly, hence, figuratively, to gain an advantage by being beforehand. (Usually followed by on.)

steal, s. [STEAL, v.] Any act of stealing, or one involving a theft; unjust and unlawful appropriation.

steal-ér (1), s. [Eng. *steal*, v.; -er.] One who steals; a thief.
 "Yield up
 Their deer to be the stand of the *stealer*."
Shakespeare: Cymbeline, II. 6.

steal-ér (2), s. [STEELER.]

steal-ing, pr. par. a., & s. [STEAL, v.]
 A. & B. As pr. par. & particip. adj.: (See the verb).
 C. As substantive:
 1. The act of one who steals; theft. [LARCENY.]
 * 2. That which is stolen; stolen property. (Generally in the plural.)

* *steal-ing-ly*, adv. [Eng. *stealing*; -ly.] By stealing; slyly, stealthily, furtively, imperceptibly.
 "They did so *stealingly* slip into one another."
Sidney: Arcadia, bk. II.

stealth, * *stelh*, * *stelhse*, s. [Eng. *steal*; -th; Icel. *stædh*; Dan. *stjald*; Sw. *stöld*.]
 * 1. The act of stealing.
 "The owner proveth the *stealth* to have been committed upon him by such an outlaw, and to have been found in the possession of the prisoner."
Spenser: State of Ireland.
 * 2. That which is stolen; stolen property.
 "On his back a heavy load he bare
 Of nightly *stealths*, and pilage several."
Spenser: F. Q. L. III. 14.
 * 3. A going secretly; clandestine or furtive motion.
 "Your *stealth* unto this wood."
Shakespeare: Midsummer Night's Dream, III. 2.

4. Secret, furtive, or clandestine mode of procedure; a proceeding by secrecy; furtive actions or procedure. (Used both in a good and bad sense.)
 ¶ *By stealth*: Secretly, in secret, privately.
 "Let humble Allen, with an awkward shame,
 Do good by *stealth*, and blush to find it fame."
Pope: Epilogue to Satires, l. 124.

* *stealth-like*, a. Stealthy, furtive, aly.
 "And then advanced with *stealth-like* pace,
 Drew softly near her—and more near."
Wordsworth: White Doe, VII.

* *stealth-fül*, * *stealth-füll*, a. [Eng. *stealth*; -ful; -full.] Given to stealth; stealthy.
 "If thy graue rail
 Hath any man seen, making *stealthful* wale
 With all these oxen!"
Chapman: Homer: Hymn to Hermes.

* *stealth-fül-ly*, adv. [Eng. *stealthful*; -ly.] Stealthily.
 * *stealth-fül-néss*, s. [Eng. *stealthful*; -ness.] Stealthiness.

stealth-y-ly, adv. [Eng. *stealthy*; -ly.] In a stealthy manner; by stealth; furtively, alyly.

stealth-y-néss, s. [Eng. *stealthy*; -ness.] The quality or state of being stealthy.

stealth-y, a. [Eng. *stealth*; -y.] Like one whose object is to steal; done by stealth; done or accomplished clandestinely; furtive, aly, clandestine, privy.
 "Now wither'd murder with his *stealthy* pace,
 Moves like a ghost."
Shakespeare: Macbeth, II. 1.

steam, * *steem*, * *stem*, * *steeme*, s. [A.S. *stæam* = a vapour, smell, smoke; Dut. *stoom* = steam.]
 I. Ordinary Language:
 1. In the same sense as II. 1.
 2. Popularly applied to the visible moist vapour which rises from water, and from all moist and liquid bodies, when subjected to the action of heat: as, the steam of boiling water.
 3. Haze caused by the sun's heat.

böll, böy; pöut, jöwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist ph = f -clan, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

4. Any exhalation.

"A pestilent and most corrosive steam,
Like a gross fog Scottish, rising fast."
Cowper: *Tout*, III. 494.

II. Technically:

1. *Physics*: Water in its gaseous form. It is a colourless, invisible gas, quite distinct from the visible cloud which issues from a kettle, &c., which is composed of minute droplets of water produced by the condensation of the steam as it issues into the colder air. Under ordinary atmospheric pressure, water boils in an open vessel at a temperature of 212°, and the steam always has this temperature, no matter how fast the water is made to boil. The heat which is supplied amply suffices to do the work of converting the liquid water at 212° into gaseous steam at 212°, without raising the temperature of the steam at all. If the temperature of steam at 212° is lowered by only a very small amount, part of the steam is condensed; hence steam at this temperature is termed moist or saturated steam. At high temperatures and pressures, steam behaves like a perfect gas; but, at lower pressures and at temperatures near the boiling-point of water, its behaviour differs markedly from that of perfect gases; and this change of properties has to be taken into account in all calculations connected with the expansion of steam in steam-engines. [LAW, ¶ (2).] The terms high pressure (q.v.) and low pressure (q.v.) are applied to steam without any sharply-defined limit between them. If the steam is superheated by passing it through hot pipes, it is converted into dry steam, which, within certain limits, behaves like a perfect gas. If, instead of allowing the steam to escape freely, the water is boiled in a closed vessel, the steam accumulates, and both pressure and temperature rapidly increase, until the former becomes several times greater than that of the atmosphere. If now the steam is allowed to escape, it rapidly expands, and, if it escapes into the cylinder of a steam-engine (q.v.), the expansion can be utilised and converted into work. As the steam expands, its pressure of course becomes less and less, until it is not greater than that of the atmosphere; and at the same time its temperature is reduced, the reduction depending on the rapidly with which expansion takes place. The economic uses of steam are extremely numerous. The most important is that of an agent for the production of mechanical force on railways, in steam-boats, and in manufactures. It is also largely employed in warming buildings, in heating baths, in brewing, in distilling, and for cooking purposes. [STEAM-ENGINE.]

2. *Geol.*: The explosive force of steam seeking vent is believed to be a potent factor in producing earthquakes and volcanic phenomena.

steam-blower, s. A blower driven by a steam-engine, or one in which the steam is mingled with the air-blast. [BLOWER, s. II. I.]

steam-boat, s. A boat or vessel propelled by steam acting either on paddles or on a screw. The term especially belongs to steam river-craft; ocean-going craft being called steamers, steamships, &c.

Steam-boat rollers: Rollers armed with steel teeth, and revolving on parallel axes towards each other, by which coal is broken at the mines. The coal falls on to an inclined screen known as the steam-boat screen (q.v.).

Steam-boat screen: An inclined barrel-screen which receives the coal from the steam-boat rollers, and sorts it.

steam-boiler, s. [STEAM-ENGINE.]

steam-box, s. A steam-chest.

steam-brake, s.

Rail-eng.: A device for bringing the power of steam under pressure to act upon the carriage wheels and stop their motion.

steam-buzzer, s. A form of steam-whistle (q.v.) used in the manufacturing districts as a signal for commencing and leaving off work.

"Nothing at all approaching the steam-buzzer, which is still to be found in some manufacturing neighbourhoods, was known to our happy forefathers. The steam-buzzer is a peculiarly ingenious combination of the fog-horn, a threshing-machine, and a locomotive boiler on the point of bursting. When this device 'goes off' at six o'clock in the morning, with the object of summoning workpeople to their daily toil, it is universally recognized in its vicinity that the time for sleep has passed."—*Daily Telegraph*, Dec. 7, 1855.

steam-car, s. A steam-carriage; a car or carriage drawn by steam power. (Amer.)

steam-carriage, s. A carriage propelled by steam; especially used of a locomotive engine adapted to work on an ordinary road. [STEAM-ENGINE, TRAMWAY.]

steam-casing, s.

Steam-eng.: A steam-jacket around a cylinder or other object to keep in the warmth. Invented by Watt, to prevent the radiation of heat from the cylinder.

steam-chamber, s.

1. The steam-room in a boiler; the space for the collection of steam, above the water-line; a steam-dome.

2. A steam-tank (q.v.).

steam-chest, s.

1. *Steam-engine*: A box or chamber above the boiler to form a reservoir for the steam, and whence it passes to the engine.

2. *Calico-printing*: One form of steam apparatus in which steam is applied to cloths, in order to fix the colours, called steam-colours from this mode of treatment.

3. A chamber heated by steam, and used for softening timber which is to be bent to a curved form, as ships' planking.

steam-chimney, s.

Steam-eng.: An annular chamber around the chimney of a boiler-furnace for superheating steam.

steam-cock, s. A valve or faucet in a steam-pipe.

steam-coil, s. A steam-pipe bent into a shape to occupy the bottom or sides of a boiler, so as to have a large surface in compact space. Used in lard-tanks, malt-vats, vacuum-pans, &c.

steam-colors, s. pl. A style of calico-printing in which a mixture of dye extracts and mordants is typically applied to cloth, while the chemical reaction which fixes the colors to the fibre is produced by steam.

steam-crane, s. A crane worked by a steam-engine; it frequently carries the engine upon the same frame.

steam cylinder, s.

Steam-eng.: The chamber within which the piston reciprocates. [PISTON.]

steam-dome, s. [STEAM-CHAMBER, I.]

steam-dredger, s. [DREDGING-MACHINE.]

steam-engine, s.

Steam & Mech.: An apparatus for converting heat into work. The first steam-engine of which we have any account is the eolipile (q.v.). The Marquis of Worcester (about

described by Papin a few years previously [DIOESTRA, II.], and was applied by Newcomen, who, in conjunction with Cawley, invented the first self-acting engine in 1712, and used it for working pumps, &c. It consisted of a cylinder in which there was a circular disc or piston fitting tightly, but capable of being moved up and down. Attached to the centre of the piston was a vertical shaft or piston-rod; and a stout beam, turning about a centre, was attached at one end by a chain to the piston rod, and at the other end by a chain to a pump-rod. Steam was admitted to the cylinder at the bottom, and the piston rose, the pump-rod being pulled down by a counterpoise attached to that end of the beam. When the cylinder was full of steam, the supply was cut off, and cold water was injected into the cylinder. The steam was thus condensed, and the pressure of the atmosphere acting on the top of the piston drove it down, raising the opposite end of the beam, and with it the pump-rod. In 1763 James Watt invented the method of condensing the steam in a separate vessel away from the cylinder [CONDENSER, II. I.]; he also was the first to use the pressure of the steam itself instead of that of the atmosphere, thus making the mechanism in reality a steam-engine. Watt's first patent was taken out in 1769. Newcomen's engine and Watt's first engine were single-acting (q.v.). In 1781 Watt took out a patent for a double-acting engine (q.v.). Some time previously Watt had introduced the method of allowing the steam to work expansively. [EXPANSION, II. 5.] and showed that the condenser might be dispensed with, the waste steam being discharged into the air by opening suitable valves. The non-condensation of the steam and the method of working steam expansively can only be satisfactorily employed with high-pressure engines, in which the pressure of the steam is several times greater than that of the atmosphere; the early engines of Newcomen and Watt were low-pressure engines, in which the pressure of the steam was not very much greater than that of the atmosphere. The essential parts of a modern steam-engine are: the steam-boiler, usually called the boiler, in which the steam is generated. It is made of wrought-iron plates, sufficiently thick to resist considerably more than the highest pressure which they will be called upon to bear, and the form of the boiler is designed to secure the greatest possible economy of heat. The boilers of locomotives, and of those of many stationary engines, are traversed by a large number of tubes, along which the gases from the fire pass; and in steam fire-engines the boiler consists of a series of comparatively narrow tubes filled with water, this being the form which enables steam to be got up with the greatest rapidity. The height of the water and the pressure of steam in the boiler are in-

1601-1667) described a steam-engine in his *Century of Inventions*, but no practical result followed. In 1698 Captain Savery described his engine for raising water, and this was the first actually used. The principle had been

indicated by gauges, of which there are several forms. In order to prevent the pressure rising too high, each boiler is fitted with one or more forms of safety-valve (q.v.). The cylinder is made of cast-iron, carefully bored on the

inside; and the piston (q.v.) is a circular plate of iron packed closely into the cylinder by means of metallic rings. The piston-rod is usually steel, and passes out of the cylinder through a stuffing-box, in which it is packed steam-tight, either by greased tow or by metallic-rings. The cylinder is provided with a steam-jacket, or outer casing, in which steam circulates; or is covered with some non-conducting material, in order to prevent loss of heat and consequent condensation of steam. The distribution of steam, or its admission above and below the piston, is controlled by a slide-valve (q.v.), working in a small cylinder or valve-casing attached to the cylinder. According to the arrangement of these principal parts, distinctive names are applied to steam-engines. [BEAM-ENGINE, HORIZONTAL STEAM-ENGINE, OSCILLATING-ENGINE, VERTICAL-ENGINE.] They are also classified according to their uses, as Portative, Stationary, Locomotive, Marine, Pumping, &c. In order to overcome the difficulty of the dead-points (q.v.) the fly-wheel was adopted by Watt in his engines, and has been used ever since. [FLY-WHEEL.] In engines which have no fly-wheel the same end is attained by having two cylinders, working on the same shaft, but with their cranks at right angles. The speed at which an engine works depends on the resistance which it has to overcome; and where this resistance is continually varying, as it generally is, the speed of the engine will also vary. It is necessary, however, to keep the speed as uniform as possible, and this is done partly by the fly-wheel, and partly by the governor. [GOVERNOR, II., 2.] In locomotive and other engines where fly-wheels or governors are not used, the speed is regulated by means of an arrangement for varying the time at which the steam is cut off by the slide-valve. [COMPOUND STEAM-ENGINE.] About 1784, Watt patented, but did not actually construct, a locomotive, and Murdoch made a small high-pressure engine, the fly-wheels of which, nine and a half inches in diameter, were used as driving-wheels. Trevithick constructed a high-pressure locomotive in 1802, and Blenkinsop and Chapinan also made locomotives a few years later. The oldest locomotive in existence, *Puffing Billy*, now in the Patent Museum, South Kensington, was constructed in 1813, and was continually used until June 6, 1802. In 1814, Stephenson constructed the Killingworth Engine, which he continually improved, and, in 1825, won the prize offered by the directors of the Liverpool and Manchester Railway, with his engine, *Rocket*. In this he used two cylinders placed one on each side of the engine, and acting on cranks attached to large driving-wheels. The boiler was traversed by a number of narrow tubes, as proposed by Seguin and Booth. In modern locomotives, the boilers are of the tubular form, and the engine is driven by two, or occasionally four, cylinders, placed in front under the boiler, and inside the iron frame on which the boiler is supported. The waste steam from the cylinders is discharged through a pipe in the chimney of the engine, and creates the draught for the boiler. The two cylinders act on cranks on the axle of the driving-wheels, which are sometimes eight or nine feet in diameter. The number of wheels is six, eight, and in some cases twelve, there being two, four, or six driving-wheels coupled together. Since the date of the experiments described the power and efficiency of engines have been enormously increased, largely through the skill and talent of the inventors and machinists of the United States, who have more than kept pace with those of England in the conception of useful and economical devices. The application of the steam engine to the movement of boats was first made a success by Fitch and Fulton, and the power and size of locomotive engines have been increased, until now monsters of eighty tons weight are in use, and a speed of seventy miles an hour is occasionally attained, while forty and more miles has become a common speed. The nominal or low-pressure horse-power of English marine engines is not 33,000 foot pounds, as on land, but more than 44,000 foot pounds, and in America its value is still greater. [INDICATOR, II., 3.]

steam exhaust-port, s. [EXHAUST-PORT.]

steam fire-engine, s. [FIRE-ENGINE, I.]

steam fountain, s. A jet or body of water raised by the pressure of steam upon the surface of the water in a reservoir.

steam-gas, s. [SUPERHEATED STEAM (q.v.)]

steam-gauge, s. An instrument attached to a boiler to indicate the pressure of steam. There are many varieties. The oldest and simplest consists of a bent tube partially filled with mercury, one end of which springs from the boiler, so that the steam rising in the tube forces up the mercury in proportion to the amount of pressure. Bourdon's consists of an elliptical copper tube bent into an arc of 540°. One of the extremities communicates with the boiler or reservoir of condensed gas whose pressure is to be measured, and the other carries an index which moves backward or forward on a graduated arc as the curvature of the tube is varied by changes of pressure.

steam-governor, s. [GOVERNOR.]

steam-gun, s. A gun whose projectile force is derived from the expansion of steam issuing through a slotted tube.

steam-hammer, s.

Mech.: A hammer worked by means of steam. The idea of a steam-hammer seems to have occurred first to James Watt, who patented it in 1784. William Deverell also took out a patent for a steam-hammer in 1806; but it does not appear that in either case the idea was carried into operation. In the year 1839 James Nasmyth invented the steam-hammer called after him, and patented it in 1842. In the older forms of steam-hammer, the hammer-head, attached to one end of a lever, was raised by the action of a cog-wheel or cam acting on the other end of the lever, and was then allowed to fall by its own weight. Hammers of this description are often called Steam-tits. In Nasmyth's hammer, the head is attached to the piston rod of an inverted cylinder supported vertically, and the piston is raised by the action of the steam admitted into the cylinder below the piston. The hammer is allowed to fall by its own weight, or is driven downwards with still greater velocity by the action of steam admitted into the cylinder above the piston. The admission of steam into the cylinder is regulated by a slide-valve worked by a lever, and the force of the stroke can be controlled to such an extent, by regulating the admission of steam, that the largest hammer can be made to crack a nut, or to come down upon a mass of iron with a momentum of many hundred foot-tons. The cylinder, which is supported on a strong iron framework, is very strong, and the steam-pipes are of extra strength, because of the high pressure at which the steam is employed. The piston-rod is of stout wrought-iron or steel, and the hammer itself is also of steel. The weight of the hammer ranges from about two hundred-weight to twenty-five tons; and the object to be struck is placed upon an anvil, consisting of a slab of iron resting on a huge mass of piles and concrete, which frequently descends a great depth into the ground. There are some other forms of less importance. In Condie's steam-hammer the hammer-head is attached to the lower end of the cylinder, and Ramsbottom's two cylinders move horizontally in the same line, but in different directions, and the metal to be forged is placed between them. Some of these are in use at the Railway Works, Crewe. Steam-hammers are rated or classified according to the effective weight of the piston and hammer-head or drop, and range from 100 pounds up to 80 tons. The largest steam-hammer in the world is one in Pennsylvania, of 125 tons. Powerful hydraulic presses are being substituted for hammers in heavy forging work.

STEAM-HAMMER.

steam-hoist, s. An elevator or lift worked by a steam-engine, frequently portable.

steam-horn, s. A steam-buzzer (q.v.).

"The steam-horns of large manufactories."—*Notes & Queries*, April 2, 1867, p. 270.

steam-indicator, s. A device to record the pressure of steam. It was invented by James Watt.

steam-jacket, s. [JACKET, s., II. 1.]

steam-jet, s. A blast of steam emitted from a nozzle.

Steam-jet pump. A form of injector or ejector in which this body of water is put in motion by a steam-jet.

steam-kitchen, s. An apparatus for cooking by steam.

steam-launch, s. A large kind of boat with a propeller-engine.

steam-navigation, s. The art or practice of applying steam to the propelling of boats and vessels; the art or practice of navigating steam-vessels. A doubtful claim has been made that on June 17, 1543, a Spaniard, Blasco de Garay, exhibited a steam-ship, which made an experimental trip in the port of Barcelona, in presence of commissioners appointed by Charles V. The Marquis of Worcester described a steamship in 1655, though he did not publish his description till 1663. On Dec. 21, 1736, a patent was granted to Jonathan Hulls for a kind of steam-tug, which he does not seem actually to have constructed. In 1783, Fitch, an American, moved a boat on the Delaware by paddles worked by a steam-engine; and in the same year Claude, Comte de Jouffroy, constructed an engine which propelled a boat on the Saône. Paddle wheels had been patented by Miller in 1781, and for some time all steam-boats were propelled by paddles. [SCREW-PROPELLER.] Synington used a steam-boat on the Forth and Clyde in 1790, and in 1802 he had one on the Clyde which was able to tow vessels. Fulton used a steam-boat on the Seine in 1803; and in 1807 his boat, the *Clermont*, with engines built by Boulton and Watt, ran from New York to Albany, and soon afterwards there was a regular service between these towns. The first successful steam-boat in Europe was Rell's *Comet*, which in 1812, ran on the Clyde between Glasgow and Greenock, three times a week, with a maximum speed of five miles an hour. The first voyage of a steam-ship from New York to Liverpool was made by the *Savannah* in twenty-six days, in 1819. Regular steam communication with Europe was begun in 1838. In 1845 the *Great Britain* crossed the Atlantic in fourteen days; on October 21-26, 1854, the *Lucania* made the trip from Queenstown to New York (about 2,800 miles) in five days, seven hours and twenty-three minutes, which is the record to date. Other steam-ships, as the *Trenton*, *Paris*, *New York*, *St. Louis*, and *St. Paul*, have developed approximately equal speed. The two last named were built on the Delaware in 1892-5, and are unsurpassed for comfort and seaworthiness. The staunch construction of the *St. Paul* (see illustration) was amply demonstrated when, on the morning of January 25, 1896, this noble vessel was driven hard and fast upon the beach at Long Branch, N. J., during a heavy fog. When finally hauled off, after straining and thumping in the surf for ten days, the vessel was found to be entirely uninjured. [STEAM-ENGINE.]

steam navy, s. A steam-engine employed in excavating earth for docks, canals, &c. (*English*.)

steam-packet, s. A steam-vessel carrying mails and running periodically between certain ports.

steam-pipe, s. Any pipe conveying steam from a boiler to an engine, or a supply-pipe in a system of steam heating or drying.

steam-plough, s. A plough or gang of ploughs drawn by portable steam-engines. By the same means, cultivators, harrows, and other agricultural implements are drawn. Steam ploughs are largely used on the great wheat farms of the West, which are much too large for hand ploughing.

steam-port, s.

Steam-eng.: An opening through the valve seat to the inside of the cylinder. Known as the induction (inlet) port, or the eduction (outlet) port, respectively, according to the course of the steam.

bill, boy; pout, fowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -iŭg. -elan, -tlan = shan. -tion, -ston = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -die, &c. = bəl, dəl.

steam-power, s. The power of steam applied to move machinery or produce any result.

steam-press, s. A press worked by steam-power; specif., a platten-machine driven by steam power.

steam-propeller, s. The same as SCREW-PROPELLER (q.v.).

steam-ram, s. [RAM, s., 11. 2. (2).]

steam-roller, s. A locomotive with wide wheels used for crushing road-metal and leveling roads.

steam-room, s. The capacity for steam over the surface of the water in the boiler.

steam-ship, s. A ship propelled by steam; a steamer.

steam-sled, s. A locomotive constructed to run on ice. The front part rests on a sledge, and the driving wheels are studded with spikes.

steam-stoker, s. A gas-retort charger (q.v.).

steam-table, s. A bellow table, heated by steam, to keep joints and other viands warm in the dining or carving rooms of hotels.

steam-tank, s. A chamber heated by steam, used for various purposes in the arts, such as steaming wood, paper-stock, rendering fats, &c.

steam-tight, a. Tight enough to resist the ingress or egress of steam.

steam-tilt, s. A steam-hammer (q.v.).

steam-toe, s.

Steam-ang.: An arm fastened to a lifting-rod to raise it by the contact of the cam or tappet. The toes on the lifting-rods of the inlet and exhaust are steam and exhaust toes respectively.

steam-trap, s. A self-acting device for the discharge of condensed water from steam-engines or steam-pipes.

steam-tug, s. A small but powerful steam-vessel for towing ships in or out of harbour.

steam vacuum-pump, s. A pump for raising water by the condensation of steam in a vessel situated at such elevation above the water supply that the atmospheric pressure will raise the water to the chamber and operate the valves.

steam-valve, s. A device for opening or closing a steam pipe or port.

steam-vessel, s. A steam-ship.

steam-way, s. A passage leading from the steam-port of a valve to the cylinder.

steam-wheel, s. The same as ROTARY STEAM-ENGINE (q.v.).

steam-whistle, s. A sounding device connected with the boiler of a steam-engine, either stationary, locomotive, or marine, for the purpose of announcing the hours of work, signalling, &c. In the ordinary locomotive steam-whistle the foot is bolted on to the fire-box, has an opening (a) for the admission of steam, and is provided with a cock (e), by turning which steam is permitted to rush into the hollow piece (b), which is provided with holes around its lower and narrower portion, through which the steam rushes into the cavity of the cup (c) and, passing out through the narrow annular opening, impinges against the rim of the bell (d), causing a shrill, piercing sound. Holes in the top of the bell permit the escape of the steam upwardly and increase the volume of sound. The quality of the tone depends on the width of the annular opening, the depth of the bell, and the distance between it and the cup. The calliope (q.v.) is a series of such whistles tuned to a scale and operated by keys.

STEAM-WHISTLE.

steam-winch, s. A form of hoisting-apparatus in which rotary motion is imparted to the winding-axle from the piston-rod of a steam engine, directly or indirectly, through bevel-gearing. The former is more rapid; the latter affords greater power. Specially used for loading and unloading ships.

steam-yacht, s. A yacht fitted with a screw propeller.

steam, "steme," "steeme, v. i. & t. [STEAM, s.]

A. Intransitive:

1. To emit steam or vapour; to give out any vapour or exhalation.

"Ye mists and exhalations that now rise From hill or steaming lake." Milton: P. L., v. 138.

2. To rise in a vaporous form; to pass off in visible vapour.

"The fume or vapour thereof steaming."—P. Holland: Plinte, bk. xxix., ch. iv.

3. To move or travel by the agency of steam.

"He steamed into the station at the usual speed."—Daily Chronicle, Oct. 19, 1888.

B. Transitive:

*1. To emit or give up in vapour; to exhale, to evaporate.

"In slouthful sleeps his melted heart to steem." Spenser: F. Q., II. vi. 27.

2. To expose to the action of steam, for the purpose of softening (as wood), cooking, or disinfecting.

steam-er, s. [Eng. steam, v.; -er.]

1. A vessel propelled by steam; a steam-ship.

2. A steam fire-engine.

3. A locomotive for roads.

4. A culinary vessel with a perforated bottom, placed upon a cooking pot, and having a lid to keep in the steam.

5. An apparatus for steaming grain preparatory to grinding.

6. A steam-tank (q.v.).

steamer-duck, s. [RACEHORSE, 2.]

steamer-lane, s. The usual track followed by ocean steamers plying between any two ports, e.g., Liverpool and New York.

"Moving east on a north-easterly track, a little south of steamer-lanes."—St. James's Gazette, April 6, 1887.

***steam-i-ness, s.** [Eng. steamy; -ness.] The quality or state of being steamy or vaporous; mistiness.

steam-y, a. [Eng. steam, s.; -y.] Consisting of or abounding in steam; resembling steam; misty, vaporous.

"Meantime, on that side steamy vapours rise." Cowper: Sonnet.

stean, s. [STEEN.]

stear-ä'-a-mide, s. [Eng. stear(ic), and amide.]

Chem.: (C₁₈H₃₅O)H₂N. Obtained by heating ethylic stearate with alcoholic ammonia for several days in a sealed tube at a temperature of 120°. It is purified by recrystallization from alcohol and washing with ether. After melting it solidifies at 107.5.

stear-än'-il-ide, s. [Eng. stear(ic); anil(ine), and suff. -ide.]

Chem.: (C₁₈H₃₅O)(C₆H₅)HN. Phenyl-stearamide. Formed when excess of aniline is distilled over stearic acid heated to 230° in an oil bath. The product is purified by repeated crystallization from alcohol, when it is obtained as white shining needles, melting at 93.6°, and solidifying to a mass of radiated crystals.

stear-är'-äte, s. [Eng. stear(ic); -ate.]

Chem. (Pl.): Compounds of stearic acid with the alkalis and metals. They have the consistency of hard soaps and plasters, and are mostly insoluble in water. Stearate of potassium, C₁₈H₃₅KO₂, separates on cooling from a solution of one part stearic acid and one part potassic hydrate in ten parts of water. It forms shining delicate needles, having a faint alkaline taste, and dissolves in 6-7 parts boiling alcohol and 25 parts boiling water. Acid-stearate of potassium, C₁₈H₃₅KO₂·C₁₈H₃₅O₂, obtained by decomposing the neutral salt with 1,000 parts of water. When dried and dissolved in alcohol, it separates in silvery scales, inodorous and soft to the touch. It dissolves in four parts of boiling absolute alcohol.

stear-är'-äne, s. [STEARONE.]

stear-är'-gill-lite, s. [Formed from Eng. stearite, and argillite.]

Mfn.: A soapy-looking clay of varying colour, and like all other clays a hydrated aluminous silicate. Found near Poitiers, France.

stear-är'-ic, a. [Eng. stear(in); -ic.] Derived from or containing stearin.

stearic-acid, s.

Chem.: C₁₈H₃₅O·OH. An acid discovered by Chevreul, and found as a frequent constituent of fats derived from the animal and vegetable kingdoms, and especially abundant as a tristearin in beef and mutton suet. It may be obtained by saponifying the fat with soda ley, decomposing with sulphuric acid, dissolving the fatty acids in alcohol, and repeatedly crystallizing, the first portions of the fatty acid only being taken. When pure it crystallizes from alcohol in nacreous laminae or needles, is tasteless and inodorous, and has a distinct acid reaction. Its specific gravity is nearly that of water, it melts at 69-69.2°, distils in a vacuum without alteration, and is sparingly soluble in alcohol, more so in ether and benzene.

stearic-anhydride, s.

Chem.: C₁₈H₃₅O } O. Formed by the action of stearic chloride on potassic stearate. It is difficult to obtain pure.

stearic-ether, s.

Chem. (Pl.): Compounds of stearic acid with the alcohol radicals. Methylic stearate, C₁₈H₃₅(CH₃)O₂, is formed by heating stearic acid with methylic alcohol in a sealed tube. It is a neutral crystalline mass, insoluble in water, and melting at 38°. Ethylic stearate, stearic ether, C₁₈H₃₅(C₂H₅)O₂. Obtained by passing hydrochloric acid gas into an alcoholic solution of stearic acid. It is a crystalline mass, resembling white wax, melts at 33.7°, and is tasteless and inodorous.

stear-ä'-rid'-ic, a. [Eng. stear(in); Gr. ελθεος (elidos) = foam, and Eng. suff. -ic.] Derived from or containing stearic acid.

stearidic-acid, s.

Chem.: C₁₈H₃₃O₂. Obtained by heating bromostearate of silver with water. It is an amorphous mass with a peculiar faint odour, is soluble in alcohol, melts at 55°, and distils unchanged. With the alkalis it forms soaps.

stear-in, s. [Or. στέαρ (stear) = fat, tallow, suet.]

Chem. (Pl.): Glyceric stearates. These compounds can be formed artificially, but the last is also a constituent of most of the more solid animal and vegetable fats. (1) Monostearin (q.v.). (2) Distearin, C₃H₅(C₁₈H₃₅O₂)₂. Obtained by heating monostearin with stearic acid to 260° for three hours. It forms microscopic laminae, which melt at 58°. (3) Tristearin (q.v.).

stear-är-in-ör-y, s. [Eng. stearin(s); -ery.] The process of making stearins from animal or vegetable fats; the manufacture of stearin or stearins products.

stear-är-ö-chlor-hy'-drin, s. [Eng. stear-(an); chlorhydr(ic), and suff. -in.]

Chem.: C₅H₅ } Cl
C₁₈N₂₅O₂ } HO
Produced by passing hydrochloric acid gas into a mixture of stearic-acid and glycerin heated to 100°. Purified from ether it forms a solid mass, melting at 28°.

stear-är-öc-ön-öte, s. [Pref. stearo-, and Gr. konis (konis) = powder.]

Chem.: Conerbe's name for a yellow-brown pulverulent fat which he extracted from the brain. It is insoluble in alcohol and ether, except in the presence of fixed oils, in which case it dissolves in ether.

stear-är-ö-glü'-cöse, s. [Pref. stearo-, and Eng. glucose.]

Chem.: C₆H₅ } (C₁₈H₃₅O₂)₂ } Glucic stearate.
(HO)₂

Formed when stearin and anhydrous glucose are heated to 120° for fifty or sixty hours. It is obtained in microscopic granules, or as a white fusible mass, is neutral, and assumes with oil of vitriol a reddish colour, changing to violet and black.

stear-är-ö-läu-rät'-in, s. [Pref. stearo-; Eag. laur(in), and retin.]

Chem.: Grosourd's name for the solid fat which separates on standing at + 10° from the oil obtained by warm pressure from the pericarp of bay-berries. It crystallizes in warty masses, but has not been further examined.

stê-ar-ô-lâu-rin, s. [Pref. stearo-, and Eng. laurin.]

Chem.: Grosourdi's name for a fat, deposited on standing at + 6° from the oil obtained by warm pressure from the shelled seeds of the bay-berry. It forms a yellowish white mass.

stê-ar-ôl-ic, a. [Pref. stear-, and Eng. oleic.] Derived from oleic and elaidic acid.

stearoic-acid, s.

Chem.: C18H32O2 = C17H31.CO.OH. Obtained by heating the dibromide of oleic and elaidic acids with an alcoholic solution of potash. It forms long, colourless prisms, insoluble in water, slightly soluble in alcohol, melts at 48°, and volatilizes without decomposition. Its salts are mostly crystalline, those of the alkalis having the properties of soaps.

stê-ar-ône, stê-ar-ône, s. [Eng. stearic; -one, -ene.]

Chem.: C18H32O2 = C17H31. The ketone of stearic acid, produced by the dry distillation of calcic or plumbic stearate, the resulting product being finely pulverised, and then several times washed with ether. It forms delicate nearly laminae, slightly soluble in boiling alcohol, nearly insoluble in cold ether, and melts at 87°.

stê-ar-ô-phân-ic, a. [Eng. steaerophanin; -ic.] Derived from steaerophanin (q.v.).

stearophanic-acid, s.

Chem.: A kind of stearic-acid obtained from Cocculus indicus berries. It crystallizes in small needles, melting at 68°.

stê-ar-ô-ph-ân-in, s. [Pref. stearo-, and Gr. φαίνω (phainô) = to appear.]

Chem.: The fat of Cocculus indicus berries. It agrees with tristearin in nearly all its properties, but melts at 35-36°.

stê-ar-ô-p-tône, s. [Pref. stearo-, and Gr. πτερός (ptēnos) = feathered; hence, fleet- ing, volatile.]

Chem.: Any of the more solid constituents of essential oils, which crystallize out in the cold.

stê-ar-ô-x-yl-ic, a. [Pref. stear-; Eng. oxalyl, and suff. -ic.] Derived from or containing stearic acid and oxalyl.

stearoxylic-acid, s.

Chem.: C18H32O4 = C17H31O2.CO.OH. Obtained by the action of nitric acid on stearoic acid. It crystallizes in brilliant plates, insoluble in water, soluble in boiling alcohol, and melts at 86°.

stê-ar-ô-yl, s. [Eng. stearo(-); -yl.]

Chem.: C18H35. The hypothetical radical of stearone.

stê-ar-yl, s. [Eng. stearic(-); -yl.]

Chem.: C18H35O. The radical of stearic acid.

stê-ât-, pref. [STEATO-]

stê-ât-ar'-gill-ite, s. [STEARGILLITE.]

Min.: A doubtful mineral species occurring in some porphyritic rocks near Ilmenau, Thuringia.

stê-a-tite, s. [Gr. στέαρ (stear), genit. στέαρος (stearos) = tallow, hard fat. The steatitis of Pliny.]

Mineralogy:

1. A term including all the massive and crystalline-massive varieties of talc (q.v.).

2. The same as SAPONITE (q.v.).

stê-a-tif-ic, a. [Eng. steatite(-); -ic.] Pertaining to steatite or soapstone; of the nature of or resembling soapstone.

stê-a-tô-, stê-ât-, pref. [Gr. στέαρ (stear), genit. στέαρος (stearos) = tallow, hard fat.]

Fatty; composed of or resembling fat.

stê-ât-ô-cèle, s. [Pref. steato-, and Gr. κύλη (kêlê) = a tumour.]

Pathol.: A tumour of the scrotum containing fat; scrotal hernia.

stê-a-tô-ma, s. [Gr. στέαρμα (stēatōma).]

Surg.: A wen, the contents of which resemble suet. It may arise on any part of the body, and often grows to a large size.

stê-a-tôm'-a-to-us, a. [STEATOMA.] Of the nature of a steatoma.

stê-ât-ô-mys, s. [Pref. steato-, and Gr. μῦς (mys) = a mouse.]

Zool.: A genus of Muridae, sub-family Dendromyinae, with two species from North and South Africa.

stê-a-tôp'-y-ga, s. [Pref. steato-, and Gr. πυγή (pygê) = the rump, the buttocks.] A great accumulation of fat in the buttocks of some Africans, especially of Hottentot women.

stê-a-tôp'-y-go-us, a. [STEATOPYOA.] Pertaining or relating to steatopyga; characterized by steatopyga.

stê-ât-or'-nis, s. [Pref. steat-, and Gr. ὄρνις (ornis) = a bird. Named because the birds are extremely fat. GUACHARO-OWL.]

Ornith.: A genus of Caprimulgidae, with a single species, Steatornis caripensis, sometimes made the type of a family Steatornithidae. In many respects it resembles the Goat-suckers, but differs from them in being a vegetable-feeder. Since Humboldt's time, it has been found in Bogota (GUACHARO) and in Trinidad.

stê-ât-or-nith'-y-dæ, s. pl. [Mod. Lat. steatornis, genit. steatornith(is); Lat. fem. pl. adj. suff. -idæ.] [STEATORNIS.]

stê-a-tô-zô-ôn, s. [Pref. steato-, and Gr. ζῴον (zōon) = a living being, an animal.]

Zool.: A synonym of Demodex (q.v.).

stêck-â-dô, s. [STICKADOBE.]

* stêd, s. [STEAD.]

stêd'-fast, a. [STEADFAST.]

stêd'-ing-êrs, s. pl. [See def.]

Church Hist.: A politico-religious sect which arose early in the thirteenth century in the district of Steding, now called Oldenburg. They appear to have been a section of the Albigenses, and a crusade was organized against them by Gerhard, Archbishop of Bremen.

stêd, s. [A.S. stigan = to mount.] A ladder. (Prov.)

stêd, * stede, s. [A.S. stêda = a stud-horse, a stallion (cf. stôdmÿre = a stud-mare), from stôd = a stud (q.v.); Irish stêad = a steed; Ger. stute = a mare; Icel. stadda = a mare; stôdhæstr = a stallion; stôdhmerr = a stud-mare, a brood-mare.] A horse, especially a spirited horse, or one for war or state. (Used chiefly in poetry or poetical prose.)

"To see this wondrous
Winged steed with mane of gold."
Longfellow: Pegasus in Fount.

stêck, stôlk, v. t. [A.S. stician = to pierce, to stick (q.v.).]

1. To pierce with a sharp-pointed instrument; to stitch or sew with a needle. (Scott.)

2. To shut, to close, to fasten.

"But now, hinky, that ye hae brought us the brandy, and the mug with the hot water . . . ye may steeck the door."—Scott: Guy Mannering, ch. xvi.

stêck, stôlk, s. [STEEK, v.] The act of stitching with a needle; a stitch.

stêel, s. & a. [A.S. stêl, stêle, stêle; cogn. with Dut. staal; Icel. stál; Dan. staal; Sw. stål; O. H. Ger. stahal; Ger. stahl.]

A. As substantive:

I. Ordinary Language:

1. Literally:

(1) In the same sense as II.

(2) A piece of such metal used for striking sparks from flint to ignite tinder or match.

"The steel must be struck in a proper manner, and with proper materials, before the latent spark can be elicited."—Knox: Essay, ess. 70.

(3) A round rod of steel, having longitudinal striations, used for sharpening knives.

2. Figuratively:

(1) A weapon, especially an offensive weapon, as a sword, a spear, or the like.

"Brave Macbeth with his brandish'd steel . . . Carv'd out his passage."—Shakspeare: Macbeth, 1. 2.

(2) Anything of extreme hardness; hardness, sternness, rigour; as, a heart of steel.

(3) A narrow slip of steel used for stiffening or expanding ladies' dresses.

"No steels are worn behind the knees."—Daily News, Dec. 17, 1866.

* (4) A mirror. (Cartwright: Lady Errant.)

II. Technically:

1. Chem., &c.: A very remarkable and useful kind of metallic iron, intermediate between cast-iron and malleable iron, prepared by imbedding bars of malleable iron in powdered charcoal contained in a large rectangular crucible, and exposing for many hours to a full red heat. The iron takes up from one to two per cent. of carbon, becoming harder, and, at the same time, fusible, but with a certain diminution of its malleability. The product of this operation has a blistered appearance—hence called blistered steel, but this is obviated by welding a number of bars together. Bessemer steel is produced by forcing atmospheric air into melted cast iron. The colour of steel is grayish-white; sp. gr. 7.60-7.98. Its most remarkable property is that of becoming very hard when heated to redness and suddenly plunged into cold water. If re-heated to redness, and left to cool gradually, it becomes as soft as ordinary iron. Between these two conditions any required degree of hardness may be attained. Hence, in the manufacture of steel articles, they are first forged into shape, then hardened, and, lastly, tempered by exposure to a proper degree of annealing heat, which is often judged of by the colour of the thin film of oxide which appears on the surface. A temperature of 221°, indicated by a faint straw colour, is the most suitable temper for lancets and razors, 250°, indicated by a brownish tint, for scissors and penknives. For swords, watch-springs, and all articles requiring softness and elasticity, the steel must be heated to 289°-293°, or until the surface becomes deep blue.

"Steel is eldest brother of iron, extracted from the same ore, differing from it not in kind, but degree of purity, as being the first running thereof. It is more hard and brittle (whilst iron is softer and tougher) useful for the making of English knives, stiches, shears, &c., but fine edges cannot be made thereof, as lancets for letting of blood, incision knives, razors, &c."—Fuller: Worthies; Gloucestershire.

2. Hist., &c.: In the A.V. of the Bible, the word "steel" occurs in 2 Sam. xxii. 35; Psalm xviii. 34; Job. xx. 24; and Jer. xv. 12, but in all these places the R.V. substitutes the word "brass." The Greeks are said to have derived it, as early as the Homeric age, from the Chalybes, and the name Χάλυξ (Chalypus), was applied both to the people and to the metal. The Caliberians were celebrated for their manufacture of steel in the first century, B.C. The process of hardening it by immersion in water was known in Western Europe in the eleventh or twelfth century. Then oil was substituted for water. Cast steel was first made at Attercliffe, near Sheffield, in 1740. The Bessemer process for converting pig-iron into malleable iron, and it again into steel with small consumption of fuel, was first communicated to the British Association at Cheltenham in 1856. Siemens, in 1876, produced steel direct from iron ore. The greater durability of steel now increasingly leads to its being preferred to iron, for the construction both of ships and of rails.

B. As adjective:

1. Lit.: Made of steel.

2. Fig.: Resembling steel in hardness hence, unfeeling, stern, rigorous.

"Thy steel bosom."—Shakspeare: Sonnet 138.

steel-bow, s.

Soots Law: Steel-bow goods consist of corn, cattle, straw, implements of husbandry, delivered by the landlord to his tenant, by means of which the tenant is enabled to stock and work the farm, and in consideration of which he becomes bound to return articles equal in value and quality at the expiration of the lease. The origin of the term is uncertain. (Bell.)

steel-bronze, s. A very hard and tenacious alloy, used as a substitute for steel in the manufacture of cannon. Its composition varies but little from that of the usual gun-metal—90 copper, 10 tin.

steel-cap, s. A cap or head-piece of steel; armour for the head.

"He has placed the steel-cap o'er his long flowing hair."—Scott: Rokeby, v. 29.

steel-clad, a. Clad in steel or armour mailed.

"No longer steel-clad warriors ride Along thy wild and willow'd shore."—Scott: Lay of the Last Minstrel, iv. 1.

* steel-clenched, a. Fastened or protected with steel.

"By a steel-clenched postern door."—Scott: Lay of the Last Minstrel, II. 8.

bôil, bôy; pôit, jôwî; eat, çell, chorus, çhin, bench; go, gem; thin, çhis; sin, aç; expect, çenophon, exist. ph = f. -clan, -tian = çhan. -tion, -sion = çhün; -çion, -çion = çhün. -çious, -çious, -çious = çhüs. -hio, -dio, &c. = beî, del.

* steel-dight, a. Steel-clad.

"And steel-dight nobles wiped their e's"
Scott: Thomas the Rhymer, pt. II.

steel-engraving, s.

1. The art of engraving upon steel plates for the purpose of producing prints or impressions in ink upon paper and other substances.

2. The design engraved upon a steel-plate.

3. The impression or print taken from an engraved steel-plate.

steel-furnace, s. A metallurgic furnace in which iron or steel is treated for the production or refining of steel.

steel-headed, *steel-head, *steel-hed, a. Having a head, tip, or top of steel.

"The steel-head spears they strongly coacht, and met."
Spenser: F. Q., III, 12. 16.

Steel-headed-rail:

Railway: A rail having an upper surface or tread of steel welded on to a body of iron.

steel-hearted, a. Hard-hearted, stern, rigorous.

steel-master, s. A proprietor of steel-works.

"Iron-masters, steel-masters, iron consumers, and export merchants, from all parts of the kingdom, will be present in great force."
Daily Telegraph, Sept. 26, 1854.

steel-mill, s.

1. Ord. Lang.: A mill with metallic grinding-surfaces, usually of steel, but sometimes of cast-iron, as being cheaper and sufficient for the purpose.

2. Mining: A steel-wheel revolving in contact with a flint, to make a light in a mine; used before the invention of the safety-lamp.

steel-ore, s.

Min.: A name given to the siderite (q.v.) of Nassau, because of the iron it yielded being peculiarly adapted for conversion into steel.

steel-pen, s. A pen made of steel. [PEN (2), s., l. i. (3).]

steel-plate, s.

1. A piece of steel flattened or extended to an even surface, and of uniform thickness. They are used as armour for the sides of warships, and other purposes.

2. A plate of polished steel, on which a design is engraved for the purpose of transferring it to paper, &c., by impressing or printing.

3. An impression or plate taken from an engraved steel-plate; a steel engraving.

steel-toys, s. pl. A manufacturing term applied to small articles such as corkscrews, buckles, and similar objects, when made of polished steel. Birmingham and Sheffield are the chief seats of their manufacture, which employs a large amount of capital and a considerable number of operatives. (Chambers.)

steel-trap, s. A trap with steel jaws and a spring to catch wild animals.

steel-wine, s. Wine in which steel filings have been placed for some time; it is used medicinally.

steel-yard, s. [STEELWARD.]

steel, v.t. [A.S. *stylan*; Icel. *stála*; Ger. *stählen*.]

I. Lit.: To point, overlay, or edge with steel.
"He had in his hande a great glane, sharpe and well edged."
Barners: Froissart; Cronycle, vol. I, ch. lix.

II. Figuratively:

1. To fortify as with steel; to make hard, stubborn, obstinate, or unfeeling; to harden, to strengthen.
"Temperd their headlong rage, their courage steeld."
Scott: Don Roderick, xiv. (Council.)

2. To cause to resemble steel, as in smoothness, polish, or other qualities.

steèle-ite, s. [After Mr. J. Steele; suff. -ite (Min.).]

Min.: An altered variety of mordenite (q.v.), occurring in sphaera varying in size from one to two and a half inches in diameter at Cape Split, Nova Scotia.

steel'-ér, s. [Etym. doubtful.]

Shipwright: The foremost or aftermost plank in a strake, which is dropped short of the stern or stern-post of a vessel.

steel'-i-néss, s. [Eng. *steely*; -ness.] The quality or state of being steely; extreme hardness.

steel'-ing, pr. par. & s. [STEEL, v.]

A. As pr. par. (See the verb).

B. As substantive:

1. The process of welding a piece of steel on that part of a cutting instrument which is to receive the edge.

2. The process of covering a metal plate with steel by voltaic electricity for the purpose of rendering it more durable. It is applied to stereotype and engraved copper-plates.

steeling-strake, s.

Shipwright: A steeler (q.v.).

* steel'-y, * steel-y, a. [Eng. *steed*; -y.]

1. Literally:

(1) Made of steel; consisting of steel.

"Steel through opposing plates the magnet draws,
And steely stones calls from dust and straw."
Grubbe: Parish Register.

(2) Resembling the surface of polished steel.

2. Fig.: Resembling steel in hardness; hard, firm, stern, inflexible.

"O tough and steely herbes, o herbe more hard than fyre or other stone."
Fisher: Seven Psalms, Ps. 143, pt. II.

steel'-yard, *stil'-i-ard, *styl'-i-arde, s. [Eng. *steel*, and *yard*.]

Mech.: A balance or weighing-machine consisting of a lever with unequal arms. It is of two kinds. The Roman balance is formed by suspending the article to be weighed from the end of the shorter arm, or placing it in a scale depending therefrom, and adding a determinate weight along the longer one till an equilibrium is obtained. The longer arm is so graduated that the figure opposite to which the weight rests indicates the weight of the article at the extremity of the shorter arm. The second form is the Danish balance (q.v.).

"It is usual with butchers and other tradesmen to weigh in the stavers, commonly called the *stilaras*, ten or twenty pounds weight."
Boyle: Works, III. 451.

Steeleyard Company, Stillyard Company:

Hist.: A company of German and Flemish merchants to whom Henry III. granted many valuable privileges in 1259. These were confirmed by Edward I., and the company flourished till the reign of Edward VI., when the Merchant Adventurers complained of them, and they were held to have forfeited their liberties, and were expelled from England by Elizabeth in 1597. Their hall was called the Steeleyard, according to some authorities, from the steel which they imported, but more probably from the king's steelyard erected on that spot (near what is now Iron Wharf) to weigh the tonnage of all goods brought into London. (Thornbury: Old & New London, II. 32-34.)

steón, stéan, *steane, s. [A.S. *stæna*.] A vessel of clay or stone.

"Upon a huge great earth-pot *stæne* he stood,
From whose wide mouth there flowed forth the
Romane flood."
Spenser: F. Q., VII. vii. 42.

steón, stéan, v.t. [STONE, s.] To line with stone or brick, as a well, a cesspool, or the like; to mend with stone, as a road. (Prov.)

steón'-bók, s. [STEINBOK.]

steón'-ing, stéan'-ing, s. [STEEN, v.]

Arch.: The brick or stone wall or lining of a well or cesspool, the use of which is to prevent the irruption of the surrounding soil.

Steón'-kirk, s. [STEINKIRK.]

steón'-strú'-pine, s. [After Steenstrup, who first found it; suff. -ine (Min.).]

Min.: A mineral occurring in crystals and massive at Kangerluarsuk, Greenland, associated with lepidolite and syrite. Hardness, 4.0; sp. gr. 3.38; colour, brown. Compos.: essentially a hydrous silicate of cerium, lanthanum, didymium, thorium, soda, alumina, and sesquioxide of iron.

steóp, *steope, *step, *stepe, a. & s. [A.S. *steop* = steep, high, lofty; O. Fria. *step* = high; Icel. *steypdr* = steep, rising high; A.S. *stepan* = to erect, to exalt.]

A. As adjective:

1. Making a large angle with the plane of the horizon; ascending or descending with great inclination; precipitous.

2. Not easily accessible; lofty, elevated, high.

3. High-priced, dear. (Slang.)

B. As subst.: A precipitous place; a rock

or hill sloping with a large angle to the plane of the horizon; a precipice.

"So eagerly the fiend
O'er bog, or steep, through strait, rough, dense, or rare,
With head, hands, wings, or feet, pursues his way."
Milton: P. L., II. 944.

*steep-down, a. Precipitous.

"Wash me in steep-down gulle of liquid fire."
Shakspeare: Othello, v. 2.

↑steep-grass, steep-weed, steep-wort, s.

Bot.: *Pinguicula vulgaris*.

steóp, *stepe, *stepyn, *steepe, v.t. [Icel. *steypa* = to make to steep, to pour out liquids, to cast metals; *stípa* = to steep (q.v.); Sw. *stípa* = to cast (metals), to steep, to sink; Dan. *stíbe* = to cast (metals); *stób* = the steeping of grain, steeped corn.]

1. To soak in a liquid; to macerate; to dip and soak in a liquid, to imbue; to extract the essence by soaking.

"A sop in honey steep'd to charm the guard."
Dryden: Virgil; Æneid, VI. 667.

2. To wet, to make wet.

"That sought she did but wayle, and often steeps
Her daily couch with tears, which closely she did weep."
Spenser: F. Q., III. II. 22.

3. To imbue thoroughly.
"With tongue in venom steeped."
Shakspeare: Hamlet, II. 2.

steóp, *steepe, s. [STEEP, v.]

1. Something steeped or used in steeping; a fertilizing liquid in which seeds are steeped to quicken germination.

2. The state of being steeped, soaked, or imbed.

"Strait to the house she hurried; and a sweet steope
Found on each woer; which so laid in steope
Their drovle teardrops, that each brow did nod."
Chapman: Homer; Odyssey II.

3. A rennet-bag.

*steóp'-én, v.t. [Eng. *steep*, a.; -en.] To become steep, or steeper.

steóp'-ér, s. [Eng. *steep*, v.; -er.] A vat in which the indigo-plant is soaked for maceration, previous to soaking in the beating-vat.

steóp'-i-néss, s. [Eng. *steepy*; -ness.] The quality or state of being steepy or steep; steepness.

"The craginess and steepness of places up and down is a great advantage to the dwellers."
Howell: Inst. for Travellers, p. 152.

*steóp'-ing (1), s. [Etym. doubtful.] A counterfeit coin current in the reign of Edward I. They were manufactured abroad, and were of the value of one halfpenny.

"Two lovely berries moulded on one stem."

Shakespeare: Midsummer Night's Dream, III. 2.

(3) Anything resembling a stem or stalk; as, the stem or tube of a tobacco-pipe, a thermometer, or the like.

(4) In the same sense as II. 6.

"Armed the stemme and becke-head of the ship with sharpe lines and pikes of brass."—P. Holland: Plinie, bk. vii, ch. lvi.

* 2. Figuratively:

(1) The stock of a family; a race or generation of progenitors.

"Whoever will undertake the imperial diadem, must have of his own wherewith to support it; which is one of the reasons that it hath continued these two ages and more in that stem, now so much spoken of."—Joulet: Vocal Forest.

(2) A branch; a branch of a family.

"This is a stem Of that victorious stock."

Shakespeare: Henry 7., II. 4.

(3) An advanced or leading position; a lookout.

II. Technically:

1. Bot.: The ascending axis of a plant. It seeks the light, strives to expose itself to the air, and expands itself to the utmost extent of its nature to the solar rays. With regard to direction, it may be erect, pendulous, nodding, decumbent, flexuose, creeping, or climbing. It is generally cylindrical; but may be triangular, as in Carex; square, as in the Labiatae; two-angled, as in some Cacti; filiform, as in flax; or leaf-like, as in Ruscus. It consists of bundles of vascular and woody tissue embedded in various ways in cellular substance, the whole being enclosed with an epidermis. Stems may be aerial or under ground. The most highly developed form of the former is the trunk of a tree, the next is that of a shrub. There are also herbaceous stems. Sometimes a plant appears stemless; only, however, because the stem is short enough to be overlooked. In duration, a stem may be annual, biennial, or perennial. In structure it may be exogenous, endogenous, or acrogenous (q.v.). Aerial stems generally branch, and bear leaves, flowers, and fruit. An underground stem is often mistaken for a root, but differs in its capacity of bearing leaves. [Ruizome.]

2. Mech.: The projecting-rod which guides a valve in its reciprocations.

3. Mining: A day's work.

4. Music: The line attached to the head of a note. All notes used in modern music but the semibreve, or whole-note, have stems; quavers and their subdivisions have stems

and hooks. In writing a "single part" for a voice or instrument, it is usual to turn the stems of notes lying below the middle line of the staff upwards, of notes lying above the middle line downwards. Notes on the middle line have their stems up or down as seems best. In a "short score," as for four parts, the stems of the higher part in each staff are turned up, those of the lower part down.

5. Ornith.: The main stalk of the feather, bearing all the other external parts, and usually resembling a greatly elongated cone. At the lower part, which is inserted in the skin, it is cylindrical, hollow, and transparent; higher up, it is filled with a cellular pith. The parenchymatous portion of the stem is called the shaft, and it is from the flattened sides of this that the barbs issue. (Nitzsch: Pterylography, sect. 1, ch. 1.)

6. Shipbuild.: The upright piece of timber or bar of iron at the fore end of a vessel, to which the forward ends of the stakes are united. With wooden stems, the lower end is scarfed into the keel. The upper end supports the bowsprit, and in the obtuse angle is the figure-head. The advanced edge of the stem is the cut-water. It is usually marked with a scale of feet, showing the perpendicular height above the keel, so as to mark the draught of water at the fore-part. Called also stem-post.

7. Vehicles: The bar to which the bow of a falling hood is hinged.

stem-clasping, a.

Bot.: Embracing the stem with its base; amplicaulx, as a leaf or petiole.

stem-head, s. The top of the stem-post (q.v.).

"A gaff tryrail and a stayrail tacked to the stem-head gives me sufficient sail-area for cruising."—Field, Jan. 30, 1856.

stem-knee, s.

Shipbuild.: A knee uniting the stem with the keel.

stem-leaf, s.

Bot.: A leaf growing from the stem.

stem-muscle, s.

Biol.: A name sometimes given to a contractile fibre in the pedicel of Vorticella (q.v.).

stem-piece, s.

Shipbuild.: An independent piece (q.v.).

stem-post, s. [STEM, II. 6.]

stem-winder, s. A watch having a stem or pendant which may be thrown into engagement with a winding wheel, so as to wind up the spring without the intervention of a key; a keyless watch.

stēm, *stemme, v. t. & i. [Eng. stem = a trunk of a tree, as a trunk thrown into a river stems or checks its current; Icel. stemma = to dam up; Dan. stemme = to stem; Ger. stemmen = to fell trees, to dam up water.]

A. Transitive:

1. To dam up; to check or stop, as a stream or moving force.

3. To dash against with the stem; to strike or cut with the stem: as, The vessels stemmed each other.

* 4. To steer.

"He is the master of true courage that all the time sedately stems the ship."—Cornelius Nepos in English (1729) (dedic.)

* B. Intrans.: To make way in opposition to some obstacle or obstruction, as a tide, a current, the wind, or the like.

"They on the trading flood, . . . Ply, stemming nightly toward the pole."—Milton: P. L., II. 642.

* steme, v. [STEAM, s. & v.]

stēm-less, a. [Eng. stem; -less.] Having no stem; having the stem so little developed as to appear to be wanting; acaulescent.

* stēm-lēt, s. [Eng. stem, s.; dimin. suff. -let.] A little or young stem.

stēm-ma-ta, s. pl. [Pl. of Gr. στῆμα (stēma) = a garland. So called because they are often arranged in a circular form on the top of the head.]

Compar. Anal.: The same as OCELLI, 2. [COMPOUND-EYES.]

stēm-ma-tōp-tēr-ia, s. [Gr. στῆμα (stēma), genit. στῆματος (stēmματος) = a garland, and πτερίς (ptēris) = a kind of fern, so named from the form of the markings on its surface.]

Palaeobot.: Probably the external aspect of the tree-ferns of which the internal one is Psaronius (q.v.). It is of considerable size, and occurs in the Devonian and Carboniferous rocks. It is not accepted as a genuine genus.

* stēm-māt-ō-pŷa, s. [Gr. στῆμα (stēma), genit. στῆματος (stēmματος) = a wreath, a garland, and ὄψ (ops) = the countenance.]

Zool.: Cuvier's name for the Hooded Seal, to which he gave generic distinction as Stemonotopus cristatus (= Phoca cristata = Cystophora cristata).

* stemme, v. & s. [STEM, v. & s.]

stēm-mēr, s. [Eng. stem, v.; -er.]

Mining: A piece of iron with which clay is rammed into the blasting holes to make them water-tight.

stēm-miŷg, s. [STEM, v.]

Mining: The stuff beaten down upon a charge of powder.

stē-mō-nī-tis, s. [Gr. στῆμων (stēmōn) = warp, spun thread.]

Bot.: A genus of Myxogastrous Fungals. Small, stamen-shaped plants, separate or fasciculate, growing on rotten wood. Stemonitis fusca is abundant in hothouses.

stēm-ple, s. [Perhaps a nasalized dimin. from stēp, s.]

Mining: One of the cross-bars of wood placed in the shaft of a mine and serving the purpose of steps.

"The transverse pieces of wood for this purpose they call stemple."—Rees: Cyclopaedia.

stēm-sōn, s. [STEM, s.]

Shipbuild.: A knee-piece whose horizontal arm is scarfed to the keelson and vertical arm fayed into the throats of the transoms.

"Stemson and keelson and stemson-knee."—Longfellow: Building of the Ship.

stēn-, pref. [STENO-.]

stēn, v. i. [An abbrev. of stend (q.v.).] To leap, to spring; to rear as a horse. (Scotch.)

stén-ô-ly'-tra, s. pl. [Pref. *sten-*, and Eng. *elytra*, pl. of *elytron* (q.v.).]

Entom.: The third sub-tribe or family of Heteromera in Latreille's arrangement. Oblong, convex beetles, with long legs and antennæ, the latter thickened at their extremities. They live under the bark of trees or on leaves and flowers. Genera: *Helops*, *Cistela*, *Cedemera*, &c.

stén-ô-ô-fi'-bér, s. [Gr. *sténos* (*stenos*), genit. *sténēos* (*stenēos*) = a narrow, confined space, and Lat. *fiber* = a beaver.]

Palæont.: A genus of Castoridae, from the Miocene of France.

stén-ô-ô-sâu'-rūs, s. [Gr. *sténos* (*stenos*), genit. *sténēos* (*stenēos*) = a narrow, confined space, and *sauros* (*sauros*) = a lizard.]

Palæont.: A genus of Amphicelean Crocodiles, with six species from the Jurassic. With the exception of their biconcave vertebrae, they present many points of resemblance to the living Gavials. They attained a considerable size; for the skull of one species, *Stenosauros herberti*, is about forty inches long.

stén'-i-g, s. [STENUS.]

Entom.: The typical genus of Steniadae.

stè-ni'-a-dæ, s. pl. [Mod. Lat. *stentia*; Lat. fem. pl. adj. suff. (-i)tae.]

Entom.: A family of Pyralidina. Antennæ of the male pubescent, or slightly ciliated; abdomen very long and slender; anterior wings narrow, lanceolate. Four British species.

stén'-i-dæ, s. pl. [Mod. Lat. *sten(us)*; Lat. fem. pl. adj. suff. -idee.]

Entom.: An old family of Brachelytra, now generally merged in Staphylinidae. Very active little beetles with cylindrical bodies and prominent eyes; found in moist places.

stén-ô-, stén-, pref. [Gr. *sténos* (*stenos*) = narrow; cf. *ên sténô* (*ên sténô*) = in a narrow compass.] Small, narrow, confined; in a small compass.

stén-ô-brân'-chí-sø, s. pl. [Pref. *steno-*, and Mod. Lat. *branchia* = gills.]

Ichthy.: A section of Siluridae (q.v.) with one group, Doradina, comprising several genera from South America, and one (the most important) from tropical Africa. [SYNO-DONTIS.] The rayed dorsal, if present, is short; gill-membranes confluent with the skin of the isthmus.

stén-ôch'-rô-mý, s. [Pref. *steno-*, and Gr. *χρῶμα* (*chrōma*) = colour.]

Printing: The production of many colours at one impression. Mr. E. Meyerstein described his method of doing this at the Society of Arts (Dec. 13, 1876).

stén-ô-cô-rô'-nino, a. [Pref. *steno-*; Lat. *corona* = a crown, and Eng. suff. -ino.]

Zool.: Having narrow-crowned molar teeth.

"It has been suggested to me that the contrasted terms of Dinotherium and Hippopotamine types may mislead, through being supposed to imply a greater amount both of affinity and of difference than is intended. I propose, therefore, to substitute for the former Eurycorine or broad-crowned type, and for the latter Stenocorine or narrow-crowned type." *Falcooner: Palæont. Memoirs*, II, 83. (Note.)

stén-ô-dêr-ma, s. [STENODERMA.] Any individual of the genus *Stenoderma* (q.v.).

stén-ô-dêr'-ma, s. [Pref. *steno-*, and Gr. *δέρμα* (*derma*) = skin.]

Zool.: The type-genus of Stenodermata (q.v.). Crown of head slightly elevated; muzzle very short, and broad; nose-leaf well developed in front of nasal aperture; inter-femoral membrane short. Three species, *Stenoderma achradophilum*, *S. rufum*, and *S. falcatum*. The genus is divided into several sub-genera.

stén-ô-dêr'-ma-ta, s. pl. [Mod. Lat., pl. of *stenoderma* (q.v.).]

Zool.: A group of Bats, family Phyllostomidae (q.v.), from the Neotropical region. Muzzle very short, and generally broad in front; nose-leaf generally short, horseshoe-shaped in front and lanceolate behind; inter-femoral membrane always concave behind; no tail; inner margin of lipa fringed with conical papillæ.

stén-ô-grâph, s. [Pref. *steno-*, and Gr. *γράφω* (*graphō*) = to write.] A production of stenography; any writing in shorthand.

"The reporters' room, in which they redact their hasty stenographic." *Emerson: English Traits*, ch. xv.

stén-ô-grâph, v.t. [STENOGRAPH, s.] To write or report in stenography or shorthand.

3. Music: A term often applied to one of the larger diatonic degrees or intervals of the scale, as between one and two.

4. Shipwright: The block in which the foot of a mast is placed.

5. Vehicles: A foot-piece to assist one in entering or descending from a carriage.

¶ 1. Pair of steps: A step-ladder (q.v.).

2. Step by step:

(1) By a gradual and regular process.

"Put it into words, and step by step show it another."—Locke: On Hum. Underst., bk. II., ch. ix.

(2) Moving as fast; keeping together.

3. To take a step (or steps): To make a movement in a certain direction (Lit. & fig.) to move in a matter; to take action.

step-bit, s.

Locksmith: A notched key-bit.

step-box, s.

Mach.: A case for a bearing surface at the lower end of a vertical spindle or shaft.

step-grate, s. A furnace-grate in several successive heights, like stairs.

step-ladder, s. A portable ladder, usually having flat steps, and its own means of support by struts or posts.

* step-stone, s. A stepping-stone (q.v.).

step-wheels, s. pl. Wheels having several sets of teeth on the circumference forming a series of steps. (Bossier.)

stép, pref. [A.S. stéop = orphaned, deprived of its parent; cogn. with Dut. stief, as in stiefzoon, stiefdochter, &c.; Icel. stjúp, as stjúpson, stjúpöttir, &c.; Dan. sted-, as in stedbarn; Sw. stuf-, as in stufbarn; Ger. stief-, as in stiefsohn, stieftochter, &c.; O. H. Ger. stiuif, Cf. O. H. Ger. stujan = to deprive of parents.] A prefix used before child, brother, sister, father, mother, daughter, and the like, to signify that the person spoken of is a relative only by the marriage of a parent. It was originally used in the compounds stepchild, stepbairn, stepson, and stepdaughter, as referring to orphaned persons (see etym.), and was afterwards extended to stepfather, stepmother, &c.

stép-báirn, s. [A.S. stéopbearn.] A stepchild (q.v.).

stép-bróth-ér, s. [Pref. stép-, and Eng. brother.] A stepfather or stepmother's son by a former wife or husband.

stép-child, s. [A.S. stéopchild.] The child of a husband or wife by a former wife or husband.

* stép-dáme, s. [Pref. stép-, and Eng. dame.] A stepmother.

"His cruel stepdame, seeing what was done," Spenser: F. Q., I. v. 88.

stép-daugh-ter (gh silent), s. [A.S. stéopdohtor.] The daughter of a husband or wife by a former wife or husband.

* stepe, a. [STEEP, a.]

stép-fa-thér, s. [A.S. stéopfeder.] A mother's second or subsequent husband.

stéph-án-ýa, s. [Named after S. Stephan, professor of botany at Moscow, who died in 1817.]

Bot.: A genus of Cissampelideæ. The root of Stephania hernandiifolia, an Indian plant, is an astrigic useful in fevers, urinary diseases, dyspepsia, &c.

stéph-an-íte, s. [After the Archduke Stephan of Austria; suff. -ite (Min.).]

Min.: An ore of silver occurring both in crystals and massive. Crystallization, orthorhombic. Hardness, 2 to 2½; sp. gr. 6-269; lustre, metallic; colour and streak, iron-black. Compos.: sulphur, 16.2; antimony, 15.3; silver, 68.5 = 100, corresponding with the formula 5AgS + 8Sb2S3. Occurs with other silver ores in lodes in various localities.

stéph-a-nó-, pref. Gr. στέφανος (stephanos) = a crown, a garland.]

Phys.: Resembling a crown or garland; bearing circular processes.

stéph-a-nóc-ér-ás, s. [Pref. stephano-, and Gr. κέρα (keras) = a horn.] [AMMONITE, B. II. 2.]

stéph-a-nóc-ér-ós, s. [STEPHANOCERAS.] Zool.: A genus of Flosulariidae. Eyes single; rotatory organ divided into five tentacular lobes, furnished with vibratile cilia, with which the animal takes its prey; body attached by the base to a cylindrical hyaline tube. One species, Stephanoceros etchhornii, 3½ inch long, from fresh water.

stéph-a-nó-mó-nád-ý-dæ, s. pl. [Mod. Lat. stephanomonas, genit. stephanomonad(i); Lat. fem. pl. adj. suff. -iada-]

Zool.: A family of Cilio-Flagellata; animalcules free-swimming, bearing a single terminal flagellum, the base of which is embraced by a brush-like fascicle, or uninterrupted circular wreath of cilia. One genus, Stephanomonas, with one, or possibly two, species. (Kent.)

stéph-a-nó-món-as, s. [Pref. stephano-, and Mod. Lat. monas (q.v.).] [STEPHANOMONADIDE.]

stéph-a-nó-scý-phús, s. [Pref. stephano-, and Gr. σκύφος (skufhos) = a cup.]

Zool.: The only known genus of Thecomedusæ. Animal consisting of a series of chitinous tubes embedded in a sponge, and opening by oscula. From these the animal, which has a crown of tentacles, at intervals protrudes itself.

stéph-a-núr-ús, s. [Pref. stephan(o), and Gr. οὐρά (oura) = the tail.]

Zool.: A genus of Strongyliidæ (q.v.), allied to Strongylus (q.v.). Stephanurus dentatus probably produces, in whole or in part, the hog-cholera of the United States.

stép-móth-ér, * step-mod-or, s. [A.S. stéopmohter.]

1. Ord. Lang.: A father's second or subsequent wife.

"You shall not find my daughter, After the surrender of most stepmothers, Illeged unto you!" Shakespeare: Cymbeline, I. 1.

2. Bot.: Viola tricolor.

stép-móth-ér-ly, a. [Eng. stepmother; -ly.] Of, belonging to, or befitting a stepmother; hence, neglectful, harsh.

"A long period of stepmotherly treatment."—Daily News, Nov. 8, 1885.

stép-pár-ént, s. [Pref. stép-, and Eng. parent.] A stepfather or stepmother.

ðél, bóy; póut, jówí; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ýng. -cian, -tian = shán. -tion, -sion = shún; -tion, -sion = zhún. -cious, -tious, -sious = shús. -ble, -die, &c. = bəl, dəl

stēppe, *s.* [Russ. *step* = a waste, a heath, a steppe.] A term applied to one of those extensive plains which, with the occasional interpolation of low ranges of hills, stretch from the Dnieper across the south-east of European Russia, round the shores of the Caspian and Aral seas, between the Altai and Ural chains, and occupy the low lands of Siberia. In spring they are covered with verdure, but for the greater part of the year they are dry and barren.

¶ There are three different kinds of steppe, viz., grass, salt, and sand steppes, each maintaining peculiar forms of vegetation.

steppe-murrain, *s.* The rinderpest (q.v.).

stēpped, *a.* [Eng. *step*; -ed.] Having steps or grades.

stepped-gauge, *s.* A form of gauge having a series of notches which may fit varying sizes of holes.

stepped-gearing, *s.*

Mach.: An invention of Dr. Hooke for obtaining a continuous bearing between the meshing surfaces of gear-wheels.

stepped-key, *s.*

Locksmith.: The same as BRIDGE (q.v.).

STEPPE RACK.

stepped-rack, *s.* A rack having teeth arranged in several rows, which alternate with each other so as to produce the uniformity of motion due to smaller teeth, without sacrifice of strength. The teeth of the pinion with which it gears are, of course, correspondingly arranged.

stēp-pēr, *s.* [Eng. *step*, *v.*; -er.] One who steps; one that has a gait, good or bad; specif. applied to a horse, in reference to his high action in trotting. [110H-STEPPEER.]
"The man who wants a pair of *steppers*."—*Field*, Jan. 16, 1885.

stēp-pīng, *pr. par., a., & s.* [STEP, *v.*]

A. & B. *As pr. par. & particip. adj.*: (See the verb).

C. As subst.: A step; motion; progress or advance.

"But still the flood crept by little *steppings*."—*Bp. Taylor: Sermons*, vol. 1., ser. 8.

stepping-stone, *s.*

1. *Lit.*: A raised stone in a stream or swampy places, by stepping on which a person may cross without wetting or dirtying the feet.

2. *Fig.*: An aid or means for the accomplishment of an end or the gaining of an object; a help, an advantage.

"Those obstacles his genius had turned into *stepping-stones*."—*Macaulay: Hist. Eng.*, ch. xi.

stēp-sis-tēr, *s.* [Pref. *step-*, and Eng. *sister*.] A stepfather or stepmother's daughter by a former wife or husband.

stēp-sōn, * **step-son**, *s.* [A.S. *steopsonu*.] The son of a husband or wife by a former wife or husband.

stēr, *suff.* [A.S. *-estre* (the same as in the Lat. *oleaster*, Low Lat. *poaster*). Cf. Dut. *spinster* = a spinster; *zwaagster* = a female singer. In A.S. we also find *heargestre* = a female harper, *webbestre* = a female weaver, *fithlestre* = a female fiddler, *fæcestre*, &c.] A suffix denoting occupation; as, *maltster*, *gamester*, *songster*, *huckster*, &c. Up to the end of the thirteenth century the suffix *-ster* was a characteristic sign of the feminine gender, and by its means new feminines could be always formed from the masculine. In the fourteenth century the suffix *-ster* began to give place to the Norman-French *-ess*, and there is consequently a want of uniformity in the employment of this suffix. Thus Robert de Brunne uses *sangster* (songster) as a masculine. A good number of words with this suffix are to be found as feminines even late in the fifteenth century; as, *kempster*, *wehster*, *sewster*, *baxter*, &c. In modern English there is only one feminine with this suffix, viz., *spinster*, though *huckster* was used very late as a feminine, and *sewster* is still used in Scotland and provincial dialects. When the original feminine force of the suffix *-ster* was forgotten or lost, some new feminines were formed from English feminines by the

addition of the French suffix *-ess*: as, *seamster*, *seamstress*, *songster*, *songstress*, which are thus really double feminines.

"The suffix *-ster* now often marks the agent with more or less a sense of contempt and depreciation, as *punster*, *trickster*."—*Morris: English Accidence*, p. 90.

stēr, *pref.* [STEREO-.]

* **stēr-cōr-ā'-cōoūs** (oe as sh), *a.* [Lat. *stercus*, genit. *stercoris* = dung.] Pertaining to or composed of dung; partaking of the nature of dung.

"The stable yields a *stercoraceous* heap."—*Cooper: Task*, III. 468.

stercoraceous-vomiting, *s.*

Pathol.: Vomiting of fecal matter, sometimes occurring in enteritis and obstruction of the bowels.

* **Stēr-cōr-an-ism**, *s.* [STERCORANIST.]

Church Hist.: The belief that the Eucharistic elements suffered physical change in the body of the recipient. During the controversy on Transubstantiation, in the eleventh century, the charge of stercoranism was brought against the believers in and the objectors to that dogma by their respective opponents.

"It is not easy to determine the precise form of this indecent charge as advanced by either party. The believers in transubstantiation supposed the sacramental elements not to pass through the human body like ordinary aliments, but to become wholly incorporated with the bodies of the communicants; so that on their principles they could not be justly charged with *stercoranism*. On the contrary, the opponents of transubstantiation supposed the substances of the sacramental elements to undergo the ordinary changes in the stomach and bowels of the communicant; so that by assuming that these elements had become the real body and blood of Christ, they might be charged with *stercoranism*; but it was only by assuming what they expressly denied, namely, the truth of the doctrine of transubstantiation, that either party could be justly taxed with this odious consequence; and yet a dexterous disputant, by resorting to a little perversion of his antagonist's views, might easily cast upon him this vulgar and unseemly reproach."—*Moshem: Eccles. Hist.* (ed. Reid), p. 318. (Note 4.)

* **Stēr-cōr-an-ist**, *s.* [Fr. *stercoraniste*, from Eccles. Lat. *stercoranista*, from Lat. *stercus*, genit. *stercoris* = dung.]

Eccles.: One charged with holding that the Eucharistic elements suffered physical change in the body of the recipient. The word appears to have been first applied by Card. Humbert, about the middle of the eleventh century, to the Greek monk Nicetas.

"He [Radbert] does not, however, apply the term *stercoranist* to his opponents."—*McClintock & Strong: Cyclop. Bib. Lit.*, ix. 1394.

* **Stēr-cō-rār-i-an**, *s.* [Lat. *stercorarius* = pertaining to dung.] The same as STERCORANIST (q.v.).

stēr-cō-rār-i-ī-næ, *s. pl.* [Mod. Lat. *stercorari(us)*; Lat. fem. pl. adj. suff. *-inæ*.] [STERCORARIUS.]

stēr-cō-rār-i-ūs, *s.* [Lat. = pertaining to dung.]

Ornith.: *Skua* (q.v.), a genus of Laridae, in some classifications made a sub-family Stercorariina. These birds were at first classed with the Gulls (LARUS), but were separated on account of differences in external characters and habits, and placed in a separate genus, *Lestris* (q.v.). The Linnæan name *Stercorarius* was adopted by Brisson, with a generic description (*Ornithol.*, vi. 150), in 1760, and is now revived by those authors who are endeavouring to purify nomenclature and to restore to use names originally given.

* **stēr-cōr-ar-ŷ**, *s.* [Low Lat. *stercorarium*, from Lat. *stercus*, genit. *stercoris* = dung.] A place, properly secured from the weather, for containing dung.

* **stēr-cōr-āte**, *v.t.* [Lat. *stercoratus*, pa. par. of *stercoro* = to manure, from *stercus*, genit. *stercoris* = dung.] To manure, to dung.

"Monid *stercorated* or *unstercorated*."—*Scott: Pirate*, ch. iv.

* **stēr-cōr-ā-tion**, *s.* [Lat. *stercoratio*.] The act of dunging; the act of manuring with dung.

"The *stercoration* of the soil, and promotion of the growth, though not the first germination of the seminal plant."—*Ray: On the Creation*, i.

* **stēr-cōr-i-an-ism**, *s.* [STERCORANISM.]

stēr-cōr-ŷc-ō-lōus, *a.* [Lat. *stercus*, genit. *stercoris* = dung, and *colo* = to inhabit.] Living in dung.

"This appears to be probably the case in parasitic and *stercoricolous* forms."—*Encyc. Brit.* (ed. 9th), xix. 892.

* **stēr-cōr-ist**, *s.* [Lat. *stercus*, genit. *stercoris* = dung.] A stercoranist.

"Writers like Sanchez and the *Stercorists* who had opened frivolous and unbecoming questions."—*J. Morley: Voltaire*, ch. v.

stēr-cōr-ite, *s.* [Lat. *stercus*, genit. *stercoris* (ia) = dung; suff. *-ite* (*Min.*)]

Min.: A mineral found in crystalline masses and nodules in the guano of Ichaboa. Composition: phosphoric acid, 34.05; ammonia, 12.40; soda, 14.92; water, 38.63 = 100, corresponding with the formula NaO, NH₄O, PO₅ + 9H₂O. This is a native microcosmic salt (q.v.).

* **stēr-cōr-ŷ**, *s.* [STERCORIST.] Excrement, dung.

stēr-cū-lē-æ, *s. pl.* [Mod. Lat. *sterculi(ia)*; Lat. fem. pl. adj. suff. *-æ*.]

Bot.: A tribe of Sterculiaceæ. Leaves simple or palmate; flowers by abortion unisexual.

stēr-cū-lŷ-a, *s.* [From a Latin god, *Sterculius*, who presided over manuring; *stercus* = dung. So named because the leaves of some species are fetid.]

Bot.: The typical genus of Sterculiaceæ (q.v.). Trees with soft timber; leaves simple or compound; inflorescence in racemes or panicles; flowers polygamous or monœcious; calyx somewhat coriaceous, five-lobed; petals none; carpels follicular, five or fewer, each with one cell and one or many seeds. *Sterculia urens* is a large Indian tree, with white bark, cordate leaves, and very small flowers in terminal panicles, coming out in February or March. The tree yields an inferior sort of tragacanth, used in the hospitals at Bombay and in making sweetmeats, and native guitars are made of the wood. Its seeds are cathartic. *S. villosa*, another Indian tree, yields a similar gum of little value. The bark of these, and of *S. colorata* and *S. guttata*, also Indian trees, yield fibres adapted for cordage. An oil may be extracted from the seeds of *S. fetida*, a large East Indian evergreen, by boiling them in water. The seeds of *S. tomentosa* and *S. acuminata*, African species, when chewed and sucked, render half-putrid water agreeable. *S. Trogaantha*, of Sierra Leone, yields tragacanth (q.v.). The nuts of *S. balanopis*, *S. fetida*, and *S. urens*, are eaten in India, and are sometimes roasted like coffee, as are those of *S. nobilis* in the East Indies, and those of *S. Chicha* and *S. lasiantha* in Brazil.

stēr-cū-lŷ-ā-cē-æ, *s. pl.* [Mod. Lat. *sterculi(a)*; Lat. fem. pl. adj. suff. *-æcæ*.]

Bot.: Sterculiads; an order of Hypogynous Exogens, alliance Malvales. Large trees or shrubs, having the hairs, if present, stellate. Leaves with free deciduous stipules; calyx naked or surrounded by an involucre; sepal five, more or less united at the base, aestivation generally valvate; petals five or none, aestivation convolute; stamens indefinite, monadelphous; anthers two-celled, turned outward; styles five or three; fruit capsular, three- or five-celled, or drupeaceous, berried, or consisting of distinct follicles; seeds sometimes winged or woolly. Natives of warm countries. Tribes, Bombacæ, Helicteræ, and Sterculeæ. Genera, 34; species, 125. (*Lindley*.)

stēr-cū-lŷ-ād, *s.* [Mod. Lat. *sterculi(a)* Eng. suff. *-ad*.]

Bot. (PL): The Sterculiaceæ (q.v.).

* **stere**, *s. & v.* [STEER, *s. & v.*]

stère, *s.* [Fr., from Gr. *στερεός* (*stereos*) = solid.] The French unit for solid measure, equal to a cubic metre, or 35-3156 cubic feet.

* **stere**, *v.t. & i.* [STIR, *v.*]

* **stere-les**, * **stere-less**, *a.* [STERLESS.]

† **stēr-ēl-mŷn-thæ**, *s. pl.* [Pref. *stēr-*, and Gr. *ἐλμύς* (*helmys*), genit. *ἐλμύδος* (*helmythos*) = a tape-worm.]

Zool.: Owen's name for one of the two classes into which he divided the Entozoa, the other being Coelminthia. It is equivalent to the Trematoda (q.v.). [See extract under Coelminthia.]

stēr-ē-ō, **stēr-ē-ō**, *pref.* [Gr. *στερεός* (*stereos*) = solid.] Solid; having an appearance of solidity.

¶ Authorities differ as to the pronunciation of the first *e* in this prefix. In printing, however, *stēr-ē-ō* is always used.

fāte, **fāt**, **fāre**, **amidst**, **whāt**, **fāll**, **father**: **wē**, **wēt**, **hēre**, **camel**, **hēr**, **thère**: **pine**, **pŷt**, **sire**, **sir**, **marine**; **gō**, **pōt**, **ox**, **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūb**, **cūre**, **quite**, **cūr**, **rūle**, **rūll**; **trŷ**, **Sŷria**. **æ**, **œ** = **ē**; **ey** = **ā**; **qu** = **kw**.

stēr-ē-ō, s. [Abbrev. from stereotype (q.v.).] The same as STEREOTYPE, 1.

¶ Used also adjectively: as, a stereo plate.

stēr-ē-ō-bāte, s. [Pref. stereo-, and Gr. βάσις (basis) = a base (q.v.).]

Arch.: A base; the lower part or basement of a building or column; a kind of continuous pedestal under a plain wall.

stēr-ē-ō-chrōme, s. [Pref. stereo-, and Eng. chrome.] A stereochromic picture.

stēr-ē-ō-chrām'-īc, a. [Eng. stereochrom(y); -īc.] Of or pertaining to stereochromy; produced by stereochromy.

stēr-ē-ōch'-rō-mŷ, s. [STEREOCHROME.] A method of wall painting in which the colours are covered with a varnish of soluble glass.

stēr-ē-ō-dēl'-phis, s. [Pref. stereo-, and Gr. δελφίς (delphis) = a dolphin.]

Paleont.: A genus of Delphinidae (q.v.), from Miocene strata.

stēr-ē-ō-ē-lic'-trīo, a. [Pref. stereo-, and Eng. electric.]

Elect.: Of or pertaining to the generation of electricity by solids alone: thus, a stereoelectric current is one produced without the intervention of a liquid. (Dana.)

stēr-ē-ōg'-na-thūs, s. [Pref. stereo-, and Gr. γνάθος (gnathos) = a jaw.]

Paleont.: A mammalian genus of unknown affinities, founded on a fragment of a small jaw, with three molars in position, from the Lower Gault at Stonesfield, Oxfordshire.

stēr-ē-ō-grām, stēr-ē-ō-grāph, s. [Gr. στερεός (stereos) = solid; suff. -gram, -graph.]

The representation of a solid on a plane; specif., a stereoscopic slide.

stēr-ē-ō-grāph, s. [STEREOGRAM.]

stēr-ē-ō-grāph'-īc, stēr-ē-ō-grāph'-īc-al, a. [Eng. stereograph(y); -īc, -īcal.] Made or done according to the rules of stereography; delineated on a plane.

stereographic-projection, s. That projection of the sphere which is represented upon the plane of one of its great circles, the eye being situated at the pole of that great circle. All circles are projected either into straight lines or circles, and the angle made by two circles meeting on the globe is the same as that made by the projections of those circles. It is the projection generally employed in ordinary atlases. The distortion in the form of countries on the plane surface is very slight.

stēr-ē-ō-grāph'-īc-al-īŷ, adv. [Eng. stereographical; -īŷ.] In a stereographic manner; according to the rules of stereography; by delineation on a plane.

stēr-ē-ōg'-ra-phŷ, s. [STEREOGRAM.] The art of delineating the forms of solid bodies on a plane; a branch of solid geometry which demonstrates the properties and shows the construction of all solids which are regularly defined.

stēr-ē-ōm'-ē-tēr, s. [Pref. stereo-, and Eng. meter.]

1. An instrument for measuring the solid or liquid contents or the capacity of a vessel.

2. An instrument for determining the specific gravity of porous bodies, powders, &c.

stēr-ē-ō-mēt'-ric, stēr-ē-ō-mēt'-ric-al, a. [Eng. stereometr(y); -īc, -īcal.] Pertaining to or performed by stereometry.

stēr-ē-ōm'-ē-trŷ, s. [Eng. stereometer; -ŷ.]

1. The art of measuring solid bodies and determining their solid contents.

2. The art or process of determining the specific gravity of liquids, porous bodies, &c.

stēr-ē-ō-mōn'-ō-scope, s. [Pref. stereo-, Gr. μόνος (monos) = alone, and σκοπέω (skopeō) = to see.]

An instrument with two lenses by which a stereoscopic effect can be obtained from a single picture. (Proc. Roy. Soc., June, 1857, and April, 1853.)

stēr-ē-ōp'-tī-ōōn, s. [Pref. stereo-, and Gr. ὀπτικός (optikos) = of or for seeing or sight.]

An American name for a magic lantern in which photographic slides are employed.

stēr-ē-ō-scope, s. [Pref. stereo-, and Gr. σκοπέω (skopeō) = to see.]

Optics: An instrument invented by Wheatstone and improved by Brewster, for giving a flat picture the appearance of a solid object. Perception of perspective and what is termed the solidity of an object depends on the fact that in consequence of the distance between the eyes the right eye sees part of the object which is invisible to the left eye, and vice versa, the two separate images being combined by the brain into one impression. If a landscape, &c., is viewed with one eye alone, the effect of perspective to a great extent vanishes. The stereoscopic effect is also lessened by distance. In order to obtain a due effect from a stereoscopic slide, two pictures are necessary, one representing the object as seen by the right eye alone, the other representing it as seen by the left eye alone, and these pictures must be so arranged that each eye sees only the corresponding picture. Brewster's stereoscope consists of a box divided by an opaque partition down the middle, the slide being placed at the bottom of the box, and then viewed through a pair of half-lenses or prisms, which act upon the light rays proceeding from the pictures in such a way that the virtual images of the two pictures are coincident in position; the two images are combined by the brain into one impression; and the appearance of solidity of the scene or object is accurately reproduced. In Wheatstone's original instrument mirrors were employed instead of half-lenses or prisms. In the binocular microscope a certain amount of stereoscopic effect is obtained.

stēr-ē-ō-scōp'-īc, stēr-ē-ō-scōp'-īc-al, a. [Eng. stereoscop(e); -īc, -īcal.] Pertaining or adapted to the stereoscope; produced by the stereoscope.

"These observations will be found useful in obtaining stereoscopic views of the structures in carpentry and shipbuilding."—Brewster: Stereoscope, p. 188.

stereoscopic-slide, s.

Optics: A slip of cardboard on which are mounted side by side two photographs of the same scene or object. Theoretically, these photographs should be taken by similar lenses from points of view separated by a space equal to the distance between the human eyes, but in practice—especially in dealing with architectural groups—the space is increased in order to procure a greater effect.

stēr-ē-ō-scōp'-īc-al-īŷ, adv. [Eng. stereoscopical; -īŷ.] In a stereoscopic manner; by means of a stereoscope.

*stēr-ē-ōs'-cō-pist, s. [Eng. stereoscop(e); -īst.] One who is skilled in the use or manufacture of stereoscopes.

*stēr-ē-ōs'-cō-pŷ, s. [Eng. stereoscop(e); -ŷ.] The art of using or manufacturing stereoscopes or stereoscopic pictures.

stēr-ē-ō-spēr'-mūm, s. [Pref. stereo-, and Gr. σπέρμα (sperma) = seed.]

Bot.: A genus of Bignoniaceæ. Trees from tropical Asia and Africa, with unequally pinnate leaves and terminal panicles of fragrant flowers, generally white. The bark of Stereospermum suaveolens, an Indian plant, yields a gum of the hog or tragacanth series, and the root and bark are used in Hindoo medicine, as are the roots, leaves, and flowers of S. chelonoides. Both are large trees with deciduous leaves.

stēr-ē-ō-stāt'-īc, a. [Pref. stereo-, and Eng. static.] Applied to a linear arch sustaining the pressure of a material in which at any given point there are a pair of conjugate pressures, one vertical and the other in a fixed direction, horizontal or inclined. The conditions involve the symmetrical distribution of the vertical load on either side of a vertical axis, traversing the crown of the arch.

stēr-ē-ō-tōm'-īc, stēr-ē-ō-tōm'-īc-al, a. [Eng. stereotom(y); -īc, -īcal.] Pertaining to or performed by stereotomy.

stēr-ē-ōt'-ō-mŷ, s. [Pref. stereo-, and Gr. τομή (tomē) = a cutting.]

The science or art of cutting solids into certain figures or sections.

stēr-ē-ō-tropē, s. [Pref. stereo-, and Gr. τροπή (tropē) = a turning; τρέπω (trepō) = to turn.]

An instrument by which an object is perceived as if in motion, and with an ap-

pearance of solidity or relief as in nature. It consists of a series of stereoscopic pictures, generally eight, of an object in the successive positions it assumes in completing any motion, affixed to an octagonal drum, revolving under an ordinary lenticular stereoscope, and viewed through a solid cylinder pierced in the entire length by two apertures, which makes four revolutions for one of the picture-drum. The observer thus sees the object constantly in one piece, but its parts apparently in motion, and in solid and natural relief.

stēr-ē-ō-type, stēr-ē-ō-tŷpe, s. & a. [Gr. στερεός (stereos) = solid, and Eng. type (q.v.).]

A. As substantive:

1. Fixed type; hence a plate cast from a plaster or papier-maché mould, on which is a facsimile of the page of type as set up by the compositor, and which, when fitted to a block, may be used under the press, exactly as movable type. The alloy for stereotype-plates is composed of the same materials as ordinary type-metal. An alloy composed of 500 lead, 300 tin, and 225 cadmium, has, on account of its hardness, been pronounced the best for stereotype-plates. The original, or plaster process of stereotyping was invented by William Ged, a goldsmith of Edinburgh, who was employed by the University of Oxford, in 1731, to manufacture plates for Bibles and Prayer-books. In this process the type is set up in the usual way, except that shoulder-high spaces and quadrats are employed. The face of the forme is thinly and evenly oiled with a brush, and it is surrounded by a rectangular frame termed a flask. Plaster of Paris mixed with water is then poured upon it, forming a mould corresponding to the face of the forme. When this has sufficiently hardened, it is dried in an oven until all the moisture is driven off, and it is then used as a mould to obtain a facsimile in stereotype metal of the forme of type. This system, however, has been to a great extent superseded by the papier-maché process, invented by Wilson, in Scotland, in 1823. This is a very expeditious process, and is generally used on the daily papers of large circulation. A paper matrix is formed by spreading paste over a sheet of moderately thick unsized paper, and covering it with successive sheets of tissue-paper, each carefully patted down smooth, and the pack then saturated. The face of the type is oiled, the face of the paper treated with powdered French chalk and laid upon the type. A linen rag is wetted, wrung out, laid over the paper, and then the matrix dabbed by a beating-brush from the back, so as to drive the soft paper into all the interstices between the letters of the form. The cloth being removed, a reinforce sheet of damp matrix paper is laid upon the back of the matrix, and the matrix beaten again without the cloth, to perfect the impression and establish a junction. The hollows in the back are filled up with a smooth coat of stucco, and the matrix, after being covered with a double thickness of blanket, is placed in a press and subjected to strong pressure over a steam-chest, the heat of which dries the matrix. The press is unscrewed, the matrix removed, its edges pared, and it is warmed on the moulding-press. The matrix is then placed in the previously-heated iron casting-mould; a casting-gauge to determine the thickness of the stereotype is placed round three sides of the matrix, the other side being left open for a gate, at which the molten metal is poured in. The cover is screwed tight, the mould tipped to bring the mouth up, and the metal poured in. When the metal is set, the mould is opened and the matrix removed. The plate is then trimmed and, if otherwise prepared in the usual manner, for rotary printing-machines both matrix and plate form the segment of a circle to enable the plate to fit on the impression cylinder. [ELECTROTYPE.]

2. The art of making solid plates forming an exact facsimile of the page of type as set up by the compositor, and from which impressions are taken in the usual manner; the process of producing printed work in such a manner.

B. As adjective:

1. Pertaining or relating to the art of stereotyping; pertaining to fixed types.

2. Done or executed by means of fixed metallic types, or plates of fixed types: as stereotype printing, a stereotype Bible.

1. The art, work, or process of making stereotype plates.

2. The place where stereotype plates are made; a stereotype-foundry.

stër-ë-ö-týp-ic, a. [Eng. stereotyp(e); -ic.]

Of or relating to stereotype or stereotype plates.

stër-ë-ö-týp-íng, s. [STEREOTYPE, v.]

The art or process of making stereotype plates, and of producing printed work from such plates.

stër-ë-ö-týp-íst, s. [Eng. stereotyp(e); -íst.]

One who makes stereotype-plates; a stereotyper.

stër-ë-ö-tý-pög-ra-phër, s. [Pref. stereo-, and Eng. typographer (q.v.).]

A stereotype printer.

stër-ë-ö-tý-pög-ra-phÿ, s. [Pref. stereo-, and Eng. typography (q.v.).]

The art or practice of printing from stereotype plates.

stër-ë-ö-týp-ý, s. [Eng. stereotyp(e); -ý.]

The art, process, or business of making stereotype plates.

*steres-man, s. [STEERSMAN.]

stër-hÿ-drâu-lic, a. [Gr. στερεός (steres) = solid, and Eng. hydraulic.]

A term applied to a press in which a powerful hydrostatic pressure is obtained by introducing, by a steady, uninterrupted movement, a solid substance into the cylinder of a hydraulic press already filled with liquid.

stë-rig-ma (pl. stë-rig-ma-ta), s. pl. [Gr. στήριγμα (stërigma) = a support, a foundation, a prop.]

Botany (Pl.):

1. Pilliform or pointed protuberances on special cells which develop into spores in fungi, the filaments forming the pedicels of the spermatia in fungi. (Tulasne.)

2. The name given by Link and Klotzsch to the elevated lines on the stem of various thistles, &c., produced by decurrent leaves.

stë-rig-müm, s. [STERIOMA.]

Bot.: Desvieux's name for a Carcerule (q.v.).

*stër-íl, *stër-íll, a. [STERILE.]

steril-coal, s.

Mining: Black clay or shale at the head of a coal-seam.

*stër-íl, s. [Etym. doubtful.] (See extract.)

"To lede so many thousand steris or measures of corn out of Sardunia and Sicily custom-free."—Howell: Letters, p. 118.

stër-ílc, *stër-íl, *stër-íll, a. [Fr. stérile, from Lat. sterilis, accus. of sterilis =

barren, unfruitful; Ital. sterilis; Sp. esterile. From the same root as Gr. στερεός (steres) = hard, solid; Ger. starr = rigid.]

I. Ordinary Language:

1. Literally:

(1) Barren, unfruitful; producing little or no crop; not fertile.

"The sterill coasts of barren Rhinoceros They past, and seas where Casius hill doth stand."—Fulcras: Godfrey of Boulogne, xv. 15.

(2) Barren; producing no young; of seeds or plants, not germinating, not producing other plants.

(3) Not accompanied with good crops; unproductive.

"In sterile years, corn sowne will grow to an other kinde."—Bacon: Nat. Hist., § 925.

2. Fig.: Barren of ideas; destitute of sentiment: as, a sterile author or work.

II. Biol.: Barren. [STERILITY.]

"Rearing curious exotica sterile of all flowers or fruit."—G. H. Lewis: Hist. Philos. (ed. 1880), li. 8.

sterile-wood, s.

Bot.: Coprosma fetidissima, a cinchonaceous plant from New Zealand.

stër-íl-1-tÿ, *ster-íl-1-tie, s. [Fr. stérilité, from Lat. sterilitatem, accus. of sterilis, from sterilis = sterile (q.v.); Sp. esterilidad; Ital. sterilità.]

I. Literally:

1. The quality or state of being sterile; barrenness, unproductiveness, unfruitfulness.

"Sterility has been said to be the base of horticulture."—Darwin: Origin of Species (ed. 1859), p. 9.

"Sterility in animals and plants may be constitutional or accidental, and often arises from changed conditions of life. Thus most raptorial birds from the tropics do not lay fertile eggs in captivity in temperate climates, and many exotic plants under cultivation have worthless pollen. Sometimes a little more or less water will decide whether or not a plant will seed. There are various degrees of sterility in first crosses and hybrids; occasionally there is an absence of some element necessary to reproduction, thus in the more sterile kinds of hybrid rhododendrons pollen is wanting. (Darwin.)

2. Barrenness, unfruitfulness; want or absence of power of producing young, as of animals.

II. Fig.: Barrenness of ideas or sentiments; want of fertility or the power of producing sentiment.

"One cannot ascribe this to any sterility of expression, but to the genius of his lines."—Pope: Essay on Homer.

stër-íl-i-zā-tion, *stër-íl-i-šā-tion, s. [English sterilize(-); -ation.]

The act of making sterile, barren, or unproductive.

stër-íl-ize, stër-íl-ize, v.t. Eng. sterilize(-); -ize.]

1. To make sterile, barren, or unproductive; to impoverish, as land; to exhaust of fertility.

2. To deprive of fecundity, or the power of producing young.

3. To destroy microbes in (milk, &c.).

stër-íl-i-zer, s. One who, or a substance or an apparatus which, sterilizes.

stër-lët, s. [Ger., from Russa. sterliad.]

Ichthy.: Acipenser ruthenus, from the Danube and Russian rivers flowing into the Black Sea. It is a small species, rarely exceeding three feet in length, but is highly prized as a food-fish. It has a narrow, elongated, pointed snout, barbels slightly fringed, skin of upper surface dark gray, dorsal shields and belly whitish. The sterlet is a regular article of food at Vienna, and sometimes ascends the Danube as far as Ulm.

störn-, pref. [STERNO-]

*störn, *sterne, v.t. [STERN, s.] To steer, to guide, to direct.

"Directing them which wale to sterne their ships."--Boitned: Descrip. of Ireland, ch. lii.

störn-na, s. [Mod. Lat., from tern (q.v.)]

Ornith.: Tern; a cosmopolitan genus of Laridae, sub-family Sternidae. Bill longer than head, nearly straight, compressed; nostrils near middle of the beak, pierced longitudinally, pervious; legs slender, toes four, the three in front webbed; wings long, pointed; tail distinctly pointed. In plumage the terns resemble the gulls, but are usually smaller.

From their minor size and their forked tails they are often called Sea-swallows. They are constantly on the wing, catching small fishes, insects and other small animals, and frequenting fresh as well as salt water. Those of the north migrate to the south in winter. The species are found everywhere, and some of them have a wide range of habitation. Thus, the Common Tern (S. fluviatilis) is found on the coasts of Europe, western Asia and Africa, and eastern North America. Terns lay their spotted eggs on sand or shingle, from which it is not easy to distinguish them.

1. STERNA MACRURA. 2. STERNA FLUVIATILIS.

*störn-age (age as íg), s. [Eng. stern, s.; -age.] Steerage, stern.

"Orapple your minds to sterne of this navy."--Shakespeare: Henry F., III. (Chorus.)

störn-al, a. [Lat. stern(um) = the breast-bone; Eng. adj. suff. -al.]

1. Of or pertaining to the sternum or breast-bone: as, the sternal ribs.

2. On the same side as the breast-bone; anterior.

sternal-ribs, s. pl. [Rib, II. 1.]

störn-ál-í-gi-a, s. [Pref. stern-, and Gr. álgos (algos) = pain.]

Pathol.: Pain in the breast. Applied specifically by Baumes in 1806 to angina pectoris.

störn-ar-chús, s. [Pref. stern-, and Gr. árchos (archos) = the fundament (Agassiz); árchos (arché) = to rule (McNicoll).]

Ichthy.: A genus of Gymnotidae, with eight species, from tropical America. Tall terminating in a small, distinct caudal fin, dorsal rudimentary, teeth small, branchiostegial

four. Some of the apices have the snout compressed and of moderate length, in others it is produced into a long tube.

störn-ás-pí-dæ, s. pl. [Mod. Lat. sternaspis(s); Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Tubicolæ. Annelids having very short bodies, the fore part thick, and with three rows of setæ and a corneous shield on the under surface, near the extremity. The setæ are locomotive organs.

störn-ás-pis, s. [Pref. stern-, and Lat. aspis; Gr. áspis (aspis) = a round shield, an asp.]

Zool.: The typical genus of Sternaspidae (q.v.).

störn-bérg-í-a, s. [Named after Count Caspar Sternberg, a botanist and patron of botany.]

1. Bot.: A genus of Anaryllæ. Sternbergia lutea, which resembles an autumnal crocus, is cultivated in gardens.

2. Palæobot.: A pseudo-genus of fossil plants. It is a cylindrical stem with transverse markings, now known to be the cast of the pith cylinder of some tree. One so-called species from the Carboniferous rocks.

störn-bérg-ite, a. [After Count Caspar Sternberg of Prague; suff. -ite (Min.).]

Min.: An orthorhombic mineral, of rare occurrence. Hardness, 1 to 1.5; sp. gr. 4.215; colour, plumbic-brown, blackening on exposure; streak, black; opaque; very flexible. Compos.: sulphur, 30.4; silver, 34.2; iron, 85.4 = 100, which yields the formula AgS + 3FeS + FeS₂.

*sterne, a. [STERN, a.]

*sterne, s. [STERN, s.]

stérned, a. [Eng. stern, s.; -ed.] Having a stern; used in composition, as square-sterned, &c.

*störn-ér, s. [Eng. stern, v.; -er.] A director, a guide.

"He that is 'regens sidera,' the sterner of the stars."--Dr. Clarke: Sermons, p. 15. (1637.)

*störn-fül, a. [Eng. stern, s.; -ful(l)] Stern.

*störn-fül-ly, adv. [Eng. sternful; -ly.] Sternly. (Stanyhurst.)

störn-ní-næ, s. pl. [Mod. Lat. stern(a); Lat. fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of Laridae. It includes three genera: Hydrochelidon, Sterna, and Anous.

*störn-löss, *störn-lösse, a. [Eng. stern, s.; -less.] Having no rudder or helm.

"He . . . sternless ship yesteren."--Gosson: Schoole of Abuse, p. 76.

störn-ly, *sterne-ly, *sterne-lyche, adv. [Eng. stern, s.; -ly.] In a stern manner; with sternness, severity, or austerity; severely, harshly.

"The stranger guests he sternly eyed."--Scott: Lord of the Isles, II. 9.

störn-möst, a. [Eng. stern, s., and most.] Nearest the stern or rear; farthest in the rear; farthest stern.

störn-nöss, *stern-esse, s. [Eng. stern, s.; -ness.]

1. The quality or state of being stern; severity of look; a look of austerity, rigour, or severity.

"Should I, in these my borrow'd haunts, behold The sternness of his frowns?"--Shakespeare: Winter's Tale, IV. 4.

2. Severity or harshness of manner; rigour.

"I have sternness in my soul enough To hear of soldiers' work."--Dryden: Cleonæa.

störn-nö, störn-, pref. [Mod. Lat. sternum = the breast-bone.] Of, belonging to, or situated on or near the sternum (q.v.).

sterno-clavicular, a.

Anat.: Of or belonging to the sternum and the clavicle.

sterno-cleidomastoid, sterno-mastoid, a.

Anat.: Of or belonging to the sternum, the clavicle and the mastoid process. There is a sterno-cleidomastoid or a sterno-mastoid muscle.

sterno-hyoid, a.

Anat.: Of or pertaining to the sternum and the hyoid bone. There is a sterno-hyoid muscle.

sterno-mastoid, a.

Anat.: Of or pertaining to the sternum and the mastoid process. There are sterno-mastoid arteries, and a sterno-mastoid muscle.

sterno-thyroid, a.

Anat.: Of or pertaining to the sternum and to the thyroid cartilage. There is a sterno-thyroid muscle.

stér-nön, s. [Gr.] The breast-bone; the sternum.

"A soldier was shot in the breast through the sternon."--Wiseman.

störn-öp-työh-í-dæ, s. pl. [Mod. Lat. sternopyga, genit. Sternopych(is); Lat. fem. pl. adj. suff. -idæ.]

Ichthy.: A family of Physostomi; pelagic and deep-sea fishes of small size. Body naked, or covered with thin, deciduous scales; gill-opening very wide; air-bladder simple, if present; adipose fin generally rudimentary; series of phosphorescent bodies along the lower parts. The eggs are enclosed in the sacs of the ovarium, and excluded by oviducts. Günther enumerates nine genera.

störn-öp-tyx, s. [Pref. sterno-, and Gr. πτυξ (ptyx) = a fold.]

Ichthy.: The type-genus of Sternopychide (q.v.). Body compressed and elevated, tall short; covered with a silvery pigment, regular scales absent; phosphorescent spots on lower surface. Specimens are occasionally picked up in the Mediterranean and Atlantic. They most probably live at a small depth during the day, and come to the surface at night.

stér-nöp-ý-gús, s. [Pref. sterno-, and Gr. πρυξ (pyx) = the rump.]

Ichthy.: A genus of Gymnotidae, with four species, from tropical America. Caudal and dorsal absent; small villiform teeth in both jaws and on each side of the palate; body scaly.

störn-nö-thör-ús, störn-nö-thær-ús (ær as ör), störn-nö-thér-és, s. [Pref. sterno-, and Gr. θάπρος (thapros) = a hinge.]

Zool.: A genus of Chelydide, with six species, from tropical and southern Africa and Madagascar. Head depressed, with great plates, jaws without dentitions, no nuchal plate; sternum wide, with narrow lateral prolongations; free anterior portion of plastron rounded and moveable.

†störn-ök-i, †störn-ök-i-a, s. pl. [Pref. stern-, and Gr. ὄξυς (oxys) = sharp.]

Entom.: A sub-tribe of Pentamerous Beetles. Prosternum produced in front into a lobe, and behind into a spine received into a small cavity of the mesosternum. Families, Elateride and Eupresteride.

störn-sön, s. [STERN, s.]

Shipbuild.: A binding-piece above the dead-wood in the stern, and practically forming an extension of the keelson, on which the stern-post is stepped.

†störn-ý-la, s. [Mod. Lat., dimin. from sterna (q.v.).]

Ornith.: A genus of Laridae, founded by Boie for Sternula minuta (= Sterna minuta), the Little or Lesser Tern. [STERNA.]

stér-nüm, s. [Gr. στέριον (sternion) = the breast, the chest.]

Compar. Anat.: The breast bone. In man the flat bone occupying the front of the chest, and formed by the meeting of the visceral arches. It is flattened from before backward, and presents a slight vertical curve with the convexity in front. It is divided into the manubrium or presternum, the mesosternum, and the ensiform or xiphoid process or metasternum. All mammals and birds possess a sternum, and the presence or absence of a keel on that bone in birds is used as a means of classification. Fishes, Amphibians, and Ophiurians have no sternum, and in Saurians the broad portion is generally expanded. Some suppose that the plastron of the Chelonina is a highly-developed sternum; others hold that it is a mere integumentary ossification. The name sternum is also given to the plate on each segment of the breast of a crustacean and an arachnid, but these are integumentary, and have no relation to a true sternum.

böil, böy; pöut, jöwl; cat, çell, ohorns, çhin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, exist. -ing. -cian, -tian = şhan. -tion, -sion = şhün; -tion, -şion = zhün. -cious, -tious, -şious = şhüs. -bie, -die, &c. = bel, del.

*stēr-nū-tā-tion, s. [Lat. sternutatio, from sternuto, frequent. of sternuo = to sneeze.] The act of sneezing.

"A disease whereof sternutation proved mortal, and each as sneezed died."—Browne: Vulgar Errors, bk. IV, ch. IX.

*stēr-nū-tā-tive, a. [Fr. sternutatif.] Having the quality of provoking to sneeze.

stēr-nū-tā-tōr-ŷ, a. & s. [Fr. sternutatoire, from Lat. sternuto = to sneeze.]

A. As adj.: Having the quality of exciting to sneeze; stercutative; as snuff, subsulphate of mercury, &c. [EUBHINE.]

B. As subst.: A substance which provokes sneezing. The most familiar stercutatives are snuffs of various kinds.

"Physicians, in persons near death, use sternutatories, or such medicines as provoke auto-sneezing."—Browne: Vulgar Errors, bk. IV, ch. IX.

*stēr-nū-tōr-ŷ, s. [Lat. sternuto = to sneeze.] The same as STERNUTATORY, B. (q.v.)

Stēr-ō-pēs, s. [G. Στερόπης (Steropēs) = the Lightner, one of the three Cyclopes.]

Entom.: A genus of Hesperidae. Steropes paniscus, the Chequered Skipper, rare and local in England, has rich dark-brown wings chequered with orange-tawny spots.

*stēr-quil-in-ōus, a. [Lat. sterquilinum = a dunghill, from stercus, genit. stercoris = dung.] Pertaining to a dunghill; hence, dirty, mean, paltry.

"Any sterquilinous rascal, is licens'd to throw dirt in the face of sovereign princes in open printed language."—Hensell: Letters, bk. II, let. 48.

*sterve, v. t. or t. [STARVE.]

stēt, phr. [Lat. = let it stand.]

Print.: A word written in the margin of a proof, directing attention to a portion of the matter, and countermanding an order to expunge it. A series of dots made below the matter has the same effect. Often used as a verb: as, To stet a passage.

stēt processus, phr. [Lat. = let the process stop.]

Law: An order from a court to stay proceedings.

stēr-ē-fēldt-ite, s. [After Stetefeldt, who analysed it; suff. -ite (Min.).]

Min.: An argentiferous copper ore, found in Nevada. Analyses of a similar ore from other localities are discordant. It is probably a mixture of antimony oxide with copper and other metallic oxides.

stēth-āl, s. [Eng. st(earic), and ethal.] [STETHYLIC-ALCOHOL.]

stēth-ōm-ē-tōr, s. [Gr. στήθος (stēthos) = the chest, and μέτρον (metron) = a measure.]

Surg.: An instrument for measuring the external movement in the walls of the chest during respiration, as a means of diagnosis in thoracic disease. In one form a cord is extended round the chest, and its extension, as the thorax is expanded, works an index-finger on a dial-plate. It thus becomes a measure of the expansive power and capacity of the lungs.

stēth-ō-scōpe, a. [Gr. στήθος (stēthos) = the chest, and σκοπέω (skopēō) = to see, to observe.] Med.: An instrument employed in auscultation (q.v.). It was invented by Laennec, who at first used a roll of blotting-paper for the purpose of concentrating and conveying sound to the ear; but, according to Tyndall (Sound, pp. 42, 43), the philosophy of the stethoscope was announced by Dr. Robert Hooke (1635-1702). The simplest form of

stethoscope, and that most commonly employed, consists of a cylindrical stem of porous wood, as cedar or deal, some seven or eight inches long, expanding at one end into a circular, funnel-shaped aperture from two and a half to three inches in diameter, which is applied to the chest, whilst the other end terminates in a smaller aperture, which is placed in the ear of the physician. Flexible stethoscopes of rubber are also employed; these are sometimes furnished with two ear-tubes, so that the sounds may be perceived by both ears. The chief use of the stethoscope is to enable the medical man to sound small portions of lung at a time, and so detect more correctly than by the unaided ear the exact seat of disease.

*stēth-ō-scōpe, v. t. [STETHOSCOPE, s.] To examine with a stethoscope.

"You wish me to submit to be stethoscoped."—Savage: E. Medicist, bk. I, ch. XII.

stēth-ō-scōp-ic, stēth-ō-scōp-ic-al, a. [Eng. stethoscop(e); -ic, -ical.] Of or pertaining to a stethoscope; obtained or made by means of a stethoscope: as, a stethoscopic examination.

stēth-ō-scōp-ic-al-lŷ, adv. [Eng. stethoscopical; -ly.] By means of a stethoscope.

stēth-ōs-cō-pist, s. [Eng. stethoscop(e); -ist.] One who is skilled in the use of the stethoscope.

stēth-ōs-cō-pŷ, s. [Eng. stethoscop(e); -y.] The art of stethoscopic examination.

stēth-ŷl-ic, a. [Eng. st(earic), and ethylic.] Derived from or containing cetyl alcohol.

stethylic-alcohol, s.

Chem.: C₁₃H₂₃O = C₁₂H₂₂HO. Stethal. The alcohol of the series, C_nH_{2n+2}O, corresponding to stearic acid. It occurs in spermaceti, together with ethal and methal, but has not yet been obtained in the separate state.

stēve, v. t. [From stvedore (q.v.).] To stow, as cotton or wool, in a ship's hold. [Local.]

stēv-ē-dōre, s. [Sp. estivador = a packer of wool at shearing, from estivar = to stow, to lay up cargo in a ship's hold, to compress wool, from Lat. stipo = to crowd or press together. Cf. Sp. estiva; Fr. estive = the stowage of goods in a ship's hold; Port. estivar = to trim a ship; Ital. stivare = to press close.] One whose occupation is to stow goods, packages, &c., in a ship's hold; one who loads or unloads vessels.

*stēv-en, s. [A.S. stefn; Icel. stefna = the voice, a cry.]

1. A voice.

"So loude crieiden they with mery steven."—Chaucer: C. T., 2, 564.

2. A cry, an outcry, a clamour, noise.

"And had not Roffy renne to the steven, / Lowder had been slain thilke same even."—Spenser: Shepherds Calendar; Sept.

3. An appointment; an appointed place or time.

"Al day metheth men at unset steven."—Chaucer: C. T., 1, 526.

stēv-ŷ-a, s. [Named after Peter James Esteve, M.D., Prof. of Botany at Valencia.]

Bot.: A genus of Veronicaceæ akin to Ageratum. Pretty autumnal flowering plants, natives of this country, with purple, red, pink, white, or violet flowers. Many species have been brought under cultivation in gardens, where they are sometimes used as border plants, but require the protection of a frame in severe weather.

stew (ew as ū), *stuw-en, *stuw-yn, *stuyt, v. t. & i. [O. Fr. estuver (Fr. étuver) = to bathe, to stew, from esture (Fr. étuve) = a stove, a hothouse, in pl. stews; O. H. Ger. stupa = a hot room for a bath; Sp. & Port. estufa = a stove, a hothouse; Ital. stufa.]

A. Trans.: To boil slowly or with a simmering heat; to cook or prepare, as meat or fruit, by putting it into cold water, and gradually bringing it to a low boiling point.

"Stew'd shrimps and Afric cockles shall excite / A jaded drinker's languid appetite."—Francis: Horace; Satires IV, 2

B. Intrans.: To be boiled or cooked in a slow, gentle manner, or in heat and moisture.

*1. A hot or warmed room; a house or place furnished with warm water or vapour baths; a bagnio. (Gower: C. A., viii.)

*2. A brothel; a house of prostitution. (Generally in the plural form, but frequently treated as a singular.)

"And here as in a tavern or a stee, / He and his wild associates spend their hours."—Ben Jonson: Every Man in his Humour, q. 1.

*3. An early form of lock-hospital (q.v.).

"Thus, in the borough of Southwark, prior to the time sometimes fixed upon for the origin of syphilis, there were places called stews, where prostitutes were confined, and received the benefits of surgical assistance. They were taken up and put into these establishments, whether agreeable to them or not, by virtue of certain decrees, made expressly to protect the rest of the community from the risk of catching their complaints."—S. Cooper: Practice of Surgery (ed. 6th), p. 302.

*4. A prostitute. (In this sense also the plural form is frequently used as a singular.)

"Instead of that beauty he had a notorious stew sent to him."—Sir A. Weldon: Court of King James, p. 146.

5. A dish that has been cooked by stewing; meat stewed.

6. A stew-pan (q.v.).

7. A breeding-place for tame pheasants.

"In a stew: In a state of agitation, confusion, trouble, or excitement.

"He, though naturally bold and stout, / In short was in a tremendous stew."—Barham: Ing. Legends; The Ghost.

stew-pan, s. A cooking utensil for exposing meats to a prolonged gentle heat; usually in well-appointed kitchens a charcoal furnace or steam-bath.

stew-pot, s. A pot or vessel for stewing.

stew (ew as ū) (2), *stewe, s. [Cf. Prov. Ger. stau = a dam, a pond.] A small pond where fish are kept for the table; a store-pond.

"This gentleman constructed carp stews."—Field, Oct. 2, 1885.

stew-ard (ew as ū), *stiv-ard, *stiv-ard, *stu-ard, s. [A.S. stiuward, stiuward for stiguward = a sty-ward, from stigo = a sty, and ward = a guardian, a warden, a keeper; Icel. stivardhr. The original senae was one who looked after the domestic animals, and gave them their food; hence, one who provides for his master's table, and, generally, one who superintends household affairs for another. (Skeat.)]

*1. One who manages affairs for another.

"The first of them, that eldest was and best, / Of all the house had charge and government, / As guardian and steward of the rest."—Spenser: F. Q., I, x, 77.

2. A person employed on a large estate or establishment, or in a family of consequence and wealth, to manage the domestic affairs, superintend the other servants, collect rents, keep the accounts, &c.

"The consequence was that the steward was taken into custody and heavily fined."—Macaulay: Hist. Eng., ch. xvii.

3. An officer in a college who provides food for the students, and superintends the affairs of the kitchen.

4. An official on a vessel, whose duty is to distribute provisions to the officers and men. In passenger ships, a man who superintends the distribution of provisions and liquors, waits at table, &c.

5. A fiscal agent of certain bodies: as, the steward of a congregation of Methodists.

6. An officer of state, as the Lord High Steward, the Steward of the Household, &c. The Lord High Steward was the greatest officer of state in England. The office was anciently the inheritance of the Earls of Leicester, till it was forfeited by Simon de Montfort to Henry III., at the end of whose reign it was abolished as a permanent office. A Lord High Steward is now only appointed for particular occasions, as a coronation or the trial of a peer. In the former case he has to arrange questions of precedence; in the latter to preside over the House of Lords. His office ceases with the business for which it was required. The Steward of the Household is an officer of the royal household, who presides over the court known as the Board of Green Cloth, which has the supervision of the household expenses and accounts, the purveyance of provisions, payment for them, &c. He appoints the royal tradesmen, and selects and has authority over all servants of the household, except those of the chamber, chapel, and stables.

"To be stewardly dispensed, not wastefully spent."—Canon Tooker. (Webster.)

*stew-ard-ry (ew as ū), s. [Eng. steward, s.; -ry.] The work, office, post, or position of a steward; stewardship, superintendence.

stew-ard-ship (ew as ū), s. [Eng. steward, s.; -ship.] The office, post, or position of a steward. (Shakespeare: Richard II., it. 2.)

stew-ard-ry (ew as ū), s. [Eng. steward, s.; -ry.]

*1. The office or post of a steward; stewardship.

"A human stewardry, or trust, of which account is to be given, and just."—Byron: Poetical Version of a Letter.

2. Jurisdiction over a certain extent of territory, nearly the same as that of a regality; also, the territory over which this jurisdiction extends. Most stewardries consisted of small parcels of land, which were only parts of a county; but the stewardries of Kirkcudbright, and of Orkney and Shetland, make counties by themselves.

*stewe, v. & s. [STEW, v. & s.]

*stew-ish (ew as ū), a. [Eng. stew, s.; -ish.] Befitting a brothel; low, coarse, obscene.

*stib-borne, a. [STUBBORN.]

stib-ī-al, a. [Lat. stibium] = antimony; Eng. adj. suff. -al.] Like or having the qualities of antimony; antimonial.

"The former depend upon a corrupt incinerated melancholy, and the latter upon an adust stibial or eruginous sulphur."—Harvey.

stib-ī-al-ism, s. [Eng. stibial, -ism.] Antimonial intoxication or poisoning. (Dunglison.)

stib-ī-an-ite, s. [Lat. stibium] = antimony, an connect., and suff. -ite (Min.).]

Min.: A doubtful species, resulting from the alteration of stibnite (q.v.).

*stib-ī-ūr-ī-an, s. [Lat. stibium] = antimony; Eng. suff. -arian. From the violent operation of antimony.] A violent man.

"This stibiarian preseth audaciously upon the royal throne, and after some sacrifice, tendereth a bitter pill of scribble and cruelty; but, when the same was rejected because it was violent, then he presents his antimonial potion."—White. (Todd.)

stib-ī-āt-ēd, a. [Lat. stibium = antimony.] Impregnated with antimony.

stib-īc, stib-ī-ous, a. [Lat. stibium = antimony; Eng. adj. suff. -ic, -ous.] Antimonial, antimonious.

stib-ī-cōn-ite, s. [Lat. stibium = antimony; Gr. kovia (konta) = duat, and suff. -ite (Min.).]

Min.: A massive compact mineral, occurring also in a pulverulent form. Hardness, 4 to 5.5; sp. gr. 5.28; lustre, earthy; colour, pale yellow to yellowish-white. An analysis yielded: oxygen, 19.54; antimony, 75.83; water, 4.63 = 100, which gives the formula SbO₄+HO. A species not as yet well defined.

stib-īne, s. [Eng. stibium] = antimony; -ine.]

1. Chem.: An antimony base, formed on the type of ammonia, NH₄. Thus SbH₃ is stibine, Sb(C₂H₅)₃ is ethylstibine, &c. (Watts.)

2. Min.: [STIBINITE.]

stib-ī-ō-fēr-rite, s. [Pref. stibio-, and Eng. ferrite.]

Min.: An amorphous mineral found coating stibnite in Santa Clara County, California. Hardness, 4.0; sp. gr. 3.598; lustre, somewhat resinous; colour, yellow. An analysis yielded: antimonious acid, 47.69; sesquioxide of iron, 35.36; water, 16.94 = 99.99.

stib-ī-ō-gā-lē-nite, s. [Pref. stibio-, and Eng. galenite.]

Min.: The same as BINDHEIMITE (q.v.).

stib-ī-ō-hēx-ar-gēn-tite, s. [Pref. stibio-; Gr. ἕξ (hex) = six, and Eng. argentite.]

Min.: One of two native compounds of antimony and silver, the other being stibio-triargentite (q.v.). Compos.: antimony and silver, with formula Ag₆Sb₂. Petersen considers that all analyses of dyscrasite (q.v.) indicate mixture of these two compounds.

stib-ī-ō-tri-ar-gēn-tite, s. [Pref. stibio-, tri-, and Eng. argentite.]

Min.: A mineral consisting of antimony and silver, with formula Ag₃Sb₂. [STIBIO-HEXARGENTITE.]

stib-ī-ous, a. [STIBIC.]

stib-ī-ū, s. [ANTIMONY.]

stib-ī-lite, s. [Lat. stibium], and Gr. λίθος (lithos) = a stone; Ger. stibolith.]

Min.: The same as STIBONITE (q.v.).

stib-nite, stib-inc', s. [Lat. stibium = antimony; Fr. antimoine sulfuré; Ger. grauspiessglanzersz.]

Min.: The principal ore of antimony. Crystallization, orthorhombic; crystals being deeply striated longitudinally. Cleavage, prismatic, very distinct. Hardness, 2.0; sp. gr. 4.516; lustre, metallic; colour and streak, lead to steel-gray. Compos.: sulphur, 28.2; antimony, 71.8 = 100, which corresponds to the formula Sb₂S₃. Occurs abundantly in many places, sometimes in beds but more frequently in veins.

stī-bō'-nī-ūm, s. [Eng. stibium], and (ammonium).]

Chem.: An antimony-radicle formed on the type of ammonium, NH₄. Thus Sb(C₂H₅)₄ is tetrethylstibonium. (Watts.)

stīc-ca'-dō, stīc-ca'-tō, s. [Ital.]

Music: An instrument composed of pieces

of wood of graduated lengths, flat at the bottom and rounded at the top, resting on the edges of an open box, and tuned to a diatonic scale. The tone is produced by striking the pieces of wood with small hard balls at the end of a flexible stick.

*stīch, s. [Gr. στίχος (stichos) = a row, a line, a verse.]

1. Ordinary Language:

1. A verse, of whatever measure or number of feet.

2. A row or line of trees.

II. Hebrew Literature: One of the rhythmic lines which go to constitute the parallelism in the poetic books of Scripture. The books of Job, Psalms, Proverbs, Ecclesiastes, and the Song of Solomon are thus written in the oldest known Hebrew manuscripts, and poetical passages (like Exod. xv. 1-21) in the historic books are still printed in the Hebrew Bible, whence they have been transferred to the English Revised Version. The arrangement is of great antiquity, and may have been introduced by the sacred writers themselves. Sometimes prose works are divided into stichs, consisting either of a certain number of words or clauses separated by their sense. It is believed that a stichometrical arrangement pervades the whole Vulgate, the prose as well as the poetic books; and Josephus considered that his works were composed of 60,000 stichs.

stī-chō'-ūs, s. [Mod. Lat.] [STICH.]

Ichthy.: A genus of Blenniidae, with ten species, peculiar to the coasts near the Arctic circle, ranging southwards to Japan, Norway, and Sweden. They are small fishes, and have the body elongate and covered with small scales, sometimes several lateral lines; dorsal fin of spines only.

*stīch'-īc, a. [Eng. stich; -ic.] Pertaining or relating to lines or verses; consisting of lines or verses.

stīch-īd'-ī-ūm (pl. stīch-īd'-ī-ā), s. [Mod. Lat., from Gr. στίχιδιον (stichidion), dimin. from στίχος (stichos) = a row, a line.]

Bot. (Fl.): The pod-like processes containing tetraspores in some rose-spored algae.

stīch-ō-, pref. [STICH.] Having rod-like processes.

stīch-ō-chōs'-tā, s. [Pref. sticho-, and Gr. χαιτή (chaitē) = long, flowing hair.]

Zool.: A genus of Oxytrichidae, with one species, Stichotricha pediculariformis; akin to Stichotricha (q.v.), but separated therefrom on account of its well-developed anal styles. Free swimming animals, from salt-water.

*stīch'-ō-mān-čý, s. [Gr. στίχος (stichos) = a line, a verse, and μαντεία (manteia) = prophecy, divination.] Divination by lines or passages in books taken at hazard; bibliomancy.

*stīch'-ō-mēt'-ric-al, s. [Eng. stichometry; -ical.] Of or pertaining to stichometry; characterized by stichs or lines.

*stīch-ōm'-ō-trý, s. [Gr. στίχος (stichos) = a row, a line, a verse, and μέτρον (metron) = a measure.]

1. Measurement or length of books as ascertained by the number of verses contained in each book. [STICH, H.]

2. A division of the text of books into lines accommodated to the sense; a practice followed before punctuation was adopted. [GNOMOMETRY.]

stīch'-ō-mýth, s. [Gr. στίχομυθία (stichomuthia).]

Gk. Plays: A conversation in alternate lines

stīch-ōt'-rich-a, s. [Pref. sticho-, and Gr. ἄρτιξ (arthix), genit. ἄρτιξος (arthixos) = hair.]

Zool.: A genus of Oxytrichidae, with five species from salt and fresh-water. Animals elongate, elastic, and changeable in form, often exerting and inhabiting a mucellagnous or granular sheath, the anterior half of the body when protruded from this sheath usually twisted like a screw.

stīck, *stōck, *sticke, *stīck, *stīckle (pa. t. *stuk, *sticked, stuck, pa. par. *steken, *stīken, *stōck, *stōcken, stuck), v.t. & t. [A.S. steacan, a strong verb (pa. t. stōc, pa. par. steccen, stōccen); cogn. with Low Ger. stēken =

"Aristotle's sticketh not to affirm that the world neither began, nor yet shall end."—*Steen: Speculum Auctori*, ch. I, § 1.

* 11. To cause difficulty, trouble, or embarrassment.

"This is the difficulty that sticks with the most reasonable of those who, from conscience, refuse to join with the revolution."—*Swift*.

¶ (1) To stick expresses more than to cleave; things are made to stick either by incision into the substance, or through the intervention of some glutinous matter; they are made to cleave by the intervention of some foreign body: what sticks, therefore, becomes so fast joined as to render the bodies inseparable; what cleaves is less tightly bound, and more easily separable. Two pieces of clay will stick together by the incorporation of the substance in the two parts; paper is made to stick to paper by means of glue: the tongue

in a certain state will cleave to the roof. Stick is seldom employed in the moral sense, except in familiar and inelegant style; cleave is peculiarly proper in the moral acceptation.

(2) For the differences between to stick and to fix, see Fix.

¶ 1. To stick by:

(1) To adhere closely to; to be constant to; to support steadily.

"We are your only friends; stick by us, and we will stick by you."—*Davenant*.

* (2) To be troublesome by adhering.

Ichthy.: A popular name for any of the species of Gasterosteus (q.v.). The Fifteen-spined Stickleback, lives in salt or brackish water, the others are freshwater fish; and all, though small in size, are active, greedy, and extremely destructive to the fry of other fishes. Günther (Study of Fishes, p. 505) records that fact that a young Three-spined Stickleback (G. aculeatus) the common European species, "kept in an aquarium, devoured in five hours' time seventy-four young dace, which were about a quarter of an inch long, and of the thickness of a horse-hair. Two days after it swallowed sixty-two, and would probably have eaten as many every day could they have been procured." In the breeding season the male Stickleback constructs a nest, about three inches wide and six inches deep, of stalks of grass and other matters, cemented together with mucus which exudes from his skin. The nest is barrel-shaped and has apertures at each end, thus permitting both ease of ingress and the current of water needed in the development of the ova. The nest, when filled with eggs, is jealously guarded by the male, who keeps off parasites and other fish, even those of much larger size. After the eggs are hatched the male takes similar active care of the young; keeping them within the shelter of the nest till large enough to care for themselves.

stick-kler, s. [Eng. stickle(s), v.; -er.]

stig-ma (pl. stig-mas; stig-ma-ta, in senses II. 1, 2, 4.), s. [Lat., from Gr. *στίγμα* (*stigma*) = a mark.]

I. Ordinary Language:

1. Literally:

(1) A mark made with a red-hot iron; a brand impressed on slaves and others.

(2) A small red speck on the human skin, causing no elevation of the cuticle; a natural mark or spot on the skin.

2. *Fig.*: Any mark of infamy, disgrace, or reproach which attaches to a person on account of bad conduct; a slur.

II. Technically:

1. *Anat.*: The projecting part of a Graafian follicle at which rupture occurs.

2. *Biol. (Pl.)*: The external openings of the tracheal apparatus in the Insecta and Arachnida. Applied also to the pores of the segmental organs of Leeches, and to the openings by which the pneumocyst communicates with the exterior in some of the Physophoridae. [SPIRACLE.]

3. *Bot.*: The part of the pistil to which the pollen is applied. It is generally situated at the upper extremity of the style. It is a granular body, destitute of epidermis, and secretes a viscid material, which is most abundant at the period of fecundation. It is sometimes smooth, at others it may be covered with papillae or with plumose hairs, or it may have around it an indusium. Morphologically viewed, the stigma is the apex of the carpellary leaf. When there is more than one style, each has a stigma; when there are several, they may coalesce so as to have various lobes or divisions. In most cases the stigma is thicker than the style. It varies greatly in form, and may be capitate, penicillate, plumose, or feathery, petaloid, peltate, filiform, or papillose. In some cases the stigma extends down the inner face of the style; it is then called unilateral.

4. *Eccles. (Pl.)*: A term borrowed from Gal. vi. 17, "I bear in my body the marks (Gr. *στίγματα*, *Vulg. stigmate*) of the Lord Jesus," and applied by ecclesiastical writers to the marks of stigmatization (q.v.). St. Paul probably took his metaphor from the fact that pagan soldiers sometimes branded the name of their general on some part of their body. (*Lightfoot, in loc.*) No writer of authority has ever maintained that the stigmata of St. Paul were anything more than the actual

marks of sufferings inflicted by his persecutors (Cor. ii. xi. 23-27).

"In a work on the subject Dr. Imbert-Gourbeyre enumerates 145 persons, twenty men, the rest women, who are stated to have received the stigmata."—*Addis & Arnold*; *Cath. Diet.*, p. 777.

stig-mär'-i-a, s. (Gr. *στίγμα* (*stigma*) = a mark.)

Palæobot.: A pseudo-genus of coal plants, now proved by actual union to be the roots chiefly of Sigillaria, but in some cases of Lepidodendron. Cylindrical, trunk-like bodies, often more or less compressed, the external surface of which is covered with shallow pits, sometimes with a rootlet projecting. Very abundant in the freclay of the carboniferous rocks, the old soil in which the Sigillaria grew. The common species is *Stigmaria f-coides*.

stig-ma-ta, s. pl. [SIGMA.]

stig-mät'-ick, a. & s. [SIGMATIC.]

stig-ma-tist, s. [SIGMA.] One on whom stigmata, or the marks of Christ's wounds, are said to be supernaturally impressed.

stig-ma-ti-zä-tion, stig-ma-ti-gä'tion, s. [Eng. *stigmatiz(e)*; *-ation*.]

Eccles. & Church Hist.: The appearance or impression of counterparts of all or some of the wounds received by Jesus in his Passion, in their appropriate positions on the human body. The first case on record, and the most important, is that of St. Francis of Assisi, the founder of the Franciscans. It is said that, while the saint was engaged in a fast of forty days on Mount Alvernum, in the year 1224, a crucified seraph with six wings appeared and discoursed to him of heavenly things. Francis fainted, and, on recovering consciousness, found himself marked with the wounds of crucifixion in his hands, his feet, and right side. Thomas & Celana and St. Buonaventura attested the case, and Pope Alexander IV. (1254-1261) claimed to have seen the stigmata during the lifetime of St. Francis and after his death. A feast of the Stigmata of St. Francis is celebrated in the Roman Church on Sept. 17. The Dominicans claimed a similar distinction for a saint of their Order (St. Catherine of Siena, 1347-80), and the fact of her stigmatization is recorded in the fifth lecture of the office of her feast (April 30) in the Roman Breviary. She is honoured with a special feast in her own Order, though she is never represented in painting or sculpture with the stigmata. Since then many persons have claimed to have received these marks of divine favour. [See extract under SIGMATA, II. 4.] There is an excellent account of one of the latest cases—that of a Belgian peasant woman, Louise Lateau—in *Macmillan's Magazine*, April, 1871. Carpenter (*Mental Physiol.*, ed. 4th, § 541) sees nothing either incredible or miraculous in

these cases. "The subjects have been persons of strongly emotional temperament, who fell into a state of profound reverie, in which their minds were wholly engrossed by the contemplation of their Saviour's sufferings, with an intense direction of their sympathetic attention to his several wounds; and the power which this state of mind would have on the local action of the corresponding parts of their own bodies gives a definite physiological rationale for what some persons accept as genuine miracles and others repudiate as the tricks of impostors."

"Stigmatization seems only to have occurred where the subject had earnestly and decisively turned a way from the world and its pleasures, and had embraced the Saviour in the fervour of a glowing love; but it was nevertheless not an endowment conferred by God. As a phenomenon, permitted rather than caused by him, it must be regarded rather as a negative than a positive effect of his divine working."—*McClintock & Strong; Cyclop. Bib. Lit.*, ix. 192a.

stig-ma-tize, stig-ma-tize, v.t. [Fr. *stigmatiser* = to brand with a hot iron, to defame publicly, from Gr. *στυγματισμός* (*stigmatisis*) = to mark or brand, from *στίγμα* (*stigma*), genit. *στίγματος* (*stigmatos*) = a mark, a prick, a brand, from *στίξ* (*stix*) = to prick.]
1. Lit.: To brand; to mark with a brand or stigma.

"[They had more need some of them] have their cheeks *stigmatized* with a hot iron, I say, some of our Jesuits, instead of painting, if they were well served."—*Burton; Anat. Melancholy*, p. 470.
2. Fig.: To set a mark of disgrace on; to attach disgrace or infamy to; to brand, to reproach; to hold up to disgrace, reproach, and contempt.

Ichthy.: A genus of Syngnathina (q.v.), from the Australian seas.

stig-ma-tōph-ōr-ūs, s. [STIGMATOPHORA.]

Bot.: The part of the style of composites which bears the stigmata.

stig-ma-tōse, a. [Gr. *στίγμα* (*stigma*), genit. *στίγματος* (*stigmatos*); Eng. suff. *-ose*.]

Botany:
1. Of or relating to the stigma; stigmatic.
2. Having the stigma long and lateral or on one side of the style. (*Paxton*.)

stig-ma-tō-stō-mōn, s. [Gr. *στίγμα* (*stigma*), genit. *στίγματος* (*stigmatos*) = a mark, and *στέμον* (*stēmōn*).] [STAMEN.]

Bot.: A body formed by the union of anthers with the stigma.

stig-mite, s. [Gr. *στίγμα* (*stigm(a)*) = a spot; suff. *-ite* (*Petrol.*)]

Petrol.: A name given by Brongniart to the porphyritic varieties of pitchstone (q.v.).

stig-mō-nō-tā, s. [Gr. *στίγμα* (*stigma*) = a puncture, and *νότος* (*notos*) = the back.]

Entom.: The typical genus of Stigmonotidae.

stig-mō-nō-tī-dæ, s. pl. [Mod. Lat. *stigmotia*(a); Lat. fem. pl. adj. suff. *-idae*.]

Entom.: A family of Tortricina. Anterior wings varying in length, costa regularly arched. Larva feeding in rolled leaves or between united leaves or under bark, or on the young shoots of trees. Species widely distributed.

*** stig-ōn-ō-mān-cy, s.** [Gr. *στίγων* (*stīgōn*), genit. *στίγωνος* (*stīgōnos*) = one who marks, from *στίξ* (*stix*) = to prick, to mark, and *μαντεία* (*mantēia*) = prophecy, divination.] Divination by writing on the bark of a tree.

*** stike, v.t.** [Strick, v.]

stik-pile, stik-pyle, s. [A. S. *stician* = to pierce, and *pile* = a pillow (?).]
Bot.: *Erodium cicutarium*. (*Britten & Holland*.)

stil-āg-in-ā-gē-se, a. pl. [Mod. Lat. *stilago*, genit. *stilagin*(is); Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: Antideism; an order of Dicotyledonous Exogens, alliance Urticales. Trees or shrubs, with ample coriaceous alternate leaves, and twin deciduous stipules. Flowers minute, in axillary scaly spikes. Flowers unisexual, with a two-, three-, or five-parted calyx, and no corolla. Males, stamens two or more, arising from a tumid receptacle; females with a three- or four-toothed sessile stigma, and a one- or two-celled ovary, with the ovules suspended in pairs. Fruit drupaceous. Found in the East Indies and Madagascar. Known genera three, species about twenty. (*Lindley*.)

stil-ā-gō, s. [Lat. *stilus*, *stylus* [STYLE], perhaps with reference to its length.]

Bot.: The typical genus of Stilaginaceæ (q.v.), not sufficiently distinct from *Antidesma* (q.v.). The shining, subacid fruit of *Stilago Eunius* is eaten. The leaves are acid and diaphoretic; the young ones are boiled with pot herbs, and given in India in syphilis.

stil-ār, a. [Eng. *stil(e)*(1), s.; -ar.] Pertaining or belonging to the stile of a dial.

"Laying a ruler to the centre of the plane and to this mark, draw a line for the *stilar* line."—*Mozon*.

stil-bā-ō-gē-se, s. pl. [Mod. Lat. *stilb(e)*; Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: Stilbide; an order of Perigynous Exogens, alliance Gentianales. Shrubs with rigid, leathery, narrow leaves in whorls, articulated at the base, without stipules. Flowers in dense spikes at the point of the branches, sessile, each with three bracts at the base. Calyx tubular, campanulate, limb five-cleft, the segments equal, corolla monopetalous, the limb four-, rarely five-parted, somewhat two-lipped; stamens as many as the divisions of the corolla, if five, then one abortive; ovary superior, with two cells, each with an erect ovule; fruit dry, indehiscent. All from the Cape of Good Hope. Genera three, species seven.

*** stil-bā-ō-gē-i, a. pl.** [Mod. Lat. *stilb(um)*; Lat. masc. pl. adj. suff. *-acei*.]

Bot.: An obsolete sub-order of Hyphomycetous Fungales, having a wart-shaped receptacle composed of conjoined filamentous or hexagonal cells and spores, borne singly on the apices of free filaments. Nine British genera are placed under it, but some may be immature states of other fungals. They grow on decaying animal or vegetable matter, or on bark or leathery leaves.

stil-bō, s. [Gr. *στίλβη* (*stilbē*) = a lamp, from *στίλβω* (*stilbō*) = to glitter, to shine.]

Bot.: The typical genus of Stilbaceæ (q.v.). Flowers in straight flowering spikes; corolla lobes narrow. Known species four, from the Cape.

stil-bōne, stil-bin, s. [Eng. *stilb(e)* (*stilbē*) = lustre, and Eng. *ben(zene)*.]

Chem.: C₁₄H₁₂ = C₆H₅:CH:CH-C₆H₅. Picramyl, Toluylene. Prepared by passing the vapour of toluene over heated plumbic oxide, or by the action of sodium on benzoic aldehyde. It crystallizes in thin, colourless plates, having a mother-of-pearl lustre, is insoluble in water, soluble in boiling alcohol, melts at 115°, and boils at 306°. Heated with hydriodic acid, it is converted into dibenzyl.

stilbene-oxide, s.
Chem.: C₇H₆O. Laursen's name for oil of bitter almonds.

stilbene-peroxide, s. [STILBOUS-ACID.]

stil-bē-sio, a. [Gr. *στίλβη* (*stilbē*) = lustre; s connect, and suff. *-ic*.] Derived from or containing stilbene.

stilbesic-acid, s.
Chem.: C₂₃H₁₆O₇ (?). Obtained by passing chlorine gas into crude bitter-almond oil, pressing the product between paper, and washing with a mixture of ether and alcohol. It crystallizes in monoclinic prisms, is very slightly soluble in alcohol and ether, but soluble in alcoholic ammonia, and melts at 105°.

stil-bī-a, s. [STILBUM.]

Entom.: The typical genus of Stilbide (q.v.).

stil-bic, a. [Eng. *stilb(e)*; -ic.]
Chem.: A term sometimes used as a synonym of Benzilic (q.v.).

stil-bīd, s. [Mod. Lat. *stilbe*, and Gr. *στίβος* (*stibos*) = form.]

Bot. (Pl.): Lindley's name for the Stilbaceæ (q.v.).

stil-bī-dæ, s. pl. [Mod. Lat. *stilb(ia)*; Lat. fem. pl. adj. suff. *-idae*.]

Entom.: A family of Noctuidae. Thorax smooth; abdomen long, smooth; anterior wings narrow, in repose forming a very inclined roof. Larva smooth, with sixteen legs, feeding on grasses. Only British species, *Stilbia anomala*.

stil-bīl-īc, a. [Eog. *stilbyl*; -ic.] [STILBOUS.]

stil-bīn, s. [STILBENE.]

stil-bīte, s. [Gr. *στίλβη* (*stilbē*) = lustre; suff. *-ite* (*Min.*).]

Mineralogy:

1. An orthorhombic or monoclinic mineral belonging to the group of zeolites. Occurs commonly in sheaf-like bundles of crystals, divergent, also globular. Hardness, 5 to 4; sp. gr. 2.094 to 2.205; lustre of cleavage face, pearly, of others vitreous; colour, white, yellow, brown, red; transparent to translucent. Compos.: silica, 57.4; alumina, 16.5; lime, 8.9; water, 17.2 = 100, which corresponds to the formula 6SiO₂.Al₂O₃.CaO.6H₂O. Mostly found in cavities in amygdaloidal basaltic rocks, but sometimes in metalliferous veins, also in fissures in granites and gneiss.

2. The same as HEDDLANDITE (q.v.).

stil-boūs, a. [Eng. *stilb(ic)*; -ous.] Derived from or containing stilbic acid.

stilbous-acid, s.
Chem.: C₁₅H₁₂O₃ (?). Stilbolic acid. A compound formed by treating bitter almond oil with fuming sulphuric acid. It crystallizes from ether in monoclinic prisms, from alcohol in trimetric prisms, is insoluble in ammonia, and melts at 360°. When boiled in caustic potash, it is resolved into benzoic acid and benzoic hydride.

stil-būm, s. [Gr. *στίλβος* (*stilbos*) = glittering.]

1. Bot.: The typical genus of Stilbaceæ. Receptacle stalked at the base, capitate or clavate at the summit. Various mildew-like fungals, often brightly coloured, on decaying wood, herbs, &c.

2. Entom.: A genus of Chrysididae (q.v.). *Stilbum splendidum* is more than half an inch long, blue or emerald, often with the abdomen golden red. It occurs in the south of Europe and in Asia and Africa.

stil-būl, s. [Eng. *stilb(ene)*; -yl.]

Chem.: C₁₄H₁₁. The hypothetical radical of stilbene.

stile (1), s. [STYLE (1), s.] A pin set on the face of a sun-dial to form a shadow.

"Erect the stile perpendicularly over the sub-stilba line."—*Mozon; Mechanical Exercises*.

stile (2), *** stīle, s.** [A. S. *stigel*, from *stigan* to climb, to mount; cogn. with O. H. Ger. *stigila* = a stile; *stigan* = to climb.]

1. Ord. Lang.: A step or series of steps, or a frame of bars and steps which may be ascended or descended by a pedestrian for getting over a fence or wall, but atopping the passage of horses, cattle, &c.

 B. As substantive:

1. Ord. Lang.: Anything which stimulates, incites, or provokes; a stimulus, a spur.
 "The frivolous and dissolute who remained required every year stronger and stronger stimulants."
Macaulay: Hist. Eng., ch. III.
 2. Pharm. (Pl.): Agents which increase vital action, first in the organ to which they are applied, and next in the system generally. Stimulants are of three kinds, stomachic, vascular, and spinal. The name is popularly restricted to the first of these, which act upon the stomach, expelling flatulence, besides allaying pain and spasm of the intestines. They are also called carminatives. Examples: ginger, capsaicum and chillies, cardamoms, mustard, pepper, nutmeg, &c. Some vascular stimulants act on the heart and the larger vessels, others on the smaller ones. Of the first are free ammonia, alcohol in the form of brandy or wine, camphor, aromatics, &c. Of the latter are acetate of ammonia, ginseng, sassafras, &c. Spinal stimulants increase the function of the spinal cord. Examples: nux-

vomica, strychnia, cantharides, phosphorus, &c. (Garrod.)

*stōc-cāde, v.t. [STOCKADE, v.]

*stō-chās-tic, *stō-chās-tick, a. [Gr. στοιχαστικός (stochastikos) = conjectural, from στοιχάζομαι (stochazomai) = to aim at a mark,

to conjecture; στόχος (stochos) = a mark.] Conjectural; able to conjecture.

"Though he were no prophet, nor son of a prophet, yet in that faculty which comes nearest if he ex- telleth, i. e., the stochastick, wherein he was seldom mistaken as to future events, as well public as private."—Whitefoot: Life of Browne.

stōck (1), *stocke, *stok, *stolke, s. & a. [A.-S. stoc = a post, a trunk, from the same root as stic, v. (q.v.); cogn. with Dut. stok = a stick, a handle, stocks; O. Dut. stoc; Icel. stokkr = a trunk, log, stocks; Dan. stak = a stick; Sw. stock = a beam, a log; O. H. Ger. stoch; Ger. stock, from gestochen, pa. par. of stochen = to stick.]

A. As substantive:

I. Ordinary Language:

1. The stem or main body of a tree or plant; the trunk.

"The bud of peach or rose, Adorn, though differing in its kind, The stock whereon it grows."—Cresper: To Ren. W. C. Unwin.

2. The stem in which a graft is inserted, and by which it is supported; also, the stem or tree which furnishes slips or cuttings.

"The scion over-rueth the stock quite, and the stock is pensive only, and giveth almight, but no motion to the graft."—Bacon.

3. Something fixed and solid; a post, a block, a pillar.

4. Hence, something lifeless and senseless.

"Saying to a stock, thou art my father, and to a stone, thou hast brought me forth."—Jeremiah II, 27.

5. A person who is as lifeless and senseless as a post or stock.

"While we admire This virtue and this moral discipline, Let's be no stocks, nor no stocks."—Shakspeare: Taming of the Shrew, I, 1.

6. The principal supporting or holding part of anything; that part in which others are inserted, or to which they are attached for firm support or hold; specifically:

(1) Husbandry: The part of a plough or other implement to which the irons, draft, and handles are attached.

(2) That part of a frearn to which the barrel and lock are attached.

"Say what stock he springs of."—Shakspeare: Coriolanus, II, 4.

¶ Used also in an analogous sense of the domesticated animals, &c.

"In the case of strongly marked races of some other domesticated species, there is presumptive or even strong evidence that all are descended from a single wild stock."—Darwin: Origin of Species (ed. 6th), p. 13.

8. The property which a merchant, a trader, or a company has invested in any business, including merchandise, money, and credits; more especially the goods kept on hand by a commercial house for the supply of its customers.

9. Capital invested: as—

(1) A fund employed in the carrying on of some business or enterprise, and divided into shares held by individuals who collectively form a corporation; shares.

"In modern finance the term [Stock] is applied to an imaginary sum of money, almost invariably £100, on which interest is paid at a given rate in perpetuity. Hence, a person who buys Stock, simply buys a right to receive the said interest; and this right he may sell again, but the principal sum is altogether imaginary, and cannot be claimed. Console, Railway Stocks, and Stocks in Commercial Companies are examples. In the first of these, any amount of Stock can be purchased and held that does not involve fractions of a penny. In Railway Stocks the limit is more commonly stated at one shilling or one pound, shares, and obligations, which are invariably for round sums, as £10, £20, £50, £100, and so on; never, therefore, the term Stock is currently used in a loose way to signify bonds, shares, and financial securities of any kind whatsoever."—Bichell: Counting-House Dictionary.

bōil, bōy; pōut, jōw1; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, exist. -ing, -cian, -tian = shan. -tion, -sion = shün; -tion, -çion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del

(2) A fund consisting of a capital debt due by Government to individual holders, who receive a fixed rate of interest on their shares; money funded in Government securities; as, the Three per Cent. Stocks.

"It was customary when money was borrowed for State purposes to record the transaction by means of notes on a stick (commonly hazel), and then to split the stick through the notes. The lender took one half as a proof of his claim against the Exchequer, and it was called his *stock*. The Exchequer kept the other half, which was called the counterstock. [COURTNEY, l.] In this way *Stock* came to be understood as money lent to the Government, and eventually to any public body whatever, and the different funds subscribed from time to time came to be called *The Stocks*."—*Bithell's Counting-House Dictionary*.

10. A supply provided; provision, store, fund, accumulation.

"Till all my stock of infant sorrows spent,
I learn'd at last submission to my lot."

Cosper: My Mother's Picture.

stock-ade, 'stoc-cade, s. [From Eng. stock (1), s., in imitation of stockade (q.v.).]

I. Ord. Lang.: An inclosure or pen made with posts and stakes.

II. Technically:

- 1. Civil Engin.: A row of piles, or a series of rows with brushwood in the intervals, driven into a sea or river shore, to prevent the erosion of the banks.
2. Fort.: Stout timbers planted in the ground so as to touch each other, and loop-holed for musketry. In its most effective form it is eight or nine feet high, has a ditch in front, and a banquette in the rear. As appears from the extract (and from the still surviving customs of savage races), the driving of timber into the ground was an early form of fortification. The illustration shows a native stockade at Donobow, in Burmah, which was stormed by the British troops in

STOCKADE.

1826. It was composed of solid teak beams (c), from fifteen to seventeen feet high. Behind this wooden wall, the old brick ramparts (A) of the place rose to a considerable height, connected with the front defences by means of cross beams (e), which afforded a firm and elevated footing to the defenders. A ditch (D) of considerable magnitude surrounded the defences, the passage of which was rendered more difficult by spikes, nails, bolts, and other contrivances. Outside the ditch were several rows of strong railing (E), set in front of all an sliattis (F), thirty yards broad, reaching down to the river Irrawaddy (G).

'The earthworks and stockades which were said to have been constructed by Severus.' -Elton: Origins of English Hist., p. 325.

Fabric: An elastic material used for dresses, jackets, &c.

'The tall gentleman in the stockings pantaloons.' -The Hook: The Sutherlanda.

stock-ing, s. [From stock (1), s., in the sense of stump or trunk. The clothing of the legs and lower part of the body formerly consisted of a single garment, called hose, in French chausses. It was afterwards cut in two at the knees, leaving two pieces of dress—viz., kneebreeches, or, as they were then called, upper-stocks, or in French haut de chausses, and the nether-stocks, or stockings, in French bas de chausses, and then simply bas. In these terms the element stock is to be understood in the sense of stump or trunk, the part of the body left when the limbs are cut off. In the same way Ger. strumpf = a stocking, properly signifies a stump. (Wedgwood.)

- 1. A close-fitting knit or woven covering for the foot and leg. They are made of wool, cotton, or silk.

2. Finance: [STOCK (1), s., A. I. 9. (2)].

3. Shipwright: A frame of blocks and shores on which a vessel is built. It declines down toward the water, and is usually a timber

frame, which, as the building proceeds, assumes the form of a cradle. The cradle rests on ways, on which it eventually slides when the vessel is launched. The vessel is laterally supported by shores; the cradle is held by struts and chocks. In launching, the shores are removed, so that the vessel rests altogether in the cradle; the ways are greased or soaped; the struts are knocked away; the chocks knocked out, and the ship slides down the ways into the water, where the cradle becomes detached and floats away.

¶ On (or upon) the stocks: In preparation; in course of preparation or manufacture.

stö-ic, 'stö-icok, s. & a. [Lat. Stoicus, from Gr. Στωικός (Stoikos) = (1) belonging to a colonnade, (2) stoic, because Zeno taught under a colonnade at Athens, named the Stoa Poikile; stoa (stoa) = a colonnade, a portico.] [STOA.]

A. As substantive:

1. Lit. & Philos. (Pl.): The adherents of a system of philosophy derived from that of the Cynics by Zeno (born at Citium in Cyprus about the middle of the fourth century a.c.). Zeno was the son of a merchant, and being reduced to poverty by the loss of a cargo of Phœnician purple which he was taking to Athens, he embraced the doctrine of the Cynics, and became for a while the disciple of Crates. But he disliked the gross manner of the Cynics, and chose Stilpo of Megara (MEGAREIC) for his next instructor; then, still unsatisfied, he turned his attention to the Platonic philosophy. After twenty years of laborious study he became a teacher himself, and opened his school in the Stoa at Athens, whence his followers derived their name. Though it had its origin in Greece, the Stoical philosophy was Roman in spirit; and, after giving way to other systems in its native land, it exercised great influence in Italy, and among the Roman Stoics are to be mentioned Cato the Younger († 46 A.D.; cf. Lucan: Phars., II. 889-91), Seneca (B.C. 6-65 A.D.), Epictetus (60-140 A.D.), and the Emperor Marcus Aurelius (120-180). Stoical philosophy recognised one Supreme Moral Governor of the Universe (who, according to Epictetus, is the Father of all men), and a number of inferior deities. They taught that man alone had a rational soul, and that though he has a body like the lower animals, he has reason and intelligence like the gods, and that all his other faculties should be brought into subjection to reason. Hence, all that interfered with a purely intellectual existence was to be eliminated as dangerous. The pleasures and pains of the body were to be despised, for the pleasures and pains of the intellect were alone worthy to occupy man, allied to the gods by the possession of reason. It therefore became the duty of man to subdue his passions and senses, so that he might be free and virtuous.

'The Stoics, in their dread of becoming effeminate, became marble. They despised pain; they despised death. To be above pain was thought manly. They did not see that, in this respect, instead of being above humanity, they sank below it. . . . You receive a blow, and you do not wince? So much of heroism is displayed by a stone. You are face to face with death, and you have no regrets? Then you are unworthy of life. Real heroism feels the pain it conquers, and loves the life it surrenders in a noble cause.' -G. H. Lewis: Hist. Philoa. (Ed. 1880), I. 364.

2. Fig.: A person not easily excited, moved, or disturbed; one who is, or pretends to be, indifferent to pleasure or pain.

stōl-chī-ōl-ō-gy, s. [Gr. stōichos (stoichos) = a row; suff. -ology.]

Science: The doctrine of elements, whether material or mental.

"Such also was the stochology connected with this reduction [of the ideas to numbers], or the doctrine of the singular or limiting element, of the undetermined element determinable by the former, and of the third element resulting from the mixture of the first two—the three constituting the elements of all that exists."—Ueberwey: Hist. Philos. (Eng. ed.), I, 117.

stōl-chī-ō-mēt-ri-cāl, a. [Eng. stoichiometry (-y); -ical.] Of or pertaining to stoichiometry.

stōl-chī-ō-m'ē-tr'y, s. [Gr. stōichos (stoichos) = a row, and mētrōn (metron) = a measure.]

Chem.: The law of chemical combination in definite proportions, and its application to chemical calculations. (Watts.)

stō-ī-cism, s. [Eng. stoic; -ism.]

1. The opinions, teachings, or maxims of the Stoics.

"As a reaction against effeminacy, stoicism may be appraised; as a doctrine, it is one-sided. It tends in aughty and egotism."—G. H. Lewis: Hist. Philos. (ed. 1880), I, 364.

2. The quality or state of being stoical; real or assumed indifference to pleasure or pain.

"William so far forgot his wonted stoicism as to utter a passionate exclamation at the way in which the English regiments had been sacrificed."—Macaulay: Hist. Eng., ch. XI.

*stō-īc-ī-t'y, s. [Eng. stoic; -ity.] Stoicalness, stoicism.

"Leave this stoicity alone, till thou makest remorse."—Ben Jonson: Silent Woman, I, 1.

stōl, stōl'-ēr, v. i. [Etym. doubtful; cf. Sw. stolta = to dash one thing against another.] To walk in a staggering manner; to totter; to stumble on an object. (Scott.)

"I wish ye had seen him stotting about, off se leg on to the other."—Scott: Heart of Midlothian, ch. 22.

stōke, stōck, pref. & suff. [See def.] Used in place-nouns as a prefix and suffix, with the meanings of (1) place, from A.S. stoc = a place; as, Woodstock; A.S. wide stoc = a wood; place: Bishopstoke = the bishop's place or seat; (2) a stock, a stick, a trunk, from A.S. stoc, stocce = a stock (q.v.), as in Stockwood, Stockton, &c., being thus equivalent to a place stockaded.

stō'-īa, s. [Lat., from Gr. stōlōn (stolē) = equipment, a robe, a stole; stōlōn (stolō) = to equip.]

Roman Antig.: A loose garment worn by Roman matrons over the tunic. To the bottom of it a border or flounce was sewed, the whole reaching down so low as to conceal the ankles and part of the feet. It was the characteristic dress of the Roman matron, as the toga was of the men; divorced women or courtesans were not allowed to wear it. It was usually gathered and confined at the waist by a girdle, and frequently ornamented at the throat by a coloured border. It had either short or long sleeves, and was fastened over the shoulder by a fibula.

STOLA.

stōle, pret. of v. [STEAL.]

stōle (1), s. [A.S., from Lat. stola = a stola (q.v.).]

*1. A garment resembling the Roman stola; a loose robe or garment worn by ladies, and reaching to the ankles or heels.

"The solemn feast of Ceres now was near, When long white linen stoles the matrons wear."—Dryden: Cingras & Myrrha, 239.

*2. A dress or robe worn by men.

"And the lady seld to his servants, with hynge ye forth the first stole; and clothe ye hym."—Wyclif: Luke xv.

*3. A narrow band of silk or stuff, sometimes enriched with embroidery and jewels, worn on the left shoulder of deacons, and across both shoulders of bishops and priests, pendant on each side nearly to the ground. It was used in the administration of the sacraments and all other sacred functions. In England, since the fourteenth century to the Reformation, it was worn crossed on the breast by the priest at the altar, as it still is by Roman priests when saying Mass.

STOLE.

†4. A surplice, a cotta.

"Six little singyng-boys—dear little soules! In nice clean faces, and nice white stoles."—Barham: Eng. Leg.; Jackens of Bedham.

5. A band of trimming for ladies' dresses and mantles.

stōle (2), s. [STOLON.]

*stōle (3), s. [STOOL.]

stōled, a. [Eng. stol(e), s.; -ed.] Wearing a stole or long robe; robed.

"Prophets brightly stoled In shining lawn."—G. Fletcher: Christ's Victory.

stōl'-en, pa. par. or a. [STEAL.]

stolen-goods, s. pl.

Law: Goods or any kinds of property which have been stolen. The civil law requires that any one who has purchased such goods, unless in open market, such as a shop or store,

is bound to restore them to the true owner. This law does not apply to valuable securities, which have been purchased bona fide, if the securities are negotiable instruments. It is a punishable offence to offer or accept rewards for the recovery of stolen property.

stōl'-īd, a. [Lat. stolidus = firm, stock-like; from same root as stand.] Dull, foolish, stupid, impassive.

stōl'-īd-ī-t'y, s. [Fr. stolidité, from Lat. stoliditas, accus. of stoliditas, from stolidus = stolid (q.v.).] The quality or state of being stolid; dullness of intellect; stupidity, impassiveness.

"These are the fools in the text, Indocile untractable fools, whose stolidity can baffle all arguments."—Bentley: Sermons, ser. I.

stōl'-īd-l'y, adv. [Eng. stolid; -ly.] In a stolid manner.

stōl'-īd-nēss, s. [Eng. stolid; -ness.] Stolidity.

stō'-lōn, stōle (2), s. [Lat. stolo, genit. stolonis = a branch.]

1. Bot.: A shoot which proceeds from a stem above the ground, and then descends into and takes root, as in Aster junceus. It is akin to a sucker, which, however, leaves the stem beneath and not above the ground.

2. Zool.: The name given to (1) any connecting process of protoplasm in the multicellular Foraminifera; (2) to the prolongation of the common tunic, forming a vascular canal, in the Social Ascidiata; and (3) to any of the processes sent out by the cenosarc in some of the Actinozoa.

stō'-lōn-īf'-ēr-ōūs, a. [Lat. stolo, genit. stolonis = s branch, and fero = to bear.]

Bot.: Producing or putting forth stolons. Sometimes used more loosely for producing or putting forth suckers. (Stroton.)

stōl'-pēn-ite, s. [After Stolpen, Saxony, where it occurs; suff. -ite (Min.).]

Min.: A clay found in the basalt of Stolpen.

stōl'-īte (z as tz), s. [After Dr. Stolz, of Teplitz; suff. -ite (Min.); Ger. scheelbleispath, scheelbleierz, wolframbleierz, stollit.]

Min.: A tetragonal mineral occurring mostly in octahedral forms. Hardness, 2.7 to 3; sp. gr. 7.87 to 8.13; lustre, sub-adamantine; colour, gray, brown, red. Compa.: tungstic acid, 51.0; oxide of lead, 49.0 = 100, which is equivalent to the formula, PbO.WO₃. Found with molybdate of lead, at Bleiberg, Carinthia, and a few other places.

stō-mā (pl. stō-mā-ta), stō-māto, *stō-mā-ti-ūm (pl. stō-mā-ti-a) (ti as sh), s. [Gr. stōma (stoma), genit. stō-matos (stomatōs) = a mouth.]

1. Anat. (Pl., generally of the form stomata): Openings in the lymphatic vessels in man; lymphatic orifices. Similar orifices have been found in the omentum of the lower mammals. Used also of the spiracles or breathing holes along the sides of insects.

2. Botany:

(1) The opening through which dehiscence takes place in the spore-cases of ferns.

(2) The ostium of certain fungals.

(3) (Pl.): Passages through the cuticle of a plant for the maintenance of respiration. They appear like an oval space, in the centre of which is a slit that opens or closes according to circumstances, and lies above a cavity in the subjacent tissue. In some plants, including those with floating leaves, stomata are on the under, in others on the upper surface of the leaves; in leaves standing at right angles to the earth both sides have stomata. In succulent plants the stomata are few.

stō-māc'-a-cē, s. [Lat., from Gr. stōmakē (stomakē) = scurvy of the gums.]

Pathol.: (1) An erosion of the gums, with spontaneous hæmorrhage, fetid breath, &c., symptomatic of scurvy; (2) scurvy (q.v.).

stōm'-ach, *stōm'-aok, *stom-acke, *stom-ak, *stom-ake, s. [Fr. estomac (O. Fr. estomach), from Lat. stomachum, accus. of stomachus = the gullet, the stomach, from Gr. stōmachos (stomachos) = a mouth, an opening, the gullet, the stomach, from stōma (stoma) = a mouth; Sp. & Port. stomach.]

(6) Pride, haughtiness, arrogance.

"He was a man Of an unbowed stomach, ever ranking Himself with princes." *Shakesp.*: *Henry VIII.*, IV. 2.

II. Technically:

1. Compar. Anat.: A membranous sac, formed by a dilatation of the alimentary canal, in which food is received and subjected to the processes of digestion among the Vertebrata. The human stomach is an elongated, curved pouch, from ten to twelve inches long, and four or five inches in diameter at its widest part, lying almost immediately below the diaphragm, nearly transversely across the upper and left portion of the abdominal cavity, and having the form of a bag-pipe. It is very dilatate and contractile, and its average capacity is about five pints. The left and larger extremity is called the cardiac, great, or splenic extremity; the right and smaller, is known as the pyloric, from its proximity to the pylorus (q.v.). The food enters the stomach through the oesophagus by the cardiac or cardiac orifice, and after having been acted on by the gastric juice, is passed on in a semi-fluid or pulpy state through the pylorus into the small intestines. The stomach has four coats, named from without inwards: (1) the serous, (2) the muscular, (3) the areola or sub-mucous, and (4) the mucous coat. The last is a smooth, soft, rather thick and pulpy membrane, generally reddish in colour from the blood in its capillary vessels; often ash-gray in old age. After death it becomes a dirty brown, and in acute inflammation, or from the action of strong acrid poisons, it becomes of a bright red, either continuously or in patches. Corrosive poisons also affect its coloration. The surface of the mucous membrane is beset with secreting glands. The stomach is supplied with blood from the coeliac artery, which gives off arterial branches that ramify freely, and the veins return the residual blood into the splenic and superior mesenteric veins, and directly into the portal vein. The lymphatics of the stomach are very numerous, and arise in the mucous membrane. The nerves are large, and consist of the terminal branches of the two pneumogastric nerves belonging to the cerebro-spinal system, and of offsets from the sympathetic system derived from the solar plexus. Their ending has not been traced. In the lower mammals three forms of stomach have been distinguished: (1) Simple, consisting of a single cavity, as in man; (2) Complex, in which there are two or more compartments communicating with each other, as in the kangaroo, the porcupine, and the squirrel; and (3) Compound, in which the stomach is separated into a reservoir and a digestive portion. [RUMINATION.] In birds there are three small but distinct dilatations of the alimentary canal (CROPP, GIZZARD, PROVENTRICULUS), and in most reptiles the simplicity of the oesophagus extends to the stomach. In fishes, two forms are found, the siphonate stomach (q.v.) and the coecal, in which the upper portion gives off a long blind sac. In the

higher Invertebrata, there is a digestive tract with functions analogous to those of the stomach of Vertebrates; in the lower there may (Hydra) or may not (Amoeba) be a gastric cavity in which food is ingested and absorbed. In the latter case the living protoplasm closes over its prey, and, after a time by a reversing process, the indigestible remains are ejected. To these tracts or cavities, the name stomach is often applied. [DIOSMETION, II. 4.]

2. Pathol.: The human stomach is subject to ulceration, cancer, cadaveric softening, perforation, catarrh, &c.; besides which, chiefly through errors in food, and want of exercise on the part of the individual, it may fall in its proper function of digestion. [INDIOSMETION.]

* stomach-animals, s. pl.

Zool.: Oken's name for the Infusoria.

stomach-piece, s.

Shipbuild.: A compass-timber fayed to the stem and keel; an apron.

stomach-pump, s.

Surg.: A suction and force pump for withdrawing the contents of the stomach in cases of poisoning, &c., and also used as an injector. It resembles the ordinary syringe, except that it has two apertures near the end, in which the valve opens different ways, so as to constitute a sucking and a forcing passage.

* stomach-qualified, a. Sick at heart.

"Or stomach-qualified at land, a dram of this Will drive away distemper." *Shakesp.*: *Cymbeline*, III. 4.

stomach-stagers, s. A disease in horses, depending on a paralytic affection of the stomach. In this disease the animal dozes in the stable, and rests his head in the manger; he then wakes up and falls to eating, which he continues to do till the stomach swells to an enormous extent, and the animal at last dies of apoplexy or his stomach bursts.

* stomach-timber, s. Food.

stóm'-ach, *stóm'-ack, v. t. & i. [Lat. *stomachor* = to be or become indignant.] [STOMACH, s.]

A. Transitive:

stóm'-a-pód, s. [STOMAPODA.]

Zool.: Any member of the order Stomapoda (q.v.).

† stō-máp'-ō-dá, s. pl. [Gr. *στῆμα* (*stoma*) = the mouth, and *πόδι* (*podē*), genit. *ποδός* (*podōs*) = a foot.]

1. Zool.: An order of Crustaceans, legion Podophthalmia. The gills are composed of plates or simple filaments attached to the feet; carapace shorter, and body narrower and less compact than in the Decapoda. Under it are ranged Squilla (the type), sometimes made a family (Squillidae), Mysid (with some forms of Eriichthyid), to which similar distinction is sometimes given (Mysidae), and an anomalous group, Diastylidae, consisting of three genera: Cuma, Alana, and Bodotria.

2. Paleont.: *Pygocephalus huxleyi*, from the Coal-measure, probably belongs to this division. True Squillae and Mysid-like forms occur in the Jurassic.

stō-máp'-ō-dous, a. [Eng. *Stomapod*; -ous.] Pertaining or belonging to the Stomapoda.

stō-ma-ta, s. pl. [STOMA.]

stō-māte, a. & s. [STOMA.]

A. As adjective:

Bot.: Having stomacha.

B. As subst.: [STOMA.]

stóm-a-těl'-lá, s. [Mod. Lat., dmlin. from Gr. *στόμα* (*stoma*) = a mouth, an aperture.]

Zool. & Paleont.: A genus of Turbidae, with thirty-three recent species, found on reefs and under stones at low water in tropical and sub-tropical regions. Shell ear-shaped, regular, spire small, aperture oblong, very large and oblique; interior pearly, lip thin and even, operculum circular, horny, and multispiral. They commence in the Secondary. (*Nicholson*.)

stō-mā-ti-g (tl as shí), s. [Mod. Lat., from *stoma* (q.v.).]

Zool. & Paleont.: A genus of Haliotida, akin to Haliotis, but with a prominent spire, and a furrow instead of perforations on the shell. Recent species twelve, found under stones at low water, from Java, the Philippines, Torres Straits, and the Pacific; fossil eighteen, from the Lower Silurian to the Chalk of North America and Europe.

stō-māt'-io, s. & a. [Gr. *στοματικός* (*stomatikos*) = pertaining to the mouth; *στοματική* (*stomatikē*) = a medicine for diseases of the mouth.]

A. As subst.: A medicine for diseases of the mouth.

B. As adj.: Of or pertaining to a stoma or stomata.

stōm-a-tif'-ēr-ōūs, a. [Mod. Lat. *stomata*, and Lat. *fero* = to bear.]
Bot.: Bearing stomata.

stōm-a-tī'-tis, s. [Gr. *στόμα* (*stoma*), genit. *στόματος* (*stomatōs*); suff. *-itis*.]

Pathol.: Inflammation of the mouth, a disease commonly occurring in young children. There are three forms of it: follicular stomatitis, affecting the mucosa follicles of the mouth; ulcerative stomatitis, attacking the gums; and gangrenous stomatitis, *cancrum oris*, or sloughing phagedena of the mouth, affecting the tissues of the cheek.

stō-mā'-tī-ūm (tī as shī), s. [STOMA.]

stōm-a-tō, pref. [Gr. *στόμα* (*stoma*), genit. *στόματος* (*stomatōs*) = a mouth.] Pertaining to or connected with the mouth.

***stōm-a-tō'-da, s. pl.** [Pref. *stomat(o)*, and Gr. *είδος* (*eidos*) = form.]

Zool.: An old order of Infusoria, characterized by the possession of a mouth.

stōm'-a-tō-de, a. & s. [STOMATODA.]

A. As adj.: Possessing a mouth; belonging to the Stomatoda (q.v.).

B. As subst.: Any individual of the Stomatoda.

stomatode-protzoa, s. pl.

Zool.: The Infusoria.

stōm-a-tō-dēn'-drōn, (pl. stōm-a-tō-dēn'-dra), s. [Pref. *stomato-*, and Gr. *δένδρον* (*dendron*) = a tree.]

Zool. (Pl.): The dendritic branches of the Rhizostomida. They end in minute polypites, which cover them.

stōm-a-tō-gās'-trīc, a. [Pref. *stomato-*, and Eng. *gastric* (q.v.).] Of or pertaining to the mouth and stomach. Used chiefly of the system of nerves distributed upon the stomach and the intestinal canal. (*Owen*.)

stōm-a-tō-mor'-phōūs, a. [Pref. *stomato-*, and Gr. *μορφή* (*morphē*) = form.]
Bot.: Mouth-shaped. (*Treas. of Bot.*)

stōm-a-tō-plas'-tīc, a. [Pref. *stomato-*, and Eng. *plastic* (q.v.).]

Surg.: Applied to the operation of forming a mouth, where the aperture has been contracted from any cause. (*Dunglison*.)

stōm-a-tō-rrhā'-hī-a, s. [Pref. *stomato-*, and Gr. *ρήγνυμι* (*rhēgnymi*) = to break.]

Pathol.: Discharges of blood from the mouth and throat. As a rule, it is not a formidable disease.

stō-māt'-ō-scōpe, s. [Pref. *stomato-*, and Gr. *σκοπέω* (*skopēō*) = to observe.] An instrument for keeping the mouth open for purposes of inspection.

stōm'-a-toūs, a. [Mod. Lat. *stomata*; Eng. adj. suff. *-ous*.] Furnished with stomata.

stōm-ē-chī'-nūs, s. [Gr. *στόμα* (*stoma*) = a mouth, and Mod. Lat. *echinus* (q.v.).]

Palæont.: A group of Star-fishes, family Echinidae, occurring in the Jurassic.

stō-mī'-ās, s. [Gr. *στομίας* (*stomias*) = hard-mouthed.]

Ichthy.: The type-genus of Stomistidae (q.v.), with three species. Body elongate, compressed, covered with delicate deciduous scales; head compressed, snout very short, mouth-cleft very wide; series of phosphorescent dots along the lower side of head, body, and tail. Specimens have been dredged at depths varying from 450 to 1,800 fathoms.

stō-mī-ās'-ī-dæ, s. pl. [Mod. Lat. *stomias*, genit. *stomias(i)*; Lat. fem. pl. adj. suff. *-idae*.]

Ichthy.: A family of Physostomi (q.v.); deep-sea fishes from the Atlantic, characterized chiefly by their formidable array of

teeth. Skin naked, or covered with very delicate scales; eggs enclosed in the sacs of the ovarium, and excluded by oviducts. Dr. Günther enumerates the following genera: *Astronesthes*, with two dorsals, the posterior adipose; *Stomias*, *Echlostoma*, *Malacosteus*, and *Bathypolis*, in which the rayed dorsal is opposite to the anal fin.

stō-mī-ūm (pl. stō-mī-ā), s. [Gr. *στόμιον* (*stomion*) = a small mouth, dimin. from *στόμα* (*stoma*) = a mouth.]

Bot.: The same as STOMA, 2 (1), (2).

stōm-ōx'-ys, s. [Gr. *στόμα* (*stoma*) = a mouth, and *ὄξυς* (*oxus*) = sharp.]

Entom.: A genus of Muscidae. *Stomoxys calcitrans* resembles the house-fly, but has a long, sharp proboscis, by means of which it sucks the blood of man and the inferior animals.

stōmp, s. & v. [STAMP.]

***stōnd, s.** [STAND.]

1. A stop, a stand; an impediment or hindrance.

"The removing of the *stands* and impediments of the mind, doth often clear the passage, and enurset to a man's fortune."—*Bacon: Letter to Sir Henry Saville.*

2. A stand, a post, a station.

"On th' other side, th' assailed castle's ward
Their steadfast *stands* did mightily maintain."
Spenser: F. Q., II. xl. 15.

***stōnde, *stōnd-en, v.** [STAND, v.]

stōne, *ston, *stoon, s. & a. [A.S. *stān*; cogn. with Dut. *steen*; Icel. *steinn*; Dan. & Sw. *sten*; Ger. *stein*; Goth. *stains*; Russ. *stena* = a wall; Gr. *στία* (*stia*) = a stone, a pebble.]

A. As substantive:

I. Ordinary Language:

I. Literally:

(1) In the same sense as II. 1.

(2) The material obtained from rocks or stones; the kind of substance they produce.

"There beside of marble *stone* was built
An altar." *Spenser: F. Q., I. viii. 33.*

(3) A gem; a precious stone.

"I thought I saw
Wedges of gold, great anchors, heaps of pearl,
Inestimable *stones*, unvalued jewels."
Shaksp.: Richard III., l. 4.

(4) Something made of stone: as—

(a) A monument erected to preserve the memory of the dead; a gravestone.

"Underneath this *stone* doth lie
As much beauty as could die."
Ben Jonson: Epitaph on Queen Elizabeth.

* (b) A gun-flint.

(5) Something which resembles a stone: as—

(a) A calcareous concretion in the kidneys or bladder; hence, the disease arising from a calculus. [CALCULUS, 2.]

"Past earthquakes—*ey*, and gout and *stone*."
Tennyson: Lucretius, 153.

(b) The nut of a drupe or stone fruit; the hard covering enclosing the kernel, and itself enclosed by the pericarp; the hard and bony endocarp of a drupaceous fruit.

"Cracking the *stones* of the prunes."
Shaksp.: Measure for Measure, II. 1.

(c) A testicle.
¶ In composition used by the old herbalists for an orchis, as dog-stones = old-orchis (*Orchis mascula*).

(d) The glass of a mirror; a mirror.

"Lend me a looking-glass;
If that her breath will mist or stain the *stone*,
Why then she lives." *Shaksp.: Lear, v. 3.*

* (e) A hailstone.

* (f) A thunderbolt.

"The gods throw *stones* of sulphur on me."
Shaksp.: Cymbeline, v. 3.

(8) A measure of weight in use throughout the north-west and central countries of Europe, but varying much in different places. The English imperial standard stone is a weight of 14 lbs. avoirdupois, but there are stones of other weights for particular commodities; thus the stone of butcher's meat or fish is 8 lbs., of cheese 16 lbs., of hemp 32 lbs., of glass 5 lbs., &c.

2. Fig.: Used as the symbol of hardness, torpidity, or inaccessibility: as, He has a heart of stone.

II. Technically:

1. *Petrol., Geol., Arch., &c.:* Stone is not

used as a technical term in either Petrology or Geology, though it enters into the composition of words in those sciences, as Portland-stone. By masons, builders, &c. it is continually used, and is specially contrasted with brick as material for the construction of edifices. "That portion of it," says Weale, "which is used for building purposes is a dense, coherent, brittle substance, sometimes of a granulated, at others of a laminated structure, these qualities varying according to its chemical constitution and the mode in which it has been deposited." The qualities which render a building stone valuable are strength to resist superincumbent pressure, durability, and a capability of being easily wrought. The chief building stones at present in use are granites of various colors, gneisses, porphyries, sand-stones, millstone grit, dolomite, marbles, the mountain limestone, and others. The art of working in stone is of great antiquity, the Egyptians being especially celebrated for their granite edifices, obelisks, sculptures, &c. Among the Greeks, marble was usually employed for the great temples and other edifices.

2. *Print.:* The same as IMPOSING-STONE (q.v.).

B. As adj.: Made of stone.

"Stone walls do not a prison make,
Nor iron bars a cage."

Lovelace: To Althea, from Prison.

¶ (1) *Artificial stone:* A concreted material used for many purposes, as making building blocks, flagstones, tiles, vases, statuary, sewer-pipes, &c. Many substances have been used for its production. That which has been used on the largest scale, and, until a comparatively recent period, exclusively, was cemented Roman, or, still better, Portland cement, which hardens after being mixed with water. Ordinary concrete and beton are of this class. Terra-cotta, employed for architectural ornaments, statuary, &c., is in the nature of a fine brick.

(2) *Meteoric stone:* [AEROLITE.]

(3) *Philosopher's stone:* [PHILOSOPHER'S STONE.]

(4) *To leave no stone unturned:* To use all available or practicable means to effect an object; to omit or spare no exertions.

stone-age, s. [AGE, s., B. 3.]

stone-axe, a. An axe with two somewhat obtuse edges, used in spawling and hewing stone.

stone-basil, s.

Bot.: *Melissa Clinopodium.*

stone-bass, a.

Ichthy.: *Polytrich cornutum*, about eighteen inches long, and valued for the table. It occurs round the European coasts, and is often met with accompanying floating wood, being attracted by the small marine species generally surrounding such objects and affording a supply of food.

stone-blind, a. Blind as a stone; perfectly blind.

stone-blue, a. A compound of indigo and starch or whiting.

stone-boat, s.

1. A barge used for carrying sinnes.
2. A flat-bottomed sled for hauling heavy stones for short distances.

stone-boilers, s. pl.

Anthrop.: Any race of people practising stone-boiling (q.v.). [HIDE-BOILING, POT-BOILER, A. 2.]

"The Australians, at least in modern times, must be counted as *stone-boilers*."—*Taylor: Early Hist. Mankind* (ed. 1878), p. 265.

stone-boiling, s.

Anthrop.: (See extract).

"It is even likely that the art of boiling, as commonly known to us, may have been developed through this intermediate process, which I propose to call *stone-boiling*. There is a North American tribe, who received from their neighbours the Ojibwas, the name of Assinaboins, or 'stone-boilers,' from their mode of boiling their meat. . . . They dig a hole in the ground, take a piece of the animal's raw hide, and press it down with their hands close to the sides of the hole, which thus becomes a sort of pot or basin. This they fill with water, and they make a number of stones red-hot in a fire close by. The meat is put into the water and the stones dropped in till the meat is boiled."—*Taylor: Early Hist. Mankind* (ed. 1878), p. 263.

stone-borer, s.

Zool.: A popular name for any of the Lithophagi (q.v.).

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, eār, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

* **stone-bow**, *s.* A cross-bow for shooting stones.

"O for a stone-bow to hit him in the eye."
Shakesp.: *Twelfth Night*, II. 2.

stone-bramble, *s.*

Botany:

1. *Rubus saxatilis*, a bramble having the barren stems procumbent, unarmed, or with scattered bristles, trifoliate leaves, and very small petals. Found on the stony banks of subalpine and alpine rivulets in Britain, Europe, and Asia to the Himalays.

† 2. *Rubus Chamæmoros*. (*Ogilvie*.)

stone-brash, *s.*

Agric.: A subsoil composed of shattered rock or stone.

stone-break, *s.*

Bot.: Any saxifrage (q.v.). Gerard calls *Saxifrage granulata* the White Stone-break, and *Chrysosplenium oppositifolium* the Golden Stone-break. (*Britten & Holland*.)

stone-buok, *s.* The steinbok (q.v.).

stone-butter, *s.* A sort of alum.

stone-canal, *s.* [SAND-CANAL.]

* **stone-cast**, *s.* A stone's cast; as far as one could throw a stone.

"About a stone-cast from the wall."
Tennyson: *Mariana*, 87.

stone-ement, *s.* A hard composition of the nature of mortar, which will harden and form a water-tight joint.

stone-circles, *s.* Circles of standing stones, occurring in the British Isles, where they are popularly known as Druidical circles; in Scandinavia, where they are called Dom-rings, or Thing-steads; in France, where they receive the popular name of Cromlech, and in other countries. All these titles are given under erroneous ideas, since the origin of these circles precedes historical times, and there is little evidence as to their purposes. In some localities they are very numerous, and some are of such size and weight that it is remarkable how they were erected. In certain places they seem connected with burial customs.

stone-coal, *s.*

Min.: A name applied in America and England to anthracite (q.v.), but in Germany it is used to distinguish the coal of the carboniferous formation from the more recent Lignite or Brown Coals (Ger. *braunkohle*) of the Tertiary period.

stone-cold, *a.* Cold as a stone; very cold.

"At last as marble rocks he standeth still,
Stone-cold without; within, burnt with lones flame."
Pastor: *Godfrey of Boulogne*, xxvii.

stone-color, *s.* & *a.*

A. *As subst.*: The color of a stone; a grayish color.

B. *As adj.*: Of the color of a stone; of a grayish color.

stone-coral, *s.* Massive, as distinguished from branched, coral.

stone-cray, *s.* A distemper in hawks.

stone-crush, *s.* A sore on the foot occasioned by a bruise, or as if by a bruise. (*Prov.*)

stone-curlew, **stone-plover**, *s.*

Ornith.: *Edicnemus scolopax* (*crepitans*); called also the Thick-knee, Thicknee, or Norfolk Plover. An European bird, whose common name comes from swellings at the joints in the young.

stone-cutter, *s.* One whose occupation is to cut stones for building, ornamental, or other purposes; a machine for working a face on a stone or ashlar.

"A stone-cutter's man had the vesicle of his lungs so stuffed with dust, that, in cutting, the knife went as if through a heap of sand."
Derham: *Phys. Theol.*

stone-cutting, *s.* The business or occupation of cutting or hewing stones for walls, monuments, &c.

stone-dead, *a.* Dead, or lifeless as a stone; quite dead.

"Then home he went, and left the Hart, stone-dead."
Wordsworth: *Hart-Leap Well*.

stone-deaf, *a.* Deaf as a stone, perfectly deaf.

stone-dresser, *s.* One who dresses, shapes, or tools stone for building purposes.

stone-eater, *s.* [STONE-BORER.]

stone-falcon, **stone-hawk**, *a.*

Ornith.: The merlin (q.v.).

"From this habit of perching on pieces of stone, it has derived the name of stone-falcon, a title which has been applied to this bird in Germany and France as well as in England."
Wood: *Illus. Nat. Hist.*, II. 77.

stone-fern, *s.*

Botany:

1. *Ceterach officinarum*. So named because it grows on stone walls.

2. *Allosorus crispus*. (*Britten & Holland*.)

stone-fly, *s.* [PERLA.]

stone-fougasse, *s.*

Mil.-eng.: A mine covered with stones.

stone-fruit, *s.* Fruit whose seeds are covered with a hard shell enveloped in the pulp, as peaches, plums, cherries, &c.; a drupe.

"We gathered ripe apricocks and ripe plums upon one tree, from which we expect some other sorts of stone-fruit."
Boyle.

stone-gall, *s.*

1. The name given by quarrymen to nodules or round masses of clay often occurring in variegated sandstones, and rendering it less valuable as a building stone.

2. The same as STANNEL (q.v.).

stone-grig, *s.*

Ichthy.: The young of the Mud-lamprey, *Petromyzon branchialis*.

stone-hag, *s.* The name given to the pit-houses, divided into apartments by partition-walls, and all strongly lined with stone, so as to be the favourite quarry of the road-menders, probably 2,000 or 3,000 years old, found in such numerous clusters at Gothland and elsewhere in the easterly moorlands of north Yorkshire. (*Gentleman's Magazine*, May, 1861, p. 503.)

stone-hammer, *s.* A chipping hammer used by stone-masons in rough-dressing stone.

* **stone-hard**, *a.* Hard as stone, unfeeling. (*Shakesp.*)

stone-harmonicon, *s.* A musical instrument consisting of a number of bars or slabs of stone supported on wood or straw, and played like the dulcimer.

stone-hatch, *s.*

Ornith.: (See extract.)

"The nest is only a slight hollow in the sand, in which its four eggs are deposited; but sometimes this cavity is lined or covered with a number of small stones about the size of peas, upon which the eggs are laid, and this habit has gained for the Ringed Plover [*Egialitis haticula*] in some countries the provincial name of stone-hatch."
Yarrell: *Birds* (ed. 4th), III. 233.

stone-hawk, *s.* [STONE-FALCON.]

stone-head, *s.*

Mining: The rock immediately below the alluvial deposit.

stone-hearted, *a.* Hard-hearted, pitiless, unfeeling, stony-hearted.

stone-horse, **stone-hot**, *s.*

Bot.: (1) *Sedum acre* (*Britten & Holland*); *S. reflexum* (*Prior*).

* **stone-horse**, *s.* A horse not castrated, an entire horse.

"The Scythians chuse rather to use their mares in war-service than their stone-horses."
P. *Holland*: *Pliny*, bk. viii., ch. xiii.

stone-house, *s.* A house built of stone.

stone-jug, *s.* A prison. (*Slang*.)

stone-lichen, *s.*

Bot.: *Parmelia fabrumensis*. (*Rosseter*.)

stone-lily, *s.* [ENCRINITE, ENCRINUS.]

stone-lugger, *s.*

Ichthy.: *Campostoma*, an American genus of Carps.

stone-marten, *s.*

Zool.: *Mustela foina*, a species allied to the Pine-marten (q.v.), from which it differs in cranial and dental characters, and in having the throat white instead of yellow. It is also known as the Common or Beech Marten. It, with the Pine Marten, is a native of Europe.

stone-mason, *s.* One who dresses stones for building or other purposes; one who builds with stone.

stone-merchant, *s.* One who deals in building, paving, or other stone.

* **stone-mortar**, *s.* A large mortar formerly used in sieges for throwing a mass of small stones or hand-grenades upon an advancing enemy.

stone-oak, *s.*

Bot.: *Lithocarpus javensis*, a mastwort; named from the hardness of its fruit.

stone-ochre, *s.* An earthy oxide of iron which forms a yellow pigment of considerable permanence in oil or water-colours.

stone-oil, *s.* Rock-oil, petroleum.

stone-orpina, *s.*

Bot.: *Sedum reflexum*. Corrupted into Stone-hore or Stodor.

stone-parsley, *s.*

Bot.: *Sison Amomum*.

stone-pillar, *s.* A standing-stone; a monolith worshipped as the representative or embodiment of a deity. [PILLAR-HEIRTY, PILLAR-SYMBOL, STONE-WORSHIP.]

"A curious inquiry, whether this point of Ireland, on the utmost western verge of Europe, be not the last spot in Christendom in which a trace can now be found of stone-pillar worship."
Notes & Queries, Feb. 7, 1852, p. 121.

stone-pino, *s.*

Bot.: *Pinus Pinea*; a tree about sixty feet high, with cones five inches in length, the kernels of which are eaten in Italy, France, and China. It is the *pinus* (*pinus*) of Dioscorides.

stone-pit, *s.* A pit or quarry where stone is dug.

stone-pitoh, *s.* Hard, insipidated pitch.

stone-plant, *s.* [LITHOPHYTE.]

stone-plover, *s.* [STONE-CURLEW.]

stone-pock, *s.* An acid and hard pimple which suppurates.

* **stone-priest**, *s.* A lecherous priest.

stone-quarry, *s.* A stone-pit (q.v.).

stone-rag, **stone-raw**, *s.* [STONE-HAW.]

stone-wall, *s.* A wall built of stones.

stone-ware, *s.* A species of potter's or ceramic ware largely in use for domestic and other purposes.

"The stone-ware of London is made of pipe-clay from Dorsetshire and Devonshire, calcined and ground flint from Staffordshire, and sand from Woolwich and Charlton. The dry clay is pulverized and sifted. The ingredients are compounded in different proportions, according to the fineness of the ware, its size, and purpose. The round articles are turned on a wheel, dried, and shaved in a lathe. Articles of other shapes are moulded. The articles are then stacked in the kiln, with pieces of well-sanded clay placed between them, to prevent their adhering. A slow fire dissipates the moisture, and the heat is then raised until the flame and ware have the same colour. The glaze is then added by pouring twenty or thirty ladefuls of common salt into the top of the kiln. This is volatilized by heat, becomes attached to the surface of the ware, and is decomposed, the muriatic acid flying off and leaving the soda behind it to form a fine thin glaze on the ware, which resists ordinary acids."
Knight: *Dict. Mechanics*, s. v. Stone-ware.

stone-work, *s.* Work consisting of stone; mason's work of stone.

"They make two walls with flat stones, and fill the space with earth, and so they continue the stone-work."
Mortimer.

stone-worship, s.

Compar. Religions: Divine honours paid to stones, either as the embodiments or the representatives of deities. It is a part of stock-and-stone worship, dating from remote antiquity, and was once widely spread. Grote (*Hist. Greece*, iv. 132) notes that it existed among the ancient Greeks; Tacitus (*Hist.*, ii. 3) describes a conical pillar which stood instead of an image to represent the Paphian Venus, and adds, "ratio in obscuro," and Isaiah lviii. 6 shows that it was not unknown among the Jews. It lingered on in France and Europe till the Early Middle Ages (*Lubbock: Orig. Civil.* (ed. 1882), p. 307), in Norway till the end of the eighteenth century (*Nilson: Primitive Inhabitants of Scandinavia*, p. 241), and, according to Lord Roden (*Progress of Reformation in Ireland*, pp. 51-54), the islanders of Iouleska, off the coast of Mayo, worshipped a stone, and whenever a storm arose brought it to send a wreck on the coast. Tylor, coupling the fact that stone-worship survived to the Early Middle Ages in England and France with the circumstance that groups of standing stones are set up in India to represent deities, suggests "that men-hirs, cromlechs, &c., may be Idols, and circles and lines of Idols, worshipped by remotely ancient dwellers in the land as representatives or embodiments of their gods." [*STURGE.*]

"This stone-worship among the Hindus seems a survival of a rite belonging originally to a low civilization, probably a rite of the rude indigenes of the land."—*Tylor: Prim. Cult.* (ed. 1873), II. 164.

stone's cast, stone's throw, s. The distance to which a stone can be thrown by the hand.

"The new building will be within a stone's throw of the Ringstrasse."—*Daily Telegraph*, March 14, 1887.

stone'-chät, s. [Eng. *stone*, s., and *chat* (1), s.]

Ornith.: *Saxicola rubicola*. The colour varies according to the season: in an adult male in summer the head, throat, and small coverts of the wings are black, the borders of each feather ruddy brown, white spots on the sides of the neck, on the wings above, and on the rump, under parts ruddy, wings brown, tail-feathers white at the base, on the other parts dark brown. The colours of the female are less bright, and the white spots on the sides of the neck are smaller. The Stonechat occurs all the year in Britain, though many migrate southwards for the winter. It is rather smaller than the robin, frequents furze-clad commons or heaths, where it perches upon stones, darting forth in pursuit of some insect, and then returning to the same spot. The nest is built in April of moss and grass, hair and feathers; eggs pale grayish blue, with some reddish-brown spots at the larger end. It occurs in India, Asia Minor, &c., as well as throughout Europe. Called also Stone-smith, Stone-amich, Stone-chatter, Stoneclink, and Moor-titling.

stone'-cröp, s. [Eng. *stone*, s., and *crop* = a top, a bunch of flowers; so called because the typical species, *Sedum acre*, grows on stone walls, and has dense tufts of flowers. (*Prior.*)]

Bot.: Any species of the genus *Sedum* (q.v.), and specially the Common or Biting Stonecrop, *Sedum acre*.

¶ The Great Stonecrop is (1) *Cotyledon Umbilicus*, and (2) *Sedum album*; the Shrub Stonecrop is *Suaeda frutescens*.

(3) The handle and leverage which act upon the rows of pipes in an organ; a register.

(4) The series of pipes thus acted on. Organ-stops are of two kinds, flue and reed: the tone of flue-pipes is produced by directing a current of air against a sharp edge called the lip; the tone of reed-pipes is produced by setting a metal tongue in motion at the opening of a tube. Flue-stops are opened or closed at the top; as, open diapason, stopped diapason, &c. The tone of a stopped pipe is an octave lower than that produced by an open pipe of the same length. An open pipe of 8 ft. in length gives the note C, the lowest note on the manuals of a modern organ; it is customary, therefore, to write on stop-handles the length of the longest pipe of the series, thus informing the player of the pitch of the stop, e.g., double diapason, 16 ft.; open diapason, 8 ft.; stopped diapason, 8 ft. tone (4 ft. stopped); octave or principal, 4 ft.; flute, 4 ft. tone, &c. The 8 ft. flue-stops constitute the foundation stops. Stops containing more than one rank of pipes, such as mixture, sesquialters, &c., are called compound stops. Stops sounding the interval of a twelfth, or tierce (and sometimes also the octave and the fifteenth), are called Mutation stops.

Ornith.: Any individual of the genus *Ciconia*, or of the sub-family Ciconiinae. In form the storks resemble the herons, but are more robust, and have larger bills, shorter toes, with a non-serrated claw on the middle toe. They inhabit the vicinity of marshes and rivers, where they find an abundant supply of food, consisting of frogs, lizards, fishes, and even young birds. Storks are migratory, arriving from the south at their breeding haunts in the early spring, and departing again in the autumn. The White or House Stork (*Ciconia alba*), which is common in many countries of Central Europe, constructs a large nest, most frequently on the chimney of a cottage; also on the tops of tall trees, spires, walls of ruined buildings, &c. The plumage is dirty white, the quills and longest feathers on the wing-covers black; beak and feet red. The male is about forty-two inches long, the female somewhat less. The Black Stork (*C. nigra*), from the centre and east of Europe, Asia, and Africa, has the upper surface black, the lower parts white. It resembles the White Stork in habits. Storks are protected by laws in some countries for their services in destroying small mammals and reptiles, and in consuming off. They have also been celebrated from ancient times for their affection for their young; their reputation for regard for the old birds is much overrated, though heralds have adopted the stork as an emblem of piety and gratitude.

storm, s. [A.S. *storm*; cogn. with Icel. *stormr*; Dut., Sw., & Dan. *storm*; Ger. *sturm*; Ital. *stormo*. From the same root as Lat. *sterno*; Eng. *strew*.]

I. Ordinary Language:

1. Lit.: A violent commotion or disturbance of the atmosphere, producing or attended by wind, rain, snow, hail, or thunder and lightning; a tempest. (Often applied to a heavy fall of rain, snow, &c., without a high wind.)

"Bids the pelting of this pitiless storm."

Shakspeare: *Learn*, iii. 4.

¶ The severest storms which occur on the globe have their origin in the tropics. They were long known as hurricanes, but the investigation of the law of storms proved them to be rotatory, and they are now called cyclones. [CYCLONE.] Modern investigation has divided storms into two classes, the Cyclone, or great rotatory storm, and the Tornado, or small rotatory storm, believed to be a secondary result of the Cyclone. Thunder storms and hail storms often appear to originate in causes similar to those which produce the Tornado. In the United States, Cyclones have two centres of origin, one in the region of the West Indies, whence they migrate up the Atlantic coast region, and the other in the district east of the Rocky Mountains, whence they make their way eastward by the line of the Great Lakes. The width of their circle of rotation may be 1000 or 2000 miles. Tornadoes, on the contrary, are very contracted storms, a half mile and usually much less in width, but of extreme violence of rotation. The destruction of life and property caused by these storms is sometimes enormous.

2. Figuratively:

(1) A violent disturbance or agitation of human society; a tumult, a clamour, a commotion.

"The storm unbeked as quickly as it arose, and all's well that ends well, we are told."—*Field*, Sept. 4, 1886.

(2) A violent or vehement outbreak.

"Bills, the first appearance of which has aroused a storm of protest and denunciation from the traders."—*Morning Post*, Feb. 5, 1885.

(3) A violent or destructive calamity; a sad or distressful state of affairs; extreme distress, misfortune, or adversity.

"A brave man struggling in the storms of fate."

Pope: *Prolog. to Addison's Cato*.

(4) A heavy shower or fall.

"Rattling storms of arrows barbed with fire."

Milton: *P. L.*, v. l. 544.

II. Mil.: A violent assault on a fortified place or strong position; a furious attempt by troops to capture a fortified place by scaling the walls, forcing the gates, or the like.

"Far more terrible to me than all the dangers of the storm itself."—*Lever: Charles O'Malley*, ch. ciii.

¶ (1) Magnetic storm:

Magnetism: A magnetic disturbance simultaneously affecting a large portion of the globe. Sabine records a storm of this kind felt at the same time at Prague, the Cape, Tasmania, and Toronto.

(2) Storm in a tea-cup: A great quarrel or commotion about a trifling matter.

¶ Storm is largely used in compounds, the meanings being in most cases self-explanatory: as, storm-menacing, storm-presaging, storm-tossed, &c.

storm and stress, phr. [A translation of the German *sturm und drang*.] Impulse, excitement, unquiet, unrest.

"There is a good deal of storm and stress in Signor C.'s pianoforte playing."—*Referee*, July 18, 1886, p. 8.

¶ Used also adjectively, as a storm and stress period—i.e., a period in which one's actions spring from impulse rather than judgment.

I. Ordinary Language:

1. A room or place artificially heated, such as a bath, a hot-house, &c.

'When a certain Frenchman came to visit Robinson, he found him in his stove with one hand smoking his pipe in the smoking-chamber, and the other holding a book and reading it'—*Father's Holy Bible*, bk. ii. ch. xi.

2. Often applied to the hottest room in a Turkish bath.

3. An apparatus in which a fire is made for the purpose of warming a room or house, or for cooking, or for other purposes. They are generally made of iron, sometimes of brick or tiles, and are of various forms, according to the heating medium used, which may be coal, wood, oil, or gas. In most stoves the fire is excluded from sight, but in some it is open in front, thus affording a pleasing heat and admitting it to support convection. Stoves in the continent of Europe have a double casing which surrounds the fire-chamber. Into the intervals between the casings, air is admitted from the outside of the building, and in this space the heated air is contained by the room. These stoves are generally of cast-iron, being made round or square, and are frequently constructed mainly of tiles.

4. A small box with an iron pan used for boiling meat to warm the feet; a foot-warmer.

strāik (2), s. [STRAKE.]

strāin, *straine, *strayne, *strein, *streyn, *streyno, v.t. & i. [O. Fr. estraindre, from Lat. stringo = to draw tight; Fr. étreindre. From the same root come constrain, restrain, restriction, strict, straight, stringent, &c.]

A. Transitive: 1. To stretch; to draw out with force; to extend with great effort; as, To strain a rope. 2. To make tighter; to bind closer. "Thou, the more he varies forms, beware To strain his letters with a stricter care." Dryden: Virgil; George iv. 596.

3. To exert to the utmost. "He strained his feeble voice to thank Auverquerque for the affectionate and loyal services of thirty years." Macaulay: Hist. Eng. ch. xxv.

4. To injure or weaken by stretching or over exertion; to subject to too great exertion or effort; to injure by a twist or wrench; to sprain; as, To strain the neck or arm. 5. Used also figuratively, in an analogous sense.

"The latter is naturally in a condition which justifies the statement that his relations with the Admiral are strained." St. James's Gazette, Dec. 22, 1896.

5. To push beyond the proper extent; to stretch or carry too far. "With that catalogue of decisions before him, he pretends that the law was hardly ever strained or carried out with triumphant recklessness." Brit. Quart. Review, lvi. 510 (1874).

6. To urge, to ply, to press. "Note if your lady strains his entertainment With any strong or vehement importunity." Shakesp.: Othello, iii. 2.

*7. To force, to constrain. "The quality of mercy is not strained." Shakesp.: Merchant of Venice, iv. 1.

8. To press, to squeeze. "Y' thou desrest or wylt vsee grapes, he seeks thou not a glonious honde to straine and presse the stalkes of the vyne in the firste sommer season." Chaucer: Boethius, bk. 1.

9. To press or squeeze in an embrace. "Our king has all the ladies in his arms, And more and richer, when he straine that lady." Shakesp.: Henry VIII., iv. 4.

*10. To confine. "Streyned the feet of hem in a tree." Wycliffe: Deeds xvi. 24.

11. To press or cause to pass through some porous substance, originally by squeezing; to filter; to purify and separate from extraneous matter by filtering; as, To strain milk.

12. To remove by straining or filtering. (Followed by out.) [GNAT, s., ¶.]

B. Intransitive: 1. To exert one's self; to make violent efforts; to struggle. "The frantic crowd amale Strained at subsection's hursting rein." Scott: Marmion, l. (Intro.)

¶ Used specif. of evacuating the bowels. (See extract under STRAIN, s., 1. 1.)

2. To be filtered; to percolate; as, Water straining through sand becomes pure.

*3. To distract. ¶ 1. To strain a point: (1) To make a special, and generally inconvenient effort to oblige another. (2) To exceed one's duty; to overstep one's commission. *2. To strain courtesy: (1) To use ceremony; to insist that another or others shall take precedence. (2) To remain behind. "My business was great; and in such a case as mine a man may strain courtesy." Shakesp.: Romeo & Juliet, ii. 4.

¶ To strain is properly a species of forcing; we may force in a variety of ways, that is, by the exercise of force upon different bodies, and in different directions; but to strain is to exercise force by stretching or prolonging bodies; thus to strain a cord is to pull it to its full extent; but we may speak of forcing any hard substance in, or forcing it out, or forcing it through, or forcing it from a body; a door or a lock may be forced by violently

breaking them; but a door or a lock may be strained by putting the hinges or the spring out of place. So, likewise, a person may be said to force himself to speak, when by a violent exertion he gives utterance to his words; but he strains his throat or his voice when he exercises force on the throat or lungs so as to extend them.

strāin (1), *straine, *strayne, *strein, s. [STRAIN, v.]

I. Ordinary Language:

1. A violent effort; an excessive exertion or straining of the limbs, muscles, or mind. "Troublesome offers and strains to the seage without doing anything." P. Holland: Piny, bk. xvii, ch. xxi.

Entom.: A family of Notacantha. Antennæ three jointed, and having in most cases terminal stylet with five or six rings. In this is absent, the third articulation is long and fusiform. Wings in many species coach one upon the other. There are two sub-families—*Stratiomyinæ* and *Xylophaginæ*.

strāt-ī-ō-mŷ-ī-nōs, s. [Mod. Lat. *stratiomy(s)*; Lat. fem. pl. adj. suff. -inæ.]

Entom.: A sub-family of Stratiomyid Abdomen with five free segments.

strāt-ī-ō-mŷ-s, s. [Gr. *στράτιος* (*stratios*) = warlike, and *μύια* (*myia*) = a fly.]

Entom.: The typical genus of Stratiomyid. The best-known species is *Stratiomyia chamberlaini*, a large, handsome fly, a little more than half an inch long, the colour brassy black with tawny hairs; the scutellum yellow, with two long spines; the abdomen black with yellow spots and bands. The female deposits her eggs on the lower side of the water-plantain *Arisma Plantago*; the pupa floats like a boat.

strāt-ī-ō-tē-æ, s. pl. [Lat. *stratiot(es)*; Lat. fem. pl. adj. suff. -æe.]

Bot.: A tribe of Hydrocharidaceæ, having the ovary six, eight, or nine-celled.

strāt-ī-ō-tēs, s. [Lat. from Gr. *στρατιώτης* (*stratiōtēs*) = (1) a soldier; (2) a water-plantain (see def.), so named from the sword-like foliage.]

Bot.: Water-soldier; the typical genus *Stratiotes* (q.v.). Only known species, *Stratiotes aloides*, a stoloniferous submerged diocious herb, with the leaves, which are radical, triangular, sculeate, serrate; scape four to six inches long, compressed, twined; the perianth six-parted, white; stamina twelve or thirteen, with twenty-three or twenty-four stamens; six stigmas, as a six-celled, many-seeded, baccate fruit. Is a very ornamental plant, and occurs in Britain, especially in the fens of Norfolk and Lincolnshire. It remains under water during the greater part of the year; but appears on the surface at the time when the seeds require to be fertilized.

stra-tōō-rā-py, s. [Gr. στρατός (stratos) = an army, and κράτος (kratos) = to rule.] Military government; government by military chiefs and an army.

"Morbidly anxious for the support of a composite stratocracy and a decaying despotism."—Daily News, Nov. 10, 1888.

stra-tōg-rā-phy, s. [Gr. στρατός (stratos) = an army, and γραφή (graphē) = to write, to describe.] A description of armies or of what belongs to an army.

stra-tōm-ē-tōr, s. [Eng. strata, and meter.] An instrument for determining in what manner geological strata press upon each other. (Mayna.)

stra-tōn-ō, a. [Gr. στρατός (stratos) = an army.] Pertaining or relating to an army.

strā-tō-pē-ite, s. [Ety. doubtful.] Min.: An amorphous mineral resulting from the alteration of rhodonite, the manganese passing from protoxide to sesquioxide. Dana makes it a variety of neotcite, but it is a doubtful compound. Found with rhodonite at Filipstad, Sweden.

stra-tōt-ō, a. [Gr. στρατός (stratos) = an army.] Warlike, military.

strā-tūm (pl. strā-ta), s. [Lat. = that which is laid flat or spread out, neut. sing. of stratus, pa. par. of sterno = to strew (q.v.).] I. Ord. Lang.: A bed or layer artificially made of any material.

II. Technically:

1. Bot.: A layer of tissue.

2. Geol.: A bed or mass of matter spread out over a certain surface, in most cases by the action of water, but sometimes also by that of wind. The method in which stratification by the agency of water has been effected in bygone times may be understood by a study of the manner in which accessive layers of gravel, sand, mud, &c., are deposited in a river or running brook. The same process has been at work through untold periods of time. The greater part of the earth's crust, in nearly every land, is found to be thus stratified. Strata may be conformable (q.v.), or unconformable (q.v.). In the former case there generally is a considerable approach to parallelism among them. It is, however, inferior in exactness to that of cleavage planes.

Strata laid down by water, as a rule, retain fossil remains of the animals and plants imbedded in them when they were soft and plastic. Metamorphism generally destroys those organic remains, but leaves the stratification undisturbed; thus there are two kinds of strata—sedimentary and metamorphic—nearly synonymous with fossiliferous and non-fossiliferous stratified rocks. Most strata have a dip (q.v.) and a strike (q.v.). The fossils in most cases show whether strata are lacustrine, fluvial, or marine. They prove that deposit was very slow. One stratum may overlap another, or a stratum may thin out, or an outcrop of it may exist. As a rule, the lowest are the oldest, but some great confusion may have tilted over strata in limited areas, so that the oldest have been thrown topmost. A study of the same beds over a wide expanse of country prevents error in estimating the relative age of strata thus reversed. The thickness of the stratified rocks is believed to be about twenty miles, or 100,000 feet. They are not all present at one place, or even in one country. Though a large number are to be found in the United States, yet many foreign beds require to be inserted in the series, and even then great gaps remain, each representing a lapse of time. For the order of superposition, see Fossiliferous. [GEOLOGY.]

SEDIMENTARY STRATA. a. Mud; b. Sand; c. Pebbles. They all rest unconformably on older beds dipping at a high angle.

as if it rested on the ground. It occurs chiefly at sunset and disappears at sunrise. It is common in autumn, but rare in spring.

strācht, strāught (ch, gh guttural), v.t. [STRAIGHT, pa. t.] To stretch out; to make straight. (Scotch.)

"Hand of woman, or of man either, will never straight him."—Scott: Bride of Lammermoor, ch. xliii.

* strāught (gh guttural), pa. t. & pa. par. [STRETCH, v.]

strā-vā-dī-ūm, s. [Malabar name Latinised.] Bot.: A genus of Barringtoniaceae; calyx four-parted, ovary two-celled, fruit four-sided, ribbed. The root of Stradadium racemosum is somewhat bitter, but not unpleasant to the taste. Hindoo doctors consider it aperient, denbstruent, and cooling. The bark is supposed to possess qualities like those of Cinchona.

strā-vāig, strā-vāgue, v.i. [O. Fr. extravaguer, from Lat. extravaigo, from extra = beyond, and vago = to wander; Ital. stravagare.] To wander; to tramp about idly. (Scotch.)

strā-vāig-ēr, s. [Eng. stravag; -er.] One who wanders about idly; a tramp, a stroller, a vagabond. (Scotch.)

Bot. & Hort.: In botany, the genus Fragaria (q.v.); in horticulture, its cultivated species, spec., Fragaria vesca, of which there are wood and alpine varieties; F. elatior, the Hautbois, F. virginiana, the Virginian or Scarlet, F. grandiflora, the Pine, and F. chilensis, the Chilean Strawberry. The magnificent fruit now produced by cultivation is the outcome of American species: the Virginian, a native of the State of Virginia and neighboring states; the Pine, probably from Carolina, a species unsurpassed in flavor or texture; and the Chilean, from Chili, South America, which has yielded some of the finest varieties. The Virginian or Scarlet Strawberry has the leaves nearly smooth, dark green, of thin texture, with sharp serratures, the fruit mostly small. The Pine Strawberry has the leaves almost smooth, dark green, of firm texture, with obtuse serratures, the flower and fruit large; the latter white to nearly purple. The Chilean Strawberry has very villous or hoary leaves, with small thick leaflets, having obtuse serratures, the fruit large but insipid. All have run into varieties and sub-varieties, besides producing various

strā-tūs, s. [Lat. = a strewing, a covering.] [STRAUTUM.] Meteor.: A very large and continuous horizontal sheet of cloud, looking, in many cases,

hybrids. Strawberries are cultivated with ease in gardens, and a few plants soon spread by suckers over a considerable part of a garden, but the plants require to be renewed from time to time. The strawberry is an exceedingly wholesome article of food. Eaten alone or with sugar and cream it is easily digested, and does not become acid in the stomach. It promotes perspiration, and is refrigerating, has some effect on the gonit and the stone, and is not without influence in pulmonary consumption.

¶ *Barren strawberry* is a book name for *Potentilla Fragariastrum*.

strawberry-blite, s.

ströngth, * strengthé, s. [A.S. *strengþu*, from *strang* = strong (q.v.).]

I. Ordinary Language:

1. That property, attribute, or quality of an animal body, by which it is enabled to move itself or other things. The strength of animals is the muscular force or energy which they are capable of exerting. For the purpose of comparing the strength or the effects produced by the energy exerted by different animals, or by the same animal under different circumstances, it is usual to assume as a dynamic unit the force required to raise one pound of weight through one foot of space in one minute of time. [HORSE-POWER.]

"But their lot had fallen on a time when men had discovered that the strength of the muscles is far inferior to the strength of the mind."
Macaulay: Hist. Eng., ch. xz.

2. The quality or property of bodies by which they sustain the application of force without breaking or giving way; solidity, toughness, tenacity. The strength of a body is tested by forces acting in different ways: thus a body may be torn asunder by a tensile or stretching force, or by a direct pull in the direction of its fibres, as in the case of a rope, &c.; or it may be broken across by a transverse strain, crushed by a pressure exerted in the direction of its length, twisted, shorn across, &c.

3. Force proceeding from motion, and proportioned to it.

4. Power of resisting attacks.

"Our castle's strength will laugh a siege to scorn."
Shaksp.: Macbeth, v. 5.

5. Power or vigour of any kind; ability to do or hear; capacity of exertion, intellectual, moral, or physical.

"Though she was a woman of great strength of mind."
Macaulay: Hist. Eng., ch. v.

6. Force as measured or stated in figures; amount or numbers of any body, as of an army, a fleet, or the like.

"To decry the strength of the enemy."
Shaksp.: Lear, iv. 2.

* 7. Hence, an armed force; a body of troops; an army.

"Discover your united strengths."
Shaksp.: King John, II. 1.

8. One who or that which constitutes or is regarded as embodying force, strength, or firmness; a person or thing on which reliance or confidence is placed; support, security.

"God is our refuge and strength."
Psalm xli. 1.

* 9. A fortification, a stronghold, a fortress.

"This inaccessible high strength . . . He trusted to have seized."
Milton: P.L., vii. 141.

10. That quality which produces or tends to produce results; the effective power in an institution, established custom, or the like; legal or moral force; binding, constraining, or influencing force or power; force, efficiency, weight, influence.

"With all religious strength of sacred vows."
Shaksp.: King John, III. 1.

11. Intensity or degree of potency of the distinguishing or essential element or constituent; the quality or property of producing sensible effects on other bodies. (Said of liquors and the like.)

12. Force or power in the expression of meaning in words; vigour of style; nervous diction or style; the quality or power of fully and forcibly expressing idea.

"And praise the easy vigour of a line, Where Deunham's strength and Waller's sweetness join."
Pope: Essay on Criticism, 361.

13. Vividness, intensity, brilliance, brightness.

"His countenance was as the sun shineth in his strength."
Revelation, I. 16.

* 14. High degree, vehemence, force.

"You would abate the strength of your displeasure."
Shaksp.: Merchant of Venice, v.

ból, bóy; pót, jówl; cat, cöll, chorus, chin, bēgh; go, gem; thín, thís; sin, ag; expect, Xenophon, exist. -íng. -cian, -cian = shün. -tion, -cion = shün. -cion, -cion = shün. -cion, -cion = shün. -ble, -die, &c. = bel, del.

II. Art: Boldness of conception or treatment.

"Carace's strength, Coreggio's softer line."
Pope: Epistles, III. 37.

¶ On (or upon) the strength of: In reliance on; on the faith of; in dependence on.

"The allies, after a successful summer, are too apt upon the strength of it, to neglect their preparations for the ensuing campaign."—Addison.

* strength, v. t. [STRENGTH, s.] To strengthen.

"Hath he not made me in the Pope's defence
To speed the treasure that should strength my land?"
Marlowe: Massacre at Paris, III. 2.

* strengthened, a. [Eng. strength; -ed.] Endowed with strength.

"And his arms and legs well lengthed and strengthened."—Fabyan: Chronicles, ch. ciii.

strengthen'-en, v. t. & i. [Eng. strength; -en.]

A. Transitive:

1. To make strong or stronger; to give greater strength to physically, legally, or morally; to confirm, to establish.

"Entreatings them to come up without delay to London, and to strengthen the hands of their metropolitan at this conjuncture."—Macaulay: Hist. Eng., ch. viii.

* 2. To animate, to encourage.

"Charge Joshua, and encourage him, and strengthen him."—Deut. III. 28.

* 3. To make stronger or greater; to add intensity to; to intensify.

"To strengthen that impatience."
Shakespeare: Julius Cæsar, II. 1.

* 4. To cause to increase in power, authority, or security.

"Let noble Warwick, Cothman, and the rest . . .
With powerful policy strengthen themselves."
Shakespeare: Henry VI., I. 2.

B. Intrans. : To grow or become strong or stronger; to increase in strength.

"The young disease that must subside at length
Grows with his growth, and strengthens with his strength."
Pope: Essay on Man, II. 135.

¶ Whatever adds to the strength, be it in ever so small a degree, strengthens; exercise strengthens either body or mind: whatever gives strength for a particular emergence fortifies; religion fortifies the mind against adversity: whatever adds to the strength, so as to give a positive degree of strength, invigorates; morning exercise in fine weather invigorates.

strengthen'-en-er, *strengthen'-ner, s. [Eng. strengthen; -er.]

One who or that which strengthens; one who or that which adds or increases strength, moral or physical; specific, in medicine, something which, when taken into the system, increases vital energy and confirms the stamina.

7. Strikes have become of increasing frequency and extent during recent years, as workmen have become more thoroughly organized, and are often attended with a violence that renders military interposition necessary.

Of strikes of this character the first of great importance was the railroad strike of 1877, during which immense damage was done in the city of Pittsburgh and elsewhere. The depression of business in 1894 was signalized by two strikes of great dimensions, one by the coal-miners for an advance of wages, and one of a different character by railroad employes.

The great strike of the Philadelphia street-railway employes in December, 1895, although warmly supported by the public and amicably adjusted in January, 1896, through the intervention of a volunteer committee made up of prominent citizens, did not result in any apparent benefit to the strikers.

strix, s. [Lat., from Gr. στρίξ (strix) = στρίγξ (strigx) = an owl, lit., the screecher, from στρίξω (stríxō, stríxō) = to screech, to scream.]

Ornithology:

*1. A genus founded by Linnæus, containing all the owls known to him. This genus was divided by Brisson, who made *Strix stridula* (Linn.), the Tawny Owl the *Syrnium aluco* of some authors, the type of his genus Strix [S], and the *S. otus* (Linn.), the type of a new genus, Asio. (*Ibis*, 1876, p. 94-104.)

†2. A genus founded by Savigny, with *S. Ammaea* (Linn.), the Screech Owl, as its type. Fleming gave to this bird the generic name Aluco (Latinised from Ital. *alucio*, probably by Gaza, the translator of Aristotle, 1508), and defined it thus: Beak straight at base, decurved towards point; nostrils oval, oblique; facial disc large and complete, narrowing rapidly below the eyes towards the beak; auditory opening square, large, furnished with a large, nearly rectangular operculum; wings long and ample; tail shortish; legs long and slender, clothed with downy feathers to the origin of the toes; hind toe reversible; head smooth, not furnished with tufts. Very many anthers, however, still retain the name Strix. This genus is the type of the Alucine section, in which the hinder margin of the sternum is entire or slightly sinuated, the keel united with the furcula, and the manubrial process absent; the beak in all is straight at the base, and the claw of the middle toe serrated on the inner edge.

3. According to Brisson, and the modern taxonomists, a genus of Strigidae, with several species, widely distributed. Bill decurved from the base; nostrils large; facial disk large and complete; ears large and furnished in front with a large, crescentic operculum, broad below, tapering above; wings short and rounded; tail long, concave behind; legs and toes feathered; head large, round, and without tufts. The genus is the type of the Strigine section, in which the hinder margin of the sternum is characterized by two or four more or less deep clefts. This section may be further sub-divided into owls which do, and owls which do not possess an operculum.

"Dunsinane be strongly fortified." *Shakep.*: *Macbeth*, v. 2.

5. To a high degree; greatly, much, violently.

"'Twill strike him strongly." *Shakep.*: *Henry VIII*, III. 2.

6. Vehemently, forcibly, eagerly; with energy or earnestness.

7. In large numbers.

strön-gyile, *s.* [STRONGYLUS.] Any individual of the family Strongylidæ (q.v.)

strön-gyl'i-dæ, *s. pl.* [Mod. Lat. *strongylus*]; Lat. fem. pl. adj. suff. *-idæ*.

Zool.: A family of Nematodea (q.v.). Body round, sometimes much elongated and filiform; mouth round, oval, or triangular, frequently very large, naked or armed with a horny pharyngeal armature; tail of male furnished with a bursa, usually emitting two apicules; in some the bursa is replaced by two divergent membranous lobes. Cobbold (*Entozoa*, p. 83) enumerates the following genera: Strongylus, Eustrongylus, Sclerostoma (= Syngamus), Dochnius, Prostehecoster, Stenurus, Diaphanocephalus, Stepianurus, Deletocephalus, and Dicrotcephalus. [SCLEROSTOMA.]

strön-gyl-lüs, *s.* [Gr. *στρογγύλος* (*strongylos*) = round, rounded.]

Zool.: The type-genus of Strongylidæ (q.v.), with the chief characters of the family. The number of species has been variously estimated by different authorities. *Strongylus bronchialis* (the female an inch long, the male half that size) infests the bronchial glands in man. *S. (Eustrongylus) gigas*, is the largest known ento-parasite, the male measuring from ten inches to a foot in length, the female attaining a length of over three feet; it attacks man and the lower animals. *S. micrurus* infests the calf, *S. confertus* the sheep, and *S. armatus* the horse. *S. quadridentatus* = *Sclerostoma duodenale*. [SCLEROSTOMA.]

strön-ti-a (ti as shi), *s.* [STRONTIAN.]

Chem.: [STRONTIUM-OXIDE.]

strön-ti-an (ti as shi), *s. & a.* [After Strontian, Argyleshire, where first found.]

A. As subst.: A name sometimes given to Strontia.

B. As adj.: Pertaining to strontia; consisting of strontia.

strontian-yellow, *s.* A solution of strontia, added to chromate of potash. It is pale canary, and is a permanent colour.

strön-ti-an-ite (ti as shi), *s.* Eng. *strontian*; suff. *-ite* (Min.); Fr. *strontiane carbonatée*; Ger. *strontianit*, *strontian.*

Min.: An orthorhombic mineral belonging to the group of anhydrous carbonates. Hardness, 3.5 to 4; sp. gr. 3.605 to 3.713; lustre, vitreous; colour, white, gray, yellowish, shade of green occasionally; transparent to translucent; brittle. Compos.: carbonic acid, 29.8; strontia, 70.2 = 100, which corresponds with the formula SrCO₂.

strön-ti-än-ö-cäl-çite (ti as shi), *s.* [Eng. *strontian*; *a* connect., and *calcite*.]

Min.: A variety of calcite in which a part of the calcium is replaced by strontium.

***strön-ti-täg**, *s.* [Eng. *strontian*]; *-ites*.]

Chem.: The name given by Hope to the metallic element afterwards named Strontia (q.v.), by Klaproth.

strön-tit-jo, *a.* [Eng. *stront(ites)*; *-itic*.] Pertaining to strontia, or strontium.

strön-ti-üm (or ti as shi), *s.* [Latinized from *strontian* (q.v.).]

Chem.: A diad metallic element, symb. Sr, at. wt., 87.6, sp. gr. 2.5418; discovered by Crawford in 1787, in the native carbonate of strontium, and obtained in the metallic state by Davy in 1808. It is now easily obtained by the electrolysis of the fused chloride, or by fusing the chloride with an alloy of sodium and lead. It has a yellow colour like that of calcium, and acts similarly to it when heated in chlorine, oxygen &c., or when thrown on water. The salts of strontium colour the blowpipe flame a carmine red.

† Strontium-carbonate = *strontianite*; strontium-sulphate = *celestite*.

strontium-bromide, *s.*

Chem.: SrBr₂. Prepared by heating a solution of the carbonate in hydrobromic acid. It separates from its aqueous solution in long needles containing three molecules of water, is slightly soluble in alcohol, easily in water.

strontium-chloride, *s.*

Chem.: SrCl₂. Produced by heating anhydrous strontia in a stream of chlorine. It crystallizes from water in deliquescent needles or prisms, which dissolve easily in water and but slightly in alcohol.

strontium-hydrate, *s.*

Chem.: SrH₂O₂ = Sr⁺O.H₂O. A crystalline compound produced by the direct union of water with strontium oxide. It has a great attraction for carbonic acid.

strontium-nitrate, *s.*

Chem.: Sr(NO₃)₂. Prepared by dissolving the native carbonate in nitric acid, filtering the solution and evaporating until a pellicle begins to form on the surface. It crystallizes in anhydrous octahedrons; slightly soluble in cold, very soluble in boiling water. Chiefly used in the preparation of red fire (q.v.).

strontium-oxide, *s.*

Chem.: SrO. Strontia. Prepared by heating strontium nitrate to redness. It is a grayish-white, porous mass, having an alkaline taste and reaction; sp. gr., 3-4, infusible and not volatile. When moistened with water it behaves like lime, becoming hot and crumbling to a powder.

***strook**, ***stroke**, *pret. of v.* [STRIKE, *v.*]

***strööt**, *v. i.* [STRUT, *v.*] To swell out, to strut. (*Chapman*.)

ströp (1), *s.* [The older form of *strap* (q.v.).] A strap; specif., a razor-strap.

ströp (2), *s.* [O. Fr. *strophe* = the loop whereby the oar of a skiff hangs to the thowle (*Colgrave*); Fr. *étrepe*, *estropée* = a strop, from Lat. *stropus*, *struppus* = a band.]

1. *Naut.*: A rope applied into a circular form to seize around a block for hanging it.

2. *Rope-making*: A rope with an eye at each end, used in twisting strands.

ströp, *v. t.* [STROP (1), *s.*] To sharpen with or on a strop.

"Strapping a razor appears a very simple affair." —*Field*, March 19, 1887.

strö-phë, *s.* [Gr. = a turning.]

1. *Gr. Drama*: The turning of the chorus from the right to the left of the orchestra, the return being the *antistrophe*; the part of a choral ode sung during the act of so turning; hence, in ancient lyric poetry, a term for the former of two corresponding stanzas, the latter being the *antistrophe*. The term is sometimes used in relation to modern poetry.

2. *Bot.*: The spirals formed in the development of leaves.

strö-phic, *a.* [Eng. *strop*(*ic*); *-ic*.] Relating to or consisting of strophes.

strö-phi-ö-la, *s.* [STROPHOLE.]

strö-phi-ö-läte, **strö-phi-ö-lät-öd**, *a.* [Eng. *strophial*(*ic*); suff. *-ate*, *-ated*.]

Bot.: Surrounded by protuberances.

strö-phi-öle, ***strö-phi-ö-la**, *s.* [Lat. *strophionem* = a small wreath or chaplet, dimin. from *strophium*; Gr. *στροφίον* (*strophion*) = a bend, stay, or stomacher.]

Bot.: A tubercle surrounding the hilum of some seeds. It proceeds from the testa, independent of the micropyle, or funicula. Example, *Viola*. Called also a Caruncle.

ströph-ö-düs, *s.* [Gr. *στροφός* (*strophos*) = a twisted band, and *δούς* (*odous*) = a tooth.]

Ichthy.: A genus of Cestraciontida, ranging from the Lower Liass to the Chalk.

strö-phöm-ö-na, *s.* Gr. *στροφός* (*strophos*) = a twisted band or cord, and *μήνη* (*mēnē*) = the moon.]

Palæont.: A genus of Orthidæ; shell semi-circular, widest at the hinge line; concave-convex radiately streaked; ventral valve with an angular notch. Known species, 129; from the Lower Silurian to the Carboniferous.

† **ströph-ö-mön'-y-dæ**, *s. pl.* [Mod. Lat. *strophomena*(*a*); fem. pl. adj. suff. *-idæ*.]

Palæont.: A synonym of Orthidæ (q.v.).

ströph'-n-lüs, *s.* [Dimin. from Lat. *strophus*; Gr. *στροφός* (*strophos*) = a twisted band.]

Pathol.: Redgum, Tooth-rash; an eruption of minute hard, slightly red pimples, clustered and scattered, affecting infants or young children. The largest number of pimples are on the face and the neck. It arises from irritation of the stomach, and has been supposed by some to be lichen modified by the delicate skin of the infant affected. The irritation is slight, and the disease not dangerous. Unimportant variations have led to the establishment of the species *Strophulus intertinctus*, *S. confertus*, *S. candidus*, and *S. volucius*.

***ströss-örs**, *s. pl.* [A corrupt of *trousers* (q.v.).] Tight drawers or breeches.

"The Italian coarse strosser, nor the French standing collar." —*Decker*: *Gull's Hornbook*.

ströud, *s.* [Etym. doubtful; perhaps from Stroud, in Gloucestershire, where flannel and cloth are manufactured in large quantities.] A kind of coarse blanket or garment of strouding worn by the Indians of North America.

ströud-äng, *s.* [STROUD.]

Fabric: A coarse kind of cloth employed in the trade with the North American Indians; materials for strouds.

***ströüt**, ***stroute**, ***strowt-yn**, *v. i. & t.* [STRUT, *v.*]

A. Intransitive:

1. To swell, to puff.

"His here strutted as a fanne large and brode." *Chaucer*: *C. T.*, 3, 318.

2. To strut.

3. To make a disturbance; to brag. (*Havelok*, I, 770.)

B. Trans.: To swell; to puff out; to exaggerate.

"An historical truth, no way strutted, nor made greater by language." —*Bacon*: *Wars with Spain*.

ströve, *pret. of v.* [STRIVE, *v.*]

***ströw**, *a.* [STROW, *v.*] Loose, scattered.

ströw, *v. t.* [STREW.] To strew, to scatter.

"With olives ever green the ground is strowed." *Dryden*: *Ovid*; *Metamorphoses* VIII.

***ströwl**, *v. i.* [STROLL, *v.*]

***ströy**, ***strole**, *v. t.* [A contract of *destroy* (q.v.).] To destroy.

"Her store was stroyed with the flood." *Wyat*: *Meane & Sure Estate*.

***ströy-äl**, *s.* [Eng. *stroy*; *-all*.] A wasteful, a spendthrift. (*Tusser*.)

***ströy-ër**, ***ströl-ër**, *s.* [Eng. *stroy*; *-er*.] A destroyer.

"The drake, stroyer of his owne kinde." *Chaucer*: *Assembly of Foules*.

strück, *pret. & pa. par. of v.* [STRIKE, *v.*]

struck-measure, *s.* A measure, as of dry goods, in which the top is levelled with a strike. [STRIKE, *s.*, II. 1.]

strück-en, *pa. par. of v.* [STRIKE, *v.*]

strück-tu-ral, *a.* [Eng. *structure*(*c*); *-al*.] Pertaining to structure.

structural-planes, *s. pl.*

Geol.: Planes produced in the structure of rocks, either on a large scale by faulting, or on a small one by fissure or lamination.

böil, böy; pöüt, jöwi; cat, çell, chorus, çhîn, beuç; go, çem; thin, this; sin, aç; expect, Xenophon, exist, ph = ç -cian, -tian = şhan. -tion, -sion = şhün; -çion, -çion = zhün. -cious, -tiuous, -siuous = şhün. -dle, -çle, çc. = beç, deç.

strūc-ture, s. [Fr., from Lat. *structura* = a building; prop. fem. sing. of *structus*, fut. part. of *struo* = to build; cogn. with Goth. *strujan*; Ger. *streuen* = to strew, to lay.] [SREW.]

* 1. The act of building; construction or erection of buildings.

"He can build on, and never is content,
Till the last farthing is in structure spent."
Dryden. (Toad.)

2. A building of any kind; more especially, a building of some considerable size or pretensions; an edifice.

"One of those petty structures."
Wordsworth: *Excursion*, bk. II.

3. Manner of building or construction; form, make, construction.

"Seneca describes his baths to have been so mean a structure."
Cowley: *Essays*; *Solitude*.

* 4. Figure, outline, form.

"An idol that Iphimida did present
In structure of her every lineament."
Chapman: *Homer*; *Odyssey* iv.

5. The arrangement of the parts in a whole, as of the elements of a sentence or paragraph; the arrangement of the constituent particles of any substance or body.

"Insight into the structure and constitution of the terraqueous globe."
Woodward.

6. Manner of organization; the manner in which the different organs or parts, as of animals or vegetables, are arranged.

¶ *Structure of rocks:*

Min. & Petrol.: The arrangement of the granules in a mineral or rock.

strūc-tured, a. [Eng. *structur(e)*; -ed.] Having a regular organic structure.

strūc-ture-lōss, a. [Eng. *structure*; -less.] Devoid of structure.

"Myriads of darting dots of structureless jelly seem to be glancing about."
Scribner's *Magazine*, June, 1877, p. 159.

* **strūc-tū-rist, s.** [Eng. *structur(e)*; -ist.] One who makes structures; a builder, a constructor.

* **strūde, *strode, s.** [Ety. doubtful.] A stock of breeding mares; a stud. (Bailey.)

strūg-gle, *strog-el, *strog-eil, *strog-goll, *strogle, *strug-gel, *strugle, v.t. [Ety. doubtful. According to Skeat Mid. Eng. *strugelen* is a softened form of *strokelen*, a frequent. from *strike* (q.v.).]

1. To make efforts with a twisting or with movements of the body.

"Struggling in blood the savage lies."
Scott: *Cadyne Castle*.

2. To make great efforts; to labour hard; to strive with effort.

"She struggleth and striveth to get up and to break loose in vain."
Tindall: *Works*, p. 185.

3. To labour in pain, anguish, difficulty, or distress; to be in pain or agony.

4. To contend, to vie.

"The sunbeams sought the Court of Guard,
And, struggling with the smoky air,
Deadened the torches' yellow glare."
Scott: *Lady of the Lake*, v. 2.

strūg-gle, s. [STROUGGLE, v.]

1. A violent effort or series of efforts with contortions of the body; agonized effort; agony.

"The uneasy struggles of a man fast bound and fettered."
Waterland: *Works*, iv. 54.

2. A forcible and strong effort to obtain an object or to avert an evil; an effort.

"This came a desperate struggle for a tremendous stake."
Macaulay: *Hist. Eng.*, ch. vi.

3. Contest, contention, strife; as, a struggle between troops.

¶ *Struggle for existence:*

Biol.: A term introduced by Darwin to signify the result of the increase of animal life in a greater ratio than the means of subsistence.

"All organic beings, without exception, tend to increase at so high a ratio, that, no district, no station, not even the whole surface of the land or the whole ocean, would hold the progeny of a single pair after a certain number of generations. The inevitable result is an ever-recurring struggle for existence."
Darwin: *Variation of Animals & Plants*, I. 5.

strūg-glēr, s. [Eng. *struggl(e)*, v.; -er.] One who struggles, strives, or contends.

"Often she cast a kind admiring glance
On the bold struggler for delight."
Buckinghamshire: *Ode on Struthia*.

strūll, s. [Ety. doubtful.] A bar so placed as to resist weight.

strūm, v.t. & i. [A word of imitative origin.]

A. Transitive:

1. To play, as on a stringed instrument, noisily and unskilfully.

"The ability to strum a few airs on the piano."
Daily Telegraph, April 1, 1884.

2. To affect, by playing noisily and unskilfully on a stringed instrument.

"To strum my father to sleep after a fox-chase."
Sheridan: *School for Scandal*, II. 1.

B. Intrans.: To play noisily and unskilfully on a stringed instrument; to thrum.

strū-mæ (pl. **strū-mæe**), s. [Lat. = a scrofulous tumour.]

1. Botany:

(1) A swelling or protuberance where the petiole meets the lamina of a leaf, as in *Mimosa sensitiva*.

(2) A dilatation or swelling on one side at the base of the sporangia of some mosses.

2. *Pathol.*: External acrofolia, attended by glandular swellings, extensive ulcerations, and indolent abscesses. Called also King's evil and *tubercle glandularis*.

strū-māt-ic, a. [STRUMA.] The same as STRUMOE (q.v.).

strū-mī-form, a. [Lat. *struma*, and *forma* = form.] Having the form or appearance of a struma.

strūm-mīng, pr. par., a., & s. [STRUM.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act of one who strums.

2. The noise made by one who strums.

"Guitars and every other sort of strumming."
Byron: *Beppo*, II.

strū-mōse, strū-mōis, a. [STRUMA.]

1. *Bot.*: Covered with protuberances.

2. *Pathol.*: Scrofulous. There are *strumous* abscesses, a *strumous* diathesis, &c.

strū-mōis-ness, s. [Eng. *strumous*; -ness.] The quality or state of being strumous.

strūm-pēt, *strom-pet, *strom-pett, *strum-pete, s. & a. [A nasalized form from O. Fr. *strupe*, *stupre*; Lat. *stuprum* = dishonour, violation; cf. Ital. *strappare*, *stuprare*; Sw. *estrupar*, *estuprar* = to ravish.]

A. As subst.: A prostitute, a harlot.

"I ain no strumpet; but of life as honest,
As you that thus abuse me."
Shakespeare: *Othello*, v. 1.

B. As adj.: Like a strumpet; false, inconstant.

"The strumpet wind."
Shakespeare: *Merchant of Venice*, II. 6.

* **strūm-pēt, v.t.** [STRUMPET, s.]

1. To debauch. (Shakespeare: *Comedy of Errors*, II. 2.)

2. To call or give the reputation of a strumpet to; hence, to belie, to slander.

"Penthea, poor Penthea's name is strumpeted."
Ford: *Broken Heart*, IV. 2.

* **strūm-strūm, s.** [A redup. of *strum* (q.v).] A rude musical instrument, a tontom.

"The *strumstrum* is made somewhat like a cittern: most of those that the Indians use are made of a large gourd cut in the midst, and a thin board laid over the hollow, and which is fastened to the sides; this serves for the belly, over which the strings are placed."
Dampier: *Voyages* (vol. 1883).

strū-mū-lōse, a. [A dimin. of *strumous* (q.v).]

Bot.: Furnished with small struma.

strūng, pret. & pa. par. [STRING, v.]

strūnt, v.t. [A nasalized form of *strut* (q.v).]

To walk sturdily or pompously; to strut. (Scotch.)

strūnt, s. [Ety. doubtful.]

1. Spirituous liquor of any kind. (Scotch.)

"Syne, wif a social glass o' strunt,
They parted aff careerin'."
Burns: *Ballouven*.

2. A huñ, a pet; silliness.

strūn-tain, s. [Ety. doubtful.]

Fabric.: A coarse, narrow, worsted braid.

strū-sō, s. [Rusa.]

Naut.: A river-craft of Russia for carrying produce and goods.

strūt, *strout, *strowt-yn, v.t. [Dan. *strutte*, *strude* = to strut; Sw. dial. *strutta* = to walk with a jolting step; Icel. *strutt* = a sort of hood sticking out like a horn; Ger. *strutt* = rigid, stiff; *strauss* = a tuft, a bunch; *strutzen* = to be puffed up, to strut.]

* 1. To swell out, to protuberate.

"Of grass the only silk
That makes each under strut abundantly with milk."
Dryden: *Poly-Oibion*, s. 12.

2. To walk with a proud, pompous gait and erect head; to walk with affected dignity.

"A fellow strutting before her with nothing but a club or spear."
Cook: *Second Voyages*, bk. III, ch. vi.

strūt, s. & a. [STRUT, v.]

A. As substantive:

1. *Ord. Lang.*: A proud, pompous step with the head erect; an affectation of dignity in walking.

"That herole strutted assur'd before."
Copper: *Conversation*, 490.

2. *Carp.*: A bar in a frame having equal and opposite forces applied to its ends, acting inward and producing upon it a state of compression. Specifically—

(1) A diagonal timber which acts as a post or brace to support a principal rafter or purlin. Its lower end is stepped into a tie-beam, or on a shoulder of a king or queen post.

(2) A brace between joists.

B. As adj.: Swelling out, awollen, protuberant.

"He begetteth now to return with his belly strut and full."
P. Holland: *Ammianus Marcellinus*, p. 513.

* **strut-beam, s.** [STUTTING-BEAM.]

strū-thī-ō, s. [Lat., from Gr. *στρούθιος* (*strouthios*) = a sparrow, an ostrich.]

Ornith.: Gstrich; the typical genus of Struthionidae, having only two toes, the third and fourth on each foot. Most authorities reckon but one species, *Struthio camelus*; but as the birds from the north of Africa have the skin of the parts not covered with feathers flesh-coloured, while this skin is bluish in birds from the south, the latter are sometimes placed in a separate species (*S. australis*). Birds from the Somali country have also been described as forming a distinct species (*S. molybdophanes*), because the skin not covered with feathers is of a leaden hue.

strū-thī-ō-lā, s. [Mod. Lat., from *struthio* (q.v).] Named from the resemblance of the seeds to a bird's beak.]

Bot.: A genus of Thymelaeaceae, from the Cape of Good Hope. Pretty plants, with white, yellow, or red flowers, having four stamens.

strū-thī-ō-lār-ī-a, s. [Mod. Lat., from Lat. *struthio* (q.v).] The aperture of the shell bears some resemblance to the foot of an ostrich.]

Zool.: A genus of Certhiidae, with five species, from Australia and New Zealand, where sub-fossil specimens have been found. Shell turreted, whorls angular, aperture truncated in front, columella oblique; outer lip prominent in the middle, inner lip callous, expanded; operculum claw-shaped. Animal with cylindrical tentacles, eye-pedicles short, foot broad and short.

strū-thī-ō-nēs, s. pl. [Pl. of Mod. Lat., &c. *struthio* (q.v).]

Ornith.: A synonym of *Ratitae* (q.v).

strū-thī-ōn-ī-dae, s. pl. [Mod. Lat. *struthio*, genit. *struthion(is)*; Lat. fem. pl. adj. suff. -idae.]

Ornith.: A family of *Ratitae* (q.v.). Bill short, robust, powerful, flattened, and having a nail-like process at the tip; nostrils longitudinal, basal; no hoid toe present. There are two sub-families: Struthioninae (with two genera, *Struthio* and *Rhea*) confined to Africa, and temperate South America, and Casuarinae (sometimes made a family Casuaridae) inhabiting Australis and the Islands from Cérson to New Britain.

strū-thī-ō-nī-næ, s. pl. [Mod. Lat. *struthio*, genit. *struthion(is)*; Lat. fem. pl. adj. suff. -inae.] [STRUTHIONIDÆ.]

fāte, fāt, fare, amidst, whāt, fāll, father; wō, wēt, hērs, campl, hēr, thērs; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, oūb, cūre, quite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

strú-thí-óus, a. [Lat. struthio = an ostrich.] Pertaining to or resembling the ostrich; belonging to the Rallia (q.v.).

"Gallinaceous and struthious birds retain the same stones in their gizzards for a long time."—Darwin: Formation of Vegetable Mould, ch. v.

strút-ter, s. [Eng. strut, v.; -er.] One who struts; a pompous fellow.

"What a mere nothing it is, that this strutter has pronounced with such sonorous rhetoric."—Anot. on Glanville's Predestination.

strút-ting, pr. par., a., & s. [STAUT, v.] A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive: Carp.: Diagonal braces between joists to prevent side deflection. When the pieces are crossed alternately it is called herring-bone strutting.

*strutting-beam, *strut-beam, s. Carp.: An old name for a collar-beam (q.v.).

strutting-piece, s. Carp.: A straining-piece (q.v.).

strút-ting-ly, adv. [Eng. strutting; -ly.] In a strutting manner; with proud or pompous walk; pompously, boastfully.

strúv-ite, s. [After the Russian statesman, V. Struve; suff. -ite (Min.).]

Min.: An orthorhombic mineral occurring only in isolated crystals. Hardness, 2.0; sp. gr. 1.65 to 1.7; colour, yellowish to brown, becoming white on exposure, by loss of water of crystallization; lustre, vitreous; translucent. Compos.: phosphoric acid, 29.0; magnesia, 16.3; ammonia, 10.6; water, 44.1 = 100, corresponding to the formula NH₄O, 2MgO, PO₅ + 12H₂O. Found originally in a bed of peat, above which a large amount of carbonic dung existed; since found in guano at various localities.

strých'-nô-æ, strých-nâ'-çê-æ, s. pl. [Mod. Lat. strychn(o)s; Lat. fem. pl. adj. suff. -æ, -acæ.]

Bot.: A tribe of Loganiaceæ, having the æstivation of the corolla valvate.

strých'-ní-æ, s. [STRYCHNINE.]

strých'-nío, a. [Eng. strychnine; -ic.] Of, pertaining to, containing, or derived from strychnine.

strychnic-acid, s. [IOSTRYCHNIC ACID.]

istrých-ní'-na, s. [STRYCHNINE.]

strých'-níne, s. [Mod. Lat. strychn(o)s; -ine (Chem.).]

Chem.: C₂₁H₂₂N₂O₂. Strychnia. A highly poisonous alkaloid, discovered in 1818 by Pelletier and Caventou in St. Ignatius' beans, and shortly afterwards in Nux vomica seeds. It is obtained, together with brucine, by boiling Nux vomica seeds in dilute sulphuric acid until they become soft, crushing the seeds, and adding to the expressed liquid an excess of calcium hydrate, which throws down the two alkaloids. On washing with cold alcohol, brucine is dissolved, leaving strychnine in an impure state. When pure, it crystallizes in colourless, tetragonal prisms, having a very bitter and somewhat metallic taste, is almost insoluble in water, absolute alcohol, and ether, but soluble in spirit of wine and chloroform. Strychnine was scarcely heard of as a means of poisoning before the year 1855, the date of the Rugeley murders, for which Palmer was tried at the Old Bailey in 1856, and executed. The symptoms are very marked, and comprise violent tetanic convulsions, laborious respiration, from the tightening of the chest muscles, spasmodic contraction of the heart, and rigidity of the spinal column. These are succeeded by a short calm, after which they are again repeated until death or progress towards recovery ensues, the time being about two hours after taking the poison. From 14 to 2 grains and upwards generally prove fatal, and the presence of the poison can be best recognised by the colour-test. When strychnine is brought under the influence of nascent oxygen, the former instantly acquires a rich blue colour, successively passing into purple, violet, crimson, orange, and yellow. (Woodman & Tidy.)

strých'-nôs, s. [Lat., from Gr. στρύχνος (strychnos) = nightshade.]

Bot.: The typical genus of Strychnææ.

Calyx five-parted; corolla tubular, funnel-shaped, limb spreading; stamens five, inserted into the throat of the corolla; ovary two-celled; style one; stigma capitate; fruit, a berry with a hard rind and a pulpy sarcocarp; seeds many, peltate. Natives of Asia, America, and Australia. *Strychnos Nux Vomica*, the Snake-wood, Strychnin-tree, or Nux Vomica tree, is a moderate-sized evergreen, with dark gray bark and no spines; the leaves entire, strongly three- to five-nerved; the flowers small, in corymbs, greenish white; the fruit round, like an orange in colour, but smaller, with a brittle rind, a white, gelatinous pulp, and many seeds. It is found on hills and in forests in India and Borneo. The seeds, which are about the size and shape of a halfpenny, constitute Nuxvomica and contain strychnine (q.v.), and, it is said, a brown dye. The wood is very bitter, especially the root, which has been given in intermittent fevers and as an antidote to the bites of venomous serpents. *S. potatorum*, a tree about forty feet high, with only one seed, is the Clearing-nut tree of India; so called because the seeds render muddy water clear. They are used also in diseases of the eye. The fruit, which is like a black cherry, is eaten by the natives; the wood is used for carts, agricultural implements, and building. *S. toxifera*, the Gulana Poison-plant, is a climber, having its stem covered with long, spreading, red hairs, and five-nerved, acuminate leaves. It furnishes the chief ingredient of the poison called Woorari, or Goral. *S. Tseute*, from Java, has elliptical, scuminate, three-nerved, glabrous leaves, with simple tendrils opposite to them. It yields another deadly poison. *S. ligustrina* is said by Blume to furnish the genuine *Lignum colubrinum*. It is given in Java in paralysis of the lower extremities and as an antineurotic. *S. pseudoquina*, a Brazilian tree about twelve feet high, has a corky bark (said to be equal to Cinchona as a febrifuge), and short-stalked, ovate, quincuple-nerved leaves; all parts of it are intensely bitter except the fruit, which is eaten by children. The fruit of *S. colubrina*, a large Indian climbing shrub, is esteemed by the Telegus as an antidote to the bite of the cobra. The fruit of *S. innocua* is eaten in Egypt.

*stry-full, *stry-ful, a. [STRIFEFUL.]

strých-nô-dên'-drôn, s. [Gr. στρυφνός (stryphnos) = rough, astringent, and δένδρον (dendron) = a tree.]

stüc-cö, *s.* [Ital., from O. H. Ger. *stucco* = a crust.]

1. Fine plaster used for coating walls. It is usually made of pure lime slaked and settled, mixed with clean sand. Stucco varies in quality and composition with the purpose for which it is intended. For internal decoration gypsum and pounded marble enter into its composition, as well as gelatine or glue in solution. Being mixed with water till it is of the proper consistency, it is applied to the cornices, mouldings, &c., of rooms, and soon begins to set or harden, in which state it is moulded, and is finished off with metal tools. For external work the stucco employed is of a coarser kind, and is variously prepared, the different sorts being generally distinguished by the name of cements. Some of these take a surface and polish almost equal to that of the finest marble. In Bastard stucco a small portion of hair is employed. Rough stucco is merely floated and brushed with water, but the best kind is trowelled.

"Grottesco roofs, and stucco floors."
Pope: Imitation of Horace, sat. 6.

1. **Animal Pathol.**: A disease in sheep, marked by a disposition to stagger, sit on the rump, turn toward one side, stupor, &c. It is caused by the presence within the brain of the immature embryo of a species of tapeworm (CENURUS), varying in size from that of a pea to that of a pigeon's egg. It generally attacks young sheep under two years old, and is seldom cured.

2. **Bot.**: *Lolium temulentum*, Darnel grass, which was formerly believed to produce staggers in the sheep feeding upon it.

stūr-geōn, s. [O. Fr. *esturgeon*, *estourgeon*, from *sturionem*, accus. of Low Lat. *sturio* = a sturgeon, from O. H. Ger. *sturo*, *sturjo* (M. H. Ger. *stūr*; Ger. *stūr*) = a sturgeon = lit. a stirrer, from its habits; O. H. Ger. *storen*, *stoern* = to spread; Ger. *stören* = to trouble, to disturb, to poke about.] [STIR, v.]

Ichthy.: The popular name of any species of the genus *Acipenser* (q.v.). The body is

elongated, almost cylindrical, tapering conically to a heterocercal tail. The skeleton is cartilaginous; the skin is covered with bony scutes in longitudinal rows, between which are patches naked or furnished only with small bony scales. The snout is produced far in front of the mouth, which is situated on the under side, and furnished with barbels. Sturgeons are distributed over the whole of the northern hemisphere; they are mostly anadromous, but some species are confined to fresh water. On the approach of winter they sink deep holes in the bottom, where they crowd together and remain in a hibernating condition till the approach of spring. They are among the largest of freshwater fishes; and the larger species reach a length of about eighteen feet; they are extremely voracious, and live chiefly on worms, spawn, and fish that feed on the bottom. They are important as food-fishes; the flesh is white, well-flavoured, and delicate, resembling veal; caviare is prepared from their roe, and isinglass from their swimming-bladders. The best-known species, is the Common Sturgeon, *Acipenser sturio*. The back is usually a dull reddish, but varies to a blue or yellowish-gray, belly white, inclining to silvery, scales gray. When adult it is from 6 to 10 feet long. It occurs in the Mediterranean, western and northern Europe, and on the Atlantic coast of the United States. The largest species is *A. huso*. It belongs to the Black and Caspian Seas, and reaches a length of 25 feet. Several species occur in the United States. They are taken in considerable numbers, the flesh being eaten and caviare made. The most important sturgeon fishery is that of the Volga and the Caspian Sea in Russia. [BELUGA, 1, FISH-SOVAL, STEELET.]

"In England the Sturgeon is a royal fish, belonging by Act of Parliament of the reign of Edward II., to the sovereign, except where it has been granted by charter to certain Corporations, as at Boston, in Lincolnshire."—*Seely: Fresh-water Fishes*, p. 413.

***stūr-ī-ō, s.** [Lat. = a sturgeon (q.v.).]

Ichthy.: A lapsed synonym of *Acipenser* (q.v.). From this word many authorities have formed names for groups in their respective classifications, corresponding more or less closely to the modern *Acipenseridae* and *Polyodontidae*. Thus Cuvier employed the French *Sturioniens*; and in Modern Latin there are *Sturiones* (Bonsaparte), *Sturionia* (Rafinesque), *Sturionidae* (Swainson), *Sturionidae* (Richardson), and *Sturionini* (Gravenhorst).

† **stūr-ī-ō-nōs, a. pl.** [STURIO.]

stý-œr-ino, s. [Eng. sty(ryl), and (gly)cerine.]

Chem.: C9H17O2 = C6H5.CH(OH).CH(OH).CH2(OH). Phenyl glycerine. A trivalent alcohol, obtained by heating a mixture of styryl tribromide and water for eight or ten hours. It is very soluble in water and alcohol, and on evaporation is left as a gummy mass.

stýe, s. [STRY (2), s.]

stýe, v.t. [STRY (2), v.]

Stýë-ÿ-an, s. [Lat. Stygius, from Styx; Gr. Στύξ (Styx), genit. Στυγός (Stygos) = the Styx, from στύγεω (stugeō) = to hate.] Pertaining to Styx, a river of hell, over which the shades of the dead were ferried by Charon; hence, hellish, infernal.

"Whose Stygian throats breathe darkness all day long." Cooper: Task, iii. 738.

stý-gög-ën-ës, s. [Gr. Στύξ (Styx), genit. Στυγός (Stygos) = the Styx (q.v.), and γεννάω (gennaō) = to produce. Named from their supposed volcanic abode.]

Ichthy.: A genus of Hypostomatina [SILURIDÆ], the preñadillas of the natives. They are small Silurida, abundant in the lakes and torrents of the Andes, and have attracted considerable attention from the fact that Humboldt adopted the popular belief that they live in subterranean waters within the bowels of the active volcanoes in the Andes, and are ejected with streams of mud and water during eruptions, though he considered it singular that they were not cooked when vomited forth from craters or other openings. The explanation of their appearance during volcanic eruptions is that they are killed by the sulphuretted gases escaping during an eruption, and swept down by the torrents of water issuing from the volcano.

stýl-a-gál-má-ÿc, a. [Gr. στῦλος (stulos) = a pillar, and ἀγαμία (agalmá) = an image.]

Arch.: Performing the office of a column: as, a stýlagalmáic figure. Used also substantively of a figure performing the office of a column.

stýl-ar, a. [Eng. styl(e); -ar.] Of or pertaining to a style; stilar.

stýl-ás-tër, s. [Gr. στῦλος (stulos) = a pillar, and ἀστέρ (astër) = a star.]

Zool.: The type-genus of Stylasteridæ (q.v.), formerly classed with the Corals, and made a genus of Oculinidæ.

stýl-ás-tër-ÿd, s. [STYLASTERIDÆ.] Any individual of the family Stylasteridæ (q.v.).

stýl-ás-tër-ÿ-dæ, s. pl. [Mod. Lat. stylaster; Lat. fem. pl. adj. suff. -idæ.]

Zool. & Paleont.: A family of Hydrocoralline, with several genera, living principally at considerable depths in the warmer seas. The skeleton is a branched calcareous structure, with cup-like depressions, each with a central chamber, surrounded by secondary chambers, separated from each other by short partitions. The colony consists of two sets of zooids, the perfect ones inhabiting the central chambers, whilst the smaller ones are occupied by imperfect zooids, resembling tentacles in appearance. The cavities of the zooids communicate by canals in the skeleton, and the reproductive organs are in the form of fixed sporosacs, developed within sac-like distichopora in the skeleton. One fossil genus, Distichopora, from the Tertiary of France.

stýl-ÿte, a. [Eng. style (2); -ate.] Bot.: Having a persistent style.

style (1), * stîle (1), s. [Fr. stile, style, from Lat. stilus = an iron-pointed pen used for writing on wax-tablets, a manner of writing. From the same root as sting, stimulus, stigma, &c.; Sp. & Port. estilo; Ital. stile.]

I. Ordinary Language:

* 1. A piece of iron or other material pointed at one end, used by the ancients for writing by scratching on wax tablets. The other end was made blunt and smooth, and was used to make erasures. Hence,

2. A hard point for tracing, in manifold writing.

3. A pointed tool used in graving.

4. Manner of writing with regard to language; the peculiar manner in which a person expresses his ideas or conceptions; the particular mode or form of expressing ideas in language which distinguishes one writer or speaker from another; the distinctive manner of writing characteristic of each author, or of each body of authors, allied as belonging to the same school, country, or epoch.

"Though an author's plan should be faultless, and his story ever so well conducted, yet if he be feeble, or flat in style, destitute of affecting scenes, and deficient in poetical colouring, he can have no success." Blair: Rhetoric, lect. 10.

5. Mode of presentation, especially in music or any of the fine arts; characteristic or peculiar mode of developing an idea or accomplishing a result; the peculiar manner in which an artist expresses his ideas; it is exhibited in his choice of forms and mode of treating them, and is determined in different ways, according to the changes of thought at different times and stages of its development. Besides the individual style, there is also a national style: as, the Egyptian, the Grecian styles of architecture. Each of the various branches of art has its peculiar style: as, the epic, lyric, and dramatic styles of poetry; the historical and the landscape styles of painting, &c.

"In quiet poems of simple narrative, where there are no speakers or scenery to set off the words, the forcible style of the drama might interfere with the unity of the poem, by attracting to the words the interest that should be concentrated on the narrative; and here a simple style may be desirable. Thus poetic style may be roughly divided into (1) the elevated, (2) the graceful, (3) the forcible, (4) the simple." Abbott & Seeley: English Lessons for English People, 345.

6. The peculiar manner or mode of action characteristic of a performer of an art: as, the style of rowing of an oarsman, a batsman's style in cricket, a bad style of walking, &c.

7. External manner or fashion. Manner deemed elegant and appropriate in social demeanour; fashion: as, an entertainment given in style.

8. Phrase of address or appellation; formal or official designation; title.

II. Technically:

1. Arch.: A particular character as to the general artistic idea prevailing a building: as, the Gothic or Norman styles. [ARCHITECTURE.]

2. Chron.: The method of reckoning time with reference to the Julian and Gregorian calendars, Old Style being founded on the former and New Style on the latter. The Julian Calendar (q.v.) prevailed in Europe to A. D. 1582. Pope Gregory XIII. published the Gregorian Calendar (CALENDAR, II. 3) enacting that ten days should be deducted from the year 1582 by calling the day which by the Julian Calendar would have been Oct. 5, Oct. 15, 1582. The alteration took place that same day in Spain, Portugal, and part of Italy. In France and Lorraine the change was made on Dec. 10 [20]; in Holland, Brabant, Flanders, Artois, and Hainaut on Dec. 15 [25], of the same year. In Switzerland the Roman Catholics adopted the new style in 1583 or 1584, as did those of Germany in 1584. The Danes did so in 1582, the Poles in 1586, the Hungarians in 1587, the German Protestant city of Marburg in Feb. 1682, the States of Utrecht on Dec. 1 [12], 1700, the other German Protestants about the same date. Till 1751 both the Julian, or Old Style, and the practice of commencing the legal year on March 25 subsisted in England. But by 24 Geo. II., c. 23, it was enacted:

1. That throughout all His Majesty's dominions in Europe, Asia, Africa, and America the supputation according to which the year of our Lord began on March 25 shall not be used after the last day of December, 1751, and that the first day of January next following shall be reckoned as the first day of the year 1752, and so on in all future years.
2. That . . . the natural day next immediately

following September 3, 1752, shall be called and reckoned as the fourteenth day of September, omitting the eleven intermedial nominal days.
3. That the several years of our Lord 1800, 1800, 2100, 2200, 2300 . . . shall not be deemed bissextile or leap years . . . and that the years of our Lord 2000, 2400, 2800 . . . shall for the future be esteemed bissextile or leap years."

The difference between the Old and New Styles was progressive. Up to 1699 it was only ten days, after 1700 it was eleven, and after 1800 twelve days. The year 1751 had no January, February, March 1-24, and September had only nineteen days. (Nicolas: Chron. of Hist.)

3. Surg.: A pointed surgical instrument; a probe.

¶ For the difference between style and die tion, see DICION.

¶ (1) Juridical styles:

Scots Law: The particular forms of expression and arrangement necessary to be observed in formal deeds and instruments.

(2) Style of a court:

Law: The practice observed by any court in its way of proceeding.

style (2), * stîle (1), s. [Lat. stylus, from Gr. στῦλος (stulos) = a pillar, a post.]

1. Bot.: The part of a pistil intermediate in position between the germ or ovary below and the stigma above. It is considered to be an elongation of the ovary, and morphologically the upper narrow part of a capillary leaf supporting the stigma. It is not more essential to a pistil than a petiole is to a leaf, and its fact is often absent. It may be taper or thick, is generally terete, but may be angular, or thin, flat, and coloured. Sometimes it is continuous with, and at others articulated with the ovary; as a rule it arises from the apex, but occasionally from the sides of the latter. Its surface is generally smooth, but in Composite, most Campanulaceæ, &c., it is densely covered with hairs called collectors, which in Lobelia become an indusium (q.v.). Sometimes styles so completely cohere that they look like one style with a plurality of stigmas. In fully describing the styles of a plant mention should be made of their number, length, figure, surface, direction, and proportion.

2. Dialling: The gnomon of a sun-dial.

* style (3), s. [STILE.]

style v.t. [STYLE (1), s.] To entitle, to name, to designate, to denominate.

*1. An astringent.

2. A medicine or preparation employed for the purpose of stopping the flow of blood from a wound, &c.

¶ Styptica are of three kinds; chemical, as a saturated solution of alum or sulphate of zinc; vital (increasing the vital powers), as acetic acid, which also acts chemically; and mechanical, as the employment of a sponge tent.

***stýp-tío-al**, a. [Eng. *styptic*; -al.] The same as STYPTIC, A. (q.v.).

stýp-tí-číte, s. [Eng. *styptic*; suff. -ite (*Mfin.*)]

Mfin.: A mineral occurring in mamillary aggregations of delicate fibres, in Copiapó, Chili, and also in the department of Gard, France. Hardness, 1.5 to 2; sp. gr. 1.84; lustre, silky; colour, straw-yellow. Compos.: sulphuric acid, 29.30; sesquioxide of iron, 35.15; water, 35.55 = 100, which yields the formula 3FeO₃SO₃ + 27H₂O. Known also under the name Fibroferrite.

***stýp-tí-čí-tý**, s. [Eng. *styptic*; -ity.] The quality or state of being styptic.

"Cathartics of mercurials precipitate the viscidities by their stypticity, and mix with all animal acids."—*Floyer: On Consumption.*

stýp-a-čá-čó-ě, **stý-rá-čó-ě**, s. pl. [Mod. Lat. *styrax*, genit. *styracis*(s); Lat. fem. pl. adj. suff. -acea, -eae.]

Bot.: Storaxworts; an order of Perigynous Exogams, tribe Rhamnales. Trees or shrubs with alternate, generally toothed, exstipular leaves; flowers axillary, solitary, or clustered, with scale-like bracts; hairs often stellate; calyx with four or five divisions, imbricated, persistent; corolla monopetalous, its divisions often different from those of the calyx, imbricated in aestivation; stamens definite or indefinite; pollen broadly elliptical; style simple; stigma capitate; ovary generally inferior, with two to five cells, each with two or an indefinite number of seeds. Found in various parts of the tropics. Known genera six, species 115. (*Lindley.*)

stýp-a-čín, s. [Lat. *styrax*, genit. *styracis*(s); -in.] [CINNYL-CINNAMATE.]

stýp-a-čól, **stýp-a-cone**, s. [Eng. *styrac*(in); -ol, -one.] [CINNYL-ALCOHOL.]

stýp-áx, s. [STORAX.]

Bot.: Storax; the typical genus of *Styracaceae* (q.v.). Calyx campanulate, five-toothed, persistent; corolla monopetalous, deeply three to seven cleft; stamens ten, united at the base; anthers linear, two-celled; style simple; stigma three-lobed; ovary superior;

ovules indefinite; fruit a drupe. Elegant trees and shrubs with stellate hairs, entire leaves, and racemes of white or cream-coloured flowers. Found in the warmer parts of America and Asia; one is European and one African. *Styrax officinale*, a tree from fifteen to twenty feet high, has ovate leaves, shining above, downy beneath, longer than the racemes, which are simple, and consist of five or six flowers. It is a native of Syria, Greece, and Italy. It furnishes storax (q.v.), which exudes and hardens in the air when the bark is wounded. *S. Benzoin* is the Benjamin Storax, or Gum-Benjamin tree. It has ovate, oblong, pointed leaves, glabrous above, downy beneath, only a trifle longer than the racemes, which are compound. It is found in Sumatra, Java, and the Malay Archipelago generally, and produces benzoin (q.v.). *S. reticulata*, *S. ferruginea*, and *S. aurea* yield a gum used as incense. Among other American species are *S. grandiflorus*, *S. lavigatus*, and *S. puberulentus*, *S. serratum*, and *S. virginicum*, small trees, natives of Bengal, yield gum, but of inferior quality.

Stýr-ý-an, a. & s. [See def.]

A. As adj.: Of or belonging to Styria, a province of Austria.

B. As subst.: A native of Styria.

stýr-ól, **stýr-ó-lóns**, s. [Eng. *styr*(ax), and (*alcoh*)ol; suff. -ene.] [CINNAMENE.]

stýr-óne, s. [Eng. *styr*(ax); -one.] [CINNYL-ALCOHOL.]

stýr-ón-ýl, s. [Eng. *styrone*(t); -yl.]

Chem.: A compound radical consisting of phenyl, C₆H₅, and ethyl, C₂H₅.

styronyl-alcohol, s.

Chem.: C₈H₁₀O = C₆H₅(C₂H₅)OH. Primary phenethyl alcohol. Obtained by the action of potassic hydrate on styronyl chloride. It boils at 225°.

styronyl-chloride, s.

Chem.: C₈H₉Cl. A liquid produced by the action of chlorine on boiling ethyl-benzene. It cannot be distilled without decomposition.

stýr-ýl, s. [Eng. *styr*(ax); -yl.] [CINNYL-ALCOHOL.]

stýr-ýl-a-míne, s. [Eng. *styryl*, and *amine*.]

Chem.: C₉H₁₁N = C₉H₁₀ } N. Cinnylamine.

A base produced by heating to 100°, in a sealed tube, a mixture of styrylic chloride, ammonia, and absolute alcohol. It forms small, colourless crystals, which readily melt to a yellowish oil, is slightly soluble in water, very soluble in ether.

stýr-ýl-íc, a. [Eng. *styril*; -ic.] Contained in or derived from styril.

styrilic-alcohol, a. [CINNYL-ALCOHOL.]

styrilic-chloride, s.

Chem.: C₉H₉Cl. A light yellow oil, obtained by passing dry hydrochloric acid gas into crystallized styrilic alcohol, heating the product to 100°, and washing with dilute soda-ly. It smells of anise oil, remains liquid at -19°, and cannot be distilled, even in vacuum, without decomposition.

styrilic-oxide, s.

Chem.: (C₉H₉)₂O. A light yellow, viscid oil, produced by the action of boric anhydride on styrilic alcohol. It has the odour of cinnamon, is heavier than water, and is partly decomposed by distillation.

stýr-ýl-íno, s. [Eng. *styril*; -ine.]

Chem.: C₉H₉N. Chiozza's name for a base which he obtained by treating metastyrol with ammonium sulphide.

stýthe, s. [Ety. doubtful. Perhaps connected with *stife* (q.v.).]

Mining: Choke-damp, or carbonic-acid gas.

stýth-ý, s. & v. t. [STITHY.]

Stýx, s. [Gr.] [STYGLIAN.]

Class. Mythol.: The principal river of the lower regions, which it encompassed seven times. It had to be crossed by the shades of the departed in passing to the region of spirits.

sū-a-bíl-í-tý, s. [Eng. *suable*; -ity.] The quality or state of being suable; liability to

be sued; the state of being subject by law to civil process.

sū-á-ble, a. [Eng. *su*(s); -able.] Capable of being sued; liable to be sued; subject by law to civil process.

"Lexicons out of lands are probably, *suable* in chancery."—*Aspley: Paragon.*

***suáde** (u as w), v. t. [Lat. *suadeo*.] To persuade.

"Vice thee ill suading pleasure's baits untrue."—*Grimeald, in Tottel's Songs.*

su'-ě-dá, s. [Arabic *suad* = a kind of sea blite (see def).]

Bot.: Sea-blite; a genus of *Chenopodiaceae*. Saline herbs or shrubs with semi-cylindrical leaves; flowers generally perfect, with two bracts at the base; calyx five-partite, without appendages or a wing at the back, often fleshy. Stamens five; style none; stigma usually three; utricle enclosed in the calyx. Seed lenticular, crustaceous. Known species about thirty-three; from salt-marshes and sea-shores. Two of them are *Sueda maritima*, the Annual, and *S. frutescens*, the Shirubby Sea-blite; the first has two and the second has three styles. The first is an annual with the flowers generally solitary; it is smaller than the other species, and more common on the European sea-shores. *S. frutescens*, *S. indica*, and *S. nudiflora* are found on the shores of India; their ashes furnish alkali.

***suáge** (u as w), ***swáge**, v. t. [An abbrev. of *suavage* (q.v.).] To suavage.

"But wicked wrath had some so farro enraged. As by no means theyr malice could be changed."—*Gaocigne: Fruits of Warre.*

sū-ant, **sū-ent**, a. [O. Fr. *suant*, *suant*, pr. par. of *suire* = to follow.] [SUE.] Even, uniform; spread equally over the surface. (*Amer.*)

sū-ant-ly, adv. [Eng. *suant*; -ly.] Evenly, equally, smoothly, regularly. (*Amer.*)

sū-ar-rów, s. [SAOTAR.]

***suá-sí-ble** (u as w), a. [Lat. *suasus*, pa. par. of *suadeo* = to persuade.] Capable of being persuaded; easily persuaded.

suá-sion (u as w), s. [Fr., from Lat. *suasionem*, accus. of *suasio*, from *suasus*, pa. par. of *suadeo* = to persuade; Ital. *suasione*.] The act of persuading; persuasion.

"That had by the subtil suasion of the deull, broken the thirde commandment."—*Sir T. More: Works*, p. 157.

***suá-síve** (u as w), a. [Lat. *suasus*, pa. par. of *suadeo* = to persuade.] Having power to persuade; persuasive.

"Its command over them was but *suasivo* and political."—*South: Sermons*, vol. 1, ser. 2.

***suá-síve-ly** (u as w), adv. [Eng. *suasive*; -ly.] In a manner tending to persuade; persuasively.

***suá-sör-ý** (u as w), a. [Lat. *suasorius*, from *suasus*, pa. par. of *suadeo* = to persuade.] Tending to persuade; having the power of persuading; persuasive.

"There is a *suasory* or enticing temptation, that inclines the will and affections to close with what is presented to them."—*Hopkins: On the Lord's Prayer*, p. 123.

suáve (u as w), a. [Fr., from Lat. *suavis* = sweet.] Agreeable in manners; bland, pleasant; blandly polite.

suáve-ly (u as w), adv. [Eng. *suave*; -ly.] In a suave manner; with suavity; blandly.

***suáv-í-fý** (u as w), v. t. [Lat. *suavis* = sweet, and *facto* (pass. *fito*) = to make.] To make affable or suave.

***suá-víl-ó-quent** (u as w), a. [Lat. *suavis* = sweet, and *loquens*, pr. par. of *loquor* = to speak.] Speaking suavely, blandly, or affably; using soft and agreeable speech.

***suá-víl-ó-quý** (u as w), s. [SUAVALO-QUENT.] Sweetness or blandness of speech.

suáv-í-tý (u as w), s. [Fr. *suavité*, from Lat. *suavitate*, accus. of *suavis* = sweetness; *suavis* = sweet; Sp. *suavidad*; Ital. *suavità*, *soavità*.]

*1. Sweetness to the taste.

*2. Something pleasant or agreeable.

"Some *suavities*, and pleasant fancies within our selves."—*Glanvill: Sermon* 1.

čól, **čoy**; **čout**, **čówl**; **čat**, **čell**, **čorus**, **čhín**, **čenč**; **čo**, **čem**; **čhín**, **čhís**; **čín**, **čá**; **čexpect**, **čenophon**, **čexist**. -**čín**. -**čian**, -**čtan** = **čhan**. -**čtion**, -**čsion** = **čshün**; -**čfion**, -**čgion** = **čzhün**. -**čclous**, -**čtlous**, -**čslous** = **čshüs**. -**čble**, -**čdle**, &c. = **čbel**, **čdel**.

3. The quality or state of being suave; graciousness and pleasantness of manners; affability, agreeableness, blandness.

"The . . . refined diplomatist, whose dexterity and suavity had been renowned at the most polite courts of Europe."—*Mosulley: Hist. Eng.*, ch. xii.

sub-, pref. [Lat.]

1. *Ord. Lang.*: A Latin preposition, meaning literally, under, below. It is largely used as a prefix to English words, to denote an inferior position or intention, subordinate degree, some degree, and sometimes the least sensible degree of that expressed by the word to which it is prefixed. The *ð* is frequently changed into the letter with which the next syllable begins, as in *succinct*, *suggest*, *suppress*, &c.

2. *Chem.*: A prefix used in compounds to denote that the metal is in excess of one atom of the negative element or acid radicle, e.g., Hg₂O, suboxide of mercury; 2Pb(C₂H₃O₂)₂ Pb²O, subacetate of lead.

sub-acromial, a.

Anat.: Situated under the acromion. There is a *sub-acromial* bursa.

sub-agency, s. A subordinate agency.

sub-agent, s.

Law: The agent of an agent.

sub-alate, a.

Bot.: Having a narrow wing or margin.

* **sub-almoner, s.** A subordinate or deputy almoner.

"Sobosan of his Majesty's chapel . . . and sub-almoner to him."—*Wood: Fasti Oxon.*, ii.

sub-angular, a. Slightly angular.

sub-Antichrist, s. An inferior Antichrist. (*Milton.*)

sub-apical, a. Under the apex; of or pertaining to the part under the apex.

* **sub-aqueous, a.** Being or living under water; subaqueous.

sub-arachnoid, a.

Anat.: Situated under the arachnoid.

¶ Used of the space between the arachnoid and the *pia mater*.

* **sub-arborescent, a.** Having a somewhat tree-like aspect.

sub-arctic, a. Applied to the region or climate next to the arctic; approximately arctic.

sub-base, sub-bass, s.

Music: A pedal register in the organ, of 32-foot tone.

* **sub-beadle, s.** An inferior or subordinate beadle.

"They ought not to execute those precepts by simple messengers, or sub-beadles."—*Aylife: Parergon*.

* **sub-blush, v.i.** To blush slightly.

"Sub-blushing as she did it."—*Sterne: Tristram Shandy*, vi. 174.

* **sub-bourdon, s.** The same as *SUB-BASS* (q.v.).

* **sub-breed, s.** A distinctly marked subdivision of a breed. (*Darwin.*)

sub-cartilaginous, a.

1. Situated under or beneath cartilage.

2. Partly cartilaginous or gristly.

sub-caudal, a. Being or situated under the tail.

* **sub-celestial, * sub-cælestiall, a.** Placed or being beneath the heavens or heavenly things.

"Even he [Solomon] passeth the same sentence of vanity, vexation, and unprofitableness, upon this, as upon all other sub-cælestial things."—*Barrow: Sermons*, vol. iii., ser. 14.

sub-central, a.

1. Being or lying under the centre.

2. Nearly, but not quite central.

* **sub-chanter, s.** A deputy or under-chanter; the deputy of the precentor of a cathedral; a succentor (q.v.).

sub-class, s. A subdivision of a class, consisting of orders allied to a certain extent.

sub-columnar, a.

Min. & Petrol.: Nearly columnar. Used of basalt, &c.

sub-committee, s. An under-committee;

a part or subdivision of a committee appointed for special business.

"Their sequestrators and sub-committees abroad, men for the most part of insatiable hands, and noted disloyalty."—*Milton: Hist. Eng.*, bk. iii.

* **sub-compressed, a.** Partially or imperfectly compressed; not fully compressed.

sub-concave, a. Slightly concave.

sub-conformable, a. Partially conformable.

sub-conical, a. Slightly or partially conical.

* **sub-conscious, a.**

1. Partially or imperfectly conscious.
2. Occurring without attendant consciousness. (Said of states of the mind.)

* **sub-constellation, s.** A subordinate or secondary constellation.

"The Pleiades, or sub-constellation upon the back of Taurus."—*Brown: Vulgar Errors*, bk. v., ch. xii.

sub-contract, s. A contract under a previous contract.

* **sub-contracted, a.** Contracted after a former contract; betrothed for the second time.

"Your claim, I bar it in the interest of my wife; 'Tis she is sub-contracted to this lord."—*Shakspeare: Lear*, v. &

sub-contractor, s. One who takes a portion of a contract from the principal contractor.

sub-contrary, a. & s.

A. As adj.: Contrary in an inferior degree. Specifically—

1. *Geom.*: Applied to two similar triangles when they are so placed as to have a common angle at the vertex and yet their bases not parallel. In such triangles the angles at the bases are equal, but on the contrary sides. Thus, the triangles *ABC*, *ADE*, are sub-contrary, and the angles *ACB*, *AED* are equal to the angle *ADE*, *AEC* respectively.

2. *Logic*:

(1) A term applied to each of two particular propositions when one is affirmative and the other negative. Thus, "Some man is learned," "Some man is not learned," are sub-contrary propositions with respect to each other. Sub-contrary propositions cannot be both false, for then their contradictories, which are contrary propositions with regard to each other (in this case, "No man is learned," "All men are learned") would both be true. But, as in the examples given above, two sub-contraries may both be true.

(2) Applied to the relation between two attributes which co-exist in the same substance, but in such a way that as one increases the other decreases.

B. As substantive:

Logic: A sub-contrary proposition.

Sub-contrary section:

Geom.: In any surface of the second order, if two planes be passed perpendicular to the same principal plane, but not parallel to each other, and so that the sections are similar, both the planes and the sections are sub-contrary with respect to each other.

sub-cordate, a. Somewhat cordate; somewhat resembling a heart in shape.

sub-costal, a. Situated or lying under the ribs.

Sub-costal muscles:

Anat.: Small muscles lying on the inner aspect of the thoracic wall close to the surface of the intercostals near the angles of the ribs.

sub-crystalline, a. Imperfectly crystallized.

sub-cylindrical, a. Imperfectly or somewhat cylindrical.

sub-dilated, a. Partially or imperfectly dilated.

sub-dural, a.

Anat.: Situated under the dura mater. Applied to the space between the dura mater and the arachnoid.

sub-editor, s. The assistant editor of a newspaper, periodical, or other publication.

sub-elaphine, a.

Zool.: Resembling the Red Deer (*Cervus elaphus*), especially in the formation of the antlers. The elaphine type of antler has the brow-tynes reduplicated, while the royal is developed at the expense of the tines, and much divided up in well-grown animals. In sub-elaphine Deer (the genera *Pseudaxis* and *Dama*) the relative proportion of the tynes is much the same, but the brow-tynes is quite simple.

sub-epidermal, a. Situated or lying immediately under the epidermis or scarf-skin, or outer bark.

sub-family, s.

Nat. Science: A grade between a family and a genus.

sub-feudation, s. The same as *SUB-INFÉUDATION* (q.v.).

sub-feudatory, s. An inferior tenant who held a feud from a feudatory of the crown or other superior.

sub-fibrous, a. Somewhat or slightly fibrous.

sub-generic, a. Of or belonging to a sub-genus (q.v.).

sub-genus, s.

Nat. Science: A division of a genus consisting of species having common characteristics differing more or less from those of the type, but not of sufficient importance to entitle them to generic distinction.

sub-globose, a. Partially or imperfectly globose.

* **sub-governor, s.** An under or subordinate governor.

"The sub-governor general . . . might arrive in the sleep that was daily expected from Okotak."—*Cook: Third Voyage*, bk. vi., ch. v.

sub-group, s.

Nat. Science: A sub-division of a group.

sub justice, phr. [Lat. = before the judge.] Not yet decided; undecided.

sub-kingdom, s.

Nat. Science: A grade between a kingdom and a class.

sub-lessee, s. The receiver or holder of a sub-lease.

sub-librarian, s. An assistant or under-librarian.

sub-lieutenant, s. A subordinate or second lieutenant.

sub-marshāl, s. A subordinate or under-marshāl.

* **sub-niveal, a.** Situated or being under the snow.

"A favourite resort for these sub-niveal operations is a steep bank where the heather is old and long."—*Field*, Dec. 12, 1888.

sub-officer, s. An under or subordinate officer.

sub-orbital, *sub-orbitar, a. Seated beneath the orbital cavity.

sub-porphyrific, a. Allied to porphyry, but containing smaller and less distinctly marked points or crystals.

sub-reader, s. An under reader in the Inns of Courts.

sub-rector, s. The deputy or substitute of a rector.

sub-region, s.

Geography: A division of a zoogeographical region founded on the distribution of families and genera. [RE_{ION}, II. 2.]

* **sub-religion, s.** A faith, doctrine, or belief approaching the sacredness of religion; an inferior religion.

! **sub-resin, s.** That portion of a resin soluble only in boiling alcohol, and precipitated again as the alcohol cools, forming a kind of seeming crystallization.

sub-sizar, sub-sizer, s. An under-sizar; a student of lower rank than a sizar. (*Cambridge Univ.*)

"A sub-sizer of Peter-house in Cambridge."—*Wood: Athens Oxon.*

sub-species, s.

Nat. Science: A grade immediately below a species. In the case of plants sub-species are

fāte, fāt, fare, amīdst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, oūre, unīte, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

often produced by cultivation, and when the characters are hereditarily transmitted with constancy through the seed, races arise.

sub-specifico, a. Of or belonging to a sub-species (q.v.).

sub-spherical, a. Partially or imperfectly spherical; of a form approaching a sphere.

sub-spiral, a. Partially spiral. Used spec. of the operculum of Melania, &c.

sub-treasury, s. One of the nine branches of the United States Treasury, located, for the convenient receipt and disbursement of public moneys, at Baltimore, Boston, Chicago, Cincinnati, New Orleans, New York, Philadelphia, San Francisco, and St. Louis, respectively.

sub-tribe, s. *Nal. Science*: A grade immediately below a tribe.

sub-variatal, a. Of, belonging to, or having the characters of a sub-variety.

sub-variety, s. *Nat. Science*: A grade next below a variety.

sub, s. [See def.] A colloquial contraction for a subordinate or for substitute; an inferior officer, &c.; a subaltero, or a substitute.

sub, v.t. To act as a substitute; to take one's place temporarily. (*Printers' slang*.)

sub-ác-íd, a. & s. [Pref. *sub-*, and Eng. *acid* (q.v.).]

A. As adj.: Slightly acid, acrid, or sour. "The juice of the stem is like the chyle in an animal body, not sufficiently concocted by circulation, and is commonly *subacid* in all plants."—*Arbuthnot: Of Atiments*, ch. 111.

B. As subst.: A substance moderately or slightly acid.

sub-ác-íd, a. [Pref. *sub-*, and Eng. *acid* (q.v.).] Somewhat or moderately acrid, sharp, or pungent.

"The green cholera of a cow tasted sweet, bitter, *sub-acrid*, or a little pungent."—*Floyer: On Consumption*.

sub-ác-t', v.t. [Lat. *subactus*, pa. par. of *subigo* = to subdue: *sub* = under, and *ago* = to bring.] To subdue; to reduce to any state.

"So thoroughly *subacted*, that he takes his load from God, as the camel from his master, upon his knees."—*Bishop Hall: Of Content*, 1, 19.

sub-ác-tion, s. [Lat. *subactio*.] [SUBACT.] The act or process of reducing to any state, as of mixing two bodies completely, or beating anything to a powder. (*Bacon: Nat. Hist.*, § 638.)

sub-a-çúte, a. [Pref. *sub-*, and Eng. *acute* (q.v.).] Moderately acute; acute in a modified degree. (*Lit. & fig.*)

sub-bá-dar, s. [SUBAH DAR.]

sub-á-ór-i-ál, a. [Pref. *sub-*, and Eng. *aerial* (q.v.).]

1. *Ord. Lang.*: Being or lying under the air or sky.

2. *Geol.*: Taking place or produced by the action of the atmosphere.

subaerial denudation, s. *Geol.*: Denudation produced by the action of the air on rocks exposed to its influence, as opposed to sub-marine denudation (q.v.).

When the sun heats rocks, the component minerals expand to a different extent, and afterwards, as they cool, contract differently. The alternations of heat and cold make rocks brittle; ice tends to split them; the carbon-dioxid of the air helps to decompose and weather them; the sand blast of the desert or of sand dunes scubs them. The aggregate effect of these causes, continued through many ages, is very great.

sub-ág-i-tá-tion, s. [Lat. *subagitatio*, from *subagito* = to get under one, to lie with illicitly.] Carnal knowledge; sexual intercourse.

sub-bah, soó-bah, s. [Hind. *suba*.] A province. (*Anglo-Indian*.)

sub-bah-dar, soó-bá-dar, s. [Hind. *subadár*.] The holder of a province; a provincial governor. (*Anglo-Indian*.)

sub-bah-dar-ý, soó-bah-dar-ý, s. [Hind. *subadár*.] The office, dignity, or jurisdiction of a subahdar (q.v.).

***sub-áid**, v.t. [Pref. *sub-*, and Eng. *aid* (q.v.).] To give secret or private aid to; to aid secretly or in an underhand manner.

"To hold that kingdom from *subaiding* such, Who else could not sustain." *Daniel: Civil War*, viii.

sub-ál-pine, a. [Pref. *sub-*, and Eng. *alpine*.] Not quite alpine, though approaching it. Used in botany, &c., for the zone on a mountain side just below the alpine zone.

sub-ál-térn, sub-ál-térn, *sub-ál-terne, a. & s. [Fr. *subalterne*, from Lat. *subalternus* = subordinate, from *sub* = under, and *alter* = another.]

A. As adj.: Holding a subordinate or inferior position; subordinate, inferior; specif., in the army, being below the rank of captain.

"The *subaltern* officers must be selected among the Dunhe Wassels, proud of the eagle's feather."—*Macauley: Hist. Eng.*, ch. xiii.

B. As substantive:

1. *Ord. Lang.*: One who holds a subordinate or inferior position; specif., a commissioned officer below the rank of captain.

"How could *subaltern* like myself expect Leisure or leave to occupy the field?" *L. Browning: Luria*, li.

2. *Logic*: A subaltern proposition.

"Two propositions are said to be opposed to each other, when, having the same subject and predicate, they differ in quality or quantity, or both. . . In ordinary language, however, and in some logical treatises, propositions which do not differ in quality (viz. *subalterns*), are not reckoned as opposed. . . In *subalterns*, the truth of the particular (which is called the *subaltern*) follows from the truth of the universal (*subalternant*), and the falsity of the universal from the falsity of the particular. . . *subalterns* differ in quantity alone; contraries, and also *sub-contraries*, in quality alone."—*Whately: Logic*, bk. ii, ch. ii, § 8.

subaltern opposition, s. *Logic*: The opposition which exists between a universal and a particular proposition of the same quality.

subaltern propositions, s. pl. *Logic*: Universal and particular propositions agreeing in quality, but not in quantity. Thus, Every vine is a tree, Some vine is a tree; and No vine is a tree, Some vine is not a tree, are subaltern propositions.

subaltern species (or genus), s. *Logic*: That which is both a species of some higher genus, and a genus in respect of the species into which it is divided.

sub-ál-térn-ánt, s. [Eng. *subaltern*; -*ánt*.] *Logic*: A universal as opposed to a particular. (See extract under *Subaltern*, B. 2.)

sub-ál-tér-nate, a. & s. [Eng. *subaltern*; -*ate*.]

A. As adjective:

1. Successive; succeeding by turns.

2. Subordinate, subaltern, inferior.

"The service, maple, lime-tree, horn-beam, quick-beam, birch, hazel, &c., together with all their *sub-ternate* and several kinds."—*Evelyn: Sylva*, 1 & 13 (introd.)

B. As substantive:

Logic: A particular, as opposed to a universal.

sub-ál-térn-á-tíng, a. [SUBALTERNATE.] Succeeding by turns; subalternate.

***sub-ál-tér-ná-tion**, s. [SUBALTERNATE.] A state of subordination, inferiority, or subjection.

"So that woman being created for man's sake to be his helper, in regard of the end before mentioned, namely, the having and bringing up of children, whereunto it was not possible they could concur, unless there were *subalternation* between them, which *subalternation* is naturally grounded upon inequality."—*Hooker: Eccles. Politie*, bk. v., § 73.

sub-án-gled (le as el), a. [Pref. *sub-*, and Eng. *angled*.] Somewhat angled.

subangled-wave, a. *Entom.*: A British geometer moth, *Acidalia prataria*.

sub-áp-én-nine, a. [Pref. *sub-*, and Eng. *Apennine*.] Situated or being under or at the foot of the Apennine mountains.

subapennine beds, or series, s. pl. *Geol.*: Older Pliocene beds constituting a range of low hills flanking both sides of the Apennine chain. They are about 3,000 feet thick, becoming more massive towards the south. They exhibit a finer development of

the Pliocene than any other in Europe, and constitute its typical series. There are innumerable alternations of light brown or gray calcareous and argillaceous marls. They are chiefly marine, but fluviatile or lacustrine strata also occur. There are many plants of the genera *Pinus*, *Taxodium*, *Sequoia*, *Ilex*, *Quercus*, *Platanus*, *Prunus*, *Alnus*, *Ulmus*, *Ficus*, *Laurus*, *Cassia*, *Juglans*, *Acer*, *Betula*, *Rhamnus*, *Smilax*, &c. The upper portion contains the mammalian remains of *Mastodon arvernensis*, *Elephas meridionalis*, *Hippopotamus major*, with species of the genera *Ursus*, *Hyenas*, *Felis*, &c.

sub-a-quát-íc, sub-á-que-óus, a. [Lat. *sub* = under, and *acqua* = water.]

1. *Ord. Lang.*: Being, lying, or living under or beneath the surface of water.

"The northern naturalists will perhaps say, that this assembly met for the purpose of plunging into their *subaqueous* winter quarters."—*Pennant: British Zoology*; *Swallow*.

2. *Geol. (Of strata)*: Formed under water.

sub-ar-cu-át-éd, a. [Pref. *sub-*, and Eng. *arcuate* (q.v.).] Having a form resembling that of a bow; somewhat arcuate or incurved.

***sub-ár-rá-tion**, s. [Lat. *sub* = under, and *arraha* = earnest money.] An old manner of betrothing; betrothal.

"By these tokens of sponsage are to be understood rings, or money, or some other things to be given to the woman by the man; which said giving is called *subarration*, (i.e., wedding or covenanting), especially when it is done by the giving of a ring."—*Whately: Common Prayer*, ch. 2, § 4.

***sub-ás-tral**, a. [Lat. *sub* = under, and *astrum* = a star.] Beneath the stars or heavens; terrestrial.

"By the aid of improved astronomy he compares this *subastral* economy with the system of the fixed stars."—*Warburton: Sermons*, vol. ix, ser. ii.

sub-a-strín-gent, a. [Pref. *sub-*, and Eng. *astringent* (q.v.).] Somewhat astringent; moderately astringent.

† **sub-áud'**, v.t. [Lat. *subaudio*.] To understand or supply when an ellipsis occurs.

***sub-áu-dítion**, s. [Lat. *subauditio*, from *subauditus*, pa. par. of *subaudio* = to understand or supply a word omitted: *sub* = under, and *audio* = to hear.] The act of understanding or supplying something not expressed; that which is understood or implied from what is expressed.

"This [egregious] has always now an ironical *sub-audition*, which it was very far from having of old."—*Trench: Select Glossary*, p. 68.

sub-áx-il-lar-ý, a. [Pref. *sub-*, and Eng. *axillary* (q.v.).]

1. *Ord. Lang.*: Situated or placed beneath the armpit or the cavity of the wing.

2. *Bot.*: Situated under the axil formed by a petiole and a stem or branch, or by a branch with a stem.

***sub-brách-ý-ál**, a. [SUBBRACHIALES.] The same as *Subbrachian*, A. (q.v.).

***sub-brách-ý-á-l-éss, *sub-brách-ý-á-tí**, s. pl. [Pref. *sub-*, and Lat. *brachiatum* = with bows or branches like arms; *brachium* = an arm.]

Ichthy.: A group of Anacanthini, having ventral fins. Families, Gadidae and Pleuronectidae.

***sub-brách-ý-an**, a. & s. [SUBBRACHIALES.] **A. As adj.**: Pertaining or belonging to the group *Subbrachiales* (q.v.).

B. As subst.: Any individual of the group *Subbrachiales*.

sub-cál-car-é-óus, a. [Pref. *sub-*, and Eng. *calcareous* (q.v.).] Somewhat or moderately calcareous.

***sub-cír-cu-lar**, a. [Pref. *sub-*, and Eng. *circular* (q.v.).] Somewhat or nearly circular.

sub-clá-vi-an, a. [Lat. *sub* = under, and *clavis* = a key, used in sense of Gr. *κλειε* (*kleis*) = a key, a collar-bone.] Situated under the clavus or collar-bone, as the *subclavian* artery and vein.

sub-crá-ni-ál, a. [Lat. *sub* = under, and *cranium* = the skull.] Under the cranium or skull, as the *subcranial* or pharyngeal arches.

sub-cu-tá-né-óus, a. [Pref. *sub-*, and Eng. *cutaneous*.]

ból, bóy; pòut, jòwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f -cian, -tian = shàn. -tion, -sion = shùn. -tion, -sion = zhùn. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del

1. *Ord. Lang.*: Situated under the skin; placed or performed under the skin.

"The subcutaneous injection of drugs."—*Daily Telegraph*, Oct. 20, 1884.
2. *Anat.*: Just below the cutis or skin. Applied to the platysma myoides muscle, &c.

subcutaneous-injection, s. [HYPODERMIC INJECTION.]

subcutaneous-saw, s.

Surg.: A saw by which bony sections may be made without large incision in the flesh. It may be compared to a probe, a portion of whose length, at and toward the end, is flattened and serrated, so that being driven into the seat of its operations, it is reciprocated, so as to cut the bone without mangling the flesh to any serious extent.

subcutaneous-syringe, s.

Med.: An instrument for injecting medicinal solutions beneath the skin. It consists essentially of a tube with a piston for containing the preparation, and a perforated needle for piercing the skin and injecting the fluid. Also called a Dermopathic syringe.

sub-cu-tā-nē-ōus-ly, adv. [Eog. *subcutaneous*; -ly.] Under the skin.

"One centigramme of pilocarpine was injected subcutaneously."—*Pall Mall Gazette*, March 31, 1886.

sub-cu-tic-ū-lar, a. [Pref. *sub-*, and Eng. *cuticle* (q.v.).] Being under the cuticle (q.v.).

sub-dea-con, s. [Pref. *sub-*, and Eng. *deacon* (q.v.).]

Eccles. & Ch. Hist.: The lowest step in holy orders in the Roman Church, the highest of the minor orders among the Greeks. In the Roman Church subdeacons prepare the sacred vessels and the bread and wine for mass, pour the water into the chalice at the offertory, and sing the Epistle; in the Greek Church they prepare the sacred vessels, and guard the gates of the sanctuary. There are no subdeacons in the Anglican Communion.

sub-dea-con-ry, s. [Pref. *sub-*, and Eng. *deaconry* (q.v.).] The order and office of subdeacon in the Roman Church.

"To be promoted here to the holy order of subdeaconry."—*Martin: Marriage of Priests* (1550) O 2.

sub-dean, s. [Pref. *sub-*, and Eng. *dean* (q.v.); Lat. *subdecanus*.] The deputy or substitute of a dean; an under-dean.

"Being subdean . . . he undertook the entire management of all affairs."—*Pell: Life of Hammond*.

sub-dean-er-ry, s. [Pref. *sub-*, and Eng. *deanery* (q.v.).] The office and rank of a subdean.

"The subdeanery of York, founded anno 1229."—*Bacon: Lib. Regis*, p. 1, 102.

sub-de-cā-nal, a. [Pref. *sub-*, and Eng. *decanal* (q.v.).] Pertaining or relating to a subdean or subdeanery.

sub-dec-ū-ple, a. [Pref. *sub-*, and Eng. *decuple* (q.v.).] Containing one part of ten.

sub-dēl-ē-gate, a. [Pref. *sub-*, and Eng. *delegate*, s. (q.v.).] A subordinate or under delegate.

sub-dēl-ē-gāte, v.t. [Pref. *sub-*, and Eng. *delegate*, v. (q.v.).] To appoint to act as subordinate, or under another delegate.

sub-dē-less-ite, s. [Pref. *sub-*, and Eng. *desessite*.]

Min.: A name proposed for those varieties of desessite (q.v.) in which protoxide of iron predominates over the sesquioxide.

sub-dēnt-ēd, a. [Pref. *sub-*, and Eng. *dented*.] Indented beneath.

sub-dē-pōs-īt, s. [Pref. *sub-*, and Eng. *deposīt* (q.v.).] That which is deposited beneath something else.

sub-dēr-i-sōr-i-ōus, a. [Pref. *sub-*, and Lat. *derisorius* = serving for laughter, ridiculous.] [Derisive.] Ridiculing with moderation or delicacy.

"The subderisorious pleas is far from giving any offence to us; it is rather a pleasant compliment of our conversation."—*More*.

sub-dē-riv-ē-tive, s. [Pref. *sub-*, and Eng. *derivative* (q.v.).] A word following another immediately in grammatical derivation; a word derived from a derivative, not from the

root. Thus, *manliness* is a subderivative, being derived from *manly*, a derivative from *man*.

sub-dī-ōn-āte, s. [Pref. *sub-*, and Eng. *diaconate*.] The office or rank of a subdeacon (q.v.).

sub-dī-al, a. [Lat. *subdialis* = in the open air.] Of or pertaining to the open air; being under the open sky.

sub-dī-a-lēct, s. [Pref. *sub-*, and Eng. *dialect* (q.v.).] A subordinate or inferior dialect; a less important dialect.

sub-dī-chōt-ō-my, s. [Pref. *sub-*, and Eng. *dichotomy* (q.v.).] A subordinate or inferior dichotomy or division into pairs; a subdivision.

sub-dī-tīnō-tion, s. [Pref. *sub-*, and Eng. *distinction* (q.v.).] A subordinate distinction.

sub-dī-tī-tious, a. [Lat. *subditivus*, from *subditus*, pa. par. of *subdo* = to substitute; *sub* = under, and *do* = to give.] Put secretly in the place of something else; foisted in.

sub-dī-verse-si-fy, v.t. [Pref. *sub-*, and Eng. *diversify* (q.v.).] To diversify again what is already diversified.

"Various subdiversified according to the fancy of the artificer."—*Hate: Orig. Mankind*, p. 157.

sub-dī-vidē, v.t. & t. [Pref. *sub-*, and Eng. *divide* (q.v.).]

A. Trans.: To divide the parts into more or smaller parts; to part into subdivisions; to divide again, as that which has been already divided.

"Robert Stephens, a Frenchman, that curious critic and palpit printer, some six score years since, first subdivided [chapters] into verses."—*Fidler: Worthies: Kent*.

B. Intrans.: To be subdivided; to divide, separate, or part into subdivisions.

"A sect is sufficiently thought to be reformed, if it subdivides and breaks into little fractions, or changes its own opinions."—*Bishop Taylor: Sermons*, vol. II., ser. 22.

sub-dī-vine, a. [Pref. *sub-*, and Eng. *divine*, s. (q.v.).] Divines in a partial or lower degree.

"Given as some little glimpse of your sublime natures."—*Ep. Bull: Invisible World*, bk. I., ser. II.

sub-dī-vis-i-ble, a. [Pref. *sub-*, and Eng. *divisible* (q.v.).] Capable of admitting of subdivision.

sub-dī-vī-sion, s. [Pref. *sub-*, and Eng. *division* (q.v.).]

1. The act of subdividing or separating a part into smaller parts.

2. The part of anything made by subdivision; the part of a larger part.

"Separates itself into two correspondent subdivisions."—*Knox: Essay* 80.

sub-dō-lous, a. [Lat. *subdolosus*, from *sub* = under, and *dolus* = treacher, trick, fraud.] Deceitful, tricky, cunning, sly, crafty.

"They are the subtlest; I will not say the most subdolosus dealers."—*Bowtell: Letters*, bk. I., let. 41.

sub-dōm-īn-ant, s. [Pref. *sub-*, and Eng. *dominant* (q.v.).]

Music: The fifth below or the fourth above any key-note; the fourth note of the diatonic scale lying a tone under the dominant or fifth of the scale. Thus, in the scale of C, F is the subdominant, and C the dominant; in the scale of G, C is the subdominant, and G the dominant; &c.

sub-dū-a-ble, a. [Eng. *subdu(e)*; -able.] Capable of being subdued; possible to be subdued.

"I have a natural touch of enthusiasm in my complexion, but such as I thank God, was ever governable enough, and I have found at length perfectly subduable."—*More: Philosophical Writings* (Pref. Oen.).

sub-dū-ā-l, s. [Eng. *subdu(e)*; -al.] The act of subduing.

"He mistakes the consequences of these powers, which are the punishment of overt acts, and subduent of the passions; he mistakes them, I say, for powers themselves."—*Warrburton: Alliance*.

sub-dū-ē, sub-dū-ēt, v.t. [Lat. *subduco*, pa. par. *subductus*, from *sub* = under, and *duco* = to lead, to draw.]

1. To withdraw, to take away.

"For never was the earth so peevish as to forbid the sun when it would shine on it, or to slink away, or subduce itself from its rays."—*Hammond: Sermons*, vol. IV., ser. 14.

2. To subtract by arithmetical operation; to deduct.

"If out of that supposed infinite multitude of antecedent generation, we should by the operation of the understanding subduce ten, whether we subduce that number of ten out of the last generation of men . . . the residue must needs be less by ten than it was before that subduction made."—*Bate: Orig. of Mankind*, p. 10.

sub-dū-ēt, v.t. [SUBDUCE.]

sub-dū-ō-tion, s. [Lat. *subductio*, from *subductus*, pa. par. of *subduco* = to subduce (q.v.).]

1. The act of taking away; removal.
2. Arithmetical subtraction; deduction.

sub-dū-ē, sub-dū-ē, v.t. [O. Fr. *subduire* = to reduce, from Lat. *subduco* = to draw away, to remove.] [SUBDUCE.]

1. To conquer and reduce to a state of permanent subjection. (It is a stronger term than conquer.)

"He had found it impossible to subdue the colonists, even when they were left almost unaided."—*Macaulay: Hist. Eng.*, ch. XIV.

2. To conquer by superior force; to obtain the victory over; to vanquish.

"He could never subdue the Israelites, unless they should be disobedient to their God."—*Chilpin: Sermons*, vol. I., ser. 7.

3. To overcome by discipline; to conquer; to bring under command: as, To subdue the passions.

4. To prevail over, as by argument or entreaty; to overcome, as by kindness, entreaty, persuasion, or other mild means; to gain over.

"This virtuous maid subdues me quite."

Shaksp.: Measure for Measure, II. 2.

5. To reduce, to bring down, to lower.

"Nothing could have subdued nature

To such a lowness, but his unkind daughter."

Shaksp.: Lear, III. 4.

6. To tone down, to soften; to make less glaring in tone or colour. (Generally in the pa. par., as, To speak in subdued tones; a subdued light, &c.)

7. To bring into cultivation; to make mellow; to break up.

"Nor is't unwholesome to subdue the land

By often exercise."—*Mas: Virgi: Georgia*.

8. For the difference between to subdue and to conquer, see CONQUER.

sub-dū-ē, s. [SUBDUCE, v.] Conquest, subjugation.

"The world's subduer."

Greene: Looking-Glass, p. 118.

sub-dū-ē-ment, s. [Eng. *subdue*; -ment.]

The act of subduing; conquest, subduer.

"Bravely despising fortitude and subduement."

Shaksp.: Troilus & Cressida, IV. 5.

sub-dū-ēr, s. [Eng. *subduer*; -er.] One who or that which subdues; one who conquers and brings into subjection; a conqueror, a vanquisher.

"Victor of gods, subduer of mankind."

Spenser: In Honour of Love, hymn I.

sub-dū-ē-īd, a. [Pref. *sub-*, and Eng. *dulcid* (q.v.).] Somewhat sweet; moderately sweet.

sub-dū-ple, a. [Pref. *sub-*, and Eng. *duplex* (q.v.).] Containing one part of two.

"As one of these under pulleys doth abate half of that heaviness which the weight hath in itself, and cause the power to be in a subduplex proportion unto it, so two of them do abate half of that which remains, and cause a subquadruple proportion, and three a subsextuple."—*Wilkins: Mathematical Magick*.

subduplex-ratio, s. The ratio of 1 to 2, 3 to 6, &c.

sub-dū-pli-cate, a. [Pref. *sub-*, and Eng. *duplicate* (q.v.).]

Math.: Expressed by the square root.

"The times are 10 subduplicate works to the length of the penulminas."—*Boyle: Works*, III. 482.

subduplicate-ratio, s.

Alg.: The ratio of the square roots of a ratio. The subduplicate ratio of *a* to *b*, is the ratio of \sqrt{a} to \sqrt{b} ; or $\sqrt{\frac{a}{b}}$.

sub-dū-lōn-gate, a. [Pref. *sub-*, and Eng. *elongate* (q.v.).] Somewhat elongated; not fully elongated.

sub-dū-ē-qual, a. [Pref. *sub-*, and Eng. *equal* (q.v.).] Nearly equal.

sub-dū-ām-īc, a. [Eng. *suberitic*, and *amic*.] Derived from or containing *suberitic* acid and ammonia.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hōre, camel, hēr, thēre; pīnē, pīt, sīre, sīr, marine; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūta, cūb, cūre, unite, cūr, rāle, fāll; trȳ, sȳrian. s, ce = ē; ey = ā; qu = kw.

suberamic acid, s.

Chem.: C₅H₁₀O₂(HO)H₂N. Produced by the dry distillation of ammonium suberate. It is fusible, soluble in boiling water, and deposited therefrom on cooling. (Watts.)

sū-bēr-a-mīdō, s. [Eng. suber(ite), and amide.]

Chem.: N₂(C₅H₁₀O₂)₂H₂. A white crystalline substance, produced by the action of aqueous ammonia on methylic suberate.

sū-bēr-a-nīl-īc, a. [Eng. suber(ite); anti-line], and suff. -īc.]

Derived from or containing suberic acid and aniline.

suberanilic acid, s.

Chem.: C₉H₁₀O₂(HO)C₆H₅HN. Produced by melting suberic acid with an equal volume of aniline, and recovered from the alcoholic filtrate obtained, after the separation of anberanilide. It crystallizes in microscopic laminae, melts at 128°, is slightly soluble in boiling alcohol. It dissolves easily in ether, and when fused with potash yields aniline.

sū-bēr-ān-īl-īdō, s. [Eng. suber(ite); anti-line], and suff. -īdō.]

Chem.: C₉H₁₀O₂(C₆H₅)₂H₂N₂. Is produced along with anberanilic acid when suberic acid is melted with an equal volume of dry aniline. The product is dissolved in alcohol, from which the anberanilide crystallizes out in pearly laminae. It melts at 123°, and dissolves readily in boiling alcohol and in ether.

sū-bēr-āte, s. [Eng. suber(ite); -ate.]

Chem.: A salt of suberic acid (q.v.).

sū-bēr-ē-ōūs, a. [Lat. suber = cork.]

Of the nature of cork; auherose.

sū-bēr-īo, a. [Eng. suber; -īo.]

Pertaining to cork; contained in or derived from cork.

suberic acid, s.

Chem.: C₅H₁₀O₂(HO)₂. An acid of the oxalic series, formed by the action of nitric acid on cork and various fatty bodies, as stearic and oleic acids. Oxalic acid is first removed from the product by cold water, and then lepargylic acid by treatment with cold ether. When further purified, it crystallizes in needles an inch long, or in hexagonal tables, melts at 149°, dissolves sparingly in cold water and ether, easily in alcohol and boiling water.

suberico-ether, s.

Chem.: C₁₁H₂₂O₂(C₂H₅)₂. Ethylic anberate. Obtained by passing hydrochloric acid gas into an alcoholic solution of suberic acid. It is a limpid liquid, having a faint odour and nauseous taste, boils at 230°, and mixes in all proportions with alcohol and ether. Sp. gr. 1.003.

sū-bēr-in, s. [Lat. suber = cork; -in.]

Chem.: Cellulose from cork.

sū-bēr-īto, a. & s. [SUBERITE.]

A. As adj.: Belonging to or resembling the genus Suberites, or the family Suberitidae (q.v.).

B. As subst.: Any individual of the genus Suberites, or the family Suberitidae (q.v.).

sū-bēr-ī-tōg, s. [Med. Lat., from Lat. suber = a cork.]

Zool.: The type-genus of Suberitidae (q.v.).

sū-bēr-īt-ī-dō, a. pl. [Mod. Lat. suberit(es); Lat. fem. pl. adj. suff. -īdō.]

Zool. & Paleont.: A family of Monaxonida (approximately = the Monaxonida (q.v.) of Schmidt). The apicules are pin-shaped, densely aggregated in fibres or matted. There is no network of flesh apicules. R. v. Lendenfeld (Proc. Zool. Soc., 1886, p. 584), enumerates eleven genera, one of which (Cliona) dates from the Silurian, and another (Poterion) from the Chalk.

sū-bēr-īt-ī-dī-nō, s. pl. [Mod. Lat. suberit(es); Gr. εἶδος (eidos) = form, and Lat. fem. pl. adj. suff. -īdō.]

Zool.: In Schmidt's classification of Sponges a sub-family of Monaxonida (q.v.), approximately equivalent to Suberitidae (q.v.).

† sū-bēr-ī-zā-tion, s. [Lat. suber = the cork tree; suff. -īz(ō); -ation.]

Bot.: The process of conversion into cork.

"The most common examples of the first kind are afforded by the lignification and suberization of cell-walls, &c., the processes by which cellulose is converted into lignin or cork."—Thomé: Botany (ed. Beauvet), pp. 22, 23.

sū-bēr-ōnō, s. [Lat. suber = cork; -ōnō.]

Chem.: C₂H₅O₂C₂H₅ (2). A substance obtained by distilling suberic acid with excess of lime; probably the ketone of anberic acid. It is an aromatic liquid, boiling at 176°, but its composition has not been ascertained with certainty.

sūb-ē-rōsē (1), a. [Lat. sub = under, and erous, pa. par. of erode = to gnaw.]

Bot.: Presenting a somewhat gnawed appearance.

sū-bēr-ōsē (2), sū-bēr-ōūs, a. [Lat. suber = cork; Eng. adj. suff. -ōsē, -ōūs.]

Of the nature or texture of cork; corky; soft and elastic.

sū-bēr-yl, s. [Lat. suber = cork; -yl.]

Chem.: C₂H₅O₂. The hypothetical diatomic radical of suberic acid.

sūb-fōs-sil, a. [Pref. sub-, and Eng. fossil (q.v.).] Partially fossilized.

* sūb-fū-mī-gā-tion, s. [Lat. subfumi-gatio.]

A species of charm by smoke. [SUF-FUMIGATION.]

* sūb-fūsō, * sūb-fūs-ōūs, * sūb-fūsīk, a. [Lat. subfusos.]

Moderately dark; darkish, gloomy, brownish, tawny.

"Of whose quiescent walls Amehne's uncollected care has drawn Curtains subfusc."—Shelton's: Economy, III.

sūb-gō-lāt-īn-ōūs, a. [Pref. sub-, and Eng. gelatinosus (q.v.).]

Somewhat or imperfectly gelatinous.

* sub-get, a. [SUBJECT, a.]

sūb-glā-cī-āl (or c as sh), a. [Pref. sub-, and Eng. glacial (q.v.).]

Belonging to the under side of a glacier; under a glacier.

sūb-glōb-ū-lar, a. [Pref. sub-, and Eng. globular (q.v.).]

Having a form approaching to a globe; nearly globular.

sūb-glū-mā-gō-ōūs (or ceous as shūs), a. [Pref. sub-, and Eng. glumaceous (q.v.).]

Somewhat glumaceous.

sūb-grān-ū-lar, a. [Pref. sub-, and Eng. granular (q.v.).]

Somewhat granular.

* sūb-hās-tā-tion, s. [Lat. subhastatio, from subhastatus, pa. par. of subhasto = to sell by public auction; sub = under, and hasta = a spear.]

[SPEAR, s. 7.] A public sale by auction to the highest bidder; a sale by auction.

sūb-horn-blēnd-īc, a. [Pref. sub-, and Eng. hornblendic.]

Petrol, &c.: Of or belonging to rocks containing disseminated hornblend; containing hornblend in a scattered state.

* sūb-hū-mēr-āte, v. l. [Lat. sub = under, and humerus = the shoulder.]

To bear or support by putting one's shoulder under; to take upon one's shoulders.

"Nothing surer tyes a friend, then freely to sub-humerate the burthen which was his."—Feltham: Resolve 32.

sūb-hy-ōid, a. [Pref. sub-, and Eng. hyoid (q.v.).]

Anat.: Under the hyoid bone; as, the sub-hyoid or cervical arch.

* sūb-in-ōū-gā-tion, s. [Lat. sub = under, and incusatio = a charge, an accusation.]

A slight charge or accusation.

"But all this cannot deliver thee from the lust blame of this bold subincusation."—Bishop Hall: Contempt; Martha & Mary.

* sūb-in-dī-ōate, v. l. [Pref. sub-, and Eng. indicate (q.v.).]

To indicate by signs; to indicate in a less degree.

"For this spirit of the world has faculties that work not by election, but factly or naturally, as several Gamalea's we meet withall in nature seen somewhat obscurely to subindicatō."—Mors: Immort. Soul, bk. II, ch. 2.

* sūb-īn-dūcē, v. l. [Pref. sub-, and Eng. induce (q.v.).]

To insinuate, to suggest; to bring into consideration indirectly or imperfectly.

* sūb-in-fēr', v. t. or i. [Pref. sub-, and Eng. infer (q.v.).]

To infer or deduce from as inferences already made.

"From the force then of this relation, it is easily subinferred that, &c."—Bp. Hall: Acol. for Religion.

sūb-in-fēū-dā-tion, s. [Pref. sub-, and Eng. infundation (q.v.).]

Law: 1. The act of enclothing by a tenant or feeoffee out of lands which he holds of the crown or other superior; the act of a greater baron who grants land or a smaller manor to an inferior person; a feudal sub-letting.

2. Under-tenancy.

* sūb-in-grēss-lōn (as as sh), s. [Pref. sub-, and Eng. ingressio (q.v.).]

Secret entrance.

"Altered by the subingression of salt water."—Boyle: Works, III. 767.

* sūb-ī-tānō, s. [SUBTANEOUS.]

A sudden.

* sūb-ī-tā-nō-ōūs, a. [Lat. subitaneus, from subito = suddenly.]

Sudden, hasty.

* sūb-ī-tā-nō-ōūs-nēssā, s. [Eng. subitaneous; -ness.]

Suddenness.

* sūb-ī-tān-ŷ, a. [Fr. subitain.]

[SUBITANEOUS.] Sudden, hasty.

"This which I have now commented is very subitany, and I fear, confused."—Hales: Golden Remains, p. 204.

sū-bī-tō, adv. [Ital.]

Music: Quickly, sharply, suddenly; as, voltī subito = turn [the leaf] quickly.

sūb-jā-gent, a. [Lat. subjacens, pr. par. of subjaco = to lie under; sub = under, and jaco = to lie.]

1. Ordinary Language: Lying under or beneath.

"If the muscles be cut away, we come sooner or later to subjacent bones."—St. George Mivart: The Cat, ch. II, § 1.

2. Being lower in position, though not directly beneath.

"The superficial marks of mountains are washed away by rains and borne down upon the subjacent plains."—Woodward.

3. Underlying, subordinate.

"Suitable to the subjacent matter and occasion."—Barrow: Sermons, vol. I, ser. 5.

II. Geol.: Lying under, inferior in position. Used chiefly of sedimentary rocks, in all cases presumably, and in nearly all cases actually, older than those resting upon them.

sūb-jēct, * sub-get, * sub-gette, * sug-ēt, * su-gett, * sug-ēt, a. & s. [O. Fr. suict, suict, subject (Fr. sujet), from Lat. subjectus, pa. par. of subjicio = to throw or place under; sub = under, and jacio = to throw; Sp. sujeto; Port. sujeito, sugetto; Ital. soggetto, sugetto, subieto.]

A. As adjective: 1. Placed, situated, or being under; lower in position.

"An hills side which did to her bewray A little valley subject to the same."—Spenser: F. Q., III. vii. 4.

2. Being under the power, control, or authority of another.

"For all that lives is subject to that law; All things decay in time, and to their end doe drawe."—Spenser: F. Q., III. II. 40.

3. Exposed, liable, obnoxious.

"Subject and servile to all discontents."—Shakespeare: Venus & Adonis, 1161.

4. Being that on which anything operates, whether material or intellectual: as, the subject matter of a discourse.

5. Submissive, obedient.

"Put them in mind to be subject to principalities and powers."—Titus III. 1.

B. As substantive: I. Ordinary Languages: 1. One who is placed under the power, control, authority, or dominion of some one else; specif., one who owes allegiance to a sovereign, and is governed by his laws; one who lives under the protection of, and owes allegiance to a government.

"To serve me well, you all should do me duty, Teach me to be your queen, and you my subjects."—Shakespeare: Richard III., I. 3.

2. One who or that which is subjected, exposed, or liable to something; a person as the recipient of certain treatment.

"I am too mean a subject for thy wrath."—Shakespeare: B Henry VI., I. 3.

bōil, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, Xenophon, exist. -īng-

-clan, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel. del.

3. One who or that which is the cause or occasion of something.

"I am the unhappy subject of these quarrels." *Shaksp.: Merchant of Venice, v.*

4. That which is subjected or submitted to any physical operation or process; aspecif, a dead body used for purposes of dissection.

"It is no longer that temple; it is not even a corpse; it has become a subject." *G. H. Lewes: Aristotle, p. 151.*

5. That on which any mental operation is performed; that which is spoken of, written of, thought of, or otherwise treated or handled; a theme.

"And could discriminate and argue well On subjects more mysterious." *Cowper: Task, v. 390.*

6. The hero of a piece; the person treated of; the principal character.

II. Technically:

1. Art: The incident chosen by an artist; the design of a composition or picture; anything which constitutes the design or aim of any work of art.

2. Gram.: That which is spoken of; the person or thing of which anything is affirmed; and the nominative of a verb.

"Moreover, his sentences occasionally have no subject and no principal verb." *Fall Mall Gazette, Aug. 3, 1894.*

3. Logic: That term of a proposition of which the other is affirmed or denied. One of the two terms by which (in conjunction with the copula) a proposition is constructed. Of these two, it is the name of that object of thought concerning which the statement is made. The corresponding term (i.e., the word which delivers what the statement is), is the predicate. The copula tells us whether the two are or are not in agreement. In the statements A is B, two A is not B, A is the subject, B the predicate, is or is not the copula.

4. Music: The theme or principal phrase of any movement, from which all the subordinate ideas spring or are developed. In sonate form there should be two chief subjects, called first and second; in rondo form one is sufficient. In a fugue the subject is called also the exposition, dux, proposition.

5. Philosophy:

(1) The Ego (q.v.), as distinguished from the object, or non-Ego; the mind considered as that in which knowledge inheres. (2)

"All knowledge is a relation, a relation between that which knows (in scholastic language the subject to which knowledge adheres) and that which is known (in scholastic language the object about which knowledge is conversant); and the contents of every act of knowledge are made up of elements, and regulated by laws, proceeding partly from its object and partly from its subject. . . . But philosophy being the science of knowledge, and the science of knowledge supposing, in its most fundamental and thorough-going analysis, the distinction of the subject and object of knowledge, it is evident that to philosophy the subject of knowledge would be by preeminence the subject, and the object of knowledge the object. It was therefore natural that the object and objective, the subject and subjective, should be employed by philosophers as simple terms, compendiously to denote the grand discrimination about which philosophy was constantly employed, and which no others could be found so precisely and promptly to express." *Burton: Reid's Works, (Notes B).*

(2) (See extract under Substratum).

subject-matter, s. The matter or thought submitted for consideration or treatment in a discussion, discourse, or statement.

"As to the subject-matter, words are always to be understood as having a regard thereto; for that is always supposed to be in the eye of the legislator, and all his expressions directed to that end." *Blackstone: Comment., § 3. (Intro.)*

sub-ject', *sub-get, *sub-lecte, v.t. [SUBJECT, a.]

1. To bring into subjection; to bring under power, dominion, or control; to subdue, to reduce.

"God in judgment just Subjects him from without to violent lords." *Milton: P. L., xii. 93.*

2. To make subservient.

"Subjected to his service angels' wings." *Milton: P. L., ix. 154.*

3. To put, place, or lay under.

"In one short view, subjected to our eye, Gods, emperors, heroes, ages, beauties lie." *Pope: Moral Essays, v. 32.*

4. To expose; to make liable or obnoxious.

"If the vessels yield, it subjects the person to all the inconveniences of an erroneous circulation." *Arbuthnot.*

5. To submit, to offer.

"God is not bound to subject his ways of operation to the scrutiny of our thoughts, and confine himself to do nothing but what we must comprehend." *Locke.*

*sub-ject-dóm, s. [Eng. subject, a.; -dom.] The state or condition of being a subject.

"No clue to its nationality, except in the political sense of subjectdom, therefore is available." *Greenwell: British Barrows, p. 606.*

sub-ject-éd, pa. par. & a. [SUBJECT, v.]

A. As pa. par.: (See the verb).

B. As adjective:

*1. Situated or being under, lower, or beneath; subjacent.

"Led them direct, and down the cliff as fast To the subjected plain." *Milton: P. L., xii. 640.*

*2. Having the qualities of a subject, as opposed to a sovereign.

"How can you say to me I am a king?" *Shaksp.: Richard II., III. 2.*

*3. Reduced to a state of subjection to another; enslaved.

4. Rendered liable or obnoxious; exposed, liable, subject.

*5. Due from a subject; becoming in a subject.

"Subjected tribute to commanding love." *Shaksp.: King John, I.*

sub-jec-tion, *sub-jec-ci-oun, *sub-jec-tion, s. [O. Fr. subjection, from Lat. subjectionem, accus. of subiectio; Fr. subjection; Sp. subjeccion; Ital. suggestione.]

1. The act of subjecting or subduing; the act of vanquishing and bringing under the power, authority, or dominion of another.

"After the conquest of the kingdom, and subjection of the rebels." *Hale.*

2. The state of a subject; the state or condition of being under the power, control, or authority of another.

"Such as refuse Subjection to his empire tyrannous." *Milton: P. L., xii. 82.*

sub-ject-ist, s. [Eng. subject; -ist.] One versed in subjectivism; a subjectivist.

sub-ject-ive, a. [Lat. subiectivus; Fr. subjeclif.]

I. Ordinary Language:

*1. Pertaining or relating to a subject in a political sense.

*2. Obedient, submissive.

"Which sadly when they saw How those had sped before, with most subjective a we Submit them to his sword." *Drayton: Poly-Olbion, a. 11.*

II. Technically:

1. Literature & Art: Applied to a production characterized by the prominence given to the individuality of the author or artist.

2. Metaph.: Relating to the subject, as opposed to the object.

"It will be well once for all to explain the modern use of the words subject and object-subjective and objective. The subject is the mind that thinks; the object is that which it thinks about. A subjective impression is one which arises in and from the mind itself; an objective arises from observation of external things. A subjective tendency in a poet or thinker would be a preponderating inclination to represent the moods and states of his own mind; whilst the writer who dwells most upon external objects, and suffers us to know little more of his own mind than that it has the power to reproduce them with truth and spirit, exhibits an objective bias." *Thomson: Laws of Thought, § 14.*

subjective-method, s.

Philos.: The method of investigation which moulds realities on its conceptions, endeavouring to discern the order of things, not by step-by-step adjustments of the order of ideas to it, but by the anticipatory rush of thought, the direction of which is determined by thoughts and not controlled by objects. (*G. H. Lewes: Hist. Philos., (ed. 1880), p. xxxiii.*)

sub-ject-ive-ly, adv. [Eng. subjective; -ly.] In a subjective manner; in relation to the subject; as existing in a subject or mind.

"The name of God taken subjectively, is to be understood of Christ." *Pearson: On the Creed, art. 2.*

sub-ject-ive-ness, s. [Eng. subjective; -ness.] The quality or state of being subjective; subjectivity.

sub-ject-iv-ism, s. [Eng. subjective(e); -ism.] Philosophy:

1. The doctrine that human knowledge is, in its constitution, purely subjective, and therefore relative; and that objective truth can never be predicated of it.

"These men were followed by a pommer generation of Sophists, who perverted the philosophical principle of subjectivism more and more till it ended in mere frivolity." *Veberweg: Hist. Philos., (Eng. ed.), l. 72.*

2. The doctrine of Kant as to the relativity

of human knowledge. His teaching on the subject is thus summarized by Lewes (*Hist. Philos., (ed. 1880), pp. 516, 517.*)

(1) A knowledge of things *per se* (*Dinge an sich*) [=*Noumena*] is impossible, so long as knowledge remains composed as at present; consequently Ontology, as a science, is impossible.

(2) The existence of an external world is a necessary postulate, but its existence is only logically affirmed.

(3) Our knowledge, though relative, is certain. We have ideas independent of experience, and these ideas have the character of universality and necessity. Although we are not entitled to conclude that our subjective knowledge is completely true as an expression of the objective fact, yet we are forced to conclude that within its own sphere it is true.

(4) The veracity of consciousness is established.

(5) With the veracity of consciousness is established the certainty of morals.

3. The subjective method (q.v.).

"The subjectivism of Descartes." *T. Davidson: PAR. System of A. Romini, p. xxii.*

sub-ject-iv-ist, s. [Eng. subjective(e); -ist.] One who supports the doctrine or doctrines of Subjectivism.

"This interpretation, which would make of Spinoza a Subjectivist, is not in harmony with the general character of his philosophy." *Veberweg: Hist. Philos., (Eng. ed.), II. 65.*

sub-jec-tiv-ity, s. [Eng. subjective(e); -ity.]

1. The quality or state of being subjective.

2. That which is treated subjectively; that which relates or pertains to self, or to impressions made upon the mind.

3. The individuality of an author or artist, as exhibited in his works.

"This subjectivity, or egotism, crippled his invention and made his *Tales* little better than prose poems." *Scribner's Magazine, May, 1880, p. 117.*

sub-ject-less, a. [Eng. subject; -less.] Having no subjects.

sub-ject-ness, s. [Eng. subject; -ness.] The quality or state of being subject; subjection.

sub-ject-ure, s. [Eng. subject; -ure.] Submission.

"Performs not to it all subjection due." *Davies: Wittes Pilgrimage, st. 32.*

"That thirteenth book, to which it is subjoined." *Cudworth: Intel. System, p. 340.*

sub-join-der, s. [From *subjoin*, an analogy of *rejoinder*.] A remark following or subjoined to another; a rejoinder.

sub-ju-gate, v.t. [Lat. *subjugatus*, pa. par. of *subjugo* = to bring under the yoke; sub = under, and *jugum* = a yoke.]

1. To subdue and bring under the yoke by superior force; to conquer and compel to submit to the government or authority of another; to reduce to subjection.

"She had subjugated great cities and provinces." *Macaulay: Hist. Eng., ch. 11.*

2. Used also where moral instead of material force is the instrument of conquest; to subdue, to vanquish, to crush.

"Her understanding had been completely subjugated by him." *Macaulay: Hist. Eng., ch. 12.*

sub-ju-ga-tion, s. [Fr., from Lat. *subjugationem*, accus. of *subjugo*, from *subjugo*, pa. par. of *subjugo* = to subjugate (q.v.).] The act of subjugating or of bringing under the power, dominion, or government of another; subjection; the state of being subjugated.

"He would not to punish them, acquiesce in the subjugation of the whole civilized world." *Macaulay: Hist. Eng., ch. xii.*

sub-ju-ga-tor, s. [Lat.] One who subjugates or subdues; a conqueror, a subduer.

sub-juñc-tion, s. [Lat. *subjunctio*, pa. par. of *subjungo* = to subjoin (q.v.).] The act of subjoining; the state of being subjoined.

"The verb undergoes in Greek a different formation; and in dependence upon, or subjunction to, some other verb." *Clarke: Grammar.*

sub-juñc-tive, a. & s. [Lat. *subjunctivus* = joining on at the end, subjunctive, from *subjunctus*, pa. par. of *subjungo* = to subjoin (q.v.); Fr. *subjunctif*; Sp. & Port. *subjuntivo*; Ital. *subiunctivo, soggiuntivo*.]

6. Elevated by joy; elate, excited.

*Their hearts were found and sublime, Drunk with idolatry, drunk with wine.—Milton: Samson Agonistes, l. 669.

B. As subst. (with the def. article): That which is sublime; as,

1. Something lofty or grand in style.

*The sublime is a certain eminence or perfection of language.—Smith: Longinus; On the Sublime.

2. That which is grand and awe-inspiring in the works of nature or art, as distinguished from the beautiful.

† Hamilton (Metaph., ed. Mansel, ii. 512-16) thus distinguishes between the sublime and the beautiful: "The feeling of pleasure in the sublime is essentially different from our feeling of pleasure in the beautiful. The beautiful awakens the mind to a soothing contemplation; the sublime rouses it to strong emotion. The beautiful attracts without repelling; whereas the sublime at once does both; the beautiful affords us a feeling of unmingled pleasure, in the full and unimpeded activity of our cognitive powers; whereas, our feeling of pleasure is a mingled one of pleasure and pain—of pleasure in the consciousness of the strong energy, of pain in the consciousness that this energy is vain. . . . That we are at once attracted and repelled by sublimity arises from the circumstance that the object which we call sublime is proportioned to one of our faculties, and disproportioned to another; but as the degree of pleasure transcends the degree of pain, the power whose energy is promoted must be superior to that

power whose energy is repressed." He then proposes, instead of the ordinary division of the Sublime into the Theoretical and Practical (or, according to Kant, the Mathematical and Dynamical), a three-fold division: (1) The Sublime of Extension or Space; (2) Prostration, or Time; (3) Intension, or Power; and quotes the following passage from Kant as an admirable example of the sublime in all its three forms:

"Two things there are, which, the oftener and the more steadily we consider them, fill the mind with an ever new, an ever rising admiration and reverence—the starry Heavens above, the Moral Law within. Of neither am I compelled to seek out the reality, as veiled in darkness, or only to conjecture the possibility, as beyond the hemisphere of my knowledge. Both I contemplate lying clear before me, and connect both immediately with my consciousness of existence. The one departs from the place I occupy in the outset world of sense; expands beyond the bounds of imagination this conception of my body with worlds lying beyond worlds, and systems blending into systems; and protends it into the illimitable times of their periodic movement—to its commencement and continuance. The other departs from my invisible self, from my personality, and represents me in a world, truly infinite indeed, but whose infinity can be tracked out only by the intellect, with which also my connection, unlike the fortuitous relation I stand in to all worlds of sense, I am compelled to recognise as universal and necessary. In the former, the view of a countless multitude of worlds annihilates, as it were, my importance as an animal product, which, after a brief and that incomprehensible endowment with the power of life, is compelled to refund its constituent matter to the place—its self as a atom in the universe—on which it grows. The aspect of the other, on the contrary, elevates my worth as an intelligence even without limit; and that through my personality, in which the moral law reveals a faculty of life independent of my animal nature, nay, of the whole material world; at least, if it be permitted to infer as much from the regulation of my being, which a conformity with that law exacts; proposing, as it does, my moral worth for the absolute end of my activity, conceding no compromise of its imperative to a necessitation of nature, and insisting on its inflexible conditions and boundaries of my present transitory life."

Hamilton adds: "Here we have the extensive sublime in the heavens and their interminable space, the protensive sublime in their illimitable duration, and the intensive sublime in the omnipotence of the human will as manifested in the unconditional imperative of the moral law."

*sublime-geometry, s. A name given by the older mathematicians to the higher parts of geometry, in which the infinitesimal calculus, or something equivalent, was employed.

Sublime Porte, s. [PORTE, ¶.]

sub-līme', v.t. & i. [Lat. sublimo, from sublimis = sublime (q.v.); Fr. sublimier.]

4. The emotion produced by that which is sublime; a feeling produced by the contemplation of great or grand scenes and objects, or of exalted excellence; a mingled emotion of astonishment and awe excited by the contemplation of something sublime.

***sub-lin-ě-ā-tion, s.** [Prof. sub., and Eng. lineation (q.v.)] The mark of a line, or lines, under a word or sentence; underlining.

"I have compared his transcription, in which he hath made use of sublineation in lieu of asterisks."—Letter to Archbishop Usher, p. 164.

sub-lin-gual (u as w), a. [Prof. sub., and Eng. lingual (q.v.)]

1. *Anat.*: Situated or being under the tongue; as, the sublingual gland, the sublingual artery.

*2. *Pathol.*: Placed under the tongue.

"These sublingual humours should be intercepted, before they mount to the head, by sublingual pills."—Barcees.

sub-lin-gual-gland, s.

Anat.: The smallest of the three salivary glands. It is situated along the floor of the mouth, where it forms a ridge between the tongue and the gums of the lower jaw, covered only by the mucous membrane.

sub-lin-tion, s. [Lat. *sublitus*, pa. par. of *sublino* = to amear, to lay on as a ground colour.]

Paint.: The act or art of laying the ground colour under the perfect colour.

***sub-lit-tōr-ā, a.** [Prof. sub., and Eng. littoral (q.v.)] Under the shore.

sub-lōb-u-lar, a. [Prof. sub., and Eng. lobule.] Situated under a lobe or lobule; as, the sublobular veins of the liver.

***sub-lū-nar, a.** [Prof. sub., and Eng. lunar (q.v.)] Situated beneath the moon; sublunary.

"Now had night measured with her shadowy cone Half way up hill this vast sublunary vault."—Milton: *P. L.*, IV, 777.

sub-lū-nar-ý, *sub-lū-nar-ý, a. & s. [Eng. sublunary; -y.]

A. As adjective:

1. Situated beneath the moon.

"Man like this sublunary world, is born The sport of two cross planets, love and scorn."—Shakespeare: *The Microcosm*.

2. Pertaining to this world; terrestrial, earthly, worldly.

"To seek no sublunary rest beside."—Cresper: *Fest*, v. 476.

***B. As subst.**: Any worldly thing.

"These sublunaries have their greatest freshness plac'd in only hope."—Pepham: *Resolves*, pt. II, res. 66.

sub-lux-ā-tion, s. [Prof. sub., and Eng. luxation (q.v.)]

Surg.: An incomplete or partial luxation; a sprain.

sub-mām-mar-ý, a. [Prof. sub., and Eng. mammary (q.v.)] Situated or being under the mamma or paps.

sub-mar-ġin-ā, a. [Prof. sub., and Eng. marginal (q.v.)]

Bot.: Situated near the margin.

sub-mar-rine, a. & s. [Prof. sub., and Eng. marine (q.v.)]

A. As adj.: Situated, being, existing, acting, or growing at some depth beneath the surface of the sea; remaining or acting at the bottom or under the surface of the sea.

"By the appellation of submarine regions it is not to be supposed that the places so called are below the bottom of the sea, but only below the surface of it."—Boyle: *Works*, III, 322.

B. As subst.: A submarine plant.

submarine-battery, s. A vessel capable of being submerged and maintained at a given depth below the surface of the water, and provided with means for penetrating the hull of an enemy's ship below the water-line, or of blowing her up—usually a torpedo arrangement, which may be detached from the battery and attached to the bottom of the ship.

submarine-boat, s.

Naut.: A boat capable of being propelled under the water. The first was probably that constructed by Drebbel, a Dutchman, for James I., and Robert Fulton made an effort in the same direction in 1801, constructing a boat in which he remained for four hours at a depth of 25 feet, and successfully blew up an old vessel with a torpedo. In 1863 the Confederates succeeded by a submarine boat in sinking the Federal war vessel *Housatonic*, in Charleston Harbor, the boat going down with the vessel. Of later successful experiments with submarine boats may be named those made in France in 1889 and later. The boats used had electricity for their motive power. Other countries have made similar experiments, and some good results have been obtained in the United States. Yet submarine navigation, for warlike purposes, must always be dangerous. Little speed is attainable, and the limit of vision is small, which detracts from usefulness.

submarine-cable, s.

Telegr.: A wire, or combination of wires, protected by flexible non-conducting water-proof material, designed to rest upon the bottom of a body of water, and serve as a conductor for the currents transmitted by an electro-magnetic telegraphic apparatus.

submarine-denudation, s.

Geol.: Denudation produced by the action of marine currents on the bed of the sea. Though during storms the sea is agitated only to the depth of a few fathoms from the surface, yet extensive currents can operate at greater depths; besides which the now existing depth of particular portions of the sea may have been much less at some former periods. The amount of denudation which takes place on the sea cliffs is probably only an insignificant fraction of the whole volume of marine denudation. (*Lyell*.)

submarine-forest, s.

Geol.: The remains of a forest beneath the present level of the sea. Such a forest exists along the northern shore of Fifeshire, and beyond that area. It consists of a peat bed, with the roots, leaves, and branches of trees. The Rev. Dr. Fleming attributed it to the encroachment of the sea; Lyell (*Princ. of Geol.*, ch. xx.) thought that it more probably arose from subsidence. A smaller forest of oak, yew, &c., with their trunks and roots as they grew, occurs at the mouth of the Parret in Somersetshire. It was described by Mr. Leonard Horner in 1815, and attributed by him to subsidence. (*Ibid.*, ch. xx.) A forest beneath the sea-level at Bournemouth, discovered by Mr. Charles Harris in 1831, is believed to have reached the present low level by the encroachment of the sea. (*Ibid.*, ch. xviii.) Many others are known.

submarine-lamp, s. A lamp designed to burn and show light under water. One was used in exploring the breaches of the Thames Tunnel, 1825-27, and others have since been constructed.

submarine-telegraph, s. [TELEGRAPH.]

submarine-torpedo, s. [TORPEDO.]

submarine-valve, s. A port or valve in the side of a vessel, opening beneath the surface of the water, for the purpose of protruding a torpedo, the muzzle of a gun to be fired under water, or some other offensive weapon.

submarine-volcano, s. [VOLCANO.]

sub-māx-ī-lar-ý, a. [Prof. sub., and Eng. maxillary (q.v.)] Situated or being under the jaw.

submaxillary-gland, s.

Anat.: One of the three salivary glands. It is situated immediately below the base and the inner surface of the inferior maxilla.

***sub-mē-dī-ā, *sub-mē-dī-ān, a.** [Prof. sub., and Eng. medial, median (q.v.)]

I. Ord. Lang.: Situated or being under the middle.

II. Geol.: Of or belonging to the so-called Transition rocks (q.v.).

sub-mē-dī-ānt, s. [SUBMEDIAL.]

Music.: The sixth note of the diatonic scale, or middle note between the octave and subdominant; thus, in the scale of C, A is the submediant.

sub-mēn-tal, a. [Lat. sub = under, and mentum = the chin.]

Anat.: Situated or being under the chin; as, a submental artery or vein.

sub-mērgē, v. t. & i. [Fr. *submerger*, from Lat. *submergo*, from sub = under and mergo = to plunge; Sp. *sumergir*; Port. *submergir*; Ital. *sommergere*.]

A. Transitive:

1. To plunge or put under water.

2. To cover with water; to overflow with water; to inundate, to drown.

"So half my Egypt was submerged, and made A cistern for sea's snakes."—Shakespeare: *Antony & Cleopatra*, II, 5.

***B. Intrans.**: To plunge under water; to be buried or covered, as by a fluid; to sink out of sight.

sub-mērged', pa. par. or a. [SUBMERGE.]

submerged-pump, s. A well or cistern pump which is placed under water, the pump-rod and discharging pipe reaching from the surface of the ground to the pump.

sub-mērg-ēnce, s. [Lat. *submergens*, pr. par. of *submergo* = to submerge (q.v.)] The act of submerging or plunging under water; submeration.

sub-mērg-ī-ble, a. That may be submerged; submersible.

***sub-mērsē, v. i.** [Lat. *submersus*, pa. par. of *submergo* = to submerge (q.v.)] To submerge; to plunge under water; to drown.

1. The act of submerging or putting under water or other fluid; the act of drowning or overflowing.

2. The state of being submerged or put under water or other fluid, or of being overflowed, inundated, or drowned.

***sub-mīn-ī-s-tēr, v. t. & i.** [Lat. *subministrō*, from sub = under, and ministrō = to attend, to serve.]

A. Trans.: To supply, to afford, to yield, to minister.

"The inferior animals have subministrated unto man the invention or discovery of many things both natural and artificial and medicinal."—Hale: *Orig. of Mankind*, p. 154.

B. Intrans.: To serve, to subservise; to be useful.

"Passions, as fire and water, are good servants, but bad masters, and subminister to the best and worst purposes."—L'Esrange.

***sub-mīn-ī-s-trānt, a.** [SUBMINISTER.]

Subservient, subordinate.

"The attending of that which is subservient and subministrant."—Bacon: *Church of England*.

3. The act of calming down; the state of becoming calm or quiet.

"By the subdual or subsidence of the more violent passions."—*Warburton: Sermons, vol. 1, ser. 32.*

II. Geol.: The sinking of the land, or of a sea, lake, or river-bed, the result in very many cases of earthquake action. In the Lisbon earthquake of Nov. 1, 1755, a new quay disappeared, with all the people who had taken refuge upon it, the depth of water where it sunk being a hundred feet. On June 16, 1819, a violent earthquake occurred at Cutch, in the delta of the Indus, and, among other effects of the convulsion, the estuary at the fort of Luckput, previously a foot deep at low water, was increased to eighteen feet, the adjacent village of Sindree being submerged to the house-top. Other earthquakes have produced similar effects. Subsidence is in progress at present over wide areas in the Pacific. [ATOLL.] It may take place in elevated inland regions, and the inhabitants not be aware that a change of level has occurred. Lyell (*Prin. Geol.*, ch. XI, xxxiii.) suggested that subsidence might arise from the melting of porous rocks, which, when fluid and subjected to great pressure, occupied less room than before; or which, by passing from a pasty to a crystalline condition, might suffer contraction; or from the subtraction of lava driven to some volcanic orifice and there forced outwards; or from the shrinking of solid and stony masses during refrigeration. Prof. Seeley considers that depression is inseparable from elevation just as every synclinal

fold is a portion of an anticlinal. Hence, beyond the geographical limit of upheaval, a coast is found to be subsiding, and the regions where this condition is seen are necessarily adjacent to those which are being raised.

sub-sid-i-ar-ý-ly, adv. [Eng. *subsidiary*; -ly.] In a subsidiary manner or degree.

sub-sid-i-ar-ý, a. & s. [Lat. *subsidiarius* = belonging to a reserve; *subsidium* = a reserve, aid; Fr. *subsidiare*.] [SUBSINÝ.]

"I cannot," he wrote, "offer a suggestion without being met by a demand for a subsidy."—*Maccaulay: Hist. Eng., ch. xix.*

2. Specif.: An aid or tax formerly granted by Parliament to the Crown to meet urgent or pressing necessities, and levied on every subject of ability, according to the value of his lands or goods.

"Subsidies were such as were imposed by parliament upon any of the staple commodities before mentioned, over and above the customs antiqua et magna."—*Blackstone: Comment., bk. 1, ch. 4.*

3. A sum paid, often under a treaty, by one government to another, sometimes to secure its neutrality, but more frequently to meet the expenses of carrying on a war.

[Eng. Hist.: Subsidies were the successors of scutages, hydage, and tallage. By 14 Edw. III., c. 20, passed in 1340, a subsidy was granted the king to defray the expense of the French war. The first subsidies amounted to 4s. a pound for lands, 2s. 6d. for goods, and twice as much for aliens. The clergy first taxed themselves in Convocation, the Parliament afterwards confirming the vote; the rate was 4s. in the pound on the value of their livings. The last ecclesiastical subsidies given were confirmed by 15 Charles II., c. 10, after which taxation was levied indiscriminately upon clergy and laity. The last lay subsidy was in 1670. Britain granted subsidies to various continental powers to oppose France during the wars of the first Revolution.

*2. Continuance; continued life.

3. That which furnishes support to animal life; means of support; support, livelihood.

"By the means of subsistence, I understand not the means of superfluous gratifications; but that present competency which every individual must possess in order to be in a capacity to derive a support from his industry in the proper business of his calling."—*Bishop Horsley: Sermons, vol. 111, ser. 28.*

4. The state of being subsistent or inherent in something else; inherence.

*5. Anything that exists or has existence.

"We know as little how the union is dissolved, that is the chief of these differing subsistencies that composed us, as how it first commenced."—*Hamilt.*

sub-sist-ént, a. [Lat. *subsistens*, pr. par. of *subsisto* = to subsist (q.v.).]

1. Having existence or real being; existing

"Such as deny there are spirits subsistent without bodies, will with more difficulty affirm the separated existence of their own."—*Brown: Vulgar Errors, bk. 1, ch. 2.*

2. Inherent.

"No sensible qualities, as light, and colour, and heat, and sound, can be subsistent in the bodies themselves absolutely considered, without a relation to our eyes, and other organs of sense."—*Bentley: Sermon 2.*

sub-sóil, s. [Pref. *sub-*, and Eng. *soil*, s. (q.v.).] The under-soil; the bed or stratum of earth immediately below the surface-soil.

subsoil-plough, s. A form of plough having a share and standard, but no mould-board. It follows in the furrow made by an ordinary plough, and loosens the soil to an additional depth without bringing it to the surface.

sub-sóil, v. t. [SUBSOIL, s.]

Agrie.: To employ a subsoil-plough on; to cultivate with a subsoil-plough.

***sub-só-lar, *sub-só-lar-ý, a.** [Pref. *sub-*, and Eng. *solar*, *solar* (q.v.).] Situated or being under the sun; terrestrial.

"Thereby the causes and effects of all Things done upon this *sub-solar* ball."—*Brome: Paraphr. upon Eccles. 1.*

sub-stáge, s. [Pref. *sub-*, and Eng. *stage*, s.]

Microscopy: A subsidiary apparatus underneath the ordinary Stage (q.v.) of the better class microscopes, capable of being made to approach or recede by rack-and-pinion movement, with centring screws and fittings for carrying various polarizing and illuminating apparatus. Its purpose is the precise adjustment of the latter to the object. Occasionally it is fixed to a swiveling arm for further adjustment in azimuth, when it is called a Radial or Swinging Substage.

sub-stán-ce, *sub-stá-nce, s. [Fr. *substance*, from Lat. *substantia* = essence, material, substance, from *substans*, pr. par. of *subsisto* = to stand under, to exist; *sub* = under, and *sto* = to stand.]

I. Ordinary Language:

1. That of which a thing consists or is

fáte, fát, fáre, amidst, whát, fáll, father; wê, wêt, hère, camél, hêr, thêre; pine, pít, síre, sír, marine; gô, pôt, oz. wôre, wêlf, wôrk, whô, sôn; müte, cüb, cüre, uníte, cür, rüic, füll; trý, Sýrian. æ, œ = é; ey = ä; qu = kw.

made up; body, matter, material; kind or character of matter.

As this substance as the air. Shakespeare: Romeo & Juliet, I. 4. 2. That which is real; that which makes a thing actual; that which constitutes the thing itself, and not merely a vain semblance or imaginary existence.

He takes false shadows for true substances. Shakespeare: Titus Andronicus, III. 2.

3. Anything existing by itself; a being.

That little seeming substance. Shakespeare: Lear, I. 1.

4. The most important elements in any existence; the characteristic constituents collectively; the essential, main, or material part; the essence; the essential import.

Their [letters] cold intent, tenour and substance. Shakespeare: 3 Henry IV., IV. 1.

5. Solidity, firmness, substantiality.

6. Body, strength.

7. Goods; material means and resources; riches, wealth, resources, property.

Cannot amuse unto a hundred marks. Shakespeare: Comedy of Errors, I. 1.

II. Technically:

1. Bot.: Texture. (Lindley.)

2. Philos.: That which is and abides (Coleridge: Aids to Reflection, p. 6) as distinguished from accident, which has no existence of itself, and is essentially mutable. The derivation of the word in this sense is, according to Augustinus (de Trinitate, vii. 4) from the Latin substare, and so = that which subsists of or by itself; Locke prefers to connect it with the Lat. substare = to stand under, to support, to uphold, and says (Human Understanding, bk. ii., ch. xxiii., § 2) "The idea, then, to which we give the name of substance, being nothing but the supposed, but unknown support of these qualities [accidents] we find existing, which we imagine cannot subsist without something to support them, we call that support substantia, which, according to the true import of the word is in plain English [something] standing under and upholding."

The first idea of substance is probably derived from the consciousness of self—the conviction gained by experience that, whilst sensations, thoughts, and purposes are continuously changing, the Ego constantly remains the same. Observation teaches us that bodies external to us remain the same as to quantity or extension, though their colour and figure, their state of motion or of rest may be changed. But as every power and property of a thing, every mode in which it affects a sentient being, is an accident, and all these accidents may be either actually or mentally abstracted, the question arises, What is left after all the accidents are thus abstracted?—What is the substance? To meet the difficulty, it was assumed that everything possesses, besides its accidents, an unknown substratum on which these accidents rest, or in which they inhere. Locks, without departing from the knowable, placed the substance of an object in some essential or fundamental quality, the presence of which maintained, while its removal destroyed, the identity of the object (ESSENCE, s. II. 1.); and Fichte made it consist in a synthesis of attributes; holding that these, synthetically united, gave substance, whilst substance analysed gave attributes.

When we speak of substance, we mean only what persists or abides in time, and we contrast the permanent with the changes of its phases. But the substance is not a separate thing over and above its modes or manifestations. It is simply that change or alteration cannot be understood except in reference to something permanent. It is easy, then, to say that substance is a fiction of thought. Kant's reply to that charge is, that to treat successive sensations as having one source common to them (what we must constantly do in our experience), implies, as a ground of its possibility, an identity or persistency in the consciousness which serves as the common vehicle of the successive feelings. Unless thought supplied this persistent, permanent background, it would be impossible for us to realise the relations in time known as succession and simultaneity. —Wallace: Kant, p. 175.

3. Theol.: Essence, nature, being. Used specially of the Three Persons in the Godhead, who are said to be the same in substance, i.e., to possess one common essence.

Principle of substance: Philos.: The law of the human mind by which every quality or mode of being is referred to a substance.

sub'stance, v.t. [SUBSTANCE, s.] To furnish or endow with substance or property; to enrich.

Substanced with such a precious deal of well-got treasure. Chapman: Homer: Odyssey IV.

sub'stance-less, a. [Eng. substance; -less.] Having no substance; unsubstantial, empty.

Thus substanceless thy state. Coleridge: Human Life.

sub'stant, a. [Lat. substans.] Substantial.

sub'stān-ti-g (ti as sh), s. [Lat.] Ultimate substance upon which the properties of matter rest. [SUBSTANCE, s., II. 2.]

sub'stān-ti-ā (ti as sh), 'sub-stān-ci-āll, a. & s. [Fr. substantiel, from Lat. substantialis, from substantia = substance (q.v.).]

A. As adjectives:

1. Real; actually existing.

To give thee being I lent Out of my side thee, earnest my heart, Substantial life. Milton: P. L., IV. 488.

2. Real, true; not seeming or imaginary; not illusive.

Too flattering-sweet to be substantial. Shakespeare: Romeo & Juliet, II. 2.

3. Corporeal, material.

Most ponderous and substantial things. Shakespeare: Measure for Measure, III. 2.

4. Having firm or good substance; strong, solid, stout; as, substantial cloth, a substantial meal.

5. Firm, strong.

Christes church can never erre in any substantial point. —Sir T. More: Works, p. 153.

8. Of considerable amount; as, substantial damages.

B. As subst. (PL.): Essential parts. [SUBSTANTIALIA.]

Although a custom introduced against the substantialities of an appeal be not valid, as that it should not be appealed to a superior but to an inferior judge, yet a custom may be introduced against the accidentia of an appeal. —Ayliffe: Parergon.

sub'stān-ti-ā-ly-a (ti as sh), s. pl. [Lat. neut. pl. of substantialis = substantial (q.v.).]

Scotts Law: Those parts of a deed which are essential to its validity as a formal instrument.

sub'stān-ti-ā-l-ism (ti as sh), s. The doctrine that, behind the phenomena of consciousness and of nature, there are real substances, whether mental or corporeal.

sub'stān-ti-ā-l-ty (ti as sh), s. [Eng. substantialis; -ty.]

1. The quality or state of being substantial, or of having real existence; reality.

The moral attributes of the Deity, and the substantiality of the soul. —Warburton: Bolingbroke's Philosophy, let. 2.

2. Corporeity, materiality.

The soul is a stranger to such gross substantiality, and was nothing of these. —Glanville: Sceptic, ch. IV.

3. Firmness, strength, solidity.

sub'stān-ti-ā-izo (ti as sh), v.t. [Eng. substantialis; -ize.] To render substantial.

sub'stān-ti-ā-l-ly (ti as sh), 'sub-stān-ci-āll-ly, adv. [Eng. substantialis; -ly.]

1. In a substantial manner; in manner of a substance; with reality of existence.

In Him all his Father shone Substantially expressed. Milton: P. L., III. 110.

2. In a substantial manner; strongly, solidly.

And, in one part, a minister with the tower Truly expressed a place for bell Or clock to toll from. Wordsworth: Miscellaneous Sonnets.

3. Truly, really; not falsely or hypocritically.

The laws of this religion would make men, if they would truly observe them, substantially religious towards God, chaste, and temperate. —Tillotson.

4. Strongly, vigorously, firmly.

Charles, hauntye thus the rule and governance, ruled it well and substantially. —Fabyan: Chronicle, ch. xlv.

5. In substance; in the main; essentially; by including the material or essential part.

That which is created, being supposed to differ essentially or substantially, from that which is uncreated. —Cudworth: Intellect. System, p. 608.

6. With a competence of goods or substances.

sub'stān-ti-ā-nēss (ti as sh), s. [Eng. substantialis; -ness.] The quality or state of

being substantial; substantiality, strength, firmness, solidity.

In degree as in substantialitas (the language) next above the doctrine, containing the third, and adorning the second story. —Rutilius Wottonianus, p. 24.

sub'stān-ti-ā (ti as sh), s. pl. [SUBSTANTIAL, B.]

sub'stān-ti-āte (ti as sh), v.t. [Eng. substantia; -iate.]

1. To give substance or reality to; to make to exist; to make real or actual.

He would not embitter their enjoyments, but he would sweeten and substantiate them, by giving them a better foundation. —Knox: Works, vol. vi., ser. 5.

2. To establish by proof or competent evidence; to prove, to verify; to make good.

The evidence of the most infamous of mankind was ready to substantiate every charge. —Macaulay: Hist. Eng., ch. vi.

sub'stān-ti-ā-tion (ti as sh), s. [SUBSTANTIATE.] The act of substantiating or proving; proof, evidence.

sub'stān-ti-ā-ly, a. [Eng. substantiv(e); -al.] Pertaining to or of the nature of a substantive; as, the substantial use of a word.

sub'stān-tive, 'sub-stān-tif, 'sub-stān-tyf, a. & s. [Fr. substantif, from Lat. substantivus = self-existent; Sp. substantive.]

A. As adjective:

1. Betokening or expressing existence; as, the substantive verb to be.

2. Depending on itself; independent.

He considered how sufficient and substantivus this land was to maintain itself, without any aid of the foreigner. —Bacon.

3. Solid, enduring, firm, substantial.

B. As substantive:

Gram.: A noun; the part of speech which expresses something that exists, either material or immaterial.

Every noun which in conjunction with a verb makes a complete sentence . . . is called a substantive. —Wilkins: Real Character, pt. III, ch. I.

substantive-colours, s. pl.

Dyeing: Colours which, in the process of dyeing, remain fixed or permanent without the intervention of other substances, as distinguished from adjective colours, which require the aid of mordants to fix them.

sub'stān-tive, v.t. [SUBSTANTIVE, a.] To convert into or use as a substantive.

The word . . . is not a diminutive, as some have conceived, but an adjective substantiv'd. —Cudworth: Intellect. System, p. 264.

sub'stān-tive-ly, adv. [Eng. substantivus; -ly.]

1. Ord. Lang.: In substance; essentially, substantially; in reality.

2. Gram.: In manner of a substantive; as a substantive or noun.

Moreover it is to be observ'd, that the personal pronouns, and any of the rest being us'd substantively, are capable of number and case. —Wilkins: Real Character, pt. III, ch. II.

sub'stān-tive-ness, s. [Eng. substantivus; -ness.] The quality or state of being substantive.

sub'stēr-nal, a. [Lat. sub = under, and sternum = the breast-bone.]

Anat.: Situated or being under the sternum; as, the subternal lymphatics.

sub'stī-le, s. [SUBSTYLE.]

sub'stī-tūte, 'sub-sty-tūte, v.t. [SUBSTITUTE, a.]

1. To put one in the place of another; to put in exchange.

Reject him, lest he darken all the flock And substitute another from thy stock. Dryden: Virgil; Georgic III. 599.

2. To invest or appoint with delegated power.

But who is substituted 'gainst the French, I have no certain notice. Shakespeare: 3 Henry IV., I. 5.

sub'stī-tūte, a. & s. [Fr. substitut = substitute, from Lat. substitutus, pa. par. of substituo = to lay under, to put instead of: sub = under, and statuo = to place; Sp. & Port. substituto; Ital. sostituto.]

A. As adj.: Substituted; put in place of another.

It may well happen that this pope may be deposed, and another substitute in his room. —Sir T. More: Works, p. 1427.

bell, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del.

B. As substantive:

1. A person put in the place of another to answer the same purpose; one who acts for another; one who takes the place of another. *Specif.*: One who is hired to serve in place of another who has been drafted into military service. (U.S.)

2. Something put in the place of another; one thing serving the purpose of another.

"Manner is all in all, what'er is writ
The substitute for genius, sense and wit."
Comper: Table Talk, 542.

sub-sti-tū-tion, * **sub-sti-tu-ti-on**, *s.* [Fr., from Lat. *substitutionem*, accns. of *substitutio*, from *substituere* = substitute (q.v.); Sp. *substitución*; Ital. *sustituzione, sostituzione.*]

I. Ordinary Language:

1. The act of substituting or putting one person or thing in the place of another to serve the same purpose.

"The Rabbins of the Jews who lived since the dispersion of the nation, thought all would be well if for tutelet deities they substituted tutelet angels. From this substitution the system which I have described arose."—*Sp. Heresy: Sermons, vol. II, ser. 29.*

2. The state of being substituted or put in the place of another to serve the same purpose.

* 3. The office of a substitute; delegated authority.

"He did believe
He was the duke from substitution,
And executing th' outward face of royalty."
Shakesp.: Tempest, I. 2.

II. Technically:

1. *Alg.*: The operation of putting one quantity in place of another, to which it is equal, but differently expressed.

2. *Chem.*: A term denoting the replacing of one element or group of elements for another. It is the great agent, and covers nearly the whole field of chemical change, and is always attended with some alteration of properties in the compound, the alteration increasing with the amount of the substitution. (1) When chlorine replaces hydrogen in marsh gas, forming hydrochloric acid and methylic chloride, $CH_4 + Cl_2 = HCl + CH_3Cl$. (2) When an alcohol radical replaces chlorine, as in trichloride of phosphorus, $3Zn(C_2H_5)_2 + 2PCl_3 = 3ZnCl_2 + 2P(C_2H_5)_3$. (3) A basylous or chlorous radical is replaced one for the other, as when nitrate of silver is decomposed by chloride of sodium, $AgNO_3 + NaCl = NaNO_3 + AgCl$. (4) When hydrogen is replaced by an alcohol radical, as in the case of acting on ammonia with iodide of ethyl, $H_2N + C_2H_5I = HI + C_2H_5N$. (See SALTS, EQUIVALENTS.)

3. *Gram.*: Syllepsis (q.v.).

4. *Law*:

(1) *Civil Law*: A conditional appointment of an heir.

(2) *Scots Law*: The enumeration or designation of the heirs in a settlement of property.

5. *Theol.*: The doctrine that in the Crucifixion Christ was divinely substituted for, or took the place of, the elect (CALVINISM), or of all mankind (ARMINIANISM), obeying the law in their stead, suffering the penalty, expiating their sins, and procuring for them salvation.

[**ATONEMENT.**] Used also of the principle involved in the bloody sacrifices of the Jewish economy (in which the animals were types of Christ), and in a still wider sense of the offering of the lower animals in the place of men, and of unbloody in the place of bloody sacrifices in ethnic religions. [SACRIFICE, s., II. 1. (4).]

* **sub-sti-tū-tion-al**, *a.* [Eng. *substitution*; -al.] Pertaining to or implying substitution; supplying the place of another.

* **sub-sti-tū-tion-al-ly**, *adv.* [Eng. *substitutional*; -ly.] In a substitutional manner; by way of substitution.

* **sub-sti-tū-tion-ar-ly**, *a.* [Eng. *substitution*; -ary.] Pertaining to or making substitution; substitutional.

* **sub-sti-tū-tive**, *a.* [Eng. *substitut(e)*; -ive.] Making substitution; tending to afford or provide substitution; capable of being substituted.

"These substitutive particles, which serve to supply the room of some sentence or complex part of it, are still interjections."—*Widdin: Real Character, pt. III, ch. II.*

* **sub-sti-tū-tōr-ly**, *adv.* [Eng. *substitut(e)*; -ory.] Substitutional; capable of being substituted for another.

* **sub-stract**, *v.t.* [Formed from *sub* = under, and *traho* = to draw, on an erroneous supposed analogy with *abstract* (q.v.).]

1. To subtract.

"Whatever time and attendance we bestow upon one thing, we must necessarily subtract from another."
—*Scott: Christian Life, pt. I, ch. IV.*

2. To withdraw.

"Subtracting his gracious direction and assistance, he giveth them over to their own hearts' lusts."
—*Barrow: Sermons, vol. III, ser. II.*

* **sub-stract-ion**, *s.* [SUBSTRACT.] Subtraction. (Now only in vulgar use.)

"I cannot call this place Tully's nor my own, being much altered not only by the change of the style, but by addition and subtraction."—*Denham.*

* **sub-stract-tōr**, *s.* [Eng. *subtract*; -or.] One who subtracts; a subtracter; hence, a detractor, a slanderer.

"They are scoundrels and subtractors that say so of him."
—*Shakesp.: Twelfth Night, I. 2.*

* **sub-strate**, *s.* [SUBSTRATE, *v.*] A substratum (q.v.).

* **sub-strate**, *v.t.* [Lat. *substratus*, pa. par. of *substerno*: *sub* = under, and *sterno* = to strew.] To strew or lay under something.

"The melted glass being supported by the substrated sand."
—*Boyle: Works, II. 222.*

* **sub-strā-tūm** (pl. **sub-strā-ta**), *s.* [Lat., neut. sing. of *substratus*, pa. par. of *substerno*.] [SUBSTRATE, *v.*]

I. Ordinary Language:

1. *Lit.*: That which is laid or spread under; that which underlies something; specif., a stratum of earth lying under another; subsoil.

† 2. *Fig.*: That which underlies anything; as, There is a substratum of truth in the statement.

II. Philos.: The same as SUBSTANCE, II. 2.

"That which manifests its qualities—in other words, that in which the appearing causes inhere, that to which they belong—is called their subject, or substance, or substratum."
—*Hamilton: Metaphysics* (ed. Mansel), I. 137.

* **sub-struct**, *v.t.* [SUBSTRUCTION.] To build beneath; to lay as the foundation of.

* **sub-struct-ion**, *s.* [Lat. *structio*, from *structus*, pa. par. of *struo* = to build under: *sub* = under, and *struo* = to build.] An underbuilding; a mass of building under another; a foundation.

"To found our habitation firmly, examine the bed of earth upon which we build, and then the underfillings, or substruction, as the ancients called it."
—*Wotton: Remarks, p. 17.*

* **sub-struct-ure**, *s.* [Pref. *sub-*, and Eng. *structure* (q.v.).] An understructure; a foundation.

"Being adopted in modern times to various uses, for example, as the substructure of a wind-mill."
—*Longfellow: Skeleton in Armour*. (Intro.)

* **sub-sty-lar**, * **sub-sti-lar**, *a.* [Eng. *substyle*(*l*); -ar.] Of or pertaining to the substyle; consisting of the substyle.

substylar-line, * **substilar-line**, *s.*

Dialling: A right line on which the gnomon or style is erected at right angles with the plane.

"Erect the style perpendicularly over the substilar line, so as to make an angle with the dial-plane equal to the elevation of the pole of your place."
—*Moxon: Mech. Exercises.*

* **sub-style**, *s.* [Pref. *sub-*, and Eng. *style* (q.v.).]

Dialling: The line on which the style or gnomon stands, formed by the intersection of the plane of the dial with the plane which passes through the gnomon.

* **sub-sul-tive**, *a.* [Lat. *subsultum*, sup. of *subsilio* = to leap up: *sub* = under, and *silio* = to leap.] Moving by sudden leaps or starts; bounding; having a spasmodic character.

"The earth, I was told, moved up and down like the bell of a pot. . . . this sort of *subsilio* motion is being accounted the most dangerous."
—*Bishop Berkeley: Letters, p. 147.*

* **sub-sult-ōr-ly**, *adv.* [Eng. *subsultory*; -ly.] In a subsultory or bounding manner; by leaps; by fits and starts.

"The spirits spread even, and move not subsultorily; for that will make the particles loose and pliant."
—*Bacon: Nat. Hist.*, § 226.

* **sub-sult-ōr-ly**, *a.* [SUBSULTIVE.] Subsultive, spasmodic.

"Flippancy opposed to solemnity, the subsultory to the continuous, these are the two frequent extrinsecities to which the French manner betrays men."
—*De Quincy: Works, x. 197.*

* **sub-sul-tus**, *a.* [Mod. Lat., from Lat. *sub-sultus*, pa. par. of *subsilio*.] [SUBSULTIVE.]

Pathol.: Leaping, twitching. Used chiefly of a spasmodic or clonic convulsion, perceptible mainly in the tendons of the wrist. In a more general sense it is applied to all involuntary twitching or spasmodic contraction of muscular parts. *Subsultus* is often a prelude to general convulsions; it frequently arises during the course of continued fevers, and is generally an unfavourable symptom.

* **sub-sūm-**, *v.t.* [Lat. *sub* = under, and *sumo* = to take.] To include under a more general class or category; to place under, and as being comprehended in a wider notion.

"St. Paul cannot name that word, 'atoners,' but must straight *subsume* in a parenthesis, 'of whom I am the chief.'"—*Hammond: Works, IV. 614.*

* **sub-sūm-pt-ion** (*p* silent), *s.* [Lat. *sub* = under, and *sumptio* = a taking.]

1. The act of subsuming; the act of including under something more general, as a particular under a universal, a species under a genus, &c.

2. That which is subsumed; the minor clause or premise of a syllogism.

¶ **Subsumption of the libel:**

Scots Law: A narrative of the alleged criminal act, which must specify the manner, place, and time of the crime libelled, the person injured, &c.

* **sub-sūm-pt-ive** (*p* silent), *a.* [SUBSUMPTION.] Of or relating to a subsumption; of the nature of a subsumption.

* **sub-tack**, *s.* [Pref. *sub-*, and Eng. *tack* (q.v.).]

Scots Law: An under-lease; a lease of a farm tenement, &c., granted by the principal tenant or leaseholder.

* **sub-tan-gent**, *s.* [Pref. *sub-*, and Eng. *tangent* (q.v.).]

Conic Sections: That part of an axis included between the points in which a tangent cuts it and the foot of the ordinate through the point of contact. The subtangent and subnormal are projections of the tangent and normal upon the axis on which they are taken, or to which they are referred. The subtangent and the subnormal form the hypotenuse of a right-angled triangle, whose other sides are the tangent and the normal; hence the square of the ordinate of the point of contact is always equal to the product of the subtangent and subnormal.

* **sub-tar-tar-ē-an**, *a.* [Pref. *sub-*, and Eng. *Tartarus* (q.v.).] Situated, being, or living under Tartarus; infernal.

"From the infernal bowers
Invokes the sable subterranean powers."
Pope: Homer; Iliad XIV. 514.

* **sub-tēc-ta-cle**, *s.* [Lat. *subtectus*, pa. par. of *subtegere* = to cover below.] A tabernacle, a covering.

"This is true Faith's intire subteccle."
Davies: Holy Roodie, p. 90.

* **sub-tēg-ū-lā-nō-ōus**, *a.* [Lat. *subtegulaeus*, from *sub* = under, and *tegula* = tiles, roof.] Under the eaves or roof; within doors.

* **sub-tēn-ant**, *s.* [Pref. *sub-*, and Eng. *tenant* (q.v.).] An under-tenant; a tenant under a tenant; one who rents a house, land, &c., from a tenant.

* **sub-tēnd**, *v.t.* [Lat. *subtendo*, from *sub* = under, and *tendo* = to stretch.]

Geom.: To extend under or be opposite to.

"If two angles of a triangle be equal to one another, the sides which subtend, or are opposite to the equal angles, are equal to one another."
—*Euclid, I. 6.*

* **sub-tēnsē**, *s.* [Lat. *subtensus*, pa. par. of *subtendo* = to subtend (q.v.).]

Geom.: A line subtending or stretching across; a chord of an arc; a line or angle opposite to a line or angle spoken of.

"An equal subtense (you say) subtends an equal periphery, a greater a greater, and a lesser a less."
—*Barrow: Mathematical Lectures, lect. 22.*

* **sub-tēp-id**, *a.* [Pref. *sub-*, and Eng. *tepid* (q.v.).] Moderately warm; slightly tepid.

* **sub-tēr-**, *pref.* [Lat.] A Latin preposition meaning under, and used in composition with much the same force as *sub*.

* **sub-tēr-nū-ent**, * **sub-tēr-nū-ōus**, *a.* [Lat. *subterfuentis*, pr. par. of *subterfuo* = to flow under: *subter* = under, and *fuo* = to flow.] Flowing or running under or beneath.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīrs, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quīte, ōir, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

sub-tér-fúge, s. [Fr., from Low Lat. subterfugium, from Lat. subterfugio = to escape secretly: subter = under, secretly, and fugio = to fly.] That to which a person resorts for escape or concealment; a shift, an evasion; an artifice employed to escape censure, or the force of an argument, or to justify opinions or conduct.

"This plea the king considered as the subterfuge of a vanquished disputant."—Macaulay: Hist. Eng., ch. vi.

repaired, replaced, &c., without disturbing the pavement or obstructing traffic.

*sub-wörk-ër, s. [Pref. sub-, and Eng. worker (q.v.).] A subordinate worker or help. "It is glorious to be a subworker to grace, in freeing it from some of the inconveniences of original sin." South.

*süo-cädes, s. pl. [Lat. succus = juice.] A commercial name sometimes given to green fruits and citron candied and preserved in syrup; sweetmeats.

*süo-cë-dän, *süo-cë-däne, *süo-cë-dä-në-üm (pl. süo-cë-dä-në-a), s. [Lat.] (SUCCEDANOUS.) One who or that which supplies the place of another; that which is put or used for something else; a substitute.

"Oh for a succedaneum then, To accelerate a creeping pen!" Cooper: To the Hon. William Bull.

*süo-cë-dä-në-öus, a. [Lat. succedaneus.] Supplying the place of something else; acting or employed as a substitute or succedaneum. "If it [the Bologna stone calcined] be but exposed to the sun-beams (to which I have found other strong lights succedaneous) it will not only in a few minutes acquire a luminousness, but for some time after retain it in the dark." Boyle: Works, III. 315.

*süo-cëed', s. suc-cede, v.t. & i. [Fr. succéder, from Lat. succedo = to go beneath or under, to follow after, from suc- (for sub-) = under, and cedo = to go; Sp. suceder; Fr. succéder.]

A. Transitive:

- 1. To take the place of; to be heir or successor to; to follow in an office. "Not Amorth an Amorth succeeds But Harry, Harry." Shakesp.: 2 Henry IV, v. 3. *2. To fall heir to; to inherit. "If not a feodary, but only he One and succeed thy weakness." Shakesp.: Measure for Measure, II. 4. *3. To follow; to come after; to be subsequent or consequent to. "The curse of heaven and men succeed their evils!" Shakesp.: Pericles, I. 4. *4. To make successful, to prosper, to promote. "Now frequent trines the happier lights among . . . Will gloriously the new bid work succeed?" Dryden: Annus Mirabilis, extel.

B. Intransitive:

- *1. To go under cover. "Will you to the cooler cave succeed, Whose mouth the curling vines have overyread?" Dryden: Virgils; Æd. v. 7. *2. To approach. "Who ever as he saw his nigh succeed, Can cry aloud with horrible affright." Spenser: F. Q., VI. iv. a. *3. To follow in order; to be subsequent; to come after; to come next or in the place of another which has preceded. "While low delights succeeding fast behind, In happier meanness occupy the mind." Goldsmith: The Traveller. *4. To become heir; to take the place of one who has died, resigned, or completed a term of office; specif., to ascend a throne on the death or removal of the occupant. "No woman shall succeed in Saline land." Shakesp.: Henry 7, I. 2. *5. To come or be handed down in order of succession; to descend, to devolve. "A ring . . . That downward hath succeeded in his house, From son to son, some four or five descents." Shakesp.: All's Well that Ends Well, III. 7.

- *6. To be successful in any endeavour or undertaking; to obtain the object or end sought or desired; to accomplish that which is attempted or intended. *7. To terminate or turn out as desired; to be successful; to turn out successfully; to have the desired result: as, The plan succeeded.

¶ For the difference between to succeed and to follow, see FOLLOW.

*süo-cëed'-ant, a. [Eng. succeed; -ant.] Her.: Succeeding or following one another.

*süo-cëed'-ër, s. [Eng. succeed; -er.] One who succeeds; one who follows or comes after or in the place of another; a successor. "The true successors of each royal house." Shakesp.: Richard III, v. 4.

*süo-cëed'-ing, pr. par., a., & s. [SUCCEED.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive:

- 1. The act of one who succeeds.

*2. Consequence, result. "A most harsh one [language], and not to be understood without bloody succeeding." Shakesp.: All's Well that Ends Well, II. 2.

*süo-cën'-tör, s. [Low Lat., from Lat sub = under, and cantor = a singer.]

*I. Ord. Lang.: An inciter, a promoter, an instigator. "The prompter and succentor of these cruel enterprises." Holland.

II. Music:

- 1. One who sings the bass or lowest harmonized parts. (Anwandale.)
- 2. In cathedrals and collegiate churches, the deputy of the precentor; a sub-chantor.

*süo-cën-tür'-i-äte, v.t. or i. [Lat. succenturiatus, pa. par. of succenturio = to receive, as a recruit into a century or century.] To receive recruits, or as recruits; to supply soldiers for the missing; to recruit.

*süo-cëss', s. [Fr. succés, from Lat. succensus, genia. of succensus, from succedo = to succeed (q.v.).]

*1. The termination of any affair, whether happy or unhappy in the issue; the result; more especially (when not accompanied by a qualifying adjective) a favourable or prosperous result, or termination of anything attempted; fortune. "I know not what the success will be, my lord; but the attempt I vow." Shakesp.: All's Well, III. 6.

*2. A successful undertaking or attempt; specifically, successful results of warlike operations. "Swell'd with our late successes on the foe." Dryden: Annus Mirabilis, ext.

*3. Succession; order of following one another.

"All the sons of these five brethren reignd By due success, and all their nephews late, Even thrice eleven descents, the crown retained." Spenser: F. Q., II. 2. 45.

*süo-cëss'-a-ry, s. [Eng. success; -ary.]

Succession. "My peculiar honors, not derived From necessary, but purchased with my blood." Brown & Mat.: Loss of Gandy, I. 2.

*süo-cëss'-füll, a. [Eng. success; -full.] Resulting in or having access; obtaining or terminating in the accomplishment or obtaining of what is wished or intended; hence, prosperous, fortunate, happy. (Applied to persons and things). "I should be willing, sir, to think it was a young man's rashness, or perhaps the rage of a successful rival." Dryden: Amboyna, III. 1.

¶ For the difference between successful and fortunate, see FORTUNATE.

*süo-cëss'-füll-ly, adv. [Eng. successful; -ly.] In a successful manner; with good success; prosperously, happily, fortunately.

"He took a course which since successfully Great men have often taken." Donne: Progress of the Soul, s. 1.

*süo-cëss'-füll-nëss, s. [Eng. successful; -ness.] The quality or state of being successful; prosperous termination; favourable result or event; success.

"An opinion of the successfulness of the work is as necessary to found a purpose of undertaking it, as the authority of commands, or the persuasiveness of promises." Hammond.

*süo-cëss'-iön (ss as sh), s. [Fr., from Lat. succensione, accus. of succensio, from succensus, pa. par. of succedo = to succeed (q.v.).]

1. Ordinary Language:

- 1. A following of things in order; series of things following each other, either in time or place; consecution. "The water instead of making one continued shoot, falls through a succession of different stories." Gilpin: Tour, vol. I, 18.
- 2. The act of succeeding or coming in the place of another. "Collateral successions are taxed according to the degree of relation, from five to thirty per cent. upon the whole value." Smith: Wealth of Nations, bk. v., ch. II.
- 3. The act or right of succeeding or coming to an inheritance, office, or dignity; the act or right of entering upon an office or dignity. "The question of Spanish succession was to be mentioned to William at a private audience." Macaulay: Hist. Eng., ch. v.

4. An order, line, or series of descendants; lineage; successors collectively; heirs.

"A long succession must ensue: And his next son the divided ark of God Shall in a glorious temple enshrine." Milton: P. L., XII. 321.

*5. That which is to come; the future; futurity.

"Make them exclaim against their own succession." Shakesp.: Hamlet, II. 2.

*6. The person who succeeds to rank, office, or the like; a successor.

II. Music:

1. The order in which the notes of a melody proceed. There are two sorts of succession, regular, or conjoint, and disjunct. A regular or conjoint succession is that in which the notes succeed each other in the order of the scale to which they belong, either ascending or descending. In a disjunct succession the melody is formed of intervals greater than a second.

2. A sequence is sometimes spoken of as a succession, and passages of similar chords or progressions are described as a succession of thirds, fourths, fifths, sixths, sevenths, or octaves, as the case may be.

¶ (1) Acts of succession:

Eng. Hist.: The name given to several Acts of Parliament, by which the accession to the crown was limited or modified. The first is the Act 7 Henry IV, c. 2, declaring Prince Henry heir-apparent to the thrones of England and France, with remainders to the other children of Henry IV. Other instances occurred in the case of Henry VII, and in regard to the successors of Henry VIII, and the rights of James I, Charles I, and Charles II. The most important is the Act of Settlement. [SETTLEMENT, ¶.]

(2) Apostolic, or Apostolical succession: [APOSTOLIC.]

(3) Arms of succession: [FEUDAL, ¶.]

(4) Geological succession of organic beings: The gradual disappearance of species, genera, families, &c., throughout the world as geological time goes forward, or the more rapid succession of one group of organisms to another within a limited area, as the adaptation of that area to particular forms of life changes, by water giving place to land, salt to fresh water, or the reverse. Within limited areas, however, the same type often persists from the later Tertiary to the present day: as in North America, where the Sloth and Armadillo have succeeded gigantic Edentata like Megatherium and Glyptodon.

(5) Law of succession: The law or rule according to which the succession to the property of deceased persons is regulated. In general this law obtains only in cases in which the deceased person has died intestate, or in which the power of bequeathing property by will is limited by the legislature. In England primogeniture is the general rule in cases of real estate, the eldest son and his issue taking the whole of the freehold estate; and, failing such stock, the next eldest son, and so on. This rule is, however, subject to dower—generally one-third to the widow of the intestate. When males fail the daughters succeed, but all together. When there is no lineal descendant, the nearest lineal ancestor succeeds. In regard to movable property no right of primogeniture, nor preference of males over females is recognized, the property being divided in equal proportions among the children or, failing them, the nearest kinsmen of the deceased, without respect to sex or seniority.

(6) Succession of crops: [ROTATION.]

(7) Wars of succession:

Hist.: The name given to several wars in Europe between the middle of the seventeenth century and the middle of the eighteenth, on the occasion of the failure of an heir to a throne. The most important were: that concerning the Orleans accession to the Palatinate (1688-97), closed by the Peace of Ryswick; the Spanish succession (1702-1713), the Polish accession (1733-38), closed by the Peace of Vienna; the Austrian accession (1740-48), and the Bavarian accession (1777-79). The second was the most important to English interests, and arose from the rival claims of Philip, Duke of Anjou, grandson of Louis XIV, and of Charles, second son of Leopold, Emperor of Germany, to the throne of Spain. The Grand Alliance between England, Holland, and Austria was revived by William III, and the war which followed, though Philip's claim was ultimately admitted, is famous for the victories of the Allies, under Marlborough, at Blenheim (1704), Oudenarde (1708), Malplaquet (1709), and the capture of

Gibraltar (July 24, 1704) by the English and Dutch fleets, under Sir George Rooke. The war was practically concluded by the Peace of Utrecht, April 11, 1713, between France and the English and Dutch. The emperor abandoned the struggle in the following year.

succession-duty, s. A duty imposed on every succession to property, according to the value and relationship of the parties to the person from whom the property comes.

¶ A duty of this character exists under English law, and to some extent in this country, as in the case of the estates of unmarried persons.

suc-cess-ion-al (ss as sh), a. [Eng. *succession*; -al.] Relating to succession; implying succession; existing in succession; consecutive.

¶ He presented a calculation of the costs of growing a crop of autumn-sown vetches, and a *successional* one of blank. —*Daily Telegraph*, March 15, 1888.

suc-cess-ion-al-ly (ss as sh), adv. [Eng. *successional*; -ly.] In a successional manner; in succession; consecutively.

suc-cess-ion-ist (ss as sh), s. [Eng. *succession*; -ist.] One who adheres to succession, especially to apostolic succession.

suc-cess-ive, a. [Fr. *successif*, from Lat. *successivus*, from *successus*, pa. par. of *succedo* = to succeed (q.v.); Sp. *successiva*.]

1. Following in order or uninterrupted succession; consecutive; following in regular course, as a series of persons or things, either in time or place.

* 2. Having or giving the right of succession to an inheritance; inherited by succession; hereditary, legitimate.

“Countrymen,
Plead my successive title with your words.”
Shaksp., *Titus Andronicus*, I, 4.

suc-cess-ive-ly, adv. [Eng. *successive*; -ly.]

* 1. By order of succession and inheritance.

“So thou the garland wear’st successively.”
Shaksp., *2 Henry IV.*, I, v. 4.

2. In a successive manner; in a series of uninterrupted course; consecutively.

“We . . . successively saw a remarkable hill near Santo Espirito, then Cape St. Thomas, and then an island just without Cape Frio.” —*Cook*: *First Voyage* bk. I, ch. 11.

* 3. Successfully, completely, fully.

suc-cess-ive-ness, s. [Eng. *successive*; -ness.] The quality or state of being successive.

“All the notion we have of duration is partly by the successiveness of its own operations.” —*Hale*: *Orig. of Mankind*, p. 119.

suc-cess-less, a. [Eng. *success*; -less.] Having no success; unsuccessful, unlucky, unfortunate; failing to accomplish what was intended.

“I found not the experiment successful.” —*Boyle*: *Works*, III, 179.

suc-cess-less-ly, adv. [Eng. *successless*; -ly.] In a successless manner; unsuccessfully.

“Then shall the end come, to wit, when the gospel having been preached through all the cities of Judaea successively.” —*Jammond*: *Works*, III, 121.

suc-cess-less-ness, s. [Eng. *successless*; -ness.] The quality or state of being successless; unsuccessfulness.

“His apprehensions of the successlessness of his endeavors.” —*Boyle*: *Works*, VI, 20.

suc-cess-or, suc-cess-ur, s. [Fr. *successeur*, from Lat. *successorem*, accus. of *successor*, from *successus*, pa. par. of *succedo* = to succeed (q.v.).] One who succeeds or follows; one who takes the place which another has left, and sustains the like part or character. (Correlative to *predecessor*.)

“I here declare you rightful successor,
And heir immediate to my crown.”
Dryden: *Secret Love*, v.

suc-cess-or-y, a. [Eng. *successor*; -y.] Following in line of succession.

suc-cid-ū-ous, a. [Lat. *succidūus* = sinking, falling, from *succida* = to fall under, to sink down: *sub* = under, and *cado* = to fall.] Ready to fall; falling.

suc-cif-er-ous, a. [Lat. *succus* = juice, and *fero* = to bear.] Producing or conveying sap.

suc-cin, succin-ite, s. [SUCCINELLITE.]
Mineralogy:
I. The same as AMBER (q.v.).

2. A name given to a yellow variety of garnet found in globular aggregations enclosed in asbestos, in Switzerland.

suc-cin-ā-m-ic, a. [Eng. *succin(ic)*, and *amic*.] Derived from or containing succinic acid and ammonia.

succinic-acid, s.

Chem.: C₂H₄<CO(H₂N) / COHO. Its barium salt is obtained by leaving a solution of succinimide and barium hydrate in equivalent proportions to evaporate over oil of vitriol and recrystallizing several times from weak alcohol. By decomposing with sulphuric acid, impure crystals of succinic acid are obtained, which soon decompose into succinate of ammonia.

suc-cin-ā-m-ide, s. [Eng. *succin(ic)*, and *amide*.]

Chem.: C₂H₄<CO(H₂N) / COHO. Obtained by mixing ethylic succinate with strong aqueous ammonia. It forms small white crystals, soluble in boiling water, nearly insoluble in cold water, alcohol, and ether.

suc-cin-ā-nil, s. [Eng. *succin(ic)*, and *anil(ine)*.]

Chem.: C₂H₄O₂(C₆H₅)N. Obtained by heating pulverized succinic acid with dry aniline, and then dissolving it out with boiling water. It crystallizes from alcohol in fine interlaced needles sublimable without decomposition. It is insoluble in cold water.

suc-cin-ā-nil-ic, a. [Eng. *succinanil*; -ic.] Derived from or containing succinanil.

succinanilic-acid, s.

Chem.: C₂H₄<CO(C₆H₅N) / COHO. Prepared by dissolving succinanil in dilute ammonia and alcohol, boiling for a time, and neutralising with nitric acid. It forms elongated laminae, very slightly soluble in cold water, more soluble in hot water; melts when heated to 100°, and at a higher temperature decomposes into phenyl succinimide.

suc-cin-ās-phāt, s. [Eng. *succin(um)*, and *asphalt*.]

Chem.: A resinous substance resembling amber, obtained from the granular clay iron ore of Bergen.

suc-cin-āte, s. [Eng. *succin(ic)*; -ate.]

succinate of ammonium, s.

Chem.: C₂H₄<CO(H₂N) / COHO. Obtained by supersaturating succinic acid with ammonia, and leaving it to evaporate over quicklime. It crystallizes in hexagonal prisms; sp. gr. 1.367; very soluble in water and alcohol.

suc-cin-āt-ēd, a. [Eng. *succinat(e)*; -ed.] Combined with or containing succinic acid.

suc-cinct, a. [Lat. *succinctus* = prepared, short, small, contracted, pa. par. of *succingo* = to gird below, to gird or tuck up: *sub* = under, and *cingo* = to gird.]

* 1. Lit.: Tucked up, girded up so as to leave the legs free.
“His habit fit for speed succinct.”
Milton: *P. L.*, III, 648.

2. Fig.: Compressed into few words; characterized by verbal brevity; brief, short, concise.

“A tale should be judicious, clear, succinct,
The language plain, and incidents well linked.”
Conyer: *Conversations*, 288.

† **suc-cinct-ti, s. pl.** [Masc. pl. of Lat. *succinctus*.] [SUCCINCT.]

Entom.: Girted: a term applied to the chrysalides of the Papilionide, which are not only attached by the tail, but also supported by a belt of silk passing round the middle of the body and fixed firmly on each side. (*Newman*.)

suc-cinct-ly, adv. [Eng. *succinct*; -ly.] In a succinct manner; briefly, concisely, shortly.

“He [John Pell] hath also succinctly and clearly demonstrated the second and tenth books of Euclid.”
—*Wood*: *Fasti Oxon.*, vol. II.

suc-cinct-ness, s. [Eng. *succinct*; -ness.] The quality or state of being succinct; brevity, conciseness.

“In fine, brevity and succinctness of speech is that which, in philosophy or speculation, we call maxim, and first principle.” —*South*: *Sermons*, vol. II, ser. 4.

suc-cin-ē-a, s. [Lat. *succineus* = of or pertaining to amber.]

Zool. & Palaeont.: Amber-enail, a genus of Helicidae (q.v.), with 155 recent species, universally distributed. Shell imperforate, thin, ovate or oblong; spine small, aperture large; columella and peristome simple, acute; animal large, with short thick tentacles and broad foot; lingual teeth like *Helix* (q.v.). These snails inhabit damp places, but rarely enter the water. Seven fossil species from the Eocene of Britain.

suc-cin-ē-ite, s. [Lat. *succinum* = amber.]

Min.: A name given by Dana to an orthorhombic mineral substance obtained from amber by distillation. Hardness, 1.0; sp. gr. 1.55; lustrous, vitreous; colourless or white; odour, aromatic; soluble in water. Compos.: carbon, 40.7; hydrogen, 5.1; oxygen, 54.2 = 100.

suc-cin-ē-ū-pi-ōne, s. [Lat. *succin(um)* = amber, and Eng. *euptione*.]

Chem.: A name applied by Eianer to a very light oil, obtained by rectifying oil of amber with sulphuric acid. (*Watts*.)

suc-cin-ic, a. [Eng. *succin(um)*; -ic.] Derived from or contained in amber.

succinic-acid, s.

Chem.: C₄H₆O₄ = C₂H₄{COHO / COHO. Volatile salt of amber. A dibasic acid belonging to the oxalic series, first recognized by Agricola in 1567. It occurs ready formed in amber, in certain plants, and in many animal fluids, and is a product of the oxidation of fatty acids of high molecular weight, and of the alcoholic fermentation of sugar. It is prepared by bringing calcium malate in contact with one-twelfth of its weight of decayed cheese, suspended in three parts of water, and kept for some days at a temperature of 30° to 40°. Succinate of lime is formed, which is collected on a filter, decomposed with sulphuric acid, purified by recrystallization. It crystallizes in monoclinic prisms, is readily soluble in water, less easily in alcohol, insoluble in ether, melts at 180°, and boils at 235°. It forms neutral and acid salts, those of the alkalis being very soluble in water. A characteristic reaction of succinic acid and soluble succinates is the formation of a red-brown precipitate with ferric salts.

succinic-anhydride, s.

Chem.: C₂H₄CO<CO. Obtained by distilling succinic acid once or twice with phosphoric anhydride. It is a white mass, soluble in boiling absolute alcohol, and deposited from the solution in needles on cooling, insoluble in ether. Melts at 119.6°.

succinic-chloride, s.

Chem.: C₂H₄CO<COCl. Produced by distilling succinic anhydride with phosphoric pentachloride. It is a fuming, strongly refracting liquid, boils at 190°, and with water yields succinic acid.

succinic-ethers, s. pl.

Chem.: Compounds of succinic acid with alcohol radicals. Ethylic succinate = C₂H₄CO<CO(C₂H₅)O. Is prepared by distilling ten parts succinic acid, twenty parts alcohol, and five parts strong hydrochloric acid, and purifying the product by distillation over lead oxide. It is an oil, boiling at 214°; sp. gr. 1.036, slightly soluble in water. Methyl succinate = C₂H₄CO<CO(CH₃)O is similarly prepared. It forms a crystalline mass, dissolves in alcohol and ether, boils at 198°, melts at 20°, the liquid having a sp. gr. of 1.179.

suc-cin-im-ide, s. [Eng. *succin(ic)*; and *imide*.]

Chem.: C₂H₄<CO / COHN. Formed by the action of dry ammonia gas on succinic anhydride. It is obtained in large transparent crystals, which melt at 125-126°, sublime without alteration, and are easily soluble in water and alcohol.

suc-cin-ite, s. [SUCCIN.]

suc-cin-ōne, s. [Eng. *succin(um)*; -one.]

Chem.: The name applied to the volatile

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hōre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīno; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

oil obtained by the distillation of neutral succinate of calcium. Its composition is uncertain.

sūc-qin-ō-sūl-phūr-lo, a. [Eng. succin(ite); o connect., and sulphuric.] [SULPHOSUCCINIC.]

sūc-qin-ōūs, a. [Lat. succinum = amber.] Pertaining to or resembling amber.

sūc-qin-ūm, s. [Lat.] [AMBER.]

sūc-qin-ŷl, s. [Eng. succin(um); -yl.]

Chem.: C₁₀H₁₀O₂. The hypothetical diatomic radical of succinic acid.

sūc-qŷ-ŷion, s. [Lat. succisio, from succisus, pa. par. of succido = to cut down; sub = under, and cado = to out.] The act of cutting off or down.

"Upon waste brought and assigned in the succision of trees, the justification is, that they were overthrown by wind."—Bacon.

sūc-qŷ-ŷēr-ēne, s. [Lat. succi(num) = amber, and Gr. στερεός (stereos) = solid.]

Chem.: The name given to that portion of Colophonum succin which is insoluble in alcohol and ether. (Watts.)

sūc-cla-mā-tion, s. [Lat. sub = under, and clamo = to call out.] Quiet exhortation; suggestion.

"Why may we not also, by some such exclamations as these, call off young men to the better side."—Translation of Plutarch's Morals, pt. lit., p. 412.

sūc-cōr, *soc-our, v.t. [O. Fr. succurre, succorre, from Lat. succurro = to run under, to run to the aid of; to succor: sub = under, and curro = to run; Fr. secourir; Sp. socorrer; Port. socorrer; Ital. soccorrere.] To run to the aid of; to aid; to help; to assist in difficulty or distress; to relieve.

"To succour wretched regions, and repair the smile of opulence in sorrow's face."—Cowper: Charity, 122.

sūc-cōr, *soc-our, *soc-ours, *soc-course, *suc-urs, s. [O. Fr. socors, from Lat. succursus, from succurro = to succor (q.v.).]

1. Aid, help, assistance; particularly assistance that delivers from difficulty, want, or distress.

"The devotion of life or fortune to the succour of the poor is a height of virtue to which humanity has never arisen by its own power."—Tatler, No. 4.

2. The person who or thing which brings aid, help, or assistance.

"Hire to assist, and eke hire for to prey To ben our help, and socour whan we dey."—Chaucer: C. T., l. 1461.

†3. (Pl.). Troop serving as an aid or relief.

"There rode the Volcanic succours."—Macaulay: Battles of Lake Regillus, xlii.

*sūc-cōr-a-ble, a. [Eng. succor; -able.]

1. Capable of being succored, aided, or relieved; admitting of succor.

2. Affording succor or relief; helpful, aiding.

"If the physician be not verie answerable in liking to the patient, perceiving him not so succorable as his desirah or would have such a physician, shall never proceed successfully."—Time's Storehouse, 740-2.

sūc-cōr-ēr, s. [Eng. succor, v.; -er.] One who succors; one who affords aid or relief; a helper.

"She hath been a succorer of many."—Romans vi. 2.

*sūc-cōr-ēss, s. [Eng. succor; -ess.] A female helper. (Stanhurst.)

sūc-cōr-ēss, *suc-cour-lesse, a. [Eng. succor; -less.] Destitute of succor, aid, or help.

"And all his friends and soldiers, succourless Ferisht but he."—Chapman: Homer; Odyssey v.

sūc-cōr-ŷ, s. *sūck-ēr-ŷ, *sūck-ēr-le, s. [A corrupt. of chioray (q.v.).]

Bot.: Cichorium Intybus. [CHICORY.]

sūc-cōse, a. [Lat. succus = juice.] Full of juice.

sūc-cō-tāsh, s. [N. Amer. Indian susich-qualash = corn boiled whole.] Green maize and beans boiled together; originally a North American Indian dish.

Sūc-cō-trine, a. [SOCOTRINE.]

*sūc-cūb, s. [SUCCUBA.] A succubus (q.v.).

"Our succub Satanick now found, She touched his soul in place unsound."—V. Orfey: Athenian Jit.

1. Anthrop. (Of both forms): A demon believed to have the power of assuming the shape of a woman in order to consort sexually with men. [INCUBUS, LAMIA.]

"This is the doctrine of the incubi and the succubi those male and female nocturnal demons which consort sexually with men and women. We may set out with their descriptions among the islanders of the Antilles, where they are the ghosts of the dead, vanishing when clutched; in New Zealand, where ancestral deities form attachments with females, and pay them repeated visits; while in the Samoan Islands, such intercourse of inferior gods caused 'many supernatural conceptions; and in Lapland, where details of this last extreme class have also been placed on record. From these lower grades of culture we may follow the idea onward. Formal rites are specified in the Hindu Tantra, which enable a man to obtain a companion-symph by worshipping her and repeating her name by night. In a cemetery, Augustine, in an instructive passage, states the popular notions of the visits of incubi . . . yet he is careful not to commit himself to a positive belief in such spirits. Later theologians were less cautious, and gave argumentation on nocturnal intercourse with incubi and succubi was carried on till, at the height of medieval civilization, we find it accepted in full belief by ecclesiastics and lawyers."—Tyler: Prim. Cult. (ed. 1873), II, 189, 190.

succulent-plants, s. pl.

Bot.: Plants characterized by the succulence of their stems, their leaves, or their whole organization. This is produced by a remarkable distension or increase of the cellular tissue. Their organization enables them to derive their nourishment from the air rather than from the ground, and flourish in dry places. When cultivated, they are planted in sandy loam not too finely sifted, and require very little watering. They do not flourish well with other plants, but should have a greenhouse of their own. The succulent orders of plants, Cactaceae, Mesembryanthemaceae, Crassulaceae, &c., are not closely akin to each other. Succulence may be associated with any structure, and extend through an order, a tribe, a genus, or a species only.

*sūc-cū-lēn-tæ, s. pl. [Fem. pl. of Lat. succulentus = succulent.]

sufficient reason, determining reason, s.

Philos.: A term adopted from the following passage of Leibnitz's *Théodicée* (I, § 44):

"Nothing is done without a sufficient reason; that is, nothing happens without its being possible to one knowing the causes of all things to render a reason which is sufficient why it is so, and not otherwise." He defines the principle of Sufficient Reason, as that in virtue of which we know that no fact can be found real, no proposition true, without a sufficient reason why it is in this way rather than in another."

After stating that Archimedes was obliged to take for granted that if there be a balance in which everything is alike on both sides, and if equal weights are hung on the two ends of that balance, the whole will be at rest, because no reason can be given why one side should weigh down rather than the other, Leibnitz goes on to say: "Now by this single principle of the sufficient reason may be demonstrated the being of a God, and all other parts of metaphysics or natural theology, and even, in some measure, those physical truths that are independent of mathematics, such as the dynamical principles or the principles of forces." The Principle of Sufficient Reason as a law of thought is usually stated by logicians thus: Every judgment we accept must rest upon a sufficient reason; and from this the following principles have been derived:

1. Granting the reason, what follows from the reason must also be granted. On this syllogistic inference depends.

2. If all the consequents are held to be true, the reason must be true.

3. If the consequent is rejected, the reason must also be rejected.

4. If the consequent is admitted, we do not necessarily admit the reason, as there may be other reasons or causes of the same effect.

Mansel (*Proleg. Log.*, p. 198) asserts that the Principle of Sufficient Reason is not a law of thought, but only the statement that every act of thought must be governed by some law. ¶

¶ *Axiom of determining (or sufficient) reason:* Logic: A judgment can be derived from another judgment (materially different from it), and finds in it its sufficient reason, only when the (logical) connection of thought corresponds to a (real) causal connection (*Uebervveg: Logic* (Eng. ed.), § 81.)

sūf-fīc-īent-lī (c as sh), adv. [Eu. *sufficiens*; -ly.]

suf-fūse, v.t. [Lat. *suffusus*, pa. par. of *suffundo* = to pour beneath, to diffuse beneath or upon: *suf* (for *sub*) = under, and *fundo* = to pour.] To overspread as with a fluid or tincture; to fill or cover as with something fluid.

"Medora still (while tears his cheeks suffuse) The dear remembrance of his lord renews." Hoole: *Orlando Furioso*, XVII.

suf-fū-sion, s. [Fr., from Lat. *suffusio*, accus. of *suffusio*, from *suffusus*, pa. par. of *suffundo* = to suffuse (q.v.).]

1. The act or process of suffusing or overspreading, as with a fluid or tincture; the state of being suffused.

"He [Putarch] being deeply tainted, as it were, with the suffusions of it, everything which he looked upon, seemed to him coloured with it."—Cudworth: *Intel. System*, p. 224.

2. That which is suffused or overpread, as a cataract on the eye, or an extravasation of some humour.

"So thick a drop serene bath queeched their orbs Or dim suffusion veiled." Milton: *P. L.*, III. 88.

sū-fī, s. [SOFI.]

sū-fīsm, s. [SOFISM.]

*sūg, s. [Etyim. doubtful; perhaps allied to suck.] A small kind of worm.

bēl, bōy; pōut, jōwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = shūn. -sious, -tious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

sûg-ar (s as sh), ***sucre**, ***suger**, ***supre**, s. & a. [Fr. *sucre*, from Sp. *azúcar* = sugar, from Arab. *sakkār*, *sakkar* = sugar; Pers. *shakar*, from Sansc. *ṣaṅkarā* = gravel, sugar; allied to Lat. *saccharum*; Gr. *σάκχαρος*, *sákcharon* (*sakchar*, *sakcharon*); Port. *açúcar*; Ital. *zucchero*.]

A. As substantive:

I. Ordinary Language:

1. Literally:

(1) A sweet, crystallized substance manufactured from the expressed juices of various plants, especially of the sugar-cane (q.v.).

(2) Any substance more or less resembling sugar in any of its properties: as, *sugar of lead*.

2. *Fig.*: Sweet, honeyed, or soothing words or flattery, used to disguise or hide something distasteful.

II. Chem. & Sugar Manuf.: $C_n(H_{2n}O)_m$. The generic name for a large number of bodies occurring naturally in the animal or vegetable kingdom, or produced from glucosides by the action of ferments or dilute acids. They are all more or less soluble in water, and their solutions exert a rotatory action on polarized light. Some reduce alkaline solutions of copper, whilst others either do not, or do so only to a limited extent. They may all be classed under two heads, viz., unfermentable sugars, as mannite, dulcitate, sorbite, &c., and fermentable sugars as cane-sugar, glucose, maltose, &c. Cane-sugar, $C_{12}H_{22}O_{11}$, called also Saccharose, Sucrose, and Canose, is found in the juice of many grasses, in the sap of several trees, and in beet and several other roots. It appears to be the transition product between starch and invert-sugar in all plants which yield the latter compounds. Walnuts, almonds, and St. John's bread contain only cane-sugar. It is extracted most easily from sugar-cane, but on the continent of Europe is manufactured on a large scale from beet-root. The expressed juice is heated nearly to the boiling point, and a small quantity of slaked lime added. The clear liquid which separates from the coagulum is evaporated as rapidly as possible, and transferred into shallow vessels to crystallize. Drained from the syrup, or molasses, it yields the raw sugar of commerce. When further refined by treatment with animal charcoal, poured into moulds, and then dried in a stove, the product is loaf-sugar. When the crystallization is allowed to proceed very slowly, sugar-candy results. Moderately heated it melts, and solidifies on cooling to an amorphous mass, familiar as barley-sugar. Pure sugar separates from its solution in transparent colourless crystals, having the figure of a modified monoclinic prism. It has a pure, sweet taste, and requires for solution only one-third of its weight of cold water. Its crystals have a specific gravity of 1.6. Heated above 210°, water is given off and a brown substance known as caramel remains. Cane-sugar is transformed into invert sugar by boiling in presence of dilute acids, mineral acting more rapidly than organic acids. Strong sulphuric acid completely decomposes cane-sugar, and nitric acid converts it into saccharic acid. It turns a ray of polarised light to the right, $A_j = 73.8$. [INVERT-SUGAR, MAPLE-SUGAR.]

B. As adj.: Made of sugar.

sugar-baker, s. One who refines sugar.

sugar-bean, s.

Bot.: (1) *Phaseolus saccharatus*; (2) *P. lunatus*.

sugar-beet, s. A variety of the Common Beet, *Beta vulgaris*, cultivated on the Continent, and occasionally to a small extent in England, from which is extracted sugar equal to that of the cane. [BEETROOT-SUGAR.]

sugar-berry, s.

Bot.: *Celtis occidentalis*; called also the Nettle-tree and the Hoakberry.

sugar-birds, s. pl.

Ornith.: The family Cerythidae, a group of delicate little birds, allied to the Dicaeidae and the Drepanididae, but with protrusile tongues, and confined almost entirely to the tropical parts of America.

sugar-bush, s. [SUGAR-ORCHARD.]

sugar-camp, s. A place in or near a maple forest where the sap from the trees is collected and manufactured into sugar.

sugar-candy, ***sugar-candian**, s. Cane-sugar crystallized on threads by slow evaporation.

"Her breath was as sweet as sugar-candian."—*J. Taylor: Penitential Pilgrim.*

sugar-cane, s.

1. *Bot., Hort., &c.*: *Saccharum officinarum*, a strong, cane-stemmed grass, from eight to twelve feet high, producing a large, feathery plume of flowers. It is wild or cultivated in India, China, the South Sea Islands, the West Indies, Louisiana, &c., flourishing in the zone or belt from the equator to 35° or 40° north and south. In India the land chosen for its cultivation is usually a good loam or light clay well manured. The leafy ends of the canes of the preceding season are cut off, or the whole cane is cut up, each piece being made to contain two nodes or joints. Twenty thousand of these are planted on each acre in January and February, the harvest begins early in December, and the cutting and crushing of the canes are carried on till January or February. There are several varieties of the sugar-cane. It was calculated that in 1876 2,140,000 tons of sugar were manufactured from the cane all over the world. It is probable that the amount has since increased.

2. *Hist.*: It has been supposed that the sugar-cane was the "sweet cane from a far country" of Jeremiah (vi. 20; cf. also Isa. xliii. 24). The scripture plant was, however, more probably *Andropogon calamus aromaticus*. [CANE.] According to Strabo, Nearchus, the admiral of Alexander the Great, describes a kind of honey (probably sugar) from an Indian reed, as did Theophrastus and other writers. Dioscorides uses the term *saccharum*, derived from the Indian name of the sugar-cane. Europe seems to be indebted for the plant to the Saracens, who introduced it into Rhodes, Cyprus, Sicily, Crete, and Spain, in the ninth century; the Crusaders, in the twelfth, found it in Syria; the Spaniards and Portuguese carried it to the Canary Islands and Madeira early in the fifteenth. Thence, on the discovery of America, it was transported to the West Indies, where a large sugar industry speedily arose.

sugar-clarifier, s. [CLARIFIER, 2.]

sugar-evaporator, s. A furnace and pan for condensing saccharine juices or solutions.

sugar-filter, s. The vessel employed for cleansing and decolorizing the defecated syrup by the aid of bone-black.

sugar-fungus, s. [TORULA, YEAST-PLANT.]

sugar-furnace, s. A furnace in which pans are set for boiling sugar-cane juice, the sap of the maple, or other saccharine solutions.

sugar-house, s. A building in which sugar is refined.

sugar-kettle, s. A kettle for boiling the sap of the sugar-maple, the sorghum, or the cane; a sugar-pan.

sugar-loaf, s. & a.

A. As substantive:

1. *Lit.*: A conical mass of refined sugar.

2. *Fig.*: A high-crowned conical hat, resembling a sugar-loaf in shape.

B. As adj.: Conical and tall, like a sugar-loaf: as, a *sugar-loaf* hat.

sugar-louse, s. [SUGAR-MITE.]

sugar-maple, s.

Bot.: *Acer saccharinum*, an American tree, sometimes eighty feet high, largely prevailing in the United States, New Brunswick, and Nova Scotia. The leaves are cordate, very smooth, and glaucous beneath. They have five lobes, which are taper, pointed, and toothed, becoming red in autumn. It is tapped in the spring for its juice, which yields sugar. [ACER.]

sugar-mill, s. A mill for expressing the juice from sugar-canes. It has usually three rollers; two in the same horizontal plane, and the third over and between these. The canes are fed in between the upper and first horizontal rollers, where they receive their first squeeze, the juice running down into a trough at the base of the mill; they then travel onward, receiving a second squeeze between the top roller and the second horizontal roller, which extracts the remaining juice. The resi-

due woody fibre, termed bagasse, when dried, is used as fuel for the furnace-boiler.

sugar-mite, **sugar-louse**, s.

Entom.: The genus *Lepisma*, spec. *Lepisma saccharina*.

sugar-mould, s. A conical iron mould in which sugar is placed to crystallize and allow the molasses to drain away.

sugar-nippers, s. A tool or instrument for cutting loaf-sugar into small pieces.

sugar of acorns, s. [QUERCITE.]

sugar of lead, s. [NEUTRAL PLUMBI ACETATE; ACETIC-ACID.]

sugar-orchard, **sugar-bush**, s. A collection or small plantation of maples used for making sugar.

sugar-pine, s. The *Pinus lambertiana* of the Pacific coast of the United States, a large pine, which, when partly burned, yields a sweetish exudation, whence its name.

sugar-planter, s. One who owns or manages land devoted to the cultivation of the sugar-cane.

sugar-plum, s. A kind of sweetmeat made of boiled sugar, coloured and flavoured with various ingredients, and formed into balls or disks.

sugar-refiner, s. One who refines sugar.

sugar-refinery, s.

1. A building where sugar is refined.

2. The process of purification of raw or brown sugar. The sugar is (1) dissolved in water, a little blood and lime-water being added; (2) filtered in bags, to remove feculences; (3) filtered through animal charcoal, to remove colour; (4) boiled in a vacuum-pan, to concentrate it; and (5) crystallized in moulds.

sugar-squirrel, s.

Zool.: *Petaurus sciureus*.

sugar-tongs, s. A small instrument of silver or plated metal, used for lifting small pieces of sugar at table.

sugar-tree, s.

Bot.: (1) *Myoporum platycarpum*; (2) *Acer saccharinum*, the sugar-maple (q.v.).

sûg-ar (s as sh), ***sug-er**, v. t. & i. [SUGAR, s.]

1. *Lit.*: To impregnate, flavour, cover, sprinkle, or mix with sugar. [SUGARING, II.]

2. *Fig.*: To cover or hide, as with sugar; to sweeten, to disguise, as something unpleasant or distasteful, so as to render it acceptable.

"With devotion's viage,
And pious action, we do sugar-our
The devil himself." *Shaksp.: Hamlet*, III. 1.

sûg-ar-i-ness (s as sh), s. [Eng. *sugary*; -ness.] The quality or state of being sugary or sweet.

sûg-ar-ing (s as sh), s. [Eng. *sugar*; -ing.]

I. Ordinary Language:

1. The act of sweetening, mixing, or covering with sugar.

2. Sugar used for sweetening, &c.

3. The act or process of making sugar.

II. Entom.: A method of catching moths introduced in 1842, and since largely used. A compound of coarse brown sugar dissolved in water and beer, and having a little gum or some essential oil added, is spread on the sheltered side of trunks of trees by a painter's brush. The collector visits the sugared trees after dark with a bull's-eye lantern and catches any moths he may find.

sûg-ar-lëss (initial s as sh), a. [Eng. *sugar*; -less.] Free from sugar.

sûg-ar-y (s as sh), ***sug-rie**, a. [Eng. *sugar*; -ry.]

1. Containing, resembling, or composed of sugar; sweet.

"And with the *sugrie* sweets thereof allure
Chast ladies eares to fantasies humors." *Spenser: Mother Hubbard's Tale.*

2. Fond of sugar or of sweet things: as, a *sugary* palate.

***su-gës-çont**, a. [Lat. *sugens*, pr. par. of *sugo* = to suck.] Pertaining or relating to sucking.

fâte, fât, fâre, amidst, whât, fáll, father; wê, wêt, hère, camél, hër, thère; pine, pít, síre, sír, maríns; gô, pôť, or. wôre, wôlf, wôrk, whô, sôn; müte, cúb, cüre, únite, cûr, rûle, fûll; trý, Sýrian. œ, œ = ê; ey = â; qu = kw.

sug-gest, v.t. & i. [Lat. suggestus, pa. par. of suggere = to carry or lay under, to supply, to suggest: sug (for sub) = under, and gero = to carry.]

A. Transitive:

1. To introduce indirectly into the mind or thoughts; to cause to be thought of by the agency of other objects.

"The growing seeds of wisdom, that suggest . . . Reflections such as meliorate the heart." Cooper: Two, II. 302.

2. To propose with diffidence or modesty; to propose indirectly or guardedly; to hint, to insinuate.

"Then you suggested Avignon; and I assented." Macaulay: Hist. Eng., ch. xiii.

3. To inform secretly; to prompt.

"We must suggest the people, in what hatred He still hath held them." Shakspeare: Coriolanus, II. 1.

4. To tempt, to seduce.

"To suggest thee from thy master." Shakspeare: Taming of the Shrew, IV. 5.

B. Intrans.: To make suggestions; to present half thoughts to the mind.

sug-gest-er, a. [Eng. suggest; -er.] One who suggests; one who makes suggestions.

"The Spirit of God in person is not the immediate suggester of this conclusion." Bp. Bull: Works, II. 885.

sug-ges-ti-o fál-si, phr. [Lat. = the suggestion of something false or untrue.]

1. Logic & Ethics: A term used when one, instead of telling a positive untruth, makes a statement which, though not false, is yet pretty sure to be misunderstood, and is intended to be so.

2. Law: One of the branches of fraud. If suggestio falsi be practised in drawing out legal conveyances, re-leases, or agreements, its detection affords a ground for setting them aside.

sug-gest-i-ón (s as y), s. [Fr., from Lat. suggestio, accus. of suggestio, from suggestus, pa. par. of suggere = to suggest (q.v.).]

I. Ordinary Language:

1. The act of suggesting, hinting, or proposing guardedly or with diffidence. (Either in a good or bad sense.)

2. That which is suggested; a hint; a first intimation or proposal.

"One slight suggestion of a senseless fear, Infus'd with cunning, serves to ruin me." Dryden: Juvenal, sat. 3.

3. A prompting, especially to evil; a secret incitement; temptation, seduction.

"Why do I yield to that suggestion?" Shakspeare: Macbeth, I. 2.

4. Presentation of an idea to the mind: as, the suggestions of fancy or imagination.

5. A crafty device.

"One that by suggestion Fled all the kingdom." Shakspeare: Henry VIII., IV. 2.

II. Technically:

1. Law: Information without oath: as, (1) An information drawn in writing, showing cause to have a prohibition.

(2) A surmise or representation of something, enrolled upon the record of a suit or action, at the instance of a party thereto.

2. Metaph.: The same as ASSOCIATION (q.v.).

¶ (1) Principle of suggestion: Association of ideas.

(2) Relative suggestion: Judgment. Dr. Thomas Brown (1778-1820), Prof. of Moral Philosophy in the University of Edinburgh, divided "the Intellectual States of Mind" into Simple and Relative Suggestion; the first corresponding to what others have called Association, and the latter to Judgment. He places under Simple Suggestion: Conception, Memory, Imagination, and Habit; under Relative Suggestion: Coexistence and Succession. (Brown: Philos. Human Mind, lect. xxxiii., xlv.)

sug-gest-ive, a. [Eng. suggest; -ive.] Containing a suggestion or hint; calculated or tending to suggest ideas or thoughts; suggesting more than appears on the surface. (Very often in a bad sense.)

sug-gest-ive-ly, adv. [Eng. suggestive; -ly.] In a suggestive manner; by way of suggestion.

sug-gest-ive-ness, s. [Eng. suggestive; -ness.] The quality or state of being suggestive.

"His menageries—constant employment of the dash for suggestiveness, and a habit of italicizing to make a point or strengthen an illustration—are wearisome." Scribner's Magazine, May, 1880, p. 119.

sug-gest-ment, s. [Eng. suggest; -ment.] The act of suggesting; suggestion.

sug-gest-ress, a. [Eng. suggest; -ress.] A female who suggests.

sug-gil, v.t. [Lat. sugillo, sugillo = to beat black and blue, to insult, to revile.]

1. To beat black and blue; to make livid by bruises.

2. To defame, to sully, to blacken.

"They will not shrink to offer their blood for the defence of Christ's verity, if it be openly insuiped, or secretly suggilled." Archbishop Parker's Sermon: App. to Life.

sug-gil-áto, v.t. [Lat. suggillatus, pa. par. of sugillo.] [SUGGIL.] To beat black and blue; to beat livid.

"The head of the os hameri was bruised, and remained suggillat long after." Wiseman: Surgery.

sug-gil-á-tion, s. [Lat. suggillatio.] A livid or black and blue mark; a blow, a bruise, ecchymosis. Also applied to the spots which occur in disease and in incipient putrefaction.

sugre, s. & v. [SUOAR.]

sū-y-íd-ál, a. [Eng. suicidal(e); -al.]

1. Partaking of the nature of the crime of suicide: as, suicidal mania.

2. Destructive to one's self, or one's own interests.

"The obstinacy of the English authorities in keeping the army on so reduced a footing is considered simply suicidal." Daily Telegraph, Feb. 14, 1885.

sū-y-íd-ál-ly, adv. [Eng. suicidal; -ly.] In a suicidal manner.

sū-y-ído, s. [Formed in sense 1 from Lat. sui, genit. of se = one's self, and cidum = a slaying, from caedo (in comp. -cido) = to kill; in sense 2, from sui, and -cida = a slayer, on the analogy of homicida, fratricida, &c.; Fr. suicide. Trench says that till the middle of the seventeenth century this word had not established itself in the language; self-homicide was used instead.]

1. Self-murder; the act of wilfully and designedly destroying one's own life. To constitute suicide in the legal sense, the person must be of years of discretion and of sound mind, in which case he is termed a felo-de-ee (q.v.). By the common law the consequences of suicide were deprivation of the rites of Christian burial, the suicide being interred at night at cross-roads, with a stake driven through his breast, and the forfeiture of all his goods and chattels to the Crown, including debts to him at the time of his committing the crime, but not including freehold property, and the forfeiture did not involve corruption of blood. These severe laws are now obsolete. In the United States eleven states have Constitutional provisions that the property of suicides shall not be forfeited. Christian burial is also the rule.

"Nor less to be exploded is the word suicide, which may as well seem to participate of sui, a sow, as of the pronoun sui." Phillips: New World of Words. (Pref. to ed. 3rd.)

2. One who commits self-murder; a felo-de-ee.

3. Ruin or destruction of one's own interests.

"In countries pretending to civilization there should be no war, much less intestine war, which may be justly called political suicide." Knox: Letter to a Young Nobleman.

sū-y-íd-íc-ál, a. [Eng. suicidal(e); -ical.] Suicidal.

sū-y-íd-ism, s. [Eng. suicidal(e); -ism.] A disposition or tendency to suicide.

sū-y-ídam, *su-i-óisme, s. [Lat. sui, genit. of suus = one's own; Eng. suff. -ism.] The seeking of what is personal to one; selfishness, egotism. [ALTRUISM.]

"But his suicide was so gross, that any of Alah's relations (whom he made run out all they had might read it)." R. Whitlock: Grand Schismatic.

sū-y-dæ, sū-y-dæ, s. pl. [Mod. Lat. su(s); Lat. fem. pl. adj. suff. -idæ, or neut. -idæ.]

1. Zool.: A family of Artiodactyle Mammals, of the Bunodont group (in which the crowns of the molars are tuberculated). The feet have only two functional toes, the other two being much shorter, and hardly touching the ground. Molars, incisors, and canines are present, the last very large, and, in the males, usually constituting formidable tusks

projecting from the side of the mouth. The stomach is generally slightly divided, but is by no means so complex as in the Ruminantia. Snout truncated and cylindrical, capable of considerable movement, and adapted for rooting up the ground. The skin is covered with hair to a greater or less extent; tall very short, in some cases rudimentary. The family is divided into three well-marked groups or sub-families: Suinae, True Swine (Sus, Potamochoerus, Babirusa, and Porcula); Dicotylinae (Pecorari, and the single genus Dicotyles, often classed as a family); and Phacochoerinae (Wart-hogs, with one genus, Phacochoerus).

2. Paleont.: The family probably commenced in the Eocene Tertiary. The most noteworthy genera are described in this Dictionary under their names.

sū-y-gén-ér-ys, phr. [Lat.] Of his or its own peculiar kind; singular.

sū-íl-lage (age as íg), s. [Fr. souillage, from souiller = to sully, to soil.] A drain or collection of filth; sullage.

"Some Italians dig wells and cisterns, and other conveyances, for the sullage of the house." Wotton: Remarks, p. 18.

su-íl-line, a. & s. [Lat. sull(us) = pertaining to swine; Eng. suff. -ine.]

A. As adj.: Belonging to, or characteristic of the genus Sus or the family Suidæ (q.v.).

"There are, moreover, extinct types, with many Sulline affinities." Nicholson: Paleont., II. 548.

B. As subst.: Any individual of the genus Sus or the family Suidæ (q.v.).

"All these early Sullines . . . appear to have had at least four toes." Marsh: Introd. & Success. of Vert. Life in America, p.

su-íl-næ, s. pl. [Mod. Lat. su(s); Lat. fem. pl. adj. suff. -inæ.] [SUIDÆ.]

*sū-íng, s. [Fr. suer = to sweat; Lat. sudo.] The process of soaking through anything.

"Note the percolation or suing of the verjuice through the wood; for verjuice of itself would never have passed through the wood." Bacon: Nat. Hist., § 78.

*sū-íng, pr. par. or a. [SUE.]

*sū-íng-ly, *su-yng-ly, adv. [Eng. suing, a.; -ly.] Following, in succession, after.

"My mynde & my flesh both have loved in lulling God, and for this the prophete saith here suingly, my eyes or kidneys, hath chiden me unto the night." Sir T. More: Works, p. 20.

sū-ínt, s. [Fr.] The natural grease of wool. It consists of insoluble saponaceous matter, together with a soluble salt containing from 15 to 33 per cent. of potash.

*sū-ísm, s. [SUIST.] Selfishness.

*sū-íst, s. [Lat. suus = one's own.] One who seeks to gratify himself; a selfish person; an egotist.

"A man with more liberty might be debtor to the Jews of Malta, than owe for curtesie to this schismatical suit; that hath with lesser favours to angle for greater." R. Whitlock: Grand Schismatic, p. 289.

suit, *suite, *sute, s. [Fr. suite = a chase, a suit, a train of attendants, from Lat. secta = a following, a sect (q.v.); in Low Lat. extended to mean a suit-at-law, a series, a suit of clothes, &c., from Lat. sequor = to follow.]

I. Ordinary Language:

*1. The act of following; pursuit, chase, as of game, &c.

*2. Consequence, succession, series.

"Every five and thirty years the same kind and suit of weather comes about again." Bacon.

3. The act of suing; a seeking for something by petition or application; petition; address of entreaty; request, prayer.

"Many shall make suit unto thee." Job xl. 9.

4. A petition made to one of exalted position or authority, as a monarch or great prince.

"I can but be thy guide, sweet maid, With Scotland's King thy suit to aid." Scott: Lady of the Lake, vl. 25.

5. Amorous solicitation; courtship, wooing; an attempt to win a woman in marriage.

"Rebate your loves, each rival suit suspend, Till this funeral web my labours end." Pope: Homer; Odyssey xii. 164.

6. The object of one's request, petition, or seeking; that which is sought or begged for; request, prayer.

"Thou hast obtained thy suit." Shakspeare: Merchant of Venice, II. 2.

7. A set, a number of things used together,

ból, bóy; pót, jówl; cat, cell, ehorns, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -íng. -dan, -tian = shán. -tion, -sion = shún; -tion, -sion = zhún. -cious, -tious, -sious = shús. -ble, -dle, &c. = bel, dol.

and in a degree necessary to be united in order to serve their purpose; as, a suit of armour, a suit of sails for a ship, &c.; especially used absolutely for a set of clothes; dress, apparel.

"He hath his change of *suits*, yes, he spareth not to go in his silkes and velvet."—*Wilton: Art of Rhetorique*, p. 84.

8. Things which follow in a series or succession; a set of things of the same kind or stamp; the collective number of individuals composing a series: as, a *suit* (more generally a *suite*) of rooms.

9. Specifically, one of the four sets (of thirteen cards each) which compose a pack.

"To deal and shuffle, to divide and sort Her mingled *suits* and sequences."—*Copier: Tark I. 474*.

*10. Kind, class, sort, description.

"The tapes of hire white volpere Were of the same *suit* of hire colere."—*Chaucer: C. T., § 241*.

*11. Retinue, attendants; number of followers, train. (Now written *suite*.)

12. Outward covering or dress.

"But I have that within which passeth show; These hot the trappings and the *suits* of woe."—*Shakespeare: Hamlet, I. 4*.

II. Law:

1. Feudal law: A following or attendance: as—

(1) Attendance by a tenant on his lord, especially at his court; called also *Suit-court*.

(2) Attendance for the purpose of performing some service; called also *Suit-service*.

(3) The retinue, chattels, offspring, and appurtenances of a vassal.

2. Civil Law:

(1) An action or process for the recovery of a right or claim; legal application to a court of justice; prosecution of right before any tribunal: as, a *suit* in Chancery. When the remedy is sought in a court of law, the term *suit* is synonymous with *action*, but when proceedings are taken in a court of equity the term *suit* alone is used. In Britain it is applied to proceedings in the Ecclesiastical and Admiralty courts.

"Of a strange nature is the *suit* you follow."—*Shakespeare: Merchant of Venice, IV. 1*.

(2) The witnesses or followers of the plaintiff in an action at law.

* (1) *Out of suits*: No more in service and attendance on; at odds with.

(2) *To follow suit*: [FOLLOW, ¶ (2)].

"Wear this for me; one *out of suits* with fortune, That would give more, but that her hand lacks means."—*Shakespeare: As You Like It, I. 2*.

* *suit-broker*, s. One who made a regular trade of obtaining favours for court petitioners.

* *suit-court*, s. [SUIT, s., II. 1. (1).]

* *suit-covenant*, s.

Law: A covenant by the ancestor of one man with the ancestor of another to sue at his court. (*Bailey*.)

* *suit-like*, * *sute-like*, a. Suitable, adapted.

"Then she put her into man's apparel, and gave her all things *sute-like* to the same, and laid her upon a mattress all alone without light or candle."—*North: Plutarch*, p. 40.

* *suit-service*, s. [SUIT, s., II. 1. (2).]

suit, v. t. & i. [SUIT, s.]

A. Transitive:

1. To adapt, to accommodate; to fit or make suitable.

"*Suit* this action to the word, the word to the action, with this special observance, that you overstep not the modesty of nature."—*Shakespeare: Hamlet, III. 2*.

2. To be adapted or suitable to; to become.

"Such furniture as *suits* the greatness of his person."—*Shakespeare: Henry VIII., II. 1*.

3. To fit; to be adapted to.

4. To be agreeing to; to fall in with; to please; to be convenient or agreeable to: as, *To suit* one's tastes.

* 5. To dress, to clothe.

"It is the use for Tyrian maids to wear Their bow and quiver in this modest sort, And *suit* themselves in purple for the nonce."—*Marlowe: Tido, Queen of Carthage, I. 1*.

B. Intrans. : To agree, to accord, to match, to correspond, to tally. (Often followed by *to* or *with*.)

"I'll with King James's mood that day, *Suited* gay feast and minstrel lay."—*Scott: Lady of the Lake, v. 33*.

¶ For the difference between *suit* and *fit*, see *Fit*.

suit-a-bil-i-ty, s. [Eng. *suitable*; -*ty*.] The quality or state of being suitable; suitability.

suit-a-ble, a. [Eng. *suit*; -*able*.] Capable of suiting; suiting or being in accordance; according, agreeable, fitting, convenient, proper, becoming.

"In his face Youth smiled celestial, and to every limb *Suitable* grace diffused."—*Milton: P. L., III. 688*.

¶ For the difference between *suitable* and *becoming*, *conformable*, *convenient*, and *correspondent*, see *BECOMING*, *CONFORMABLE*, &c.

suit-a-ble-ness, s. [Eng. *suitable*; -*ness*.] The quality or state of being suitable, fit, adapted, agreeable, proper, becoming, or convenient; agreeableness, fitness, propriety.

"There is a cautious *suitableness* and applicability to the text of Moses all along."—*Morse: Def. of Phil. Cabbala*, [App.]

suit-a-bly, adv. [Eng. *suitable*(e); -*ly*.] In a suitable manner or degree; fitly, agreeably, conveniently, becomingly.

"The most notable of those offices that can be assigned to the spirit of nature, and that *suitably* to his name, is the translocation of the souls of beasts into such matter as is most fitting for them."—*Morse: Immort. of the Soul, bk. III., ch. XIII.*

suite (as *swēt*), s. [Fr.] [SUIT, s.]

1. A company or number of attendants or followers; a retinue, a train.

2. A number of things having a connection together, spoken of as a whole; a collection of things of the same kind; a set, a series: as, a *suite* of rooms, furniture, &c.

* *suit-er*, * *sut-er*, s. [Eng. *suit*, v.; -*er*.] A suitor (q. v.).

"Now in all judgements being two parties, the first we call the impleader, *suter*, demandant, or demandant, and plaintiff."—*Smith: Commonwealth, bk. II., ch. 2*.

* *suit-höld*, s. [Eng. *suit*, and *hold*.]

Feudal Law: Tenure in consideration of certain services to a superior lord.

suit-ing, pr. par., a., & s. [SUIT, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: Cloth for making suits of clothes.

suit-ör, * *sut-er*, s. [Eng. *suit*, v.; -*ör*.]

I. Ordinary Language:

1. One who prefers a suit; a petitioner, an applicant.

"The throng, that follows Cæsar at the heels, Of senators, of pretors, common *suitors*."—*Shakespeare: Julius Cæsar, II. 4*.

2. One who solicits a woman in marriage; a wooer, a lover.

"My court quickly swarmed full of *suitors*."—*Stidney: Arcadia, bk. I.*

II. Law: A party to a suit or litigation.

* *suit-ör*, v. i. [Eng. *suitör*, a.] To court, to woo.

"Counts a many, and dukes a few, A *suitöring* came to my father's hall."—*Barham: Ing. Ley; St. Nicholas*.

* *suit-röss*, s. [Eng. *suitör*; -*ess*.] A female suitor or applicant.

"Beshrew me, but 'twere pity of his heart, That could refuse a boon to such a *suitress*."—*Rome: Jane Shore, III. 1*.

* *suit-y*, * *sut-ye*, a. [Eng. *suit*; -*y*.] Fitting, becoming, suitable.

"This to soones is *sutie*."—*Darwin: Holy Roods, p. 18*.

sül-la, s. [Latinised from the Icelandic name of the Soland-geese (q. v.).]

Ornith.: Gannet; a cosmopolitan genus of Pelecanidae, with eight species. Bill forming an elongated cone, very large at base, compressed at point, which is slightly curved; mandibles serrated; angle of gape below the line of the eyes; face and throat naked; nostrils basal, obliterated; legs strong, short, three toes in front, one behind, all articulated by a membrane.

sül-cato, *sül-cät-öd*, a. [Lat. *sulcatus*, pa. par. of *sulco* = to furrow; *sulcus* = a furrow.] Furrowed, grooved; having longitudinal furrows, grooves, or channels. (Applied especially to stems, leaves, seeds, &c., of plants, the surfaces of various molluscan shells, &c.)

"All are much chopped and *sulcated* by having lain exposed on the top of the clay to the weather."—*Woodward: On Fossils*.

sül-öä'-tion, s. [SULCATE.] A channel, groove, or furrow.

sül-cä-tö, pref. [SULCATE.] Furrowed.

sulcato-rimose, a.

Bot.: Furrowed and cracked, as the cotyledons of a Spanish chestnut.

sül-öä'-tör, s. [Lat. = one who draws furrows, a plougher.]

Zool.: A genus of Amphipod Crustaceans. *Sulcator arenarius*, living on the sandy seashore, leaves tracks like those of Annelids or the impressions of plants, which have been compared with those on some of the Palæozoic rocks.

sül-öüs (pl. *sül'-çl*), s. [Lat. = a furrow.]

1. Anat.: A furrow, a groove: as, the auriculo-ventricular *sulcus* of the heart and the *sulci* of the brain.

2. Bot. (Pl.): The lamellæ of certain fungals.

suld, v. t. [SHOULD.] (Scotch.)

sulf-ät-äl-lö-phäne, s. [Fr. *sulfur* = sulphate, and Eng. *allopäne*.]

Min.: A mixture of allopäne and sulphate of alumina.

sül-fü-ri-çin, s. [Fr. *sulfuré* = sulphurous.]

Min.: A white porous silica, having an acid taste and impregnated with sulphur. Found in Greece.

* *sülk*, s. [Lat. *sulcus*.] A furrow.

"The surging *sulks* of the sandiferous sea."—*Stidney: Waverley, p. 618*.

sülk, v. i. [SULKY.] To be sulky; to indulge in a sulky fit or mood. (Colloq.)

* *sülk*, *sülke*, a. [SULKY, v.] Hanging on hand, hard to sell (?).

"Never was thrifty trader more willing to put of a *sülk* commodity."—*Heywood: Challenge for Beauty, III. 1*.

sülk-y-ly, adv. [Eng. *sulky*; -*ly*.] In a sulky manner; sullenly, morosely. (See extract under STUPID, A. 2.)

sülk-y-ness, s. [Eng. *sulky*; -*ness*.] The quality or state of being sulky; sullenness, moroseness; sourness of temper.

"Allow nothing to the *sulkiness* of my disposition."—*Gray: To Dr. Clarke, Aug. 1780*.

sülks, s. pl. [SULK.] A state or fit of sulkiness; a sulky fit or mood. (Colloq.)

"When she wakes up out of the *sülks*."—*C. Kingsley: Alton Locke, ch. XVI.*

sülk-y, a. & s. [Properly *sulken*, *sulken-ness* being misdivided as *sülk-ness* by analogy with *happi-ness*, from *happy*, &c. From A.S. *solen* = slothful, rennis, disgrated.]

A. As adj.: Sullen, sour in temper, morose; obstinately maintaining ill-feeling and repelling advances.

"It is surely better to be even weak than malignant or *sülky*."—*Knox: Essay No. 123*.

B. As subst.: A light, two-wheeled vehicle, having a seat for a single occupant, used as a

SULKY.

pleasure-carriage and for trials of speed between trotting-horses. (Amer.)

¶ Used also adjectively = having a single seat: as, a *sülky-cultivator*, *sülky-harrow*, *sülky-plough*, &c., in which there is a single seat for the driver.

* *süll*, s. [A.S. *sulh*.] A plough.

süll-äge (age as *äg*), s. [SULLAGE.]

I. Ordinary Language:

1. A collection of filth; a drain; sewage.

* 2. Anything which sullies or defiles.

3. Silt and mud deposited by water.

II. Founding: The scoria which rises to the surface of the molten metal in the ladle, and which is held back when pouring, to prevent porous and rough casting.

fäte, fät, färe, amidst, whät, fäll, father; wö, wöt, hère, camel, hër, there; pine, pít, síre, sír, marine; gö, pöt, ör, wöre, wöf, wörk, whät, söñ; müte, cüb, cüre, unite, öür, rüle, füll; trý, Sýrian. æ, œ = è; ey = ä; qu = kw.

sullage-piece, s. A dead-head, or feeling-head, a piece of metal on a casting which occupies the ingate at which the metal entered the mould.

sul-lên, *sol-ain, *sol-ayne, *sol-ein, *sol-eine, *sol-eyn, *sol-syne, a. & s. [O. Fr. *solain* = lonely, solitary, from Lat. *solus* = alone.]

- A. As adjective:**
- 1. Alone, solitary.
"The solein fenix of Arabia."
Chaucer: *Drems.*
 - 2. Lonely, solitary.
"In soleyn pice by my selfe."
Gower: *C. A. vi.*
 - 3. Gloomy, dark, dismal, sombre.
"And nought disturbs the silence of the night;
All sleeps in sullen shade or silver glow."
Scott: *Don Roderick, l.*
 - 4. Melancholy, dismal.
"The sullen presage of your own decay."
Shakesp.: *King John, l.*
 - 5. Gloomily angry and silent; morose, sour-tempered, cross.
"She is peevish, sullen, froward."
Shakesp.: *Two Gentlemen, III. 1.*
 - 6. Characterized by sourness or moroseness; gloomy.
"Meanwhile a sullen and abject melancholy took possession of his soul."—Macaulay: *Hist. Eng., ch. xlii.*
 - 7. Mischievous, malignant, unpropitious, baleful.
"Such sullen plans at my birth did shine,
They threaten every fortune met with mine."
Dryden: *(Todd).*
 - 8. Obstinate, intractable.
"Things are as sullen as we are, and what they are, whatever we think of them."—Tillotson.
 - 9. Sluggish, slow-moving, dull.
"Small Cock, a sullen brook comes to her succour then."
Drayton: *Poly-Olbiion, s. 23.*

B. As substantive:

- 1. A person alone by himself.
"By hymself as a soleyne."
Piers Plowman, xli. 203.
- 2. A mess of meat for one person. (*Prompt. Parv.*)

3. (Pl.): [SULLENS].
¶ For the difference between *sullen* and *gloomy*, see **GLOOMY**.

sullen-lady, s.
Bot.: An unidentified species of *Fritillaria*. (*Britten & Holland.*)

• **sul-lên, v.t.** [SULLEN, a.] To make sullen, morose, gloomy, or obstinate; to sour.
"This: i. sullen the whole body."—Fettham: *Re-solves, pt. i., nos. 43.*

• **sul-lên-ly, adv.** [Eng. *sullen*, a.; -ly.] In a sullen or morose manner; morosely, gloomily, dismally.
"Sullenly, slowly,
The black plague dew o'er it"
Byron: *Manfred, III. 3.*

• **sul-lên-nêss, s.** [Eng. *sullen*; -ness.] The quality or state of being sullen; silent or gloomy moroseness; sourness of temper.
"The form which her anger assumed was sullenness."
—Macaulay: *Hist. Eng., ch. vii.*

• **sul-lên-sq, s. pl.** [SULLEN, a.] A state or fit of sullenness; a morose temper; the sulks.
"He did not love in other days
To wear the sullen on his face."
—Piercy: *County Ball.*

• **sul-lêr-ry, s.** [Eng. *sull*; -ry.] A plough-land (q.v.).

• **sul-lê-vâte, v.t.** [Lat. *sublevatus*, pa. par. of *sublevo* = to raise up, to support; pref. *sub-*, and *levo* = to make light, to lift up; *levis* = light in weight.] To rouse up, to excite.

• **sul-lê-âge (age ss ig), s.** [SULLAGE.]

• **sul-ly, *sul-ic, v.t. & i.** [A.S. *syltan* = to sully, to defile with dirt or mud, from *sol* = mire, dirt; cogn. with Sw. *sola* = to blemish; Dan. *søle*, from *søl* = mire; Goth. *bisaulþon*; Ger. *sullen*, from *suhle* = slough, mire; M.H.Ger. *söl, sol* = mire.]

A. Transitive:
1. Lit.: To stain, to dirty, to spot, to tarnish, to foul.
"A letter,
Much torn and sullied,"
Dryden: *Marriage à-la-Mode, l. 1.*

2. Fig.: To stain, to tarnish, to disgrace.
"Weakned our national strength, and sullied our glory abroad."—Bolingbroke: *Dissert. on Parties, let. 1.*

• **B. Intrans.**: To become sullied, soiled, or tarnished.
"Your white canvas doublet will sully."—Shakesp.: *1 Henry IV., ll. 4.*

• **sul-ly, *sul-ley, s.** [SULLY, v.] A spot, soil, or tarnish. (*Fielding: Joseph Andrews, bk. i., ch. iv.*)

sulph-, pref. [SULPHO-]

sulph-a-pôt'-a-mide, s. [Pref. *sulph-*, and Eng. *acetamide*.]
Chem.: Schizole's name for the compound $(C_4H_5SO_2)^N$, produced by the action of ammonium sulphide on chloracetamide.

sulph-a-pôt'-yo, a. [Pref. *sulph-*, and Eng. *acetic*.] Derived from or containing sulphur and acetic acid.

sulphacetic-acid, s.
Chem.: $C_2H_4SO_6 = (C_2H_3SO_3)^N$. Oily-cetyl-sulphurous acid. A dibasic acid produced by the action of sulphur anhydride on glacial acetic acid. It forms colourless deliquescent prisms, which melt at 62°, and are very soluble in water, forming an acid solution. Its salts are all soluble in water, but insoluble in alcohol.

sulph-a-pôt'-y-lên-ic, a. [Pref. *sulph-*; Eng. *acetylene*, and suff. -ic.] Derived from or containing sulphuric acid and acetylene.

sulphacetylenic-acid, s.
Chem.: $C_2H_4SO_5 = (SO_2)^N$. Isomeric with sulphacetic acid, and obtained by heating argentic sulphate with acetyl chloride to 120°, and treating the product with water. It is a viscid, unstable liquid, and gradually decomposes into sulphuric and acetic acids.

• **sulph'-âç-îd, s.** [SULPHO-ACID.]

• **sulph'-a-mâte, s.** [Eng. *sulpham(ate)*; -ate.]
Chem.: A salt of sulphamic acid (q.v.).

• **sulph-a-mêth'-yl-âne, s.** [Pref. *sulph-*, Eng. *methyl*, and suff. -ane.]
Chem.: $CH_5NSO_3 = (SO_2)^N$. Methyl sulphamate. Formed by dissolving methyl sulphate in aqueous ammonia, and crystallizing, by evaporation in a vacuum. It forms large, very deliquescent crystals.

• **sulph-âm-ic, a.** [Pref. *sulph-*, and Eng. *amic*.] Derived from or containing sulphuric acid and ammonia.

sulphamic-acid, s.
Chem.: $NH_2SO_3 = NH_2SO_3^N$. Unknown in the free state, but known in its salts. Sulphamate of ammonium, $2NH_3 \cdot SO_3$. Sulphat-ammon, Sulphammon. A white, crystalline powder, obtained by passing dry ammonia gas over a thin layer of sulphuric anhydride. Permanent in air; taste bitter; soluble in nine parts of water, insoluble in alcohol.

• **sulph-âm-ide, s.** [Pref. *sulph-*, and Eng. *amide*.]
Chem.: $H_4SO_2N_2 = (SO_2)^N$. Produced, according to Regnaud, when dry ammonia gas is passed over sulphuric chloride.

• **sulph-âm-î-dôn-ic, a.** [Eng. *sulph(uric)*; *amidon*; and suff. -ic.] Derived from or containing sulphuric acid and amidon.

sulphamidonic-acid, s.
Chem.: $C_{24}H_{48}O_{24} \cdot 2SO_3$ (?). A syrupy, deliquescent acid, produced by triturating starch with strong sulphuric acid. Its salts are all amorphous, deliquescent, easily soluble in water, and very unstable. (*Haffs.*)

• **sulph-âm-môn, sulph-at-âm-môn, s.** [Pref. *sulph-*, or *sulphat(o)*-, and Eng. *ammôn(ium)*.] [SULPHAMIC-ACID.]

• **sulph-a-myl-ic, a.** [Pref. *sulph-*, and Eng. *amylic*.] Derived from or containing sulphuric acid and amyl alcohol.

sulphamylic-acid, s.
Chem.: $(C_5H_{11})HSO_4$. Amylsulphuric acid. A colourless, thin syrup, obtained by allowing a mixture of sulphuric acid and amyl alcohol to stand in a cool place till water no longer separates amyl alcohol from it. It has an acid, bitter taste, and is very soluble

in water and alcohol, the aqueous solution decomposing spontaneously into amyl alcohol and sulphuric acid.

• **sul-phân, s.** [Eng. *sulphate*], and (*oxyge*)n.]
Chem.: Sulphatoxygen. Graham's name for the radical SO_4 .

• **sulph-a-nê-thic, a.** [Pref. *sulph-*; Eng. *aneth(ol)*, and suff. -ic.] Derived from or containing sulphuric acid and anethol.

sulphanethic-acid, s.
Chem.: $C_{10}H_{14}O \cdot SO_4$ (?). Sulphanetholic acid. Obtained by the action of strong sulphuric acid on anise-camphor. Its soluble salts are coloured deep violet by ferric solution.

• **sulph-a-nê-thâl-ic, a.** [SULPHANETHIC.]

• **sulph-a-nil-ic, a.** [Pref. *sulph-*, and Eng. *anilic*.] Derived from or containing sulphuric acid and aniline.

sulphanilic-acid, s.
Chem.: $C_6H_7NSO_3 = NH(C_6H_5SO_3)^N$. O. Phenyl-sulphamic acid. Formed by the action of sulphuric acid on aniline, or on oxanilide.

It crystallizes from hot water in shining rhombic plates, soluble in boiling water, slightly soluble in cold water, still less soluble in alcohol, insoluble in a mixture of alcohol and ether. Heated with a solid caustic alkali, it gives off aniline, leaving an alkaline sulphate. Its salts are soluble and crystallizable.

• **sulph-ar'-sin, s.** [Pref. *sulph(o)*; Eng. *arsenic*], and suff. -in.] [SULPHIDE OF CADODYL.]

• **sulph-at-âm-môn, s.** [SULPHAMMON.]

• **sulph'-ate, s.** [Eng. *sulph(uric)*; -ate.]

1. **Chem. & Min.:** A salt of sulphuric acid.
¶ Sulphate of alumina = *Alumogen*; Sulphate of ammonia = *Mascagnite*; Sulphate of barium = *Barytes*; Sulphate of cobalt = *Bieberite*; Sulphate of copper = *Chalcantite*; Sulphate of iron = *Melanterite*; Sulphate of lead = *Anglesite*; Sulphate of lime = *Anhydrite* and *Gypsum*; Sulphate of nickel = *Morenosite*; Sulphate of potash = *Apthitalite*; Sulphate of potash and ammonia = *Taylorite*; Sulphate of soda = *Mirabilite* and *Theophrastite*; Sulphate of strontian = *Celestine*; Sulphate of uranium = *Johannite* and *Vogliantite*; Sulphate of uranium and lime = *Medjidite*; Sulphate of zinc = *Goslarite*.

2. **Pharm., &c.:** Various sulphates are used in medicine. (See the elements, with which the sulphates are combined.)

• **sul-phât-ic, a.** [Eng. *sulphat(e)*; -ic; Fr. *sulfatique*.]
Chem.: Of, belonging to, containing, or resembling a sulphate.

• **sulph'-a-tite, s.** [Eng. *sulph(ur)*; *at* connect., and suff. -ite (*Min.*); Ger. *schwefelsäure*.]
Min.: Native sulphuric acid (q.v.). (*Dana.*)

• **sul-phâ-tô-, pref.** [SULPHATE.] Sulphatic (q.v.).

sulphato-carbonate of barytes, s.
Min.: A variety of witherite (q.v.), containing a sulphate. Now shown to be a result of partial alteration. (*Thomson.*)

sulphato-carbonate of lead, s. [LANARKITE.]

sulphato-chloride of copper, s. [CONNELLITE.]

sulphato-tricarbonat of lead, s. [LEADHILLITE, SUSANNITE.]

• **sulph-at-ôx'-y-ğên, s.** [Pref. *sulphat(o)*, and Eng. *oxygen*.] [SULPHAN.]

• **sulph-âz'-ô-tişed, a.** [Pref. *sulph-*, and Eng. *azotised*.] Derived from or containing sulphuric acid and azote or nitrogen.

sulphazotised-acids, s. pl.
Chem.: A series of acids, the salts of which are formed by the action of sulphurous anhydride upon a solution of potassium, sodium, or ammonium nitrite, containing a large excess of free alkali. The potassium salts may be represented by the following formulæ: sulphazite of potassium = $3K_2O \cdot S_4H_6N_2O_{12}$; sulphazate of potassium = $3K_2O \cdot S_4H_6N_2O_{14}$; sulphazotate of potassium = $3K_2O \cdot S_4H_6N_2O_{16}$.

sulph-ide, s. [Eng. *sulph(uric); -ide.*]
Chem. & Min.: A neutral salt of sulphydric acid.
 † Sulphide of arsenic = *Orpiment* and *Realgar*; Sulphide of antimony = *Stibnite*; sulphide of bismuth = *Bismackinite*; sulphide of cadmium = *Greenockite*; Sulphide of copper = *Vitreous-copper*; Sulphide of iron = *Trochilite*; Sulphide of lead = *Galena*; Sulphide of manganese = *Alabandite*; Sulphide of mercury = *Cinnabar*; Sulphide of molybdenum = *Molybdenite*; Sulphide of nickel = *Müllerite*; Sulphide of silver = *Argentite* and *Akanthite*; Sulphide of silver and copper = *Strzeyerite*; Sulphide of zinc = *Blende* and *Wurtzite*.

sulphide of cacodyl, s.
Chem.: $As_2(CH_3)_2S$. Sulpharsin. Formed by adding barium sulphide to crude cacodyl. It is a transparent liquid, fluid at 40°, and boiling at 100°.

sulphide of chlorine, s.
Chem.: Cl_2S_2 . Prepared by passing dry chlorine gas into a retort in which sulphur is sublimed, and collecting the distillate in a receiver surrounded by cold water. It is a mobile reddish-yellow liquid, having a penetrating, disagreeable odour, and fuming strongly in the air. Sp. gr. 1.657; boils at 139°.

sulphide of iron, s. [FERROUS-SULPHIDE.]

sulph-in-dī-gōt'-ic, a. [Pref. *sulph.*, and Eng. *indigotic.*] Derived from or containing sulphuric acid and indigotine.

sulphindigotic-acid, s.
Chem.: $C_{16}H_{10}N_4O_2 \cdot 2SO_3 = C_{16}H_8(SO_3 \cdot OH)_2 N_4O_2$. Sulphindigoylic acid. A deep blue pasty mass, obtained by heating one part of indigo with fifteen parts concentrated sulphuric acid for three days, at 40° to 50°. It is soluble in water and alcohol, and is used in dyeing.

sulph-in-dyl'-ic, a. [Pref. *sulph.*; Eng. *indigo*]; and suff. *-yl, -ic.*] [SULPHINDIGOTIC.]

sul-phim'-ic, a. [Eng. *sulph(ur)*], in connect., and suff. *-ic.*] Containing, derived from, or pertaining to hyposulphurous acid.

sulphinic-acids, s. pl.
Chem.: Compounds analogous to sulphonic acids or acid ethers of hyposulphurous acid. Formed by the action of sulphur dioxide on the zinc compounds of the alcohol radicals.
 ---CH_2
 Methyl sulphinic acid = SO
 ---OH

sulph-ī-ōn, s. [Eng. *sulph(ur)*], and ion (q.v.).]
Chem.: SO_4 . A term applied in electrochemistry to a supposed radical, resulting from the electrolysis of sulphuric acid, H_2SO_4 , the hydrogen being carried to the negative electrode, and sulphion set free; this, however, being immediately broken up into $SO_3 + O$, the latter passing over to the positive electrode.

sulph-is'-a-tin, s. [SULPHISATYDE.]

sulph-is'-a-tyde, sulph-is'-a-tin, s. [Pref. *sulph.*, and Eng. *isatylic, isatin.*]
Chem.: $C_{16}H_{12}N_2O_8S_2$. A grayish yellow powder obtained by passing sulphydric acid into an alcoholic solution of isatine, filtering, and precipitating by the addition of water. It is soluble in alcohol, insoluble in water.

sulph-īta, s. [Eng. *sulph(urous); -ite.*]
Chem.: A salt of sulphurous acid.

sul-phō-, sulph-, pref. [SULPHUR.] Of, belonging to, or containing sulphur.

sulpho-acid, s.
Chem.: An acid in which the oxygen is replaced by sulphur; thus, from cyanic acid, $C\equiv N-H$, sulphocyanic acid, $CSNH$, is obtained.

sulpho-base, s.
Chem.: A base in which the oxygen is replaced by sulphur: K_2O becomes K_2S .

sulpho-compounds, s. pl.
Chem.: Compounds of organic radicals with sulphuric and sulphurous anhydride, as sulphonic and sulphinic acids (q.v.).

sulpho-naphthalidamic-acid, s. [NAPHTHIONIC-ACID.]

sulpho-purpuric-acid, s.
Chem.: $2C_8H_7NO, SO_3$. Sulphophenic acid.

Indigo-purple. A purple-red powder obtained by mixing one part indigo-blue with eight parts strong sulphuric acid, keeping it at a temperature of 60° for three days, diluting with water, filtering, washing the residue with dilute hydrochloric acid, and drying on an oil-bath at 100°. It is slightly soluble in water, but very soluble in sulphuric acid.

sulpho-quinic acid, s. [QUININE-SULPHONIC-ACID.]

sulpho-salt, s. [SULPHUR-SALT.]

sul-phō-bēn-zām'-ic, a. [Eng. *sulphobenzamide*]; *-ic.*] Derived from or contained in sulphobenzamide.

sulphobenzamio-acid, s.
Chem.: $C_7H_7NSO_4 = (C_7H_5SO_3)' \left. \begin{matrix} H_2 \\ H \end{matrix} \right\} N. A$

monobasic acid produced by heating sulphobenzamide in strong potash ley for some hours in a water bath. It crystallizes in rhomboidal crystals or needles, insoluble in cold water, slightly soluble in ether, but soluble in hot water and in alcohol; melts above 100°, and solidifies on cooling in a crystalline mass. Its salts are all more or less soluble in water.

sul-phō-bēn-zā-mide, s. [Pref. *sulpho-*, and Eng. *benzamide.*]

Chem.: $C_7H_5N_2SO_3 = (C_7H_5SO_3)' \left. \begin{matrix} H_2 \\ H \end{matrix} \right\} N_2. Ob-$
 tained by treating sulphobenzoyl chloride with strong ammonia. It dissolves readily in hot water and hot alcohol, melts at 170°, and is slowly decomposed at 270°-290°.

sul-phō-bēn-zide, s. [Pref. *sulpho-*, Eng. *benz(o)*], and suff. *-ide.*]

Chem.: $C_{12}H_{10}SO_2$. A compound formed by the action of sulphuric anhydride on benzol, and treating the product with a large quantity of water. It crystallizes in rhombic plates, insoluble in water and in alkalis, soluble in alcohol and ether, melts at 128°, and boils at a much higher temperature.

sul-phō-bēn-zō'-ic, a. [Pref. *sulpho-*, and Eng. *benzoic.*]] Derived from or containing sulphuric and benzoic acids.

sulphobenzoyl-acid, s.
Chem.: $C_7H_5O_2S = C_6H_4 \cdot \left. \begin{matrix} SO_2OH \\ CO \cdot OH \end{matrix} \right\}$. A monobasic, aromatic, deliquescent acid, formed by heating benzoic acid with Nordhausen sulphuric acid, or by passing the vapour of sulphuric anhydride over dry benzoic acid. It is obtained in strongly-acid crystalline masses readily soluble in water.

sul-phō-car-bām'-ic, a. [Pref. *sulpho-*, and Eng. *carbamic.*]] Derived from or containing sulphur, carbon, and ammonia.

sulphocarbamic-acid, s.
Chem.: $CH_3NS_2 = C \left\{ \begin{matrix} NH_2 \\ S \\ SH \end{matrix} \right.$. A reddish, oily

liquid obtained by passing ammoniacal gas into carbon disulphide, and decomposing the salt formed with hydrochloric acid. It solidifies at ordinary temperatures to a crystalline mass, which soon decomposes into sulphocyanic acid and hydric sulphide.

sul-phō-çy'-ān-āte, s. [Eng. *sulphocyanic*]; *-ate.*]

Chem.: A salt of cyanic acid.

sulphocyanate of potassium, s.
Chem.: $CNKS$. Obtained by gradually heating to low redness a mixture of dried potassium, ferro-cyanide, sulphur, and pure potassium carbonate, exhausting with water, and evaporating the aqueous solution to dryness. It crystallizes in long, slender, colourless prisms, soluble in water and alcohol, and deliquesces when exposed to a moist atmosphere.

sul-phō-çy'-ān'-ic, a. [Pref. *sulpho-*, and Eng. *cyanic.*]] Containing cyanic acid and sulphur.

sulphocyanic-acid, s.
Chem.: $HSCN$. Hydrogen sulphocyanate. A monobasic acid obtained by decomposing lead sulphocyanate suspended in water, with sulphuretted hydrogen. It is a colourless, very acid liquid, with a pungent acetous odour, and solidifies at -12.5° to hexagonal plates. Heated to 100° it boils, but the

greater part suffers decomposition. Its colours ferric salts an intense blood-red, and on this account is used, in the form of any of its soluble salts, to detect traces of iron.

sul-phō-çy'-ān'-ō-gēn, s. [Eng. (per)sulphocyanogen.].
Chem.: The old name for persulphocyanogen (q.v.).

sul-phō-dra-cōn'-ic, a. [Pref. *sulpho-*, and Eng. *draconic.*]] Derived from or containing sulphur and draconic acid.

sulphodraconic-acid, s.
Chem.: A conjugated acid produced, according to Laurent, by treating oil of anise or tarragon with a large excess of sulphuric acid.

sul-phō-form, s. [Pref. *sulpho-*, and Eng. *form.*]]
Chem.: An oily liquid produced in small quantity by distilling iodoform with mercuric sulphide. (Bouchardat.)

sul-phō-glū'-cic, a. [Pref. *sulpho-*, and Eng. *glucic.*]] Derived from or containing sulphuric and glucic acids.

sulphoglucio-acid, s.
Chem.: $(C_6H_7O_6)_2SO_3$. Sulphosaccharic acid; an unstable acid formed by treating glucose with strong sulphuric acid. It is obtained in the form of a liquid having a sour and sweet taste, and which does not precipitate barium salts.

sul-phō-glū-tin'-ic, a. [Pref. *sulpho-*; Eng. *glutin*]; and suff. *-ic.*]] (For def., see compound.)

sulphoglutinic-acid, s.
Chem.: A glutinous acid formed, together with other products, by the action of sulphuric anhydride in excess, on naphthalene. (Berzelius.)

sul-phō-hip-pūr'-ic, a. [Pref. *sulpho-*, and Eng. *hippuric.*]] Derived from or containing sulphuric and hippuric acids.

sulphohippuric-acid, s.
Chem.: $C_9H_9NO_6SO_4$. Formed by treating hippuric acid with sulphuric anhydride. By decomposing its lead salt with sulphydric acid it is obtained as a brown amorphous deliquescent mass. It is dibasic, its neutral barium salt having the composition, $C_9H_7BaNO_5SO_3$.

sulph-ō-lē'-ic, a. [Pref. *sulpho-*, and Eng. *oleic.*]] Derived from or containing sulphuric and oleic acids.

sulpholeic-acid, s.
Chem.: An oily acid, similar to and produced in the same way as sulphomargaric acid, and not separable from it (q.v.).

sul-phō-lig'-nic, a. [LIGNOSULPHURIC.]

sul-phō-mān-nit'-ic, a. [Pref. *sulpho-*, and Eng. *mannitic.*]] Derived from or containing sulphuric acid and mannite.

sulphomannitic-acid, s.
Chem.: $C_6H_4O_6(SO_3)$. An acid produced by dissolving mannite in strong sulphuric acid. It appears to be tribasic, forming deliquescent salts with the alkalis, and a crystalline salt with baryta. (Watts.)

sul-phō-mar-gār'-ic, a. [Pref. *sulpho-*, and Eng. *margaric.*]] Derived from or containing sulphuric and margaric acids.

sulphomargaric-acid, a.
Chem.: An oily acid, produced, according to Fresny, by the action of strong sulphuric acid on olein at low temperature. It separates as an oil from the acid liquid, but is soluble in both water and alcohol, as are its salts of the alkalis.

sul-phō-mēl-lōn'-ic, a. [Pref. *sulpho-*, and Eng. *mellonic.*]] Derived from or containing sulphuric acid and mellone.

sulphomellonic-acid, s.
Chem.: $C_8H_4N_4S_2 = CyH_2 \cdot N_2 \cdot Cy(HS)$. Obtained as a potassium salt by boiling persulphocyanogen with sulphate of potassium. It is separated from sulphur by treatment with aqueous ammonia and afterwards purified by animal charcoal. It forms small colourless needles, tasteless, nearly insoluble in

fāt, fāt, fārc, amidst, whāt, fāll, father; wē, wēt, hērs, camēl, hēr, thērs; pine, pīt, sire, sir, marine; gō, pōt, ew, wōre, wōlf, wōrk, whō, sōn; mūta, oūh, oūrs, unīte, cūr, rūle, fūll; trȳ, Sȳrian. ə. œ = ē; ey = ā; au = kw.

cold water, alcohol, and ether, but slightly soluble in boiling water. It is monobasic, the potassium salt $C_2N_4H_4K_2$ forming colourless shining prisms soluble in water and alcohol.

sul-pho-mé-thyl-ic, a. [Pref. *sulpho-*, and Eng. *methylic*.] Derived from or containing sulphuric acid and methyl.

sulphomethylic acid, s.

Chem.: $(CH_3)HSO_4$. Methylsulphuric acid, produced when one part of wood spirit is added to two parts of sulphuric acid, and obtained pure by decomposing its barium salt with sulphuric acid. It forms colourless needles soluble in water and alcohol, and combines with the alkaline and metallic bases to form salts. The barium salt $(CH_3)_2Ba(SO_4)_2 + 2OH_2$ is obtained in beautiful nacreous tables or laminae, very soluble in water.

sul-pho-náph-th-léne, s. [Pref. *sulpho-*, and Eng. *naphthalene*.]

Chem.: $\begin{matrix} C_{10}H_7 \\ C_{10}H_7 \end{matrix} SO_2$. Obtained by acting on an excess of fused naphthalene with the vapour of sulphuric anhydride. It crystallizes from its alcoholic solution in tasteless, inodorous nodules, melts at 70°, is slightly soluble in water, more soluble in boiling alcohol.

sul-phón-ic, a. [Eng. *sulph(ur)*; Gr. *θειον* (*théion*) = brimstone, and suff. *-ic*.] Containing sulphurous acid.

sulphonic acids, s. pl.

Chem.: Acid ethers of sulphurous acid in which one of the bonds of sulphur is united to the carbon of the organic radical, as methyl-

sulphonic acid SO_2 . They are formed by treating the haloid ethers with solution of sodium sulphite.

sul-pho-phén-ic, a. [Pref. *sulpho-*, and Eng. *phénic*.] Derived from or containing sulphuric acid and phenol.

sulphophenic acid, s.

Chem.: $(C_6H_5)HSO_4 = (C_6H_5)OH \cdot SO_3H$. Phenylsulphuric acid. Prepared by treating phenol with strong sulphuric acid, converting the compound into the barium salt, and, after purification, decomposing it with an equivalent of sulphuric acid. Evaporated in a vacuum, it forms well-defined but unimportant crystalline salts with the alkalis and metals.

sul-pho-phé-nyl-á-mide, s. [Pref. *sulpho-*, and Eng. *phenylamide*.]

Chem.: $C_6H_5SO_2 \cdot N$. Produced by the action of sulphophenyl chloride on ammonia. The product is washed with cold water to dissolve out chloride of ammonia, and the residual compound crystallized from a small quantity of boiling alcohol. It is obtained in splendid nacreous scales, melting at 153°; insoluble in cold water, easily soluble in alcohol, and capable of combining with metals or organic radicals.

sul-pho-phé-nyl-ic, a. [Pref. *sulpho-*, and Eng. *phenylic*.] Derived from or containing sulphuric acid and phenyl.

sulphophenyl chloride, s.

Chem.: $O_6H_5(SO_2)Cl$. Produced by adding to sodic phenylsulphite small quantities of oxychloride of phosphorus until a syrup is formed, distilling the product, rectifying the distillate, and collecting the portion boiling at 25°. It is a colourless, strongly-refracting oil, having the odour of bitter-almond oil and a sp. gr. of 1.373 t 23°.

sul-pho-phlór-ám-ic, a. [Pref. *sulpho-*; Eng. *phloram(ine)*, and suff. *-ic*.] Derived from or containing sulphuric acid and phloramine.

sulphophloramic acid, s.

Chem.: Produced by treating phloramine with strong sulphuric acid, converting the compound into a barium salt and decomposing with sulphuric acid. It forms colourless needles, yielding a deep-violet colour with ferric chloride, even in very dilute solutions.

sul-pho-phlór-rét-ic, a. [Pref. *sulpho-*, and Eng. *phlorétic*.] Derived from or containing sulphuric and phloretic acids.

sulphophloretic acid, s.

Chem.: $C_9H_9SO_2$. Produced by the action of sulphuric anhydride on phloretic acid. It forms a very sour syrup, easily soluble in water and alcohol, and forming crystalline salts with baryta and lime.

sul-pho-súc-chár-ic, a. [Pref. *sulpho-*, and Eng. *saccharic*.] A synonym of sulphoglucic (q.v.).

sul-pho-sál-í-cýl-ic, a. [Pref. *sulpho-*, and Eng. *salicyllic*.] Derived from or containing sulphuric and salicylic acids.

sulphosalicylic acid, s.

Chem.: $C_7H_6O_3(SO_2)$. Produced by the action of sulphuric anhydride on perfectly dry salicylic acid. It crystallizes in long thin needles which dissolve in all proportions in alcohol, water, and ether, and melt at 120°. It is a strong permanent acid, dissolving zinc with evolution of hydrogen, and forms neutral and acid salts, nearly all of which are soluble in water, and produce a deep violet coloration with ferric salts.

sul-pho-sál-í-cýl-ól, s. [Pref. *sulpho-*, and Eng. *salicylol*.]

Chem.: C_7H_6OS . Thiosalicyl; a pulverulent substance produced by the action of sulphuric acid on hydro-salicylamide in alcoholic solution. It forms salts with the alkalis, and colours ferric salts violet-red.

sul-pho-sín-áp-ic, a. [Pref. *sulpho-*, and Eng. *sinapic*.] Derived from or containing sulphur and sinapic acid.

sulphosinapic acid, s.

Chem.: $C_5H_4CNSHS_2S$. Known only in combination with a base. Its salts are formed by the direct union of allylic sulphocyanate with a metallic sulphhydrate, as in the case of the potassium compound $(C_2H_5)CNSKHS$, which is obtained in large transparent rhombic crystals, readily decomposing on exposure to the air.

sul-pho-stán-náte, s. [Pref. *sulpho-*, and Eng. *stannate*.]

Chem. (Pl.): Tin sulphides.

sul-pho-súc-cín-ic, a. [Pref. *sulpho-*, and Eng. *succinic*.] Derived from or containing sulphuric anhydride and succinic acid.

sulphosuccinic acid, s.

Chem.: $C_2H_3 \begin{matrix} (COOH) \\ | \\ SO_2H \\ | \\ (COOH) \end{matrix}$. A tribasic acid produced by exposing succinic acid to the vapour of sulphuric anhydride for several hours. The acid thus obtained forms mammillated crystals very soluble in water, alcohol, and ether. It forms salts with the alkalis and metallic bases, some of which are crystallizable.

sul-pho-tól-u-ól-á-mide, s. [Pref. *sulpho-*, and Eng. *toluamidé*.]

Chem.: $C_7H_7SO_2 \cdot N$. Formed in the same way as sulphophenylamide, and obtained in needles or laminae.

sul-pho-vín-ic, a. [Pref. *sulpho-*; Eng. *vin(yl)*, and suff. *-ic*.] Derived from or containing sulphuric acid and vinous alcohol.

sulphovinic acid, s. [ETHYL SULPHURIC ACID.]

sul-phúr, s. [Lat. *sulphur, sulfur*; Sansc. *sulvari*; Dut. *sulfur*; Fr. *soufre*; Prov. *solfre, solpre*; Sp. *azufre*; Ital. *zolfo, zolfo*.]

1. *Chem.*: Symbol S. At. wt. = 32. A hexad non-metallic element, found native in many volcanic districts, and largely distributed through the mineral kingdom. It is purified by distillation in an iron still, the sulphur being received either in a brick chamber, when it is called flowers of sulphur, or condensed in the liquid state, and then cast into sticks. It occurs in several allotropic forms, namely, the octohedral, monoclinic, amorphous, and plastic varieties. It is a very brittle solid, of lemon-yellow colour, tasteless, almost inodorous, insoluble in water, but soluble in carbon disulphide, oil of turpentine, and benzol, and to a slight extent in hot alcohol, and has in the crystalline state a sp. gr. = 2.05. It melts at 114-120°, boils at 440°, evolving an orange-coloured vapour, and com-

bines directly with the great majority of the elements. In its chemical relations it resembles oxygen, and is interchangeable with it by double decomposition of their respective compounds. It is inflammable in air or oxygen, burning with a clear blue flame, being converted into sulphurous oxide, SO_2 .

¶ Various fruits, seeds, and bulbs, as radish, turnip, &c., derive their flavour from oils having sulphur in their composition.

2. *Engrav.*: A term applied to impressions taken by the goldsmiths of the sixteenth century from the engravings executed on plate, paxes, &c., and obtained by spreading a layer of melted sulphur on the face of the plate, producing a cast in relief of the lines engraved. They are extremely rare.

3. *Mín.*: A mineral occurring in nature in crystals belonging to the orthorhombic system, also massive. Hardness, 1.5 to 2.5; sp. gr. 2.072; lustre, resinous; streak, sulphur-yellow; brittle. Occurs in magnificent crystals in the Sicilian mines. It is abundant in parts of the United States, but not much worked, Sicily being the main source of commercial sulphur. Found in abundance in the regions of extinct and active volcanoes, and in hydrothermal districts.

4. *Pharm.*: Sublimed sulphur is given internally as a stimulant in chronic diseases of the skin, as impetigo and prurigo, also in chronic bronchitis, piles, and mercurial ptyalism, and to children as a mild laxative. Used externally it kills animal and vegetable parasites, as the acarus of itch, &c.

* ¶ *Stones of sulphur*; Thunderbolts.
"The gods throw stones of sulphur on me."
Shaksp.: *Cymbeline*, v. 1.

sulphur-acids, s. pl.
Chem.: The sulphides of the more electro-negative metals, arsenic, antimony, &c.

sulphur-bases, s. pl.
Chem.: The sulphides of the more electro-positive metals, potassium, barium, and copper.

sulphur-bottom whale, s.
Zool.: *Balenoptera sulforeus*, from the Pacific. Its specific and popular names are derived from its yellowish belly.

sulphur-colored, a. Pale lively yellow, with a mixture of white. (*Lindley*.)

sulphur-ore, s. A popular name for iron pyrites, from which is obtained a considerable portion of the sulphur of commerce.

sulphur-oxides, s. pl.
Chem.: Sulphur forms two oxides, viz., sulphurous anhydride, SO_2 , and sulphuric anhydride, SO_3 . SO_2 is produced by burning sulphur in air or oxygen. At common temperatures it is a gas, but under a pressure of three atmospheres it is converted into a liquid, and, by the aid of a freezing mixture, into semicrystalline flakes. The solid, SO_2 melts at -79°, and the liquid oxide boils at -10°. Its sp. gr. = 1.45, and it is irresorbable and incombustible. Sulphuric oxide is obtained by the oxidation of sulphurous anhydride, and crystallizes in beautiful white slender needles. In the liquid state it forms a liquid thinner than oil of vitriol. It boils at 55°, and has a sp. gr. of 1.97.

sulphur-rain, s. Pollen from the Pinaceae, Amentaceae, &c., which has been floating in the atmosphere, and is brought to the ground by rain.

sulphur-salts, s. pl.
Chem.: Compounds of sulphur acids and sulphur bases, e.g., sulpharsenate of potassium, $3K_2S \cdot AsS_5 = 2K_3AsS_4$.

sulphur-springs, s. pl.
Phys. Geog.: Hot springs in which sulphur is mixed with the water. They usually occur in volcanic districts of intermittent activity. Sulphur springs are numerous in the United States, particularly in New York and West Virginia.

sul-phý-rate, a. [Eng. *sulphur*; *-ate*.] Of or pertaining to sulphur; of the colour of sulphur; resembling sulphur.

"A pale sulphurate colour."—*More: Mystery of Godliness*, p. 123.

sul-phý-ráte, v. t. [SULPHURATE, a.] To impregnate or combine with sulphur; to subject to the action of sulphur.

bél, béy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing -elan, -tlan = shan. -tion, -sion = shün; -tion, -sion = zhün. -cions, -tious, -sious = shüs. -hle, -dle, &c. = bpl, dpl

sul-phu-rā-tion, *sūl-fu-rā-tion, s. [SULPHURATE, v.]

1. The act of dressing or anointing with sulphur.

"Charm. sulphurations, dippings in the sea, stittings all day on the ground."—*Bantley: On Free-Thinking*, p. 50.

2. The same as SULPHURINO (q.v.).

sul-phu-rā-tōr, s. [Eng. sulphurat(e); -or.]

An apparatus for impregnating with, or exposing to the action of sulphur; specific, an apparatus for fumigating or bleaching by means of the fumes of burning sulphur.

sul-phūr-ē-a, s. [SULPHUR.]

Chem.: CSN₂H₄. Sulpho-carbonyl diamide. Obtained by heating dry ammonio sulphocyanate slowly to 170°, keeping at that temperature for several hours, cooling to 100°, dissolving in an equal weight of water at 80°, filtering, and allowing the filtrate to crystallize. It forms small prisms, soluble in water and alcohol, insoluble in ether, and fuses at 149°.

***sul-phu-rē-ī-tŷ, s.** [Eng. sulphur; -city.]

The quality or state of being sulphureous. (*Ben Jonson: Alchemist*, ii. 1.)

sul-phūr-ē-ōis, a. [Lat. sulphureus, sulphureus.]

Consisting of sulphur; having the qualities of sulphur or brimstone; impregnated with sulphur; sulphurous.

"And dart destruction in sulphurous showers."—*Byron: Elegy on Newstead Abbey*.

***sul-phūr-ē-ōis-lŷ, adv.** [Eng. sulphureous; -ly.]

In a sulphurous manner.

"A town low in its situation, and sulphureously shaded by the high and barren mountain Cabobarrs, whose brazen front scorches this miserable place."—*Sir T. Herbert: Travels*, p. 35.

sul-phūr-ē-ōis-nēss, s. [Eng. sulphureous; -ness.]

The quality or state of being sulphurous.

sul-phū-rēt, s. [Eng. sulph(ur); -uret.] [SULPHIDE.]

sul-phū-rēt-ted, a. [Eng. sulphuret; -ed.]

Containing a sulphuret or sulphide.

sulphuretted-hydrogen, s. [HYDROGEN-SULPHIDE.]

sulphuretted-waters, s. pl.
Chem.: Hot or cold mineral waters holding in solution sulphides or free sulphuretted hydrogen. They are stimulant, diaphoretic, and alterative. The sulphuretted hydrogen imparts to them a nauseous odour like that of rotten eggs. The chief thermal sulphuretted waters of Europe are those of Aix-la-Chapelle, Baden, near Vienna, Aix-les-Bains, &c.; the chief cold ones are Harrogate and Bocklet. In the United States cold sulphur springs occur in several states. Of thermal springs the chief example is that of Santa Barbara, California.

sul-phūr-ic, a. [Eng. sulphur; -ic.]

Derived from or containing sulphur.

sulphuric-acid, s.

1. *Chem.*: SO₂H₂O. Oil of vitriol. Produced commercially by burning sulphur in atmospheric air, and passing the sulphurous oxide formed into a lead chamber along with the vapour of nitric acid. A reaction takes place between the two; the sulphurous oxide becomes oxidized into sulphuric oxide, the nitric compound being reduced to nitric oxide, which again becomes oxidized, and acts as a carrier of oxygen between the sulphurous and sulphuric oxides. On evaporation in leaden pans it reaches a sp. gr. of about 1.7, but on further concentration in a platinum retort it forms normal sulphuric acid having a sp. gr. 1.842. It is a heavy, oily, colourless, inodorous liquid, boils at 327°, and freezes at -35°. The addition of water to the strong acid in the proportion of 1 to 4 raises the temperature of the mixture from 0° to 100°. In many cases organic substances are broken up or destroyed by it, as in the case of sugar and allied substances.

2. *Min.*: [SULFATITE].

3. *Pharm.*: It is a very powerful caustic; when much diluted it acts as a refrigerant, tonic, and astringent.

sul-phū-rine, a. [Eng. sulphur; -ine.]

Pertaining to or resembling sulphur; sulphureous (q.v.).

sul-phūr-īng, s. [Eng. sulphur; -ing.]

1. *Bleaching*: A process of bleaching by exposure to the fumes of sulphur. It is adopted with straw-braid, straw hats, silks, woolsens, &c. Sulphurous acid is the bleaching agent, and may be applied by means of a watery solution.

2. *Calico-printing*: The process of exposing printed calicoes to sulphurous acid fumes. It is an incident in fixing of steam-colours.

sul-phū-rois, a. [Fr. sulphureux, from Lat. sulphureus, sulphureus.]

Consisting of, containing, or impregnated with sulphur; resembling sulphur; having the qualities of sulphur; sulphureous.

"Edinburgh and Leith into the air were blown With powders sulphurous smoke."—*Drayton: Poly-Olbion*, s. 23.

sulphurous-acid, s.

1. *Chem.*: SO(HO)₂. Produced by passing sulphurous oxide into water. The hydrated solid acid is formed by passing moist sulphurous oxide into a freezing mixture. Water at 15° dissolves forty-five times its volume of sulphurous oxide, forming the sulphurous acid of commerce. It then has a specific gravity of 1.04, is colourless, and has the smell of burning sulphur. It possesses bleaching properties.

2. *Pharm.*: It is not often given internally, except in the form of spray to remove the fetid sordes gathering in the mouth in malignant fevers. Externally it destroys vegetable life, and is of use in tinea, favus, and fetid sores.

sulphurous-chloride, s.

Chem.: SOCl₂. A compound derived from sulphurous acid by the substitution of chlorine for hydroxyl. It is a colourless, strongly-refracting liquid, and boils at 82°.

† **sulphurous-waters, s. pl.** [SULPHURETTED-WATERS.]

sul-phūr-wōrt, s. [Eng. sulphur and wort.]

So called, according to Gerard, because the roots have a yellow sap, which, when hard and dry, smells like sulphur.

Bot.: *Peucedanum officinale*.

sul-phūr-ŷ, *sul-phūr-ŷe, a. [Eng. sulphur; -y.]

Partaking of the nature or qualities of sulphur; sulphureous.

"Jove's... Ida covered all With sulphuric clouds."—*Chapman: Homer: Iliad* viii.

sul-phūr-ŷl, s. [Eng. sulphur; -yl.]

Chem.: SO₂. The radical of sulphuric acid and its derivatives.

sulph-ŷ-drate, s. [Eng. sulphhydr(ic); -ate.]

Chem.: A salt of sulphydric acid.

sulph-ŷ-dric, a. [Pref. sulph(h), and Eng. hydric.] (See compound.)

Containing sulphur and hydrogen.

sulphydric-acid, s. [HYDROGEN-SULPHIDE.]

Sul-pī-cian, Sūl-pī-tian (ti as sh), s. [See def.]

Church Hist. (Pl.): A congregation of secular priests, founded in 1645 by Jean Jacques Olier de Verneuil, parish priest of St. Sulpice, Paris. The members are specially devoted to training candidates for the priesthood. The congregation was suppressed by Napoleon in 1812, and re-established at the Restoration. Besides their seminaries in France, the Sulpicians have establishments at Montreal and Baltimore.

sul-tan, s. [Fr., from Arab. sultān = victorious, s ruler, a prince.]

The ordinary title of a Mohammedan sovereign, specif. applied to the Emperor of Turkey.

"The uplifted spear Of their great sultan waving to direct Their course."—*Milton: P. L.*, l. 348.

sultan-flower, s.

Bot.: Amberboa; a genus of Centaureæ. The Sweet or Purple Sultan-flower is *Amberboa moschata*, and the Yellow Sultan-flower *A. odorata*.

sul-tā-nā, s. [Ital. sultana, fem. of sultano = sultan.]

1. *Ordinary Language*:
1. The wife of a sultan; the empress of the Turks.

* 2. A mistress.
"While Charles dined with his three sultanas."—*Macaulay: Hist. Eng.*, ch. iv.

3. A kind of raisin.

II. *Ornith.*: *Porphyrio martinica*. It is an elegant bird, slender than a common fowl, with dark, metallic plumage, and a black and white tail.

The rule or dominion of a sultan; sultanship.

sul-tan-ēss, s. [Eng. sultan; -ess.]

The same as SULTANA, I. 1.

sul-tān-īc, a. [Eng. sultan; -ic.]

Of or pertaining to a sultan; imperial.

***sul-tan-īn, s.** [Arab.]

1. A former Turkish money of account, worth 120 aspers; also a small gold coin, worth ten shillings.
2. The Venetian gold sequin.

***sul-tan-ŷ, s.** [Eng. sultan; -ry.]

The dominion of a sultan.

"I affirm the same of the sultanry of the Mamelukes."—*Bacon: Holy War*.

sul-tan-shīp, s. [Eng. sultan; -ship.]

The office, position, or rank of a sultan.

***sul-tan-ŷ, s.** [Eng. sultan; -y.]

A sultanry (q.v.).

sul-trī-lŷ, adv. [Eng. sultry; -ly.]

Oppressively; so as to cause or suffer faintness.

"Earth turned in her sleep with pain Sultry aspired for proof."—*K. Browning: A Serenade at the Villa*.

sul-trī-nēss, s. [Eng. sultry; -ness.]

The quality or state of being sultry; close and moist heat.

"'Twas sweet of yore to see it play And chase the sultriness of day."—*Byron: The Giaour*.

sul-trŷ, *sul-tric, a. [Properly sultry, for swelter, from swelter, a frequent from Mid. Eng. swelten = to die, to faint, from A.S. sweltan = to die; cogn. with Icel. svelta = to die, to starve (pa. t. svalt, pl. sultu); Dan. sulte; Sw. svälta; Goth. swiltan.] [SWELTER.]

1. Very hot, burning, and oppressive.
"Beneath Batavia's sultry sky."—*Scott: Marmion*, lii. [Introd.]

2. Very hot, close, and moist; close with moist heat; heavy, sweltering.
"Squalls attended with rain and hot sultry weather."—*Cook: Second Voyage*, bk. i, ch. l.

sulz-ēr-īte (z as fz), s. [After Sulz, Wurtemberg, where found, or connect., and suffix (Min.).]

Min.: The same as STRONTIANITE (q.v.).

sūm, *somme, *summe, s. [O. Fr. somme; Fr. somme, from Lat. summa = the sum, chief part, amount, prop. fem. sing. of summus = highest, greatest for (supinus), superlative of superus = that which is above; super = above; Sp. suma; Ital. somma.]

1. The aggregate of two or more numbers, magnitudes, quantities, or particulars; the aggregate amount of any number of individual parts or particulars added together, as 7 is the sum of 3 and 4.

"You know how much the gross sum of denecose amounts to."—*Shakesp.: Love's Labour's Lost*, l. 2.

¶ In Algebra the term sum does not necessarily imply increase; for, if we aggregate several quantities, some of which are positive and some negative, it may happen that the sum is numerically less than any one of the parts; it may even be 0. This sum is therefore distinguished as the algebraic sum. [SUBTRACTION.]

2. Hence, the whole quantity or amount; the total.

sūm-mēr (1), *som-er, *som-mer, *sum-er, s. & a. [A.S. sumor, sumer; cogn. with Dut. zomer; Icel. sumar; Dan. sommer; Sw. sommar; O. H. Ger. sumar; Gar. sommer; cf. Sansc. samā = a year.]

A. As substantive:

1. That season of the year when the sun

shines most directly upon any region; the warmest season of the year. North of the equator, it is commonly taken to include the months of June, July, and August; though some substitute May, June, and July. The former view conforms better to fact, July, which by this arrangement is midsummer month, is the hottest in the year, for although the maximum of heat is obtained on June 21, the longest day, the amount received for many subsequent days is greater than that lost by radiation, and the temperature continues to increase. Summer is the appropriate season for the hay harvest and for the ripening of the earlier fruits. Astronomically considered summer begins, in the northern hemisphere, when the sun enters the sign of Cancer, about June 21, and continues till Sept. 23, during which time he passes through Cancer, Leo, and Virgo. In the southern hemisphere the opposite is the case, it being winter there when it is summer here, and vice versa. During the astronomical summer of the southern hemisphere the sun passes through Capricorn, Aquarius, and Pisces.

"Still as at night, Or summer's noon-tide air."—Milton: P. L., II. 809.

2. Used to express a whole year; a twelve-month.

"Five summers have I spent in further Greece."—Shaksp.: Comedy of Errors, I. 1.

B. As adj.: Pertaining or relating to summer; used in summer.

"He was sitting in a summer parlour."—Judges III. 20.

¶ (1) Indian summer: [INDIAN].

St. Luke's summer: Fine weather often occurring about St. Luke's day, Oct. 13.

(3) St. Martin's summer: A period of fine weather occurring after winter has set in, about St. Martin's day, Nov. 11; hence, figuratively, prosperity after misfortune.

"Expect St. Martin's summer, halcyon days."—Shaksp.: 1 Henry VI., I. 2.

¶ Summer is largely used in combination with other words, the meanings in most cases being obvious.

3. A packhorse, a baggage-horse; a horse employed to carry clothes, food, or other necessities on a journey.

"Leading his sumpsters with plate and treasure of sterling monie."
Johnes: Chronyclef (an. 1347).

B. As adj.: Applied to an animal employed to carry necessities, as of an army: as, a *sumpter horse*, a *sumpter mule*; or to its equipments: as, a *sumpter saddle*.

***sūmp-tion** (*psilent*), *s.* [Lat. *sumptio*, from *sumptus*, pa. par. of *sumo* = to take.]

1. *Ord. Lang.*: The act of taking.

"The sumpstion of the mysteries does all in a capable subject."
Taylor.

2. *Logic*: The major premissa of a syllogism. [SYLLOGISM, 1.]

sūmp-tū-a-rŷ, *a.* [Lat. *sumptuarius*, from *sumptus* = expense, prop. pa. par. of *sumo* = to take, to use, to spend; Fr. *sumptuaire*.] [SUMPTUOUS.] Pertaining or relating to expense or expenditure; regulating expense or expenditure.

"The repressing of waste and excess by sumptuary laws."
Bacon: Essays; Seditions & Troubles.

sumptuary-laws, *a. pl.* Laws enacted to restrain excess in dress, food, or any luxury. Such laws have been enacted in many countries at various times. None in the United States. Those of England have long been repealed.

"It is the biggest impertinence and presumption, therefore, in kings and ministers, to pretend to watch over the economy of private people, and to restrain their expense, either by sumptuary laws, or by prohibiting the importation of foreign luxuries."
Smith: Wealth of Nations, bk. II, ch. III.

***sūmp-tū-ōs-i-tŷ**, **sūmp-tū-ōs-i-tie**, *s.* [SUMPTUOUS.] Expensiveness, costliness, sumptuousness.

"All this sumptuousitie was punished."
P. Holland: Plinie, bk. xxxiii., ch. xi.

sūmp-tū-ōis, *a.* [Fr. *sumptueux*, from Lat. *sumptuosus*, from *sumptus* = expense, cost, prop. pa. par. of *sumo* = to take, to use, spend; *sub* = under, secretly, and *emo* = to buy.] Costly, expensive; hence, luxurious, splendid, magnificent.

"Keeping up a sumptuous establishment."
Macaulay: Hist. Eng., ch. III.

sūmp-tū-ōis-lŷ, *adv.* [Eng. *sumptuously*; -ly.] In a sumptuous manner; expensively, splendidly, magnificently.

"Beneath an abbey's roof
One evening sumptuously lodged."
Wordsworth: Excursion, ll.

sūmp-tū-ōis-nēss, *a.* [Eng. *sumptuous*; -ness.] The quality or state of being sumptuous; expensiveness, costliness, magnificence, splendour.

"I will not fall out with those that can reconcile sumptuousness and charity."
Boyle.

***sūmp-tūre**, *s.* [Lat. *sumptus* = expense.] Sumptuousness, magnificence.

"Her traine of servants, and collateral
Sumpture of houses."
Chapman: Homer; Hymn to Hermes.

sūn (1), **sonne**, **sunne**, *s.* [A.S. *sunne* (fem.); cogn. with Dut. *zon* (fem.); Icel. *sunna* (fem.); Ger. *sonne* (fem.); O. H. Ger. *sunna*; Goth. *sunna* (masc.); *sunno* (fem.); Icel. *sol*; Lat. *sol* = the sun; Sausc. *sūna* = sun, son.]

I. Ordinary Language:

1. *Literally*:

(1) In the same sense as II. 1.

(2) A luminary or orb which constitutes the centre of any system of worlds: as, The fixed stars are *sun*s in their respective systems.

(3) Popularly applied to the sunshine, or a place where the sun shines; a sunny place; as, To stand or sit in the *sun*.

2. *Figuratively*:

(1) Anything splendid or luminous; that which is the chief source of light, honour, prosperity, or the like.

"The sun of Rome is set."
Shakspeare: Julius Cæsar, v. 4.

(2) A revolution of the earth round the sun; a year.

II. Technically:

1. *Astron.*: The great central luminary which gives light and heat to our earth and the other planets of the solar system. In common language, the planets are said to revolve around the sun as a centre; more precisely, they move in elliptic orbits, the sun occupying nearly one focus of each ellipse, around the common centre of gravity of the solar system, which falls within the body of the sun, but not always at its centre. The mean distance of the sun from the earth was long alleged to be 95,000,000 miles, but there was error in the data on which the calculation was founded; now the distance is held to be either about 92,700,000 miles (*Bali*, in 1885), or 92,965,000 miles (*Norman Lockyer*, in 1866). Till lately, it was thought that the portion of the sun visible to the naked eye constituted the whole luminary; now it is believed that around that central sphere or spheroid, technically called the photosphere, there are three, if not four, concentric envelopes: the chromosphere, the inner corona, the upper atmosphere, and, perhaps, an outer corona. The axis of the sun is inclined about 7° to the elliptic. The passage of spots across the sun's disk proves that it rotates on that axis from west to east in 25 days 5 hours. From June 3 to Dec. 5 the north pole, and for the next six months the south pole, of the sun is gradually moving earthward.

The axis of the photosphere is 865,000 miles in length; its bulk is more than a million times that of the earth, but its density is only about a quarter that of the earth. With a specific gravity so low, the photosphere cannot be solid. It may, perhaps, be liquid at the centre, but the outer parts must be gaseous. It has not yet been found possible to produce artificially on the earth a heat so intense as that of the photosphere. The coolest part of its atmosphere must be outside, and the hypothesis that the sun might be an inhabited world, with a heated and luminous atmosphere, has been abandoned. Under the telescope, the surface of the photosphere seems covered with a network of polygonal and other figures. Among them are pores and domes: the former, which are dark markings, are the seat of downrushes of vapour; the latter, or brighter portions, probably consist of luminous clouds. Sometimes the domes are heaped together and arranged in different directions, constituting what are called faculae. These are often thousands of miles long, and may last for days, or even weeks. Spots also often appear upon the sun's disk. Faculae follow and do not precede spots. The chromosphere is a concentric envelope immediately external to the photosphere. It is of a magnificent scarlet colour, and from 5,000 to 10,000 miles thick. Some parts are billowy and others spike-like in appearance. It is a sea of hydrogen with some unknown element. Sometimes other vapours surge up in it, producing injections which again tend to develop into prominences. The latter are of two kinds, violent and quiet prominences. Some of the former are 40,000 miles high; they resemble trees or "fog-spouts," appearances like waterpouts, but occurring in fog. The most violent prominences are sometimes called

bell, **bey**; **pout**, **jowl**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gen**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. -**īng**.
-**clan**, -**tian** = **shan**. -**tion**, -**ston** = **shūn**; -**tion**, -**stion** = **zhūn**. -**clous**, -**tlous**, -**slous** = **shūs**. -**ble**, -**dle**, &c. = **bel**, **dpl**.

metallic prominences, and mount up at the rate of 250 miles a second. The sun spots, the faculae, and the metallic prominences are at a maximum at the same time. [SUN-SPOT.]

Immediately surrounding the chromosphere is the inner corona. Its outer part is about 100,000 miles from the surface of the photosphere. Like the chromosphere, it is seen only in eclipses. It is constituted by certain red flames, prominences, or protuberances, which pass through the chromosphere from the photosphere. The inner corona is composed mainly of hydrogen.

The next envelope is the outer atmosphere, from half a million to a million of miles high, with its outer margin constituting an irregular outline full of strange and varying forms.

The external envelope, the existence of which is yet uncertain, is the outer corona.

Kirchhoff considered that the following elements were present in the sun: sodium, iron, calcium, magnesium, nickel, barium, copper, and zinc. Angström and Thalen found sodium, iron, calcium, magnesium, and nickel, but failed to detect the rest. In their place they met with chromium, cobalt, hydrogen, manganese, and titanium. The intense heat not only vaporizes them, but drives them into forms spectroscopically different from any known to exist in the earth.

The sun's heat raises vapour from the earth, ultimately producing rain, supplying a necessary element for the growth of plants and the sustenance of animals. Stored up in coal, it supplies us with fuel and gives us steam as a creator of energy, while the sun's light similarly stored furnishes the gas which illumines houses and cities.

Though the sun may obtain as fuel a few meteors, it would expire if it had nothing else to burn. But the enormous radiation from its disc into space is partly, if not entirely, counteracted by fresh heat generated by the contraction of its volume. Hence, on the hypothesis now generally accepted, the sun was at one time an enormous mass of incandescent vapour, which, becoming more condensed as ages roll on [NEBULAR-HYPOTHESIS], is slowly diminishing in size, and will at length cease to give forth light and heat. Some authorities think this will not come to pass for ten millions of years, but Sir Wm. Thomson considers "that it would be rash to reckon on more than five to six million years of sunlight for the future."

2. Pyrotechny: A kind of firework. A strong paper case is filled with a composition which does not burn so fast as rocket-composition, driven solid. Numbers of these are attached, at short intervals, to wooden frames, usually circular. The suns emit a steady and brilliant stream of light, and are called stationary or revolving according to the nature of the frame on which they are fixed.

¶ (1) *To have the sun in one's eyes:* To be intoxicated.

"He furthermore took occasion to apologize for any negligence that might be perceptible in his dress, on the ground that last night he had had 'the sun very strong in his eyes'; by which expression he was understood to convey to his hearers, in the most delicate manner possible, the information that he had been extremely drunk."—*Dickens: Old Curiosity Shop*, ch. II.

(2) *Under the sun:* In the world; on earth.

"There is no new thing under the sun."—*Eccles. I. 4*

¶ Sun is very largely used in composition, the meanings of the compounds being in most instances sufficiently obvious: as, sun-lit, sun-scorched, &c.

sun-and-planet wheels, s. pl. An ingenious contrivance invented by Watt as a substitute for the crank in converting the reciprocating motion of the beam into a rotatory motion. The central gear (a) is called the sun-gear, and the outer one (b) the planet-gear. In the form shown in the illustration, the revolution of the planet-wheel rotates the sun-wheel, together with its shaft and the fly-wheel.

SUN-AND-PLANET WHEELS.

For this purpose the planet-wheel (b) is fast to the pitman (c), and its axis is caused to revolve around the wheel without the rotation of the planet-wheel on its own axis. [PLANET-WHEEL.]

sun-animalcule, s.

Zool.: Actinophrys sol. [ACTINOPHRYS.]

"It consists of a small bit of globular protoplasm, with spines radiating in every direction from its surface; and when seen in perfect condition for the first time under the microscope with proper illumination it seems to shoo like 'the sun in its brightness.' Hence the original observers gave it the name of the *Sun-animalcule*. Indeed, any old ordinary picture of the sun would do very well for Actinophrys, as conveying a general idea of its form."—*John Sadcock: Virgates from Invisible Life*, p. 104.

sun-bear, s.

Zool.: A popular name for two Bears:

1. *Ursus tibetanus*, from Nepal, Assam, Eastern Siberia, and China. It is about five feet long, of slender make, with close black fur. The chin is white, and there is a broad Y-shaped mark on the chest.

2. [MALAYAN-BEAR.]

* **sun-beat, * sun-boat, a.** Shone on fiercely by the sun.

"And wears fruitful Nilos to convey

His sun-beat waters by so long a way."

Drayton: Juvencel, x. 237.

sun-beetle, s.

Entom.: (See extract.)

"The metallic species of Amara and Pœcilus are termed *Sun-beetles*, from their habit of running about foot-paths during hot sunshiny weather."—*Hestwood: Class. of Insecta*, I. 85.

sun-bird, s.

1. *Anthrop.*: An unidentified bird, mentioned by Rochefort (*Iles Antilles*, bk. II., ch. viii.).

"When at midday the sunlight poured down upon the altar through the hole or shaft pierced for this purpose in the rocky vault of the cave, through which the *sun-birds*, the Tonatzilli, were let fly up seaward as messengers."—*Taylor: Fris. Cult.* (ed. 1875), II. 259.

2. *Ornith.*: A popular name for any of the Nectariniidæ (q.v.), divided by Capt. G. E. Seale (*Monograph of the Sun-birds*), into two sub-families, Nectarinidæ and Promeropidæ, the former containing the Sun-birds proper, and the latter the Long-tailed Sun-birds. They are found over the whole of Africa, ranging through Palestine to India, thence through the Indian and Malayan Islands to Northern Australia, where a single species inhabits Cape York peninsula and Northern Queensland. They are small birds, in nearly every case of brilliant and metallic plumage, with a striking external resemblance to Humming-birds, with which they are not infrequently confounded, but differing from them in the structure of the feet and tongue, the shape of the sternum, and other important characteristics. They feed chiefly on insects, small berries, and fruit, and sip the juices of flowers, and from this habit the name of the type-genus (*Nectarinia*) is derived. The majority of the Sun-birds build nests of an oval form, suspended from the branch of a tree at a considerable height from the ground, so as to be out of the reach of serpents and lizards.

sun-bittern, s.

Ornith.: *Eurypyga helias*, from the northern parts of South America. It is about sixteen inches long; body small and thin, neck long and slender, head like that of a heron, with a long, powerful beak compressed at the sides and slightly arched at the culmen; the plumage is minutely variegated with bars and spots of many colours. It is often made a pet by the Brazilians, who call it Pavaço (= Peacock), whence it is sometimes called the Peacock Heron.

sun-blink, s. A flash or glimpse of sunshine. (*Scotch.*)

sun-bonnet, s. A lady's bonnet having a shade as a protection against the sun.

* **sun-bow, s.** An iris formed by the refraction of light on the spray of cataracts or of any rising vapour.

"The circling sun-bow did appear

Its fall down the hoar precipice of spray."

Shelley: Witch of Atlas, xlii.

sun-bright, a. Bright as the sun; resembling the sun in brightness; bright with the sun; sunny.

"Upon the landscape of the sun-bright vale,

Seen, from the shady room in which we ate."

Wordsworth: Excursion, bk. viii.

sun-burn, v. l. To discolor or scorch by the sun; to tan, to freckle.

sun-burn, sun-burning, s.

1. *Ord. Lang.:* The discoloration produced on the skin by the rays of the sun.

"The heat of the sun may darken the colour of the skin which we call *sun-burning*."—*Boyle*.

2. *Veg. Pathol.:* [HELIOSIS.]

sun-burner, s. A large reflecting oil of burners placed beneath an opening in ceiling, for lighting and ventilating a building.

sun-chief, s.

Anthrop.: In solar hierarchies a chief ruler who was at the same time priest of Sun or the Sun-god, with whom he claimed relationship.

"Every morning the great Sun-Chief stood house-door facing the east, shooed and prostrated himself thrice, and smoked first towards the sun the towards the other three quarters."—*Taylor: Cult.* (ed. 1875), II. 238.

* **sun-clad, a.** Clothed in sunshine radiance.

"And woods were brightened, and soft gales Went forth to kiss the sun-clad vales

Longfellow: Sunrise on the Hills

sun-crack, s.

Geol. (Pk.): Cracks left upon rocks at times when they were being consolidated.

"The sun-cracks... divide the surface into of various sizes and shapes, and when, as is common, the superficial layer of mud is darkest, the stone, show themselves well in relief by exposing the lower stratum."—*Quar. Jour. Geol. Soc.*, xlii.

* **sun-dazzling, a.** Shining like sun; bright, brilliant.

"Your eyes sun-dazzling concavity will exit the clouds vapour of heart-tormenting melancholy."—*J. Taylor: Yorks.* (1830), p. 111.

sun-dew, s. [For reason of name extract. Prior and Britain & Holland d. it from A.S. and Fris. *sun* = ever, and *dew*.]

Botany:

1. The genus *Drosera* (q.v.), of which 100 species are known; often applied to *D. rotundifolia*, the Common Sun-dew, very remarkable insectivorous plant. Dary experiments seem to show that the insects captured and absorbed by the species sun-dew, with the nitrogenous matter that the soil in which they grow is too poor to furnish. He thus summarizes (*Insect. Plants*, p. 18) the manner in which these plants are nourished: "A plant of *Drosera*, with the edges of its leaves curled upwards, so as to form a temporary stomach, with the glands of the closely inflected tentacles pouring forth their acid secretion, which dissolves animal matter as wards to be absorbed, may be said to like an animal. But, differently from an animal, it drinks by means of its roots; and must drink largely, so as to retain many drops of viscid fluid round the glands, sometimes as many as 260, exposed during the whole to a glaring sun."

"The tentacles on one side are inflected over of meat placed on the disc, the glands are each rounded by large drops of extremely viscid secretions, glittering in the sun, have given rise to poet's poetical name of *sun-dew*."—*Darwin: Insectivorous Plants*, p. 4.

2. (*Pl.*): The Droseraceæ (q.v.). (*Lindl.*)

sun-dial, s. [DIAL.]

sun-dog, s.

Meteor.: A luminous spot sometimes visible a few degrees from the sun. It is believed to be formed by the intersection of two or more halos.

sun-dried, a. Dried in the sun.

sun-drops, s. pl.

Bot.: (*Ethiopia fruticosa* and *C. riparia*)

sun-fern, s.

Bot.: *Polypodium Phlegopteris*.

sun-festival, s.

Compar. Relig.: A festival in honour of Sun, or of the Sun-god (q.v.).

"The ancient rites of solar-worship are repeated in modern Christendom... in the continuance of the great sun-festivals countenanced by or imported into Christianity."—*Taylor: Prim. Cult.* (1875), II. 205, 207.

sun-fever, s.

Pathol.: A fever produced by the heat

LEAF OF SUN-DEW. With the tentacles on the disc inflected over a morsel placed on the disc.

fâte, fât, fâre, amidat, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pîne, pît, sûre, sîr, marine; gô, p-or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, quite, cûr, râle, fâll; trÿ, Sÿrian. æ, œ = é; ey = â; qu = kw

the tropical sun. It is a severe form of the common continued fevers of temperate climates.

sun-fish, s.

Ichthyology:

1. *Lampris luna*, called also Opah, and Kingfish (q.v.).
2. Any individual of the genera *Cetorhynchus*, *Bryttus*, and *Pomotis*, from the fresh waters of the United States. They are small fishes, about six inches long, and are not used for food.
3. Any individual of the genus *Orthogoriscus* (q.v.). The Common or Broad Sun-fish (*Orthogoriscus mola*), though a native of warmer seas, is often taken in the summer months in the Atlantic waters, and is usually captured when floating on the surface, as if basking in the sun. When laid hold of they are said to utter sounds like the grunting of a hog. The stomach has been known to contain corallines, barnacles, and seaweed, though usually nothing but mucus is found in it. Couch mentions

SUN-FISH.

that the flesh is good eating, and resembles crab in flavor, but it is never sent to market. The largest captured specimen on record measured about eight feet long, and rather more in depth from the dorsal to the ventral fins. The Oblong Sun-fish, called also Oblong Tetradon and Truncated Sun-fish, has the height of the body less than one-half its total length. A specimen taken at Plymouth in 1734 weighed 500 lbs., but it is not often met with of so large a size. It feeds on worms, crabs, and other marine animals, and does not float on the surface like the Common Sun-fish.

"The name *sun-fish* is variously regarded as derived from the form of the fish, and from its habit of floating at the surface of the water, in fine weather, as if to enjoy the sunshine."—*Chambers' Encyc.*, II. 213.

sun-gem, s.

Ornith. : A popular name for any individual of the genus *Heliactis*. They are among the most elegant of the Humming-birds, and have a brilliant metallic double crest and long graduated tail. There is but one species, *Heliactin cornuta*, from Brazil.

sun-glimpse, s. A glimpse of the sun; a momentary burst of sunshine.

"When lovers meet in adverse hour,
'Tis like a sun-glimpse through a shower."
Scott: Rokeby, IV. 17.

sun-god, s.

Comparative Religion:

1. The sun considered as one of the great deities, as representative of the greatest deity, or as the greatest deity

2. An embodiment, in whole or in part, of solar characteristics regarded as a deity; e.g., the Assyrian Bel, the Tyrian Baal, the Persian Mithras, the Egyptian Ra, and the Greek Phoebus.

"The modern student who shall undertake to discriminate among the *sun-gods* of European lands to separate the solar and non-solar elements of the Greek Apollo and Herakles, or the Slavonic Perun and Swatowit, has a task before him complicated with that all but hopeless difficulty which besets the study of myth the moment that the clue of direct comparison with nature falls away."—*Tylor: Prim. Cult.* (ed. 1873), II. 294.

sun-light, s.

1. [SUNLIGHT.]

2. The same as SUN-BURNER (q.v.)

sun-myth, s.

Anthrop. : A solar myth (q.v.).

"The author would now rather say more cautiously not that Quetzalcoatl is the Sun personified, but that his story contains episodes seemingly drawn from *sun-myth*."—*Tylor: Early Hist. Mankind* (ed. 1875), p. 153. (Note.)

Sun of Righteousness, s.

Script. : Christ, as the source of light, energy, and comfort to his disciples. (*Mt.* IV. 2.)

sun-opal, s. The same as FIRE-OPAL (q.v.).

sun-pain, s. [HEMICRANIA.]

sun-pan, s. A pan or tank in which clay was formerly left to lie until fit to use in making pottery.

sun-picture, s. A name applicable to all kinds of pictures produced by the action of light upon sensitized surfaces; a photograph, or heliograph.

sun-plane, s.

Cooper. : A tool like a jack-plane, but of a circular plan, used for levelling down the ends of the staves of a cask or barrel.

sun-rites, s. pl.

Compar. Relig. : Rites in honour of the sun or of the sun-god (q.v.).

"As for modern memory of the *sun-rites* of mid-winter, Europe recognizes Christmas as a primitive solar festival by bonfires, which our 'yule-log,' the 'Souche de Noël,' still keeps in mind; while the adaptation of ancient solar thought to Christian allegory is as plain as ever in the Christian service chant, 'Sol novus oritur.'"—*Tylor: Prim. Cult.* (ed. 1873), II. 293.

sun-rose, s.

Bot. : The genus *Heliathemum*; spec. *H. vulgare*.

sun-setting, s. Sunset.

sun-shade, s. Something used as a shade or protection against the rays of the sun; as—

- (1) A parasol or small umbrella.
- (2) An awning or canopy projecting over a shop-window, &c.
- (3) A small framework covered with silk, &c., in front of a lady's bonnet.

*** sun-smitten, a.** Smitten or lighted by the rays of the sun.

"*Sun-smitten* Alpa." *Tennyson: Daisy*, 62.

sun-spot, s.

Astron. (Pl.) : Certain dark spots seen by the aid of a telescope on the surface of the sun's photosphere. In a normal spot there is an exterior shade called the penumbra, an inner darker one called the umbra, and very often one deeper still in the centre called the nucleus. In some there are many umbrae for one penumbra. The dones seen on the surface of the penumbra are drawn into elongate shapes, hence the expression, "the thatch of the penumbra." The spots are believed to be cavities, down which hydrogen is rushing at the rate of thirty or forty miles a second. Large spots commence as little dots, often in groups, and grow very rapidly. They are of two kinds, one more violent than the other. The first may be 140,000 miles long, and are produced by the descent of solid particles into the internal heated region of the photosphere. The second are shallow depressions filled with the cooler vapours brought from the upper region of the solar atmosphere. Sometimes spots last for days, months, or weeks; sometimes they disappear on one part of the sun's disk and appear on another. They are rare at the sun's equator. Their appropriate regions are two zones, one between 10° and 30° north, the other between 10° and 30° south; they are rarely seen higher than 40°. The spots in different latitudes move at different rates, the average time they take to travel all round the luminary is about twenty-six days. The number of sun-spots varies greatly from time to time; but observations for the last three centuries show that a maximum of numbers and intensity recurs, on an average, every eleven years, and is attended by magnetic disturbances on the earth.

sun-spurge, s.

Bot. : *Euphorbia helioscopia*. It has an umbel of five principal branches, five-cleft and three-cleft, and is abundant in Britain on waste and cultivated ground, flowering from July to October. The acid milky juice is used to destroy warts.

sun-star, s.

Zool. : *Solaster pappos*, a star-fish inhabiting the British seas.

*** sun-stricken, a.** Stricken by the sun; affected with sun-stroke.

sun-temple, s. A temple dedicated to the sun or the sun-god (q.v.).

"The *sun-temple* (among the Natches) was a circular hut, some thirty feet across and dome-roofed; here in the midst was kept the everlasting fire, here prayer was offered thrice daily, and here were kept images and fetiches and the bones of dead chiefs."—*Tylor: Prim. Cult.* (ed. 1873), II. 288.

sun-worship, s.

Compar. Relig. : A form of Nature-worship,

widely, though by no means universally, diffused at the present day among races of low culture. The sun would naturally be chosen as a god by agricultural and pastoral peoples, whilst to races living by the chase the summer heat would not be so advantageous. D'Orbigny (*L'Homme Américain*, I. 242) suggests that the sun has been worshipped only by races living in temperate climates, where its heat is cheering and vivifying, and that this cultus is practically unknown within the tropics, where the solar heat is oppressive. If not entirely true, this theory contains considerable truth. Herodotus (I. 216, IV. 284), describes the Atlantes, who dwelt in the interior of Africa, as cursing the sun for afflicting them with his burning heat, and Sir Samuel Baker (*Albert Nyanza*, I. 144) says that in Central Africa "the sun is regarded as the common enemy." Traces of sun-worship appear in the earliest records of the human race. They are present in the old theology of Egypt: "Ra, who traverses the upper and lower regions of the universe in his boat, is the Sun himself in plain cosmic personality." (*Tylor*) Putting aside the later sun-gods of Greece and Rome, heroes were sacrificed on Mount Taygetos to that Helios to whom Socrates did not think it wrong to pray (*Plat., Sympos.* xxxvi.); and Cicero (*de Nat. Deor.*, III. 21) exclaims among the number of Suns set forth by Roman theologians. The worship of Mithra spread from the East into the Roman Empire, and that Vedic divinity was at last identified with the Sun. In the Old Testament there are solemn denunciations of sun-worship (*Dent.* IV. 19, XVII. 3; *Jer.* XLIII. 13; *Ezek.* VIII. 16-18); by the Israelites were surrounded by sun-worshippers, and it is clear from 2 Kings XXIII. 5, 19, that the rulers of Judah had adopted the cult. Modern Hinduism is full of sun-worship, and it exists as a distinct cultus among the Kol tribes, the Khonds, and the Tatars. It is still widely spread among the native races of Central America, and probably found its highest form of development in Peru, where the Sun was held to be at once the ancestor and founder of the dynasty of Incas, who reigned as his representative, and made sun-worship the great state-religion.

sun-worshipper, s. One who worships the sun or the sun-god (q.v.).

"In and near Armenia a sect of *sun-worshippers* have lasted on into modern times under the protection of Jacobite Christians."—*Tylor: Prim. Cult.* (ed. 1873), II. 293.

sun-worshipping, a. Adoring the sun or the sun-god (q.v.).

"The feelings with which the *sun-worshipping* Massages of Tartary must have sacrificed their horses to the deity who freed them from the miseries of winter."—*Tylor: Prim. Cult.* (ed. 1873), II. 293.

sun-year, s. A solar year.

sun (2), s. [SUNN.]

sun-plant, s. [SUNN.]

sun *sunne, v.t. [SUN (1), s.] To expose to the rays of the sun; to warm or dry in the sun; to insolate. (Generally reflexive.)

"What aim'st thou at delicious fare;
And then to sun thyself in open air."
Byron: Perithia.

sun'-beam, s. [A.S. *sunnebeám.*]

1. *Ord. Lang.* : A ray of the sun.

"From the sunny south to this part of the west,
Vanish'd in the sunbeams."
Shakep.: Cymbeline, IV. 2.

2. *Ornith.* : Any individual of the Humming-bird genus *Aglæactis*, with four species from Peru and Bolivia, extending from Ecuador into Colombia.

Sunday-closing, s. The principle or practice of prohibiting the sale of intoxicating liquors on Sundays, or of allowing it only during certain hours. The laws on this subject differ in the different states, Sunday closing being required in certain states, but not in others. The strictness of its enforcement greatly varies. Sunday closing is required in Wales, and to some extent in Ireland. Partial closing is enforced in England and Scotland.

Sunday-letter, s. The same as DOMINICAL-LETTER (q.v.).

Sunday-saint, s. One whose conduct during the week does not correspond with his professions on Sunday.

Sunday-school, s.

Church Hist.: A Sunday-school is defined by Schaff (*Cyclop. Rel. Knowl.*, iii, 2,261) as "an assembly of persons on the Lord's Day for the study of the Bible, moral and religious instruction, and the worship of the true God. It is a method of training the young and ignorant in the duties we owe to God and to our neighbour." Sunday-schools may be said to have passed through three distinct phases:

1. **Early Christian Catechetical Schools,** for the preparation of converts for church-membership, and the instruction of the young and ignorant in the knowledge of God and of Salvation. The scholars committed passages of Scripture to memory, and their books comprised parts of the Bible in verse, Jewish antiquities, sacred poems, and dialogues. Schaff remarks that "it might be an interesting problem for a modern scholar to define important features of the present system not to be found in the early Bible Schools."

2. **Schools of the Reformation Period:** Luther founded schools for catechetical instruction in 1529, and this custom spread wherever the Reformation gained a foothold. In the Roman Church St. Charles Borromeo, Archbishop of Milan, about 1560, introduced into his diocese a system of schools, which continues to the present day; and in 1699 the Venerable de La Salle opened a Sunday-school (*école dominicale*) at St. Sulpice. Sunday-schools were opened in Scotland about 1560 by Knox; at Bath, in 1650, by Joseph Alleine; in Roxbury, Mass., in 1674, and at many other places in Great Britain and America between that date and 1778.

3. **Modern Sunday Schools:** These date from 1780 or 1781, when Robert Raikes, a printer of Gloucester, began to collect a few children from the streets of that city on Sundays, and paid teachers to instruct them in religious knowledge. The improvement in the conduct and morals of the children was so marked that, when Raikes published an account of his success, his example was followed in several other places, and in 1785 a society was formed for the establishment and maintenance of Sunday-schools in all parts of the kingdom, a large sum being expended in the payment of teachers. In 1803 the Sunday School Union was formed, to secure continuous instruction by unpaid teachers, and to publish books and tracts for the benefit of the cause. The first Sunday-schools united secular with religious instruction, as did those of Borromeo and La Salle; but the spread of elementary education has to a large extent removed the necessity of teaching reading and writing on Sundays. The Society of Friends have, however, retained the practice in their large Sunday-morning schools, with great benefit as regards influence over the working

classes above the age of childhood, and in some of the Wesleyan Sunday-schools, classes for elementary instruction are held. In the United States efforts at Sunday-school instruction were made before the systematic action of Raikes. The example of Raikes was soon followed. Bishop Asbury, of the Methodist Episcopal Church, is said to have established a Sunday-school in Hanover County, Virginia, in 1786, and in 1790 the Methodist Conference resolved to establish Sunday-schools for both white and black children. A Sunday-school Union was formed in Philadelphia in 1791; one in New York in 1818; and the American Sunday-school Union was founded in 1824. Within sixty years it organized more than 74,000 schools, with 466,000 teachers and over 3,000,000 scholars. There are also separate church organizations, and the United States stands first in regard to the excellence of buildings for Sunday-school purposes, and the earnestness and vigor with which the work is pushed. The Chaotanza Summer School sprang from a Sunday-school convention. In 1890 the Sunday-schools of the United States had 8,649,131 scholars; those of the remainder of the world about 9,400,000 scholars.

sūna, adv. [SOON.] (*Scotch.*)

sūn'-flōw-ēr, s. [Eng. *sun*, and *flower*. The name is popularly accounted for by the assertion, which has no foundation in fact, that these flowers turn so as to follow the sun in its course. It probably has reference to the re-

semblance of the flower to the disk of the sun surrounded by rays.]

Botany:

1. *Helianthus annuus*, an annual, herbaceous, composite plant, six to twenty feet high. The leaves, which are rough, are subcordate, crenulate, or dentate, the heads of flowers one to two feet in diameter, the florets yellow. It is a native of Mexico and Peru, but is common in the United States and Europe. It flowers in July and August, but is of less height and has smaller flowers than in its native country. Its seeds yield a useful oil, sometimes used for the table; they are also eaten with avidity by cows, horses, and poultry. The liber furnishes a good fibre; the pith is used in Russia for maza. The quantity of nitre in the stalk makes it good fuel when dry. Since the æsthetic movement, which began about 1875, the sunflower has been much used in decoration.

2. *Helianthemum vulgare*.

"Bowed her spread board the golden sunflowers shine."
D. G. Rossetti: Wine of Circé.

2. The region or quarter where the sun sets; the west.

***II. Fig.:** The close or decline.

*"Tis the sunset of life gives me mystical lore." Campbell: *Lochiel's Warning*.*

sunset-glow, s.

Physics: An abnormally brilliant colouring of the sky at sunset, followed by an after-glow or re-illumination, observed at many places about and after the period of the Krakatoa eruption (Aug. 26, 1883). The hypothesis that the sunset-glows were caused by the eruption was long a matter of controversy,

but is now generally accepted by scientists as the only satisfactory explanation of the phenomenon, and as sustained by numerous supporting facts, among them the fact that similar appearances had previously followed similar volcanic outbreaks. This remarkable glow was visible at intervals for six or eight years after the eruption, with gradually decreasing brilliancy, and finally disappeared.

sunset-shell, s. [PSAMMOBIA.]

sūn-shine, s. & a. [Eng. sun (1), s., and shine (q.v).]

"Thus Aristotle acted his own instructions; and his obsequious sectators have supererogated in observance."—Glanville: Vanity of Dogmatizing, ch. xvii.

*sū-pēr-ēr-ō-gā-tion, s. [SUPEREROGATE.] The act of one who supererogates; the performance of more than duty requires.

¶ (1) Doctrine of supererogation:

Church Hist.: The doctrine, founded on that of the communion of saints, that the merit of good works done by one Christian belongs to the whole body of the faithful. The principle was affirmed in the Institution of a Christian Man published by authority of Convocation (A.D. 1537):

"I believe that whatsoever spirital gift or treasure is given by God unto any one part or member of this mystical body of Christ, although the same be given particularly unto this member, and not unto another yet the fruit and merit thereof shall, by reason of that incomprehensible union and bond of charity which is between them, redound necessarily unto the profit, edifying, and increase in Christ's Body of all other members particularly."

The Council of Trent decreed nothing on the subject, but the language of the Tridentine Catechism (pt. i., ch. x., q. 23) is in accord with that quoted above. At the time of the Reformation the sale of indulgences had brought discredit on the doctrine of supererogation, or, "as it might more properly be called, the communion of saints in good works," and Article XIV. was directed against the popular belief. (Blunt.)

(2) Works of supererogation:

Church Hist.: A controversial phrase borrowed from Article XIV. of the Church of England, and there defined as "voluntary works, besides, over, and above God's Commandments." In this sense the expression is used chiefly of the Councils of perfection—Poverty, Chastity, and Obedience—which, according to Roman theologians, though not universally necessary to salvation, are yet necessary, and become absolute precepts, in the case of those called to such states of life.

*sū-pēr-ēr-ō-gā-tive, a. [Eng. supererogative; -ive.] The same as SUPEREROGATORY (q.v.).

"Another of an high-birth and low-stooping spirit, who can justly brag of nothing of his own, but live upon the supererogatory deeds of his ancestors."—Staf. Ford: Mice, pt. ii., p. 31.

*sū-pēr-ēr-ō-gā-tōr-ŷ, a. [Eng. supererogative; -ory.] Partaking of the nature of supererogation; performed beyond what duty strictly requires.

"Supererogatory services, and too great benefits from subjects to kings, are of dangerous consequence."—Howell.

*sū-pēr-ēs-sēn-tial (t as sh), a. [Pref. super-, and Eng. essential (q.v.).] Essential above others, or above the constitution of a thing.

"But the spirit of God was the vehicle of the eternal wisdom and of the superessential goodness."—More: Philos. Calista, ch. i.

*sū-pēr-ēth-ic-al, a. [Pref. super-, and Eng. ethical (q.v.).] Transcending the ordinary rules of ethics; more than ethical; of greater authority than ethics.

"Moral theology contains a superethic doctrine, as some grave divines have ridiculously called it."—Bolingbroke: Auth. in Matters of Religion, § 6.

*sū-pēr-ēx-ālt', v. t. [Pref. super-, and Eng. exalt (q.v.).] To exalt to a superior degree; to exalt to a position or rank above all others.

"Having superexalted him, and bestowed on him a name above all names."—Barrow: Sermons, vol. ii., ser. 31.

*sū-pēr-ēx-ālt-tā-tion, s. [Pref. super-, and Eng. exaltation (q.v.).] Elevation above all others; elevation in a superior or pre-eminent degree.

"In a superexaltation of courage, they seem as greedy of death as of victory."—Holiday.

*sū-pēr-ēx-cel-ŷence, s. [Pref. super-, and Eng. excellence (q.v.).] Superior excellence.

*sū-pēr-ēx-cel-lent, a. [Pref. super-, and Eng. excellent (q.v.).] Excellent in an unusual or extraordinary degree.

"Something so superexcellent, that all must reverence and adore."—Devils of Piety.

*sū-pēr-ēx-crēs-ŷence, s. [Pref. super-,

and Eng. excreescence (q.v.).] Something superfluously growing.

"I rubbed the superexcreescence with a vitriol stone."—Wiseman: Surgery, bk. iv., ch. v.

*sū-pēr-fē-cūn-dā-tion, s. [Pref. super-, and Eng. fecundation (q.v.).] The impregnation of a woman already pregnant; superfetation, supercoception.

*sū-pēr-fē-cūn-dif-tŷ, s. [Pref. super-, and Eng. fecundity (q.v.).] Superabundant fecundity or multiplication of the species.

"In strict connection with another property of animal nature, viz., superfecundity."—Paley: Natural Theology, ch. xxvi.

*sū-pēr-fē-tāte, v. i. [Lat. superfetatus, pa. par. of superfeto: super = above, after, and fetō = to breed.] To conceive after a prior conception.

"The female brings forth twice in one month, and so is said to superfete, which, saith Aristotle, is because her eggs are hatched in her one after another."—Crew: Museum.

*sū-pēr-fē-tā-tion, sū-pēr-fē-tā-tion, s. [SUPERFETATE.]

1. Lit. & Forensic Medicine: The conception of a second embryo during the gestation of the first; the products of the two conceptions being born together or at different times. Early authorities were strongly convinced that superfetation was not only possible, but common, and though in the present day opinion is divided on the subject, many cases are quoted of which it is claimed that no other explanation than superfetation is possible. Woodman & Tidy (Forensic Medicine, p. 819) suggest that many of these may be accounted for by the fact that the uterus is sometimes found to be double, and in others they doubt the accuracy of the recorded observations; adding: "There is a residuum of unexplained cases, and without pronouncing formally in favour of the doctrine of superfetation, we must admit that it is difficult to explain some of the recorded facts on any other supposition than that a second impregnation took place, while the uterus or womb contained one ovum or fetus partially developed."

"2. Fig.: An excrement growth.

"His lordship's false conceptions are always attended with superfetations."—Warburton: Alliance. (Postsc. to 4th ed.)

*sū-pēr-fēte, v. t. & i. [Lat. superfeto.] [SUPERFETATE.]

A. Trans.: To superfetate.

"It makes me pregnant and to superfeto: Such is the vigour of his beans and peas."—Howell: Royal Present to his Majesty (1641).

B. Intrans.: To conceive after a former conception.

*sū-pēr-fice, s. [Fr. superficie.] A surface; a superficies (q.v.).

"Then if it rise not to the former height Of surface, judge that soil is light."—Dryden: Virgil; Georgic II. 516.

*sū-pēr-fic-ial (c as sh), *su-per-fi-ci-āl, a. [Fr. superficial, from Lat. superficialis.]

1. Lit.: Pertaining to or lying on the superficies or surface; not penetrating below the surface; not sinking deep.

"From these phenomena several have concluded some general rupture in the superficial parts of the earth."—Burnet: Theory of the Earth.

2. Fig.: Reaching or comprehending only what is obvious or apparent; not deep, profound, or penetrating; not learned or thorough; shallow.

"His knowledge both of the Church which he quitted and of the Church he entered was of the most superficial kind."—Mansfield Hist. Eng., ch. vii.

superficial-deposits, s. pl.

Geol.: Deposits on or near the surface of the ground, and belonging to the recent period, as vegetable soil, gravel, clay, peat (q.v.), &c. [RECENT, II.]

superficial-fascia, s.

Anat.: The layer of loose tissue, of varying density, immediately below the skin in every part of the body. It contains the subcutaneous fat, and in some places superficial muscles. Called also the Subcutaneous fascia.

*sū-pēr-fic-ial-ist (c as sh), s. [Eng. superficial; -ist.] One who attends to anything superficially; one who has only a superficial knowledge in, or acquaintance with anything; a sciolist, a smatterer.

*sū-pēr-fic-ī-āl-i-tŷ (c as sh), *su-per-fi-ci-āl-y-te, s. [O. Fr. superficialité.]

1. The quality or state of being superficial; shallowness.

"The colours of bodies are sensibly qualified, and receive degrees of lustre or obscurity, superficiality or profundity."—Browne: Vulgar Errors, bk. vi., ch. I.

2. That which is superficial or shallow; a superficial person or thing.

*sū-pēr-fic-ial-ize (c as sh), v. t. [Eng. superficial; -ize.] To treat or regard in a superficial, slight, or shallow manner.

*sū-pēr-fic-ial-izŷ (c as sh), adv. [Eng. superficial; -izŷ.]

*1. In a superficial manner; on the surface only; as, a thing superficially coloured.

2. Without close attention; without penetration; without going deeply into matters; slightly; not thoroughly.

"It is no wonder if many considering their theology but slightly and superficially have been led into an error."—Cudworth: Intel. System, p. 256.

*sū-pēr-fic-ial-ness (c as sh), s. [Eng. superficial; -ness.]

1. The quality or state of being superficial; position on the surface; shallowness.

2. Shallowness of observation or knowledge; show without substance.

*sū-pēr-fic-ī-a-rŷ (c as sh), a. & s. [Lat. superficialis.]

A. As adjective:

*1. Ord. Lang.: Situated on the surface; superficial.

"The outermost and superficial parts of the body."—Verner: Treatise of Tobacco, p. 41.

2. Law: Situated on another man's land (Smith.)

B. As substantive:

Law: One to whom a right of surface is granted; one who pays the quit-rent of a house built on another man's ground.

*sū-pēr-fic-ī-ēs (c as sh), s. [Lat., from super = above, and ficiēs = a face. Superficiēs and surface are doublets.]

1. Ord. Lang. & Geom.: The surface; the area of a surface. It may be rectilinear, curvilinear, plane, convex, or concave. It consists of length and breadth without thickness, and therefore forms no part of the substance or solid contents of a body. The difference between this term and the term surface, is simply this. The term surface is abstract, and simply implies that magnitude which has length and breadth without thickness, whilst the term superficies does not refer to the nature of the magnitude, but simply refers to the number of units of surface which the given surface contains.

"The idea of filling a space equal to the contents of its superficies, being annexed to our idea of body, I think it is a self-evident proposition, that two bodies cannot be in the same place."—Locke: Hum. Understand., bk. iv., ch. viii.

2. Law: Everything on the surface of a piece of ground or of a building which is closely connected with it by art or nature, so as to constitute a part of the same, as houses, trees, and the like; particularly everything connected with another's ground, and especially a real right that is granted to a person (Burrill.)

*su-pēr-fine, a. [Pref. super-, and Eng. fine, a. (q.v.).]

1. Exceedingly or remarkably fine; very fine; surpassing others in fineness or quality; as, superfine cloth.

*2. Excessively or faultily nice or subtle; over nice, over subtle.

*sū-pēr-fine-ness, s. [Eng. superfine; -ness.] The quality or state of being superfine.

*sū-pēr-fin-ic-ial, a. [Pref. super-, and Eng. finical (q.v.).] Spruce or foppish in the highest degree.

"A superfine rogue."—Shakespeare: Lear, II. 2. (Quarto.)

*su-per-flue, a. [Fr. superflu; from Lat. superfluus.] Superfluous (q.v.).

*sū-pēr-flu-ence, s. [Lat. super = above, over, and fluens, pr. par. of fluo = to flow.] That which is superfluous; a superfluity.

"The superfluence of grace is ordinarily proportioned to the faithful discharge of former trusts, making use of the foregoing sufficient grace."—Hammond.

bōil, boy; pōit, jōwi; cat, çell, chorus, çhin, bench; go, gem; thin, çhis; sin, aç; expect, Xenophon, exist. ph = f -cian, -tlan = shan. -tion, -sion = shün; -çion, -çion = zhün. -cious, -tious, -sious = shüs. -bie, -dle, &c. = beļ, deļ.

*sū-pēr-flū-it-ēnce, s. [Eng. superfluitant(s); -ce.] The act or state of floating over or on the surface; that which floats on the surface.

"Out of the cream, or superfluance, the finest dishes are made; out of the residence, the corner."—Browne: *Vulgar Errors*, bk. ii., ch. v.

*sū-pēr-flū-it-ant, a. [Lat. superfluitans, pr. par. of superfluito: super = above, and fluit, intans. of fluo = to flow.] Floating above or on the surface.

*sū-pēr-flū-it-ē, *su-per-flu-it-ē, *super-flu-it-ē, s. [Fr. superfluité, from Lat. superfluitatem, accns. of superfluitas, from superfluitus = superfluous (q.v.); Sp. superfluidad; Ital. superfluità.]

1. The quality or state of being superfluous.

"Gross disease
Soone grows through humour's superfluitie,"
Spenser: *Ruines of Rome*.

2. A quantity that is superfluous or in excess; a quantity greater than is needed; superabundance, redundancy.

"The superfluous and waste of wit."—Dryden: *Evening's Love*. (Pref.)

3. Something more or beyond what is necessary; something used or kept for show or luxury rather than for comfort or necessity; something which could easily be dispensed with.

"Nor did any thing we offered them appear acceptable but heads, as an ornamental superfluity of life."—Cook: *First Voyage*, bk. i., ch. v.

¶ For the difference between superfluity and excess, see EXCESS.

*sū-pēr-flū-ōus, a. [Lat. superfluitus = overflowing, from super = above, over, and fluo = to flow; Fr. superflu; Sp. & Port. superfluo.]

4. Having more than is necessary; supplied with superfluities.

"The superfluous and lost-disted man,"
Shaksp.: *Lea*, IV. 1.

5. Unnecessarily concerned about something.

"I see no reason why thou shouldst be so superfluous to demand the time of the day."—Shaksp.: *1 Henry IV.*, I. 2.

superfluous interval, s.

Music: An interval greater by a semitone than major or perfect.

superfluous polygamy, s.

Bot.: The term applied when in a composite flower the florets of the disc are hermaphrodite and bear seeds, and the flowers of the ray, which are only female, do so likewise, so that the latter appear superfluous. Linnaeus ranked the plants thus constituted under *Polygamia superflua*, which he made an order of the class Syngenesia.

*sū-pēr-flū-ōus-ly, adv. [Eng. superfluous; -ly.] In a superfluous manner or degree; in or to a degree beyond what is necessary; with, to, or in excess.

"Doing nothing superfluously or in vain."—More: *Antidade against Atheism*, bk. ii., ch. ix.

*sū-pēr-flū-ōus-nēss, s. [Eng. superfluous; -ness.] The quality or state of being superfluous; superfluity.

*sū-pēr-flū-x, s. [Pref. super-, and Eng. flux (q.v.).] That which is superfluous, or is more than is wanted; a superfluity.

*sū-pēr-fō-li-ā-tion, s. [Pref. super-, and Eng. foliation (q.v.).] Excessive foliation.

"This, in the pathology of plants, may be the disease of superfoliation, mentioned by Theophrastus."—Browne: *Mucellian Tract* I.

*sū-pēr-frōn-tal, s. [Pref. super-, and Eng. frontal (q.v.).]

Eccles.: The part of an altar-cloth that covers the top, as distinguished from the antependium, or part which hangs down in front.

*sū-pēr-fūse', v.t. [Lat. superfusus, pa. par. of superfundo = to pour over or upon; super = over, and fundo = to pour.] To pour over or on the top of.

"Pouring first a very cold liquor into a glass, and then superfusing on it another."— Evelyn: *Diary*, Dec. 13, 1683.

*sū-pēr-hēat', v.t. [Pref. super-, and Eng. heat, v. (q.v.).] To heat to an extreme degree, or to a very high temperature; specifically, to heat, as steam, apart from contact with water until it resembles a perfect gas. [STEAM.]

*sū-pēr-hēat-ēd, pa. par. or a. [SUPERHEAT-]

superheated-steam, s.

Physics: Steam to which an additional amount of heat has been given to that required for its production from water. No advantage is gained by heating steam above 315° Fahr.

*sū-pēr-hēat-ēr, s. [Pref. super-, and Eng. heater (q.v.).]

Steam-engine: A contrivance for increasing the temperature of the steam to the amount it would lose on its way from the boiler until exhausted from the cylinder. This end is frequently attained by making the steam travel through a number of small tubes several times across the uptake or foot of the chimney before it enters the steam-pipe.

*sū-pēr-hēr-ō-sy, s. [Pref. super-, and Eng. heresy.] A heresy arising out of a former heresy; thus further corruption of erroneous teaching.
